These bills would restore to the Phillips Petroleum Co. its unregulated monopoly of basic supply and price of gas to our State or to any other future similar monopoly that might arise in the future. This, the Eau Claire Council believes, is certainly contrary to the public interest of the citizens of Eau Claire in particular and the people of Wisconsin in general.

It would be appreciated if you can do everything within your power to defeat this vicious legislation.

Sincerely yours,
DAVID D. ROWLANDS,
City Manager.

STOUGHTON, WIS., *January 12, 1956.*
Senator ALEXANDER WILEY,
Senate Post Office,
Washington, D. C.

DEAR SENATOR WILEY: On behalf of the city of Stoughton, Wis., and myself, I earnestly urge you to do all within your power and office to oppose the Harris-Fulbright bill

which is on the present United States Senate Calendar.

Very truly yours,

TRUMAN FELLAND,
Mayor.

SHEBOYGAN, WIS., *January 12, 1956.*

Hon. ALEXANDER WILEY,
United States Senator,
Senate Office Building,
Washington, D. C.

DEAR MR. WILEY: As mayor of the city of Sheboygan, I am joining the opposition to the United States Senate bill S. 1853, known as the Fulbright bill, at present on the Senate Calendar.

The effect of these bills will be to exempt producers of natural gas from regulation of prices they charge in contracts for the sale of gas to pipeline companies for transmission and resale in Wisconsin and other consumer States.

Our State, through our attorney general and public service commission, began the fight for Federal regulation of natural gas producer prices back in 1951 before the Federal Power Commission. We were finally successful in 1954 when the United States Supreme Court decided the case of the *State of Wisconsin* v. *the Phillips Petroleum Co.*, when the Court held that under the present Federal Natural Gas Act, producer prices for sale to pipeline companies for resale in interstate commerce are subject to regulation by the Federal Power Commission.

I, therefore, ask that you make every effort to oppose this bill when it comes up before the United States Senate this month.

Yours truly,

RUDOLPH J. PLOETZ,
Mayor.

WATERTOWN, WIS., *January 13, 1956.*

Hon. ALEXANDER WILEY,
United States Senate,
Washington, D. C.

DEAR SENATOR WILEY: We are unalterably opposed to the provisions of the Fulbright bill—S. 1853. To give the Phillips Petroleum Co. an unregulated monopoly of basic supply and price of gas to Wisconsin is, we believe, pugnacious to the interest and welfare of the people of our State.

On behalf of the people of our city who it is my privilege to serve, I respectfully urge your vigorous opposition to S. 1853.

Respectfully yours,

DEAN VAN NESS,
City Manager.

MIDDLETON, WIS., *January 13, 1956.*

Hon. ALEXANDER WILEY,
United States Senator,
State of Wisconsin,
Senate Office Building,
Washington, D. C.

DEAR SENATOR: As president of the Village of Middleton, I wish to go on record as opposing United States Senate bill S. 1853.

In agreement with our present State legislation which opposes the lifting of Government regulation on natural gas, I feel that passage of this bill would be contrary to the best interest of the citizens of Middleton.

I strongly urge you to assert your influence as well as your vote in opposition to this measure.

Respectfully yours,

V. J. SCHWENN,
President.

MENASHA, WIS., *January 13, 1956.*

Hon. ALEXANDER WILEY,
Senate Office Building,
Washington, D. C.

DEAR SENATOR: In behalf of your constituents and mine, I want to urge you most imperatively to oppose decontrol of natural gas prices, as per bill H. R. 6645.

It is very evident that support of this measure on the part of the Federal Government would have a serious adverse affect on the residents of Wisconsin cities and villages.

Writing in behalf of all our citizens, I urge you most earnestly to oppose this movement for Federal decontrol.

Very truly yours,

W. H. JENSEN,
Mayor.

MANITOWOC, WIS., *January 12, 1956.*

The Honorable ALEXANDER WILEY,
United States Senator,
Senate Office Building,
Washington, D. C.

DEAR SENATOR WILEY: The city of Manitowoc being served at the present time with natural gas from the Wisconsin-Michigan Pipe Line Co., are vitally interested in the Fulbright natural gas bill (S. 1853) which is before the Senate at the present time.

Having numerous consumers of natural gas in our community, we are very concerned about this bill. We feel, that with Government control of natural gas, they will be assured that no injustice will be done them, and also, that with Government control, it would stop any monopoly of the natural gas resources by the present private owners.

Senator, as mayor of the city of Manitowoc, I wish to state, that I am definitely opposed to the passage of this bill, therefore ask, that when this bill comes before the Senate for a vote, that you oppose it in its entirety.

Thank you for your consideration of the city of Manitowoc's interests.

Respectfully requested,

WALTER G. KOEPKE,
Mayor.

WEST ALLIS, WIS., *January 13, 1956.*

Re natural gas bill.

Hon. ALEXANDER WILEY,
United States Senator,
Washington, D. C.

HONORABLE SIR: The undersigned respectfully requests that in the interest of the citizens of Wisconsin you vigorously oppose the passage of the pending natural gas bill.

Respectfully yours,

LEROY P. FARNESS,
Alderman, Fourth Ward.

ANTIGO, WIS., *January 13, 1956.*

Senator JOHN WILEY,
Senate Office Building,
Washington, D. C.

DEAR SENATOR WILEY: At the League of Wisconsin Municipalities convention held in Madison last October 13, the following statement of policy was adopted:

"Natural gas control: Since an adequate supply of natural gas, reasonably priced to the consumer, is essential to the economic stability of the citizens and industries of Wisconsin, and since natural gas consumers would be left without adequate protection if there were no Federal control over the price of natural gas as sold at the wellhead, we urge the Congress of the United States to reject any legislative proposals which would leave the price of natural gas unregulated by Federal authority."

As mayor of the city of Antigo I urge you to oppose natural gas bill S. 1853.

Very truly yours,

ANTHONY E. KONTNEY, *Mayor.*

ST. FRANCIS, WIS., *January 13, 1956.*

Hon. ALEXANDER E. WILEY,
United States Senator,
Senate Office Building,
Washington, D. C.

DEAR SENATOR: As you know, much attention is being focused upon the natural gas bill (S. 1853) pending before your legislative body.

Without going into great detail as to the adverse effect it will have upon the citizens of our State, I urge and request that you make this a matter of great concern by vigorously opposing and voting against the passage of this bill.

Federal control is, without question, essential where the pricing of the natural resources of our country are involved.

Keep our sentinel Uncle Sam on guard for this much-needed price control.

Respectfully yours,

PAUL H. RAINER,
Mayor.

HUDSON, WIS., *January 14, 1956.*

Senator ALEXANDER WILEY,
Senate Office Building,
Washington, D. C.

DEAR SENATOR WILEY: I understand United States Senate bill S. 1853, known as the Fulbright bill, is now pending before the Senate.

Our city is a potential market for natural gas under present Federal control of prices, but if this bill is passed we feel that we can't afford to use it.

On behalf of the citizens of Hudson, I urge you to vote against this bill.

Very truly yours,

GEORGE MADSON,
Mayor.

OCONOMOWOC, WIS., *January 12, 1956.*

Senator ALEXANDER WILEY,
Senate Office Building,
Washington, D. C.

DEAR SENATOR WILEY: As mayor of Oconomowoc and on behalf of the citizens of our community I would like to call your attention to the Harris bill H. R. 6645, which was adopted by the United States House of Representatives last July by a vote of 209 to 203. We are opposed to the bill because we believe decontrol of natural gas prices would have a serious adverse effect on the citizens of our community.

Our city council has adopted a statement passing a resolution:

"Natural gas control: Since an adequate supply of natural gas, reasonably priced to the consumer, is essential to the economic stability of the citizens and industries of Oconomowoc and since natural gas consumers would be left without adequate protection if there were no Federal control over the price of natural gas as sold at the wellhead, we urge the Congress of the United States to reject any legislative proposals which would leave the price of natural gas unregulated by Federal authority."

We urge you to do everything in your power to oppose this bill.

Your consideration in this matter will be appreciated.

Sincerely yours,

FRANK J. DUMBECK,
Mayor.

KOHLER, WIS., *January 13, 1956.*

Hon. ALEXANDER WILEY,
Senator, State of Wisconsin,
Washington, D. C:

We kindly request your voting against measures to exempt independent natural gas producers from price regulation as set forth in the Harris-Fulbright proposals.

A. W. BORTZ,
Clerk.

GREEN BAY, WIS., *January 6, 1956.*

Hon. Senator ALEXANDER WILEY,
Senate Chamber,
Washington, D. C.:

Aa a member of the Wisconsin legislation which voted unanimously in the past session opposing any legislation that would exempt natural gas producers from Federal legislation under circumstances as now exists in Wisconsin and as mayor of the city of De Pere which is a large user of natural gas I

wish to express my opposition to the Fulbright bill S. 1853 and the Harris bill H. R. 6645.

E. A. SEYMOUR,
Mayor of the City De Pere.

BERLIN, WIS., *January 11, 1956.*
Hon. ALEXANDER WILEY,
Senate Office Building,
Washington, D. C.

DEAR SENATOR WILEY: The city council and I as mayor wish to convey to you our strong opposition to the passage of the Harris-Fulbright bills to exempt producers of natural gas from regulation by the Federal Power Commission. We shall appreciate your efforts in defeating this attempt to remove the protection we in our city now have against unregulated monopolistic exploitation.

Respectfully yours,
FRANK J. DOPKE,
Mayor.

FOND DU LAC, WIS., *January 11, 1956.*
Senator ALEXANDER WILEY,
Senate Office Building,
Washington, D. C.

MY DEAR SENATOR: On behalf of the natural gas consumers of the city of Fond du Lac, and indirectly the natural gas consumers of the State of Wisconsin, of which there are many I am asking that before taking any action on the Fulbright bill, S. 1853, you give careful consideration to the fact that this bill, together with the Harris bill, H. R. 6645, which was passed by the House of Representatives, cut the heart out of the Natural Gas Act by repealing the provisions requiring gas producers to charge a "just and reasonable" price, and the passage of these bills would permit the gas producers to charge anything they want to.

It has been called to my attention that in the event Fulbright bill, S. 1853, should be passed by the Senate, the consumers of natural gas will be forced to pay increases of up to at least $800 million more per year, or approximately $50 per year per consumer increase.

I am pleased to say that Mayor Edwin F. Weis and Commissioners John E. Murray and Ervin H. Summerfield concur in this expression of feeling about the subject and join with me in asking that you vote in opposition to the passage of the Fulbright bill.

Very truly yours,
FREDERICK K. FOSTER,
Corporation Counsel.

NEW LONDON, WIS., *January 12, 1956.*
Senator ALEXANDER WILEY,
Washington, D. C.

DEAR SENATOR WILEY: I am writing you in behalf of the citizens of New London to express our opposition to bill S. 1853, known as the Fulbright bill.

Yours very truly,
G. O. KRUEGER, *Mayor.*

OSHKOSH, WIS., *January 9, 1956.*
The Honorable ALEXANDER WILEY,
United States Senate,
Washington, D. C.

DEAR SENATOR WILEY: I understand the Fulbright gas bill will be up for consideration in the next week or so.

Our community up here is very much opposed to said bill and is requesting me to notify you of same.

* * * * *

Very respectfully,
ERNEST R. SIEWERT,
Mayor.

FOREIGN POLICY STATEMENTS BY SECRETARY DULLES

Mr. SMITH of New Jersey. Mr. President, yesterday I addressed the Senate briefly defending Secretary of State Dulles against certain criticisms, and I referred especially to the "brink of war" article in a recent issue of Life magazine.

In yesterday's New York Herald Tribune, January 16, there appears a column by Mr. David Lawrence, entitled "Dulles' 'Brink of War' View Called Warning to Russia." I ask unanimous consent that this statement by Mr. David Lawrence be published in the body of the RECORD.

The PRESIDING OFFICER. Is there objection to the request of the Senator from New Jersey?

Mr. DOUGLAS. Mr. President, will the Senator yield for a question?

Mr. SMITH of New Jersey. I am glad to yield.

Mr. DOUGLAS. I appreciate the way in which the Senator from New Jersey always comes to the defense of the Secretary of State. I should like to inquire if, in his opinion, the Secretary of State has ever done anything wrong.

Mr. SMITH of New Jersey. In reply, let me say, of course, that all of us are human beings. All of us are frail. He may have made some mistakes. However, at the moment I am glad to come to his defense.

The PRESIDING OFFICER. Is there objection to the request of the Senator from New Jersey?

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DULLES' "BRINK OF WAR" VIEW CALLED WARNING TO RUSSIA

(By David Lawrence)

WASHINGTON, January 15.—A warning to the world, and specifically to Soviet Russia, has just been proclaimed by the Secretary of State, John Foster Dulles. It is a warning that the United States, in order to defend itself and its Allies, can and will in case of an aggression resist—even using atomic weapons if necessary—and that peace-at-any-price is not the policy of the Eisenhower administration.

This is the true significance of the much-talked-about article in Life magazine giving the views of Mr. Dulles about the "brink of war." Instead of being a matter of "inept timing," as some foreign critics refer to it, or the "rewriting of history," as the petty partisans here suggest, the revelations constitute a timely and constructive contribution to the worldwide discussion of the best way to achieve and maintain peace.

The facts contained in the Life article are correct and the magazine is to be commended for its enterprise in bringing the subject matter to the attention of the world at this time. For, while there is in the article one brief quotation which might better have been revised for clarity reasons, the essential points are historically true and realistic.

AFFIRMED BY DULLES

The main thesis—that the United States has not been and is not bluffing and will go to war if challenged—is affirmed by Secretary Dulles, as well it should be. For there is no certain way to bring on war and to encourage the aggressors to take fatal chances than to let them believe America is bluffing when issuing warnings that there will be massive retaliation in the case of attack on a broad front or selective retaliation in the event local wars require it.

It is of transcendent importance that the Communists at Moscow and Peiping shall realize that the consultations at Geneva last summer and autumn did not mean an abandonment of America's firm policies and that's why the article in Life, with its evident authorization of some pertinent quotations, is so opportune.

This correspondent can say of his own knowledge, based on talks with high officials of France and the United States at Geneva in 1953, that the article does not rewrite history and that British critics are merely repeating now their version of what happened in the conferences in London at that time over policy in Indochina. This was then and still is at variance with the American version. It was a difference in method of approach rather than objective.

But what Mr. Dulles emphasizes is that, despite those differences of opinion, the world has since benefited by those very differences. It was possible, for example, for Sir Anthony Eden then Foreign Secretary, to say privately at Geneva in May 1953, to Chou En-lai, Foreign Secretary of the Red China Government, that while the British had not as yet agreed to go along with a common front in Indochina, he knew the United States meant business. It was made clear that if military intervention did come, Britain could not afford to remain aloof. This hitherto unpublished fact might well have been included in the Life article.

To put it another way the Dulles effort to get France and Britain to agree to united action if the Red Chinese armies openly intervened in Indochina, as they had in Korea, was being discussed then as either a bluff or the real thing and, to the credit of Mr. Eden it must be said, he reflected accurately in private talks with the Red Chinese the American views and that was the main reason Chou En-lai was impressed and a truce in Indochina resulted.

Now it so happens that the United States didn't agree to the partition of Indochina itself and denounced the terms of the settlement, in fact never has to this day subscribed to those terms. But the situation when Mr. Dulles interposed his plan in 1953 was not whether the terms of a truce would be acceptable or unacceptable in themselves but whether Red China would agree to any truce at all, and instead gobble up all of Indochina because she thought the French were too weak to resist and neither Britain nor the United States would intervene. It would have been easy for the armies of Red China to capture all of Indochina—as they were about to do when the Dulles warning saved the day.

DULLES' QUOTE SHORTENED

There is in the Life article one overcondensed quotation by Mr. Dulles, which was unfortunate. He is quoted as saying: "The ability to get to the verge without getting into the war is the necessary art. If you cannot master it, you inevitably get into war."

Now this is an ambiguous sentence and might well have been revised if there had been time. It could mean that there is artifice about diplomacy and going up to the edge is really a matter of intentional bluff. But the Secretary did not mean this at all. What he had in mind was covered in the sentence: "You have to take chances for peace, just as you must take chances for war."

Mr. Dulles is eternally right—that miscalculation by the aggressor is what brings on war. This error by the Kaiser in 1914 and by Hitler in 1939 caused a world war in each case. The Dulles concept, shared by President Eisenhower, is that bluffing leads to war and you have to show clearly you will fight in order to prevent the enemy from attacking. Appeasement never pays.

Why did Mr. Dulles authorize the article at this time? For 2 reasons, 1 the recent article in Harpers magazine by former Secretary of State Dean Acheson, which, in effect, accused the administration of bluffing, and the other was a desire to inform the world that the Democratic Party spokesmen have not been speaking for America in hinting that this country has adopted a policy of bluff.

Mr. Dulles is entitled to the right to reply to Mr. Acheson's unfounded attacks. That's why Mr. Dulles was receptive to the idea and that's why the article in its introduction says "Dulles' direction of United States foreign affairs is under attack these days as the presidential campaign gets underway" and that the new information made available to James Shepley, chief of the Washington bureau of Time-Life, who wrote it, bulwarks the substantial case to be made for Dulles.

WHERE IS UNITED STATES TRADE POLICY HEADED?

Mr. SMITH of New Jersey. Mr. President, recently there has come to my attention an address delivered by our Ambassador to France, Hon. C. Douglas Dillon, entitled "Where Is United States Trade Policy Headed?" This speech was originally delivered before the American Chamber of Commerce in Paris. On December 27 the New York Herald Tribune carried the full text of this speech.

Ambassador Dillon happens to be a very distinguished and prominent citizen of the State of New Jersey. From all reports he is doing a splendid job in France.

In his address Ambassador Dillon reviews in some detail America's trade policy, how it is working today, and how it should work in the future. I believe that this speech is a very important one and should be read by all Members of Congress. I, therefore, ask unanimous consent to insert it in the body of the RECORD at this point in my remarks.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

AMERICA'S TRADE POLICY: A DEFENSE OF THE RECORD

(By Douglas Dillon)

It is a great pleasure for me to be with you today and to have this opportunity of talking with you. I would like to use the next few minutes to try and put the consistently liberal trade policy of the United States in proper perspective.

When I speak of our liberal trade policy, I mean just that. I realize that public opinion abroad sometimes, perhaps usually, gets a different impression. We have all seen newspaper and magazine articles which, drawing on a few isolated cases—in particular, the watch and bicycle escape clause actions—have conjured up a picture of triumphant protectionism in the United States.

No matter what one's personal opinion about the controversial decisions in question, I feel very strongly that we Americans need not feel defensive about them. Rather we have a positive duty to put them in their proper long-term perspective. In such perspective, our record looks mighty good.

Let us look at this record, remembering that the reciprocal trade agreements program has been in effect for 20 years, under administrations of both political parties. In order to get a realistic picture of the United States position toward foreign trade today, we must look at two things: First, the absolute level of our import duties; and, second, the progress made in the past 20 years.

The average duty paid on all imports into the United States figures out at less than 6 percent. Such a rate clearly ranks the United States among the low-tariff countries in the world today.

Now for the progress made: By the end of 1954 the rates of duty as they existed 20 years earlier had been reduced by 75 percent on about 20 percent of our dutiable import trade and by more than 50 percent on over three-fourths of that trade. Since then we have made further reductions, in connection with the recent negotiations with Japan, which involve goods accounting for $89 million of our imports. And we have recently announced our willingness to make further substantial concessions on a list of nearly 1,000 items, representing about 40 percent of our dutiable imports at the negotiations which are to be held with 25 countries in Geneva next January.

Any graph shows its zigs and zags, but the trend of progress toward the liberal American commercial policy objectives is clear. Tariffs have been reduced on thousands of items over the past 20 years. On the other hand, the famous escape clause has been used only most sparingly. Only 60 commodities have even been the subject of a formal application for escape-clause action. Of these, the President decided to invoke the escape clause in only 6, I repeat, 6, instances to restore or partially restore previous reductions on certain isolated items where demonstrable damage had occurred to the American industry concerned. In each of these six cases we have followed the procedures of the GATT and have offered compensatory concessions to the foreign countries affected. Furthermore, we did not subject the imported goods concerned to quota limitations or other similar devices.

In spite of all we have heard and read about the use of the escape clause to restore our watch tariff, in the first half of 1955 Switzerland exported 4.4 million watches and watch movements to the United States, as compared with 4.3 million in the first half of 1954, before the tariff adjustment occurred. And I wonder how many of those who talk about our "backpedaling" in the bicycle case realize that even the recent partial restoration of the duty on lightweight bikes still leaves our duty below that of any western European country except Denmark.

I have noticed that every time a protectionist statement is made by an industry representative in a congressional or a Tariff Commission hearing it is fully reported in the press. This is quite proper, but it has resulted in building up a recurrent myth of a so-called wave of protectionism which conceals the true situation. This was particularly so in connection with our negotiations for mutual reduction of tariffs with Japan a few months ago. A great many of our domestic industries were affected by those concessions, and it is understandable that they insisted upon their day in court. The point to remember, though, is that the agreement was, in fact, signed and is now in effect.

By contrast, not only did many other GATT countries refrain from entering into tariff-reduction negotiations with Japan, but 14 of them also retained the right to discriminate against Japan by refusing her the benefit of the most-favored-nation clause, one of the most essential features of the GATT system.

The President's foreign economic program of March 30, 1954, which closely followed the general lines of the majority recommendations of the Randall Commission, is a bold program. From time to time we read that it has run into serious trouble in Congress or that it has been abandoned or put on the shelf. Again the facts are different. The box score covering the year and a half since those policies were announced shows an amazingly successful record for the administration.

I shall just mention a few of the achievements in implementing the President's trade program thus far. First and foremost is the enactment of the legislative keystone of the tariff-reduction program—the Trade Agreements Extension Act of 1955—which authorizes a further 15-percent reduction of United States tariff rates over the next 3 years and the reduction to a maximum rate of 50 percent of those few tariffs still above that level. Almost as important is the legislation on customs simplification. There have already been enacted the customs simplification acts of 1953 and 1954.

Meanwhile, by executive action, a further and important simplification of procedures has been the elimination, as of October 1, of the requirement for consular certification of invoices on imports. A large number of measures have been taken to stimulate increased expenditures by American tourists abroad and to make it possible for them to bring back with them increased quantities of foreign purchases for their personal use.

On the financial side, we have increased the lending authority of the Export-Import Bank by $500 million, we have provided for United States participation in the new International Finance Corporation, and our tax laws have been revised—and will undoubtedly be revised further—to stimulate productive private American investment abroad.

The principal item of unfinished business in the President's program is now the question of getting the congressional stamp of approval on our membership in the new Organization for Trade Cooperation.

In closing, however, I do want to raise a warning signal. If we are to continue our progress in the commercial policy field, we must be in a position to demonstrate to our Congres and to our people that our efforts to reduce trade barriers are being effectively matched by our trading partners. This, of course, means that in return for the further tariff concessions we intend to make in the conference opening in Geneva next January we expect to receive roughly commensurate concessions in rates of duty on our own exports.

Of even greater importance, it also means that such concessions must not be nullified, as has so often been the case in the past, by restrictive and discriminatory import controls, by special taxes, and by various froms of administrative protectionism, particularly where our partner countries are no longer in the critical balance of payments situation of the immediate postwar years. When it gave authority for a further 15-percent reduction in American tariffs over 3 years, our Congress inserted language into the act which makes its intension in this respect very clear.

We do not expect all discriminatory controls to be abolished overnight. But we do have a right to expect positive and substantial evidence of good faith in this respect. If that is not forthcoming, the loss will not be ours alone. If lack of recriprocity by other countries should cause the balance of power to swing in the direction of increased protectionism in the United States, if the present opportunity for further reduction of tariffs and other barriers to international trade should be missed, the responsibility will not be ours alone.

REPAYMENT CONTRACT WITH YUMA MESA IRRIGATION AND DRAINAGE DISTRICT, GILA PROJECT, ARIZONA

The PRESIDING OFFICER (Mr. MCNAMARA in the chair) laid before the Senate the amendment of the House of Representatives to the bill (S. 1689) entitled "An act to authorize the Secretary of the Interior to execute a repayment contract with the Yuma Mesa Irrigation and Drainage District, Gila project, Arizona, and for other purposes," which was, to strike out all after the enacting clause and insert:

That the Secretary of the Interior is authorized to execute a contract with the Yuma Mesa Irrigation and Drainage District,

Gila project, Arizona, on such terms and conditions as the Secretary deems appropriate, which shall provide, among other things, for repayment by the District to the United States over a period of not exceeding 60 years from the end of the development period for each irrigation block established by the Secretary for lands situate within said district of (1) an average of $200 per acre for lands in said district for which irrigation facilities have been constructed, to be allocated as determined to be appropriate by the Secretary among the 12,023⅘ acres of class 2 lands and the 7,946⅒ acres of class 3 lands in the district, as classified in the Bureau of Reclamation report titled "Land Classification Report, Unit One, Yuma Mesa Division, Gila Project, Arizona, May 1949", as amended, made pursuant to subsection (d) of section 4 of the act of December 5, 1924 (43 Stat. 702, 43 U. S. C. 462); (2) the unpaid operation and maintenance charges which accrued prior to June 30, 1954, totaling $297,167.45, as allocated by the Secretary to said lands situate within the district; and (3) the costs of the works authorized in section 2 hereof, not exceeding $1,350,000, and further providing for the release, on such terms and conditions as the Secretary finds appropriate, of the existing predevelopment contracts and mortgages held by the United States on the lands situate within the district which were predeveloped by the United States, and for the repayment to the United Sates by the lands benefited by said predevelopment of the amounts provided for in said mortgages in the same period within which the costs for the construction of the irrigation facilities are to be repaid.

SEC. 2. The Secretary is authorized on such terms and conditions as he deems appropriate to make drainage surveys and investigations of the lands within the district, to construct drainage facilities and works therefor, to install additional pump capacity in the Yuma Mesa Pump Plant of not to exceed 275 cubic feet per second, to construct such buildings determined by him to be appropriate in connection with the operation and maintenance of the lands situate within the district, and to provide in the contract referred to in section 1 hereof for the performance of such work.

SEC. 3. Expenditures by the United States in excess of the amounts to be repaid by the district as provided in section 1 hereof, which have been allocated by the Secretary (a) to acreage eliminated from the Gila project pursuant to the act of July 30, 1947 (61 Stat. 628), (b) to dust control on the Yuma Mesa Division, Gila project, (c) to that portion of predevelopment costs not heretofore covered by contracts and mortgages covering predevelopment charges on lands situate within the district, and (d) other costs allocated by the Secretary to the lands situate within the district not otherwise covered by the repayment obligation in section 1 hereof to be assumed by the district or not otherwise allocated by the Secretary to other contracting entities and which are not assumed or are not to be assumed by them, shall be nonreimbursable: *Provided*, That all revenues from the disposal of public lands within the district (which disposition is hereby authorized on terms and conditions satisfactory to the Secretary) or from special water service contracts other than those which the Secretary determines are allocable to operation and maintenance costs of the district shall be retained by the United States.

SEC. 4. The authority granted in section 1 of this act to execute said contract shall terminate on December 31, 1957.

SEC. 5. This act is declared to be a part of the Federal reclamation laws as they are defined in the Reclamation Project Act of 1939 (53 Stat. 1187).

Mr. JOHNSON of Texas. Mr. President, I may say, for the information of the Senate, that the distinguished Chairman of the Committee on Appropriations, the senior Senator from Arizona [Mr. HAYDEN], has discussed this matter with both the majority leader and the minority leader, and the request he is about to make has been cleared and is supported by both of us.

Mr. HAYDEN. Mr. President, I move that the Senate concur in the House amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Arizona.

The motion was agreed to.

APPORTIONMENT OF WATERS OF THE ARKANSAS RIVER AFFECTING THE STATES OF KANSAS AND OKLAHOMA—BILL INDEFINITELY POSTPONED

Mr. JOHNSON of Texas. Mr. President, the House of Representatives has passed and transmitted to the Senate the bill (H. R. 6256) granting the consent of Congress to the States of Kansas and Oklahoma to negotiate and enter into a compact relating to their interest in, and the apportionment of, the waters of the Arkansas River and its tributaries as they affect such States.

The provisions of this bill, I am informed, were included in Senate bill 730, of an identical title, which passed both Houses during the closing days of the first session and was approved by the President on August 11, 1955.

I therefore ask unanimous consent that the bill be postponed indefinitely.

The PRESIDING OFFICER. Without objection, it is so ordered.

PUBLIC POWER—ARTICLE BY WARREN UNNA

Mr. ALLOTT. Mr. President, an article entitled "A Partnership or a Power Giveaway," written by Warren Unna, and published in the Washington Post of last Sunday, in which the author proposes to discuss constructively the various merits of the great question of public power, occasions my remarks this morning, with particular reference to several points in that article.

Because of such statements, it is impossible for me to pass over the article without comment and correction, although I am positive in my own mind that the reporter intended to do and was doing a good job on the basis of the facts as they were presented to him. It is a very classic example of what is going on in many areas of our country today—of reporting being done by people who do not know what the facts are and who are not in a position to report them.

I have commented before on the floor of the Senate on the feeling of some Members of Congress who believe that anything they read in a newspaper or magazine article should be the basis for Government action.

The particular portion of the article which I wish to quote and to discuss is as follows:

8. Conditioning Rural Electrification Administration loans to new G. and T. (generating and transmission) cooperatives on their integration with neighboring private utilities—on the utilities' terms.

* * * * *

The Arkansas Valley cooperative in southeast Colorado testified that it first had to buy an almost completed generator from its neighboring private utility and agree to cede the generator back to the company once it was amortized.

The Colorado Ute cooperative said that REA granted a loan only after Colorado Ute agreed to lease-operate its plant to the neighboring private utility. A secret REA report subpenaed by the Chudoff subcommittee showed that this integration will cost Colorado Ute $108,000 more a year than if it were allowed to operate independently.

Mr. President, I cannot permit such misstatements to be quoted on the floor of the Senate without at the same time correcting them. It may be interesting to know the source of the words which this reporter, I am sure, in all good conscientiousness, quoted. The source of that article was the so-called Chudoff committee of the House of Representatives, which, as the Public Works and Resources Subcommittee of the Government Operations Committee of the House, has spent its time in various parts of the United States and ended up in the Virgin Islands last fall to complete its investigations.

The so-called Chudoff committee has a very peculiar atmosphere surrounding it. One of the counsel for that committee is a man by the name of Van Austin, from Colorado, who was formerly manager of the State REA in Colorado, and who resigned his position, or, at least, received a leave of absence from his position, to come to Washington to be counsel for the committee which is investigating the very organizations which he had represented for many years. That is the background of the statement.

The allegations contained in this article are not true, and the basis of my statement and my disputation of the facts lives in the circumstances that one Ray Moses, a former classmate of mine at the University of Colorado Law School, and a lifelong Democrat, if you will, and an honorable gentleman, did not tell the Chudoff committee about the matter. He did not tell the Chudoff committee that they were forced into a deal in order to get the loan. As a matter of fact, he told the Chudoff committee just the opposite; and in a private conversation with me, which I am sure he would be happy to repeat on the floor of the Senate were that possible, he told me that there was absolutely no evidence of any pressure of any kind brought to get what these people have described as a shotgun wedding. Yet the Chudoff committee makes such a statement to a reporter.

With respect to the Colorado, Yute proposition, the allegations given to the reporter are not true.

It is a matter of great regret to me that I have to report a major setback in my own State of Colorado, the reason for

it being that an effort was made to mix politics and electricity.

While some of the damage may yet be repaired, the story of what happened must be told so that farmers served by rural electric cooperatives in all States might avoid the troubles recently encountered by my constituents.

On the western slope of southwestern Colorado lies a land of rugged beauty and potential richness. It nurtures agriculture, petroleum, natural gas, coal, and other minerals. Strikes of uranium only a short time ago made this country known the world over. The processing of uranium makes the area a real frontier of industry.

In this area of some 25,000 square miles, four rural electric cooperatives provide power for the farms and ranches and the newly developed light industry. The present and potential expansion has brought about an acute shortage of power for everyone.

The solution was a logical one. The rural electric systems joined together in a generation and transmission cooperative and applied to their banker, the Rural Electrification Administration, for a loan of a little more than $10 million to construct the needed power facilities. They called their new federated cooperative the Colorado-Ute Electric Association.

To save on initial investment, to get low-cost power and to get an adequate supply of power, the association worked out an agreement with the Western Colorado Power Co. to integrate its proposed system and the power company's existing system. Use of the new and existing transmission lines would form a loop which would assure more reliability of service. The interconnection of the systems would mean that power would continue to flow if one or the other power producers was forced out of service. It was a sound, practical arrangement insuring a maximum of service for a minimum of investment. Everyone seemed satisfied that the power problem had been solved.

Everyone was satisfied, it seemed, except some ambitious politicians. They seized on this situation as an opportunity for personal publicity and partisan political advantage. Some fine people were misled. Still others were smeared.

The charge was made that REA forced the Colorado-Ute Electric Association to accept the loan on REA-dictated terms. A "shotgun wedding," they called it. At that time, the loan had already been approved and the integration contract with Western Colorado Power signed.

The desperate propaganda maneuver to discredit the power plan and REA backfired. Directors of the power cooperative made it clear by a 6-to-1 vote that they supported the contract as written. They repudiated the accusations made against REA.

But the seeds of conflict planted by the political publicity seekers were yet to bear fruit. Whispered stories and planted rumors created more confusion. Farmers who had worked together in rural electric systems for more than 15 years were taken in by the propaganda sneak attack. Minor issues which normally could be settled with nothing more than a discussion suddenly were projected into major problems. An atmosphere of discord and suspicion prevailed.

The December 19 issue of Electrical World had this news item:

COLORADO CO-OPS SPLIT OVER POWERPLANT SITE

Colorado-Ute Electric Association, a combination of four western Colorado rural electric cooperatives, has split in a disagreement over the site for a powerplant to be built with a $10 million loan approved by the Rural Electrification Administration.

Directors of the La Plata Electric Association at Durango and the Empire Electric Association at Cortez have voted to withdraw from Colorado-Ute if it goes ahead with an announced plan to build the plant at Nucla.

The Durango and Cortez co-ops also demanded the resignation of Frank Meaker, of Montrose, as head of Colorado-Ute. The Durango-Cortez directors attacked Meaker for his recent charge that Colorado-Ute had been forced into a "shotgun wedding" with Western Colorado Power Co., a private company which has contracted to operate the new plant for the co-ops.

The two associations ripped Meaker "for his shotgun-wedding charge, which we believe is entirely unfounded."

Meaker replied that he had no intention of resigning and pleaded for harmony among the four co-ops.

Mr. President, what are the results? Colorado farmers must wait for adequate and reliable power. Some politicians got headlines and the farmers and miners of western Colorado got gypped. It is an object lesson for rural electrification systems everywhere. When rural electrification is made the object of abuse for personal political advantage, the only one who gets hurt is the farmer.

CRITICISM OF JOHN FOSTER DULLES

Mr. HUMPHREY. Mr. President, on Thursday, January 12, I predicted on the floor of this great body that a storm of criticism would be aroused around the world by nightfall following the publication in Life magazine of the eulogy to the Secretary of State, Mr. John Foster Dulles. My prediction proved to be correct.

Vice President NIXON has characterized this storm of criticism of the Dulles article as a "tempest in a teapot." To paraphrase Sir Winston Churchill: "Some tempest, some teapot."

The Nation has now had a chance to read the article—as has Mr. Dulles, we are informed.

On Thursday editorials had begun to appear in newspapers and statements on the radio commenting on Mr. Dulles and his article.

Arthur Krock, of the New York Times, had read the article, and I ask unanimous consent to have the article by Arthur Krock printed at this point in the RECORD. It is entitled "One More Very Curious Official Incident."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ONE MORE VERY CURIOUS OFFICIAL INCIDENT

(By Arthur Krock)

WASHINGTON, January 12.—The article in the current issue of Life magazine in which Secretary of State Dulles is directly quoted as asserting that bold and timely warnings by this administration that it would use atomic weapons in the Far East had thrice forestalled war in that area "at the brink" bears all the familiar marks of high official cooperation and approval before publication. The leading detectors of these marks are the Washington reporters.

Therefore, they heard with what can politely be termed total incredulity the replies Secretary Dulles made yesterday to questions about the Life article. For these invited 1 of 2 extraordinary inferences. The first was that a reporter and the editors of a mass-circulation magazine were reckless enough to put out such an article without checking it for approval in an authoritative quarter (for instance, Dulles' assistant in charge of his press and public relations, Assistant Secretary McCardle). The alternative inference was that the functionary who did the checking, though the article quoted Dulles extensively and was replete with foreign policy revelations and claims certain to be politically provocative, made slight mention of it, if any, to the Secretary.

He said specifically, in answering questions about the article, that he had not read it, had not seen it, had no precise recollection of what he may have said to the author, and "would hardly say it was an exclusive interview" because he had talked to a great many reporters "in one way or another at one time or another."

If he had not seen the publication (which, presumably, means it had not come under his eye in the mimeograph copy that Life distributed widely in Washington, Monday, or in the current issue of the magazine), of course, he had not read it either when he met with the newsmen yesterday. Accepting those words as statements of technical fact did not, however, induce his audience also to accept the inference that the article had been published without authorized official imprimatur.

POSSIBLE ASSUMPTIONS

But the Secretary indicated such total unfamiliarity with the contents of an interview in which he was freely quoted as to leave for evaluation the second inference, that, though his public-relations aids knew the matter would certainly arise at the press conference, they took no steps to acquaint him with it. That is possible if it can be assumed that the Secretary was too busy recently to find time to be briefed on this particular subject, or simply declined to allow his aids to bring it up. But, considering his lively interest in what appears about him in print, considering the reaction this article was sure to evoke, and further considering the risk that would be taken by an aid who passed such an article without advising Dulles of its contents, both situations are difficult to conceive.

So Dulles' responses to yesterday's questions, even before he dismissed the subject on learning that the article was not to be released until hours after the press conference was held, enter the category of official mysteries. It is known that the material was submitted to appointed checking authority in the State Department before it was circulated by mimeograph or published in the magazine. It is on the record that the Secretary had not seen, and hence not read, the interview before he was asked about it. But how and why are facts that remain in the realm of the curious and the unknown.

Dulles was virtually alone in unfamiliarity with the publication by the time his news conference assembled yesterday, so far as the political, press, and diplomatic communities in Washington are concerned. The Capital buzzed with the public attribution to him that the President and he three times had averted war for the United States, (a) by

notice to the Communist powers that in certain aggressive circumstances we would attack Manchuria, and make aircraft carriers ready to bomb south China ports, and (b) through the Senate resolution drafted by Dulles that authorized the President to take any military course he thought necessary to defend Formosa. In two instances, the use of nuclear weapons was specifically mentioned in the warnings; in the third it significantly was not excluded.

These revelations—or clarifications of what the executive department previously had but barely indicated—had atomic effects of their own. Diplomats of European nations were shocked and alarmed that the threat of nuclear war they dread had been revived, and in this casual way. Democrats in Congress, noting that Dulles was loaded with praise in an article, full of his quotes, as the boy on the burning deck whence all but he and the President had fled, resented his hero portraiture and angrily classified it as a 1956 Republican campaign document. The shudders of the self-styled neutrals could be heard from New Delhi to Belgrade. And hard things were said about the timing, just before Eden's visit here, of an open complaint attributed to the Secretary, that the British had reneged on the United States at a critical time.

Mr. HUMPHREY. Mr. President, on Friday night, Mr. Eric Sevareid, of the Columbia Broadcasting System, revealed that he had read the article. I ask unanimous consent that his broadcast be printed in the RECORD at this point.

There being no objection, the broadcast was ordered to be printed in the RECORD, as follows:

Good evening, in my dictionary one definition of "diplomacy" is "tact, shrewdness and skill in conducting any affair." This week Life magazine carries an interview with our number one diplomatist, Secretary Dulles, crediting his tact, shrewdness and skill with saving America from not one, but three wars since 1953—in Korea, when Syngman Rhee suddenly released the Red prisoners, in Indochina in 1954, and in the Formosa Strait last winter, and with this ringing verdict on his accomplishments, Mr. Dulles agrees. He refrains from endorsing the magazine writer's own obiter dicta, which include equating Mr. Dulles as a personal diplomat with Franklin, Adams and Jefferson.

It is possible at least that history will record Mr. Dulles' policies in the three aforementioned crises as great acts of diplomacy, that is, of tact, shrewdness and skill; possible, though one-half the facts are not yet known, China's half. It will be virtually impossible however for history to record the granting and publication of this interview as an act of tact, shrewdness and skill. So far as we can note the record, nobody save Mr. Dulles has publicly endorsed the article's claims: a good many people, however, have publicly denounced them. These include: members of the Senate Foreign Relations Committee who say the Dulles versions do not jibe with the Dulles testimony before them; officials of neutral and allied nations who now gather that the principal American policy for war prevention is to brandish the atomic bomb; the British Government, which Mr. Dulles now accuses of switching signals midway in the Indochina crisis, and whose Prime Minister is about to arrive in Washington for critical negotiations with Mr. Dulles himself; in other words, the very persons with whom Mr. Dulles must practice tact, shrewdness and skill are either offended or alarmed or both.

The Chinese were stopped from reopening the Korean war when Rhee released the prisoners because, says Dulles, we let the Reds know we would hit Manchuria with atom bombs if they did. This assumes the Chinese desired to restart the worn-out 3-year-old war, in which they had lost a million or more men, over the issue of the 20,000 prisoners.

Mr. Dulles thinks Red China would have entered the Indochina war with her own troops, if they had not feared our bombs and united American, British and French resistance. Red China already had half the peninsula by use of puppet troops and further fighting was pretty clearly a political impossibility for any French government. We had failed once to strike in that war, but Mr. Dulles is sure the Reds were sure we'd strike next time; he now thinks that armistice was all right; as remembered around here, the United States washed its hands of the whole business and sat silent at the Geneva armistice meeting; one of the few times in America's history our influence has collapsed in an allied enterprise in which we were deeply involved.

Last year's threat to bomb China proper if she attacked the offshore islands and if that was a prelude to attacking Formosa may have deterred the Chinese Reds, though our threat had a "maybe" in it. But it may have been the pressure on China from other Asiatic countries, culminating in the Bandung Conference. In any case, judging by the present Chinese buildup in the region, the real answer may still be ahead of us.

Historians rarely get all the facts and factors of complex events; still, the best history is usually based on more than assumptions, themselves based on only 50 percent of the facts and factors.

This is Eric Sevareid in Washington.

Mr. HUMPHREY. Mr. President, by Friday night we were informed that Mr. Dulles had at last admitted that he had read the article. He had no apologies and no demurrers to make. In a statement issued that evening, I asked the President of the United States to read the article. I ask unanimous consent that my statement may be printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

PRESIDENT REQUESTED TO READ DULLES' STATEMENT

Senator HUBERT H. HUMPHREY, Democrat, of Minnesota, tonight called on President Eisenhower to read the article in the current issue in Life magaizne reporting an interview with Secretary of State Dulles, and to tell the American people if he agrees with the statements of his Secretary of State.

"The Secretary of State," Senator HUMPHREY commented, "today reaffirmed the substance of this article. Taken literally, the article in effect expounds a new basis for American foreign policy. Mr. Dulles' art of getting to the verge of war comes precariously close to rejecting the traditional American conviction that we must not strike the first blow, that we must never bear the awful responsibility for beginning atomic warfare.

"Mr. Dulles now admits that he has read the article, and has no changes or apologies. I now ask the President of the United States to read the article and to tell the American people if he agrees with his Secretary of State.

"In the Life article Mr. Dulles is said to have isolated a major factor in causing international catastrophe in the past—miscalculation. Miscalculation can apply to a major decision to employ atomic weapons. It applies equally to the callousness toward world opinion embodied in many of the statements in the Life article.

"America's prestige and leadership rest not only on guns and dollars, but on the public image we project to the world. Much harm can be done by the way things are said, the postures we strike, and the heedless things we do for domestic political consumption. Indiscreet articles like the Dulles' article sap the vitality of our alliances and dull the edge of our foreign policy.

"Is it too much to ask that henceforth we have an American Secretary of State, rather than a Republican one?"

Mr. HUMPHREY. Mr. President, by that time—Friday night—editorials had appeared in the influential Manchester Guardian, London Daily Herald, London Daily Mail, and London Daily Mirror, sharply and bitterly criticizing Mr. Dulles. I shall read excerpts from these newspapers at the conclusion of my remarks.

By Saturday the story of editorial criticism throughout the United States was beginning to hit its peak. I wish to give this distinguished body a little of the tone, a little of the nature of the criticisms. Among others, the New York Times, through its correspondent, James Reston, and the Washington Star, both newspapers notably non-Democratic, called Mr. Dulles severely to task.

The lead editorial in the Saturday morning edition of the Washington Post of January 14, 1956, was a brilliant piece of journalistic comment. I wish to read a few excerpts from this editorial, entitled "History, Dulles Style," before I ask that the entire editorial be printed in the RECORD. I read this very short paragraph from the Washington Post editorial:

Bragging seldom makes or holds friends. The panegyric to John Foster Dulles in the current issue of Life, written by James Shepley on the basis of consultation with the Secretary of State, is not distinguished for its understatements.

Skipping, I read further from the editorial:

For the effect is about as subtle as if this country had dropped a bomb on London. The article portrays Mr. Dulles as a reckless gambler, a sort of military-minded Hairbreadth Harry who specializes in narrow escapes.

Mr. President, I am quoting from the editorial; the junior Senator from Minnesota has not been that direct in his comment.

"The ability to get to the verge without getting into the war," it quotes him as saying, "is the necessary art." This is a little like saying that the closer you get to war the better you serve peace, or that Russian roulette is a good game by which to steel your nerves and impress your adversaries. It assumes that Mr. Dulles, by some undisclosed omniscience, was able to control all the factors that governed whether the world would have been plunged into nuclear war. Other nations will find the article highly offensive, and Communist propaganda will find it a windfall. Surely, if this is the theory on which American policy has been conducted, it would have been better left unsaid.

Mr. President, I ask unanimous consent that the editorial in its entirety be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

HISTORY, DULLES STYLE

Bragging seldom makes or holds friends. The panegyric to John Foster Dulles in the current issue of Life, written by James

Shepley on the basis of consultation with the Secretary of State, is not distinguished for its understatements. It relates in matter-of-fact fashion that Mr. Dulles "had probably devoted more thought to the subject of war and peace than any other man alive," and it evaluates Mr. Dulles' work as "the greatest display of personal diplomacy since the great days of the Franklin-Adams-Jefferson triumvirate." The basis for these encomiums is the thesis that Mr. Dulles has three times saved world peace by taking the United States to the brink of nuclear war. Quite apart from the subjective version of history it presents, the article is in incredibly bad taste.

For the effect is about as subtle as if this country had dropped a bomb on London. The article portrays Mr. Dulles as a reckless gambler, a sort of military-minded Hairbreadth Harry who specializes in narrow escapes. "The ability to get to the verge without getting into the war," it quotes him as saying, "is the necessary art." This is a little like saying that the closer you get to war the better you serve peace, or that Russian roulette is a good game by which to steel your nerves and impress your adversaries. It assumes that Mr. Dulles, by some undisclosed omniscience, was able to control all the factors that governed whether the world would have been plunged into nuclear war. Other nations will find the article highly offensive, and Communist propaganda will find it a windfall. Surely, if this is the theory on which American policy has been conducted, it would have been better left unsaid.

Mr. Dulles' belief that the threat to enlarge the Korean war is what finally brought the truce has long been familiar. There is no way to prove it or disprove it. It is reasonable to think that the Truman administration could have had a truce if it had been willing to accept stalemate and division. But it did not accept these terms; and Mr. Dulles and his colleagues are entitled to credit for bringing the Korean war to a conclusion.

The history of the Indochina war is considerably more confused. The Life article maintains that Mr. Dulles and the administration never contemplated merely an air strike to save Dien Bien Phu. This is at substantial variance with the version widely understood after the event, which was that the President was prepared to go to Congress for authority to intervene at Dien Bien Phu. Whether the British changed their minds or whether there was misunderstanding in the first instance is still in dispute. One story is that Admiral Radford's talk about atomic bombing in China is what caused the British to pull back.

Nor does the assertion that at the 1954 Geneva Conference on Indochina "Mendes-France and Eden found themselves able to bargain from Dulles' strength" square with the impression at the time. If Mr. Dulles was confident that the Geneva solution would turn out well all along—which is a little like his after-the-fact expression of confidence in the Bandung Conference, although he seemed at first to want to play it down—he managed to conceal his feelings to a remarkable degree. When Mr. Dulles packed his bags and came home from Geneva in the middle of the negotiations, he seemed to have concluded that the whole affair was an unmitigated disaster and to have washed his hands of it. Prime Minister Eden, who as British Foreign Secretary was credited generally with salvaging the best settlement obtainable on Indochina, doubtless will be glad to know that Mr. Dulles planned it that way. (It also will be instructive to Eden to know that the Dulles policies are what brought acceptance of the Paris treaties after the failure of EDC.)

Similarly, on the question of what to do if the Chinese Communists attacked in the fall of 1954, the article claims credit for Mr. Dulles' policy of deterrence. What actually deterred the Communists no one knows for sure; and certainly the revision of American policy respecting Formosa was a useful step. But what the article does not say, in extolling the Dulles policy and President Eisenhower's support of it, is that the President overruled the kind of response which Mr. Dulles had at first endorsed to counter an attack on Quemoy and Matsu.

No one with a knowledge of diplomacy will contend that it is not necessary sometimes to take large risks. This newspaper also believes firmly with Mr. Dulles that it is desirable to let a potential enemy know precisely where we stand. But there is a difference between undertaking risks as a necessity and regarding risk taking as a virtue in itself. There also is a difference between risks and threats that can be interpreted as bluffs. Moreover, if Mr. Dulles originated the doctrine of deterrence, as the article indicates, the Strategic Air Force must have been twiddling its thumbs between 1946 and 1953. What our allies will find especially annoying is the implication in the article's praise of massive retaliation and other Dulles policies that this country, through some superior wisdom, has a right to incur risks for them without consultation. Their apprehensions will not be lessened by the article's concluding reference to Mr. Dulles' recent call for a revival of the American crusading spirit and missionary zeal of the last century.

What purpose is served by this boastful exercise in slanted history and massive hindsight? If it was intended as a poltical document to encourage the Republicans and impress the Democrats, it is likely to have the opposite effect. Electioneering of this sort will not advance the cause of bipartisan foreign policy. If it was intended to deter the Russians, the dismay it will create among our allies and in neutral nations will give the Soviet Union an undreamed-of opportunity. Like the Duke of Wellington's soldiers, the article may not frighten the enemy, but it will certainly terrify our friends. Popularity at home and abroad are not necessarily the index of effective policies; but strong policies and imaginative execution are their own best advertisement and do not require shouting from the housetops. The current state of American foreign relations at least raises some doubt as to whether all Mr. Dulles' policies have been an unqualified success. Perhaps the worst effect of the article is that its total absence of modesty serves to cast discredit on the good things Mr. Dulles has done.

Mr. HUMPHREY. Mr. President, I ask unanimous consent that the editorial entitled "Brink of War," published in the Washington Evening Star of Saturday, January 14, 1956, be printed at this point in the RECORD. First, I shall read one paragraph:

Secretary of State John Foster Dulles is up to his ears in boiling hot water, and he has only himself to blame.

Mr. President, I digress to point out that that is exactly what the junior Senator from Minnesota felt as he read the article.

The rest of the editorial is clearly interesting reading.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

BRINK OF WAR

Secretary of State John Foster Dulles is up to his ears in boiling hot water, and he has only himself to blame.

Mr. Dulles' troubles stem from an exclusive interview which he gave to Life magazine. Why he did this is anyone's guess. Presumably, however, Mr. Dulles thought it would be nice to start off an election year with a friendly article in a friendly magazine. There is nothing inherently wrong with this. Mr. Dulles is not the first man in public life, nor will he be the last, to welcome a bit of publicity which he thinks will be helpful to himself and his party. What is wrong, or, rather, who is incomprehensible, is that Mr. Dulles, or whoever acted for him in the matter, should have failed to realize that this particular article, far from being helpful, was certain to be harmful. Both in tone and content, the interview is damaging to our relations with our allies and should be embarrassing to Mr. Dulles.

The article says that on three occasions Mr. Dulles, with the President's full support, walked up to the brink of war—war in Korea after the truce negotiations had started, in Indo-China and in Formosa. Then came this direct quotation of the Secretary of State:

"You have to take chances for peace just as you must take chances in war. Some say that we were brought to the verge of war. Of course we were brought to the verge of war. The ability to get to the verge without getting into the war is the necessary art. If you cannot master it, you inevitably get into war. If you try to run away from it, if you are scared to go to the brink, you are lost."

The impression that the world will get from this is a portrayal of Mr. Dulles, in his own words, as a master of the art of going to the verge of war without getting into war—as a man who has thrice marched to the brink of war and who, if need arises, will march again. There are other comments in the article which imply that the French and British have not mastered this art, and there is one which suggests that the British backed out of an agreement for joint action in the Indochina matter.

It may be that Mr. Dulles is right in thinking that his "deterrent" policy, a policy of putting the enemy on notice that force would be met with superior force, saved this country from three wars. It would be quite understandable if he had said these things in private conversation. But it is incredible that the Secretary of State would consent to the publication, with direct quotes, of such views and comments.

It is even more incredible that Mr. Dulles, having given the interview, did not know what form it was going to take for publication. Now that the fat is in the fire, Mr. Dulles has read the article and he says that the statements specifically attributed to him "do not require correction from the standpoint of their substance." But in a press conference Wednesady he said that he had not read the article up to that time and that he had no "precise recollection" of what he had said during the interview.

To paraphrase an old saying, this is a deplorable way to run a State Department. Mr. Dulles is in serious trouble of his own making. He has marched to the brink of a diplomatic fiasco, and he is going to need all of his skill in extrication to keep from toppling over.

Mr. HUMPHREY. Mr. President, I ask unanimous consent that an editorial entitled "Dulles Rewrites History," published in the New York World-Telegram and the Sun, a Scripps-Howard newspaper in New York City, be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

DULLES REWRITES HISTORY

Secretary of State Dulles' interview in Life magazine has provoked cries of "politics" from the Democrats and "foul" from

our friends abroad. Our enemies and the neutralists seem certain to claim the interview proves their accusations of atom-mongering.

The essence of the interview is this—

Three times in the last 3 years—in Korea, Indochina, and Formosa—the United States was on the verge of war. Three times war was averted, Mr. Dulles contends, by strong action by the Eisenhower administration—specifically by the threat of atomic war.

"We walked to the brink and we looked it in the face," Mr. Dulles was quoted. "We took strong action * * * the ability to get to the verge of war without getting into war is the necessary art."

One of the most controversial points of the interview will be Indochina where, according to Mr. Dulles, an "acceptable solution" was found and "the outcome was a major 'save' for the free world."

That version of the Indochina debacle contradicts everything said at the time by American leaders in public and private. It is also contrary to American newspaper reports from Geneva at the time of the Indochina conference.

The whole business was almost unanimously denounced as a sellout of the people of north Vietnam, more than half a million of whom fled their homes rather than be turned over to the Communists. The result was another divided country with the entire north of Vietnam added to Red real-estate holdings.

The jubilation of the Communists and the gloom of the non-Communists at Geneva in the summer of 1954 is enough to challenge Mr. Dulles' claim of victory. Only the Reds gave an end-of-conference party. Mr. Dulles himself refused to go back for the final sessions and sent a deputy only after urgent appeals by France. The United States refused to sign the final documents.

The Eisenhower administration's stewardship of foreign affairs includes much worthy of praise. But Mr. Dulles' interview, we fear, will tarnish that record by trying make something out of nothing—by rewriting diplomatic defeats into victories.

Everyone involved in the Indochina mess shares the blame. It was a terrible tragedy for the free world and a major victory for communism. It only enhances the Red victory to pretend otherwise now.

There never has been a full public accounting of what went on in those closing months of the war. American, British, and French versions disagree. Even the many American versions are at wide variance. And now Mr. Dulles adds fuel to the controversy—in an article which hails him as the greatest Secretary of State since Thomas Jefferson.

The American people contributed about $2 billion to the lost Indochina struggle. The necessity now is for publication of all the facts—good and bad—so the people can judge on the basis of unbiased testimony.

Mr. HUMPHREY. Mr. President, I ask unanimous consent that an article entitled "The Strange Case of John Foster Dulles," written by James Reston, and published in the New York Times of January 15, 1956, be printed at this point in the RECORD. The first paragraph is indicative of the body of the article, and reads:

Like every Secretary of State since the war, John Foster Dulles has pulled some lovely boners, but, unlike his predecessors, Mr. Dulles has added something new to the art of diplomatic blundering.

This is the planned mistake. He doesn't stumble into booby traps; he digs them to size, studies them carefully, and then jumps.

The whole article is interesting reading.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE STRANGE CASE OF JOHN FOSTER DULLES

(By James Reston)

WASHINGTON, January 14.—Like every Secretary of State since the war, John Foster Dulles has pulled some lovely boners, but, unlike his predecessors, Mr. Dulles has added something new to the art of diplomatic blundering.

This is the planned mistake. He doesn't stumble into booby traps: he digs them to size, studies them carefully, and then jumps.

The common diplomatic bloomer is usually the result of ignorance, haste, imprecision, bad temper, or having to choose between hard and difficult courses of action.

Mr. Dulles has not made this kind of mistake very often. He is well-informed. He is the hardest-working man in Washington. He is patient and precise in extemporaneous speech, and he has not yet got into trouble playing question and answer with the reporters.

His mistakes are of a different variety. They are usually avoidable. They are almost always obvious, and they are usually made in carefully prepared statements or speeches.

THE RECORD

He wrote into the President's first state of the Union message the passage construed as unleashing Chiang Kai-shek to invade the China mainland.

He liberated the Communist satellites first in the Republican Party's 1952 foreign affairs platform at the Chicago convention, which he drafted, and later in several other prepared speeches.

He announced that he was going to make an agonizing reappraisal of American foreign policy if France did not join the European Defense Community—this in a formal statement to the North Atlantic Treaty Council in Paris.

He put into a formal speech before the New York Council on Foreign Relations his threat of massive retaliation against the Communist world—a threat which required a 2,000-word clarification and has plagued him ever since.

He issued last month a formal statement describing Goa on the fringe of India as a province of Portugal—just at the time when he was planning a trip to India to patch up our ragged relations with Prime Minister Nehru.

And now this week he has been involved in another controversy because he claimed that he had three times carried the Nation to the brink of war and scared the Communists off 2 of the 3 times by threats of atomic retaliation.

The common denominator of all these things is that the Secretary of State was under no compulsion to say them and that, having decided to say them, he overstated the case.

He has since been forced to qualify the liberation statements to make clear that he meant peaceful liberation; to put Chiang Kai-shek back on the leash; to swallow France's rejection of the EDC without any agonizing reappraisal; and to make clear that there would be massive retaliation only in response to some momentous Communist move that threatened the security of the Nation.

He is still standing on his boast that he avoided war three times by threatening atomic retaliation against Manchuria and South China, though this capital is full of well-informed men who regard this as a combination of bad history, bad diplomacy, and bad manners.

A GOOD CASE MADE WORSE

He has made a lifelong study of the arts of diplomacy, and has turned Assistant Secretary of State Carl McCardle into a personal press agent—yet the effect of his latest flight into print has been to emphasize his weaknesses rather than to clarify his strength.

This is unfortunate for two reasons: It blurs Mr. Dulles' real achievements, and it diverts attention from the remarkably solid front that has been built up in both parties for the policy of collective security.

There are differences of opinion between the parties about how much emphasis to put on foreign economic aid, and whether to proceed with the chain of military agreements in the Middle East, but the area of agreement is far larger than the area of disagreement, and Mr. Dulles is entitled to a great deal of credit for this extremely important development.

In fact, one could almost say that the biggest foreign policy issue between Mr. Dulles and the Democrats today is Mr. Dulles himself. The Democrats have produced no clear alternative to his policies, even in the Middle East. Nor do they complain so much about what he does. But what he says drives them nuts, and gives the impression of great division where very little fundamental policy division exists.

This, of course, is the way things usually go in Washington. The really big story here is that the Republicans are offering a program and a budget that are so New Dealish and internationalist that Bob Taft, if he were here, would feel betrayed.

There is probably not another capital in the world today where the party in power has offered a program which meets with such widespread approval from one end of the political spectrum to the other.

Nevertheless, politicians must fight, and if they don't have big things to fight about, they will fight just as hard about small things.

Mr. HUMPHREY. Mr. President, I ask that an article entitled "Conflicts in History?—Dulles Stands Firm on Verge-of-War Facts," written by Chalmers M. Roberts, and published in the Washington Post and Times Herald of January 14, 1956, be printed at this point in the RECORD. Mr. Roberts makes the comment that Mr. Dulles' quotation offered a version of history far different from that dug out, piece by piece, over many months by various Washington newsmen.

The article is very interesting reading, and I commend it to the attention of my colleagues. It is a rather extensive, but historically interesting and, I trust, factual article.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CONFLICTS IN HISTORY?—DULLES STANDS FIRM ON VERGE-OF-WAR FACTS

(By Chalmers M. Roberts)

The Eisenhower administration has now at long last officially conceded that the United States was on three occasions on the verge of war—over Korea, Indochina, and Quemoy-Formosa.

But in making such a statement, something neither President Eisenhower nor Secretary of State John Foster Dulles has ever directly told the American public, Dulles, through the medium of a friendly magazine writer, offered a version of history far different from that dug out piece by piece, over many months, by various Washington newsmen.

Confirmation of the quotations attributed to Dulles in a Life magazine article came yesterday from State Department spokesman Lincoln White. He said Dulles had authorized him to say:

"The Secretary has now read the Life article. He feels that the statements specifically attributed to him do not require cor-

rection from the standpoint of their substance."

The article, entitled "How Dulles Averted War," has roused a storm in Britain—and partial denials—because of its criticism of British policies in the Indochina affair last year. It has brought criticism at home mainly because of a Dulles' statement that "the ability to get to the verge without getting into the war is the necessary art."

Dulles also said in the now-confirmed quotations:

"Of course, we were brought to the verge of war. * * * We've had to look it square in the face—on the question of enlarging the Korean war, on the question of Formosa. We walked to the brink and we looked it in the face. We took strong action. It took a lot more courage for the President than for me. His was the ultimate decision. * * * The President never flinched for a minute on any of these decisions. He came up taut."

Here is a rundown on the major facts as given in the Life article and as this reporter was able to find them in nearly 2 years of questioning dozens of persons here and in Europe connected with the events:

Korea, the Life story, written by James Shepley, chief of the Life-Time bureau here, says General Eisenhower as President-elect made the vital decision that if the Chinese Reds tried to continue a stalemate the United States would fight to win, including an air attack on Manchuria and the use of tactical atomic arms if hostilities were resumed.

Dulles, the story goes, on a visit to India told Prime Minister Jawaharlal Nehru that if the war continued "the United States would lift the self-imposed restrictions on its actions and hold back no effort or weapon to win." The earlier Eisenhower decision was reaffirmed later when South Korean President Syngman Rhee freed prisoners in defiance of the United Nations command. Dulles himself, incidentally, has frequently told the Nehru story in Washington with the added implication that he expected Nehru to pass his words on to Peiping.

A year and a half ago it was learned that the President had decided it was essential to win the Korean war and that he intended to attack Manchurian bases, using atomic bombs. A check of competent sources brought the report that the President, in exploring possible ways to carry out his campaign commitment to end the Korean war, had indeed ordered exploration of such a military move—as a possible alternative—but that he had never adopted such a policy.

PEIPING NOT TOLD

Nehru is known to have told a British correspondent that Dulles did tell him the United States might expand the war and might even use atomic bombs. Nehru told the correspondent he thought this was an obvious bluff and paid no attention to it and did not pass it on to Peiping; however, another check on the story in mid-1954 brought the report from New Delhi that Nehru did not recall any such Dulles statement and certainly told Peiping no such thing.

Indochina: The life account says that after several National Security Council meetings, Dulles concluded that an American aircraft carrier strike to save the beseiged fortress of Dien Bien Phu, as requested by the French, as requested by the French, was a poor way for the United States to get involved. Instead, on April 4, 1954, Dulles and Adm. Arthur W. Radford, chairman of the Joint Chiefs of Staff, presented the President with a proposal for action. America, Britain, and France were to oppose the Communists on the ground in Indochina and, if the Chinese Reds intervened, to destroy with United States airpower their South China staging bases. The President, the story says, concurred and American carriers with planes armed with atomic weapons steamed toward the area. But a Dulles plan for an allied meeting of nations which would jointly take up the battle in Indochina was frustrated because Britain had a change of heart.

But, the Life story goes on, since Dulles had seen to it that the Chinese and the Soviets knew that the United States was prepared to act decisively to prevent the fall of all of southeast Asia, the French and British at the Geneva Conference found themselves able to bargain from Dulles' strength and much of Indochina was saved by the truce.

As the story is pieced together, however, the President in March 1954, initiated an NSC decision that Indochina intervention should be undertaken by the United States if necessary to prevent its loss.

Such intervention was to be on the conditions that it (a) be allied action, (b) at French request, (c) have congressional approval and (d) that France grant Indochina's three states full independence. Congressional leaders, as revealed in detail in this newspaper on June 7, 1954, were sounded out on April 3 of that year on a joint resolution giving the President power to order intervention. Dulles was told to line up allies—and given no commitment even if he did.

BRICK WALL

Dulles ran into a brick wall in the form of Winston Churchill, then British Prime Minister. (Churchill told the President during his Washington visit that June that never will we allow a single British troop to go into Indochina. At this time Dulles was saying privately that the United States was ready under decent conditions to go into Indochina and fight.)

Anthony Eden, then British Foreign Secretary, met in Paris on April 24 with Dulles and Radford. Radford proposed not only the Dien Bien Phu air strike but also dropping atomic bombs on China. Radford earlier had told congressional leaders that he alone of the Joint Chiefs approved intervention. Army Chief of Staff Matthew Ridgway completely opposed the so-called immaculate war idea and argued that at least six American divisions of ground troops would be needed. Eden took the position that ground troops would be called for within 48 hours of an air strike. There is no doubt that Radford had alerted the Navy for action. One officer aboard a carrier was prepared to parachute into Dien Bien Phu to instruct the French garrison on how to protect itself once the atomic bombs began to fall around the fort.

But intervention collapsed the day before the Geneva Indochina Conference opened when the British Cabinet flatly refused to go along. Dulles covered up his intervention moves by confirming for an American newsman a French report that he had written Premier Georges Bidault that it was impossible because of American constitutional limitations and because no allied plan had been worked out.

Thus the Geneva Conference began with the Western allies in disagreement and in a publicly exposed state of weakness rather than, as Life would have it, with Britain and France bargaining from Dulles' strength. It should be added, however, that toward the end of the months-long conference the United States made some sort of offer, 2 Marine divisions one report had it, to the French if they would go on fighting. Nothing came of this if, in fact, that was the offer.

The conference outcome was taken in Washington as the best of a bad bargain or worse. The United States signed nothing. Now, however, the outcome is pictured as acceptable and due to Dulles planning.

Quemoy-Formosa: The Life account completely skips the September 1954 Quemoy-Formosa affair and says that war was avoided mainly by the resolution drafted by Dulles and passed by Congress in January 1955, authorizing the President to use force to protect Formosa and Quemoy-Matsu if he thought necessary. As was disclosed in this newspaper on November 8, 1954, 3 of the 4 Joint Chiefs—with Dulles initially concurring—approved a proposal in September 1954 that under certain conditions American planes should attack the Communist mainland in order to prevent a Red landing on Quemoy, then threatened. But President Eisenhower, at the now famous September 12 NSC meeting in Denver, refused to buy that proposal. Instead, he ordered a search for peace through the U. N.

When the Far East crisis recurred in January 1955, the Dulles-drafted resolution did pass Congress and, as Life says, the Chinese Reds were publicly put on notice that Eisenhower was ready and authorized to retaliate at once. But the public has never yet—even in the Life article—been told by the administration itself the story of the long route which led to that congressional action.

The United States has, indeed, been brought by the Eisenhower administration to the verge of war. Many diplomats agree that American war talk and war moves—or deterrence may have in fact deterred the Communists. Dulles without doubt has consistently advocated deterrence both publicly and privately. But whether everything that has happened in the last 3 years was planned that way is something else again.

Mr. HUMPHREY. Mr. President, I ask unanimous consent that an editorial entitled "Storm Around Mr. Dulles," published in the New York Times of January 14, 1946, be printed at this point in the RECORD. A sentence in the second paragraph reads as follows:

But by the specific manner in which this has been done he has not only brought upon himself both domestic and foreign charges of distortion of history; he has also provided new grist to the mills of both the Communists and the European appeasement elements, and thereby unwittingly impaired the very policy he seeks to support.

The final sentence of the editorial reads:

It would seem, therefore, that the presentation of the events and policies ascribed to Mr. Dulles require further and more official clarification.

The entire editorial, Mr. President, is interesting and provocative reading.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

STORM AROUND MR. DULLES

Secretary Dulles has to his credit so many creditable achievements, from the Japanese peace treaty to the completion of a world-encircling defense system of free nations, that it is regrettable to find him the center of an international storm aroused by some unwise remarks of his which are, to say the least, an extreme example of how not to conduct diplomacy. The remarks, which he acknowledges, are contained in a Life magazine article which, aside from the controversial facts involved, represents him as taking pride in practicing the art of leading the United States three times to the verge of war to deter Communist aggression without getting us into war.

In supplying material for such an article Mr. Dulles apparently intended, by citing the specific cases of Korea, Indochina, and Formosa, to emphasize the established American policy of "peace through strength" which excludes appeasement and seeks to prevent war by creating an approximate balance of power with effective retaliatory means to deter Communist aggression. But by the specific manner in which this has been done he has not only brought upon himself both domestic and foreign charges

of distortion of history; he has also provided new grist to the mills of both the Communists and the European appeasement elements, and thereby unwittingly impaired the very policy he seeks to support.

It is, of course, a fact that in resisting Communist aggression in the three cases mentioned the United States and other United Nations members did get into war in Korea, and France in Indochina, before Mr. Dulles became Secretary of State. It is likewise a fact that these free nations faced up to the risk of even bigger wars unless Communist aggression halted. There were ample official warnings of that risk at the time, not the least among them the Sixteen Nation Declaration that a breach of the Korean armistice would expand hostilities beyond the Korean frontiers, the congressional resolution for the defense of Formosa and Mr. Dulles' own warning against armed Communist Chinese intervention in Indochina. But it is one thing to proclaim a considered policy and quite another thing for the American Secretary of State to be cast in the role of an artist juggling with threats of war.

Such a representation is quite contrary to the general policy enunicated by President Eisenhower—namely, that while we must maintain a strong defense posture we must wage peace, not war, because in the atomic age there is no alternative to peace. It is also contrary to the President's specific declaration in reference to Indochina what while each situation involves its own degree of risk, each such situation must be met on its merits. It would seem, therefore, that the presentation of the events and policies ascribed to Mr. Dulles require further and more official clarification.

Mr. HUMPHREY. Mr. President, on Saturday morning I released a point-by-point discussion of the Life article. I asked President Eisenhower for a clarification of our national position on the Quemoy-Matsu situation, which is not, as Mr. Dulles is reported as saying, a closed case. I ask unanimous consent that my statement, released on the morning of January 14, 1956, going over the entire Life article by Mr. Dulles, be printed at this point in the RECORD.

I may say, with due modesty, that at least this is a factual statement, and I trust it will be interesting to those who will take the time to study its contents.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

SENATOR HUMPHREY CORRECTS DULLES' REWRITING OF HISTORY

Senator HUBERT H. HUMPHREY, Democrat, Minnesota, today called on President Eisenhower to confirm or deny the statement attributed to Secretary of State Dulles that the President would have regarded an attack on Quemoy and Matsu as an attack on Formosa. "Quemoy and Matsu are still threatened," Senator HUMPHREY stated. "The American people and the Congress have a right to know whether President Eisenhower has already made the decision, as Secretary of State Dulles is said to have implied, to defend the offshore islands if they are attacked.

"Congress was led to believe that the President would make the decision only after carefully weighing the circumstances. At that time the President assured Senator GEORGE and the Senate that before that decision was made there would be consultation.

"In the Life article on Dulles, it is stated that since the Formosa resolution was sent to Congress, 'Dulles has never doubted * * * that Eisenhower would have regarded an attack on Quemoy and the Matsus as an attack on Formosa.'

"If this is the case," Senator HUMPHREY said, "then Congress was misled. If the President is actually determined to defend the islands, as Mr. Dulles thinks, it would be good for Congress to be informed without having to subscribe to Life magazine.

"In the light of this article, it would now seem prudent, and in the national interest, for the President to inform the responsible leaders of Congress what our present policy is.

"Furthermore, I submit that this Nation cannot depend for its survival on newsstand diplomacy."

Senator HUMPHREY continued: "I want to make my own position quite clear. As a member of the Senate Foreign Relations Committee, I am deeply dedicated to the concept of bipartisanship and responsible, constructive discussion to which the Democratic Party is thoroughly committed. I have already announced my support of the President's request for long-term economic aid. If there is any electioneering going on, it is from Mr. Dulles and his election-year magazine article—not from his critics.

"Oddly enough the three crises which the Secretary of State has selected for self-congratulation are exactly those crises in which administration policies were most confused. They occurred in areas where the threat of a new outbreak of diplomatic danger still continues. Those areas are Korea, the Formosan Straits, and Indochina.

"Without wishing to invite another futile historical debate, I do believe that some of Mr. Dulles' most flagrant inaccuracies should be pointed out:

SENATOR HUMPHREY CORRECTS DULLES' REWRITING OF HISTORY

"1. Korea: The Secretary says that an American decision was conditionally reached to renew the Korean war by extending it to air bombardment of Manchuria and the use of tactical atomic weapons. This was to happen if the Chinese Communists walked out of the 1953 truce talks after President Syngman Rhee freed thousands of Communist war prisoners in South Korea. Mr. Dulles says he was awakened at 2 a. m. on June 18, 1953. Informed of Rhee's move, Dulles realized this might broaden the war and he phoned the President whom he found both 'calm' and 'taut.' The Manchurian targets had already been carefully selected, Dulles stated, and our allies would be informed later of the decision to use atomic weapons. Because the North Koreans and the Red Chinese did not walk out of the Panmunjom Conference, Dulles claims his threat of enlarging the war was successful.

"There is in the published record not one line of evidence that such an American military ultimatum was delivered, hinted at, or even contemplated, through Mr. Nehru or otherwise. The record does show that the good offices of our allies and of neutrals were a large factor in smoothing over the conflict arising from the release of the war prisoners and in accomplishing a resumption of the truce talks. Great indecisiveness was shown by the Eisenhower administration in the matter of restraining our own ally, President Rhee, until after he had precipitated the crisis. We then went all out to assure everyone that Rhee had acted intemperately against our advice, and to exert heavy pressure on him to prevent further incidents.

"Rhee in his determination to renew the war, received conspicuous encouragement from Republican right-wing critics of the administration, and from the persistent Dulles-Eisenhower efforts to appease the Old Guard extremists.

"The Dulles account of a war decision by the United States in the 1953 war prisoner incident will be welcome news in Moscow and Peiping, where it will surely be greeted as confirmation of the Communist propaganda that the United States conducts diplomacy chiefly at the point of the A-bomb plus the H-bomb.

"It is news that will alarm our allies and the uncommitted nations, as evidence that American leadership follows the counsels of desperation and military extremism.

"By disregarding the large contributions which the United Nations, our allies, and neutral countries made to a compromise settlement without resort to further hostilities, the Dulles version discourages other nations from collaborating with us in the future to keep the peace. Worse, the Secretary's exclusive emphasis on American military threats gives our own people a dangerously false impression of the efficacy of military bluffs.

"It will also create alarm to be told that the President, on the moment of being awakened from a sound sleep, would have made the drastic decision attributed to him by Dulles without any consultation whatever with his Joint Chiefs of Staff, the National Security Council, other members of his Cabinet or congressional leaders.

"This I refuse to believe. I have faith that our President would weigh any such decision with prayerful thought and with the careful consultation of his military and civilian advisers.

"If life-and-death decisions such as this are being or have been made in the light, impulsive, and ill-considered fashion described by Mr. Dulles in this instance, then our predicament is more critical than anyone heretofore has imagined was possible.

"2. Formosan Strait: The Life article in a single parenthesis on page 77 undercuts the whole basis of the approach on which Congress passed the Formosa resolution in 1955. That resolution purported to give the President discretionary authority to consider whether a Communist attack on Quemoy and Matsu under all the circumstances of the time would constitute an attack on Formosa. Dulles is now said to have 'never doubted' that the President would have regarded an attack on Quemoy and the Matsus as an attack on Formosa.

"If so, the whole approach to the Formosa question, used by the Administration in asking Congress for an expression of support, was fraudulent. The implication was that the decision had not been made and would be left to the President's discretion at the moment of a possible attack. If the new Dulles statement is accurate, it is tantamount to saying that the Communists are now casually put on notice through the pages of Life, that if they attack the offshore islands, they will in fact be retaliated against on the mainland by American armed force. The administration apparently has reversed its practice of 'keeping the Communists guessing.'

"Mr. Dulles is quoted as saying: 'When I think of the problems behind us, I am not too worried about those ahead of us.' But the Secretary must know that the Formosan Strait situation is not behind us, any more than the Korean or Indochina situations are. The Chinese Reds have attacked in the Formosa area, and are still doing so. They attacked the Tachen Island group, which they seized after they were abandoned by the Chinese Nationalists under protection of our 7th Fleet. They have kept up a constant assault on the Chinese off-shore islands, Quemoy and Matsu. Now the fighting between the rival Chinese armies in this area is rising again in intensity. The Red Chinese has greatly reinforced their positions in the last year. There are mounting rumors of preparations for a full-scale Red Chinese offensive against Quemoy and Matsu this spring. In light of this article, it would now seem appropriate for the President to tell the responsible leaders of Congress what our present Formosan Strait policy is.

"3. Indochina: During the Indochina crisis in April 1954, Mr. Dulles was sounding modified echoes of his massive retalia-

tion theme. They reverberated around the world and frightened everyone—most of all the American people, since our leaders had not prepared us for a sudden Indochina crisis.

"Secretary Dulles made such vague threats as: 'If Red China sent its own army into Indochina that would result in grave consequences which might not be confined to Indochina. Recent statements have been designed to impress upon potential aggressors that aggression might lead to action at places and by means of free world choosing, so that aggression would cost more than it could gain.

"Shortly thereafter Secretary Dulles made public a top-secret United States intelligence report that Chinese Communists had in fact already been identified in actual combat alongside the Communist-led Viet-Minh forces in Indochina.

"The only conclusion that anyone could draw from Secretary Dulles' ambiguous foreign policy statements on our intentions in Indochina was that we would intervene, perhaps with atomic or hydrogen weapons. It quickly became obvious that the Army Chief of Staff disagreed with Mr. Dulles and that our allies joined in that disagreement.

"When the Secretary found that neither the American people nor their friends abroad were ready to risk nuclear war in Indochina, he hastened to Europe to try to convert our allies overnight.

"The Life article claims that he had a specific agreement at one point from Churchill and Eden, as well as a reluctant one from Bidault, to intervene in Indochina. Within the past 2 days, Mr. Dulles' statement has been hotly repudiated from London. His position was previously repudiated by events when our threats were shown up to be bluff.

"Strangely enough Mr. Dulles now seems to regard the 1954 Geneva Indochina Conference as a success. 'Again the policy of boldness impressed the Communists,' says the Life article. The fact of the matter is that Mr. Dulles himself attended that Conference with reluctance for only a few days, finally leaving Under Secretary Bedell Smith in Geneva to make the most of a bad situation. As General Smith said of the cease-fire agreement on his return, it 'was the best which we could have possibly obtained under the circumstances.' He acknowledged that the settlement contained 'features which the United States does not like.' President Eisenhower had made almost the same statement the day before. In his testimony before the Senate Foreign Relations Committee, Secretary Dulles never claimed that the Indochina truce was a successful result of American policy. In fact, he was most unhappy over the arrangements made at Geneva.

"As the Secretary well knows, the instructions to our delegation at the Conference revealed the deep concern we had over the affirmative Communist gains which were ratified there.

"4. Massive retaliation: The Life article would have us believe that the discredited doctrine of 'massive retaliation' has saved us from war three times. The fact of the matter is that it was not applied at any of these times. The lesson of recent events is that the massive retaliation policy has failed in every test to which it has been put, outside the European area where the lines against aggression are clearly drawn and have been since 1950.

"But now the Secretary seeks to revive this dangerous doctrine by advancing the fiction that military bluffs have actually worked to our advantage in practice. This 'revival' is particularly disturbing in relation to the menacing situation that is developing in the Formosa area. Since last year's approach to a showdown over Formosa, Secretary Dulles and the administration have made, insofar as the Congress and the public know, very limited use of diplomatic opportunities to ease this crisis. The foreign policy of this administration has continued to replace excessive reliance on the strategy of atomic threats, while failing to meet the Communist challenge in the build-up of actual defense forces, and while moving belatedly to meet the growing Communist challenges of economic, psychological, and political competition.

"On the very day that the article appeared, Secretary Dulles revealed that our own delegation to the United Nations called for a change in our policies to meet the challenge of the new Communist tactics. The statement of the U. N. delegation said, in part: 'We believe that the United States must counter these Soviet efforts. We can succeed, not by outbidding communism in sheer amounts of economic aid, but by making newly independent and newly articulate peoples feel that they can best satisfy their wants by becoming and remaining part of the community of free nations. We welcome more emphasis on economic and educational endeavors, for we have a proven experience in these fields. We are in a contest in the field of economic development of underdeveloped countries which is bitterly competitive. Defeat in this contest could be as disastrous as defeat in an armaments race.'

"5. Confidential disclosures: The Life article is replete with language suggesting that the Secretary of State has divulged hitherto secret information to the Life correspondent. It refers to new information provided by the Secretary and by the State Department. It says that important sections of the record could not be made public until now. To take only a single instance, many people would like to know what security classification had previously been given to the memorandum written by the Secretary and quoted on page 78 of the Life article. Perhaps Mr. Dulles will clarify this for those of us who are interested.

"6. The verge of war: A section of Mr. Dulles' article has already become notorious overnight:

" 'Some say we were brought to the verge of war. Of course, we were brought to the verge of war. The ability to get to the verge without getting into the war is the necessary art. * * * We walked to the brink and we looked it in the face. We took strong action.'

"The international reaction to these words has been one of universal criticism and alarm.

"For 3 years, the Nation has witnessed repeated demonstrations that Secretary Dulles does not understand the implications of competitive coexistence and the atomic stalemate. Apparently he has a seriously unbalanced view of our military power potential, an inadequate conception of the risks involved, and a pronounced inclination toward rash words and imprudent actions.

"He has consistently shown a disposition to shape foreign policy to suit the domestic political considerations of a party which is tragically divided, still deeply affected by isolationism, and further agitated by elements which suffer from the preventive-war psychosis.

"For our Secretary of State to say that getting to the verge of war is an art is a very precarious base on which to build our foreign policy. It is due to such statements as this that the President had to reassert to the world at the summit meeting that we are a peace-loving nation. It is shocking that such irresponsible statements by our own leaders should have combined with the propaganda of the Communists to so distort the true image of the American people.

"The time has come again for President Eisenhower to speak out and correct the false image which Secretary Dulles' ill-chosen statements have created throughout the world. The President should correct the distortions of history in the Dulles' article. He should confirm or deny the intention attributed to him by Secretary Dulles that an attack on Quemoy and the Matsus would be regarded as an attack on Formosa. Most of all, President Eisenhower should tell the world that the United States has no intention of conducting its foreign policy by bringing us, and the world, to the verge of war."

Mr. HUMPHREY. Mr. President, editorials were still continuing to appear on Sunday, January 15. One of them was an editorial entitled "The Dulles Disaster," published in the New York Post of January 15, 1956. I ask unanimous consent that it be printed at this point in the RECORD. The first line is quite interesting and is indicative of the entire editorial:

John Foster Dulles has done it again.

In what has been widely described as a classic example of "foot-in-mouth" diplomacy, Dulles has succeeded in creating a political riot in the free world. The discord and despair created by his latest blunder raise the gravest doubt as to whether there is any further excuse for his existence as Secretary of State.

Those are the words of the New York Post editorial writer.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE DULLES DISASTER

John Foster Dulles has done it again.

In what has been widely described as a classic example of "foot-in-mouth" diplomacy, Dulles has succeeded in creating a political riot in the free world. The discord and despair created by his latest blunder raise the gravest doubt as to whether there is any further excuse for his existence as Secretary of State.

Dulles' most disastrous performance has been staged in collaboration with Life magazine in what was seemingly conceived as a major Republican campaign text for 1956.

The thesis of the piece is simple. It is that a bold, brave fellow named John Foster Dulles, with the aid of Dwight D. Eisenhower, has on at least three occasions—involving Korea, Indochina, and Formosa—saved the peace by invoking the threat of atomic warfare.

The article is richly endowed with tributes from Dulles to himself, and the basic authenticity of the quotations has been confirmed by Dulles.

It must be said that no one, except Dulles and the editors of Life, would try to prove why the Chinese Communists did not do certain things at given moments. We can hardly compete with that sort of omniscience.

There will be ample time to debate some aspects of Dulles' self-serving version of history, such as the notion that the outcome in Indochina can somehow be described as a positive achievement of American diplomacy.

What matters most now is the implication that the strategy of atomic retaliation is still the major weapon of United States foreign policy, and that our State Department is still operating on the obsolete principle of calculated risk that seemed to make sense before atomic bombs were discovered.

This is how Dulles puts it:

The ability to get to the verge without getting into the war is the necessary art.

To which the London Daily Mail commented Friday:

If this is an art, it is the most terrifying art we ever encountered. One false step and the artist is over the edge, taking his H-bombs with him and destroying the world in the process.

The issue is of deadliest urgency because the crisis over Formosa remains unresolved. If Dulles' words mean anything, they mean that a Communist attack on Matsu and Quemoy would invite immediate atomic reprisal. ("Dulles has never doubted," says Life in an authoritative tone, "that Eisenhower would have regarded an attack on Quemoy and the Matsus as an attack on Formosa.")

Consider the consequences of this position. The United States is currently making no serious effort to end the Formosa deadlock. The Communist build-up continues; Chiang plainly dreams of the day when a Communist assault will plunge America into full-scale war with the Peking regime.

We have therefore clearly demonstrated anew "the ability to get to the verge." But what if the Chinese Communists now decide the risk is worth taking—either because they do not believe the Republicans will let Dulles carry out his threat, or because they feel confident all Asia would rise against us if he did?

There are times when nations must live dangerously. But in the atomic age all the ancient equations must be revised. We are not permitted the old luxury of error; we are not allowed one wrong guess.

But the whole substance and spirit of the Life article is that American foreign policy is a reckless gamble camouflaged as statesmanship.

Dulles has smugly told the world that we were ready to start hurling A-bombs in three earlier crises, and the impression is unmistakable that he is still relying on the same threat.

This policy is presented as dramatic proof of Dulles' valor. But it is in fact a damning indictment of his political cowardice. For the underlying truth is that Dulles lacks the simple moral courage to tell the country that we must seek an overall settlement with Communist China. We do not say this can be easily or surely achieved. We do say that this is the great challenge to American diplomacy.

The ugly fact is that Dulles prefers to risk an atomic war over Formosa rather than face the fury of the China Lobby battalions. That is the way his words will be read throughout the world; the tragedy is that neither Dulles nor Life seems to understand the danger of such talk.

Mr. HUMPHREY. Mr. President, by Monday Secretary Dulles was reported by Mr. Jack Bell, of the Associated Press, ready to take the stump to defend his policies. In addition, Secretary of the Army Brucker, in a very interesting quotation printed in the Washington Star, indirectly refused to back up some of the statements attributed to Mr. Dulles. I quote from the Associated Press dispatch as follows:

Army Secretary Brucker said yesterday he had no knowledge that the United States had been on the brink of war three times in recent years. He said also he doubted that President Eisenhower has decided whether a Red Chinese attack on Quemoy and the Matsus Islands would be considered an attack on Formosa.

Mr. Brucker was questioned on an ABC television program, College Press Conference, about the statements attributed to Mr. Dulles in the Life article.

I ask unanimous consent that an excerpt from the article, published in the Washington Star of January 15, 1956, be printed at this point in the RECORD.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

DULLES MAY TAKE STUMP TO DEFEND HIS POLICIES—POSSIBLE ELECTION-YEAR APPEAL SEEN TO OFFSET CLAMOR OVER GOP TACTICS

(By Jack Bell)

* * * * *

BRUCKER IS DUBIOUS

Army Secretary Brucker said yesterday he had no knowledge that the United States had been on the brink of war three times in recent years. He said also he doubted that President Eisenhower has decided whether a Red Chinese attack on Quemoy and the Matsus Islands would be considered an attack on Formosa.

Mr. Brucker was questioned on an ABC television program, College Press Conference, about the statements attributed to Mr. Dulles in the Life article.

Mr. Brucker made it clear that he was not disputing Secretary Dulles. He said the brink-of-war incidents occurred before he became Army Secretary and that he did not know about past State Department actions.

As for the threat to Formosa, Mr. Brucker said President Eisenhower has at no time told what his decision will be. That will be made at the time of the mounting of the attack, if one does occur.

Mr. HUMPHREY. Mr. President, it is rather an unusual circumstance that the Secretary of the Army would not have any idea as to whether the United States had been at the brink of war. I understood the Army had something to do with wars, brinks or no brinks. It appears to me that the Army would have something to do with defending Quemoy and the Matsus.

I recall General Ridgway saying that one of the reasons why he deferred from the matter of the defense of Quemoy and the Matsus was that he did not feel he had under his command sufficient troops with which to make such defense successful.

Mr. DOUGLAS. Mr. President, will the Senator yield for a question?

Mr. HUMPHREY. I shall have to ask unanimous consent to do so, because I have exceeded my time.

Mr. President, I ask unanimous consent that I may complete the insertion of the rest of the articles and editorials in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSON of Texas. Mr. President, does the Senator from Minnesota ask for a specific amount of additional time?

Mr. HUMPHREY. Five minutes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Minnesota? The Chair hears none, and the Senator may proceed.

Mr. HUMPHREY. I yield to the Senator from Illinois.

Mr. DOUGLAS. I was merely going to ask, in connection with the discussion of "brink of war," whether this is another Brink's robbery.

Mr. HUMPHREY. In all sincerity, I may say that the "brink of war" case is as difficult to solve as was the Brink robbery case. In that instance the robbers were found but not the loot.

Mr. President, in this morning's newspapers, a keenly analytical article on the Life magazine article and Mr. Dulles appeared under the by-line of that distinguished writer, Mr. Walter Lippmann. I wish to quote briefly from his article, entitled "Dulles Rides Again":

There is not as yet available any plausible explanation of why Mr. Dulles chose deliberately to have the Life magazine article written about him. For the extraordinary thing about this article is that while it pretends to reveal the inner truth of our recent policy in the Far East, it provides a fundamentally false account.

I skip through the article to the next to the last paragraph:

The article has done damage to the country and to Mr. Dulles' own usefulness as Secretary of State. He has provided the Soviet propaganda with a text which is sheer bonanza. The exasperating thing about it is that whereas ordinarily we have to contend with untruths that others tell about us, here we have to contend with half-truths that are tantamount to untruth put out by the Secretary of State himself.

I ask unanimous consent that the entire article by Mr. Lippmann may be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DULLES RIDES AGAIN

(By Walter Lippmann)

There is not as yet available any plausible explanation of why Mr. Dulles chose deliberately to have the Life magazine article written about him. For the extraordinary thing about this article is that, while it pretends to reveal the inner truth of our recent policy in the Far East, it provides a fundamentally false account.

The falsity lies in this: That Mr. Dulles describes what has happened in Korea, Indochina, and the Formosa Strait in terms of "unilateral deterrence" by the United States. What has really happened is that both sides and all concerned have been held within a condition of "mutual deterrence." Thus, while it is no doubt true that the Communists have been deterred by fear of our retaliation, it is also undoubtedly true that Dr. Syngman Rhee, Gen. Chiang Kai-shek, Admiral Radford, and those who wanted to intervene in Indochina have been deterred by our fear of Soviet retaliation. The existence of the military stalemate explains, as Mr. Dulles' one-sided account does not explain, the political situation in the contested area on the approaches to China.

The actual condition of mutual deterrence, or military stalemate, was first discerned by Churchill when he learned the results of the hydrogen-bomb test. Shortly after that the conclusion was drawn by the President in his famous declaration that there is "no alternative to peace." It was that declaration, which the Russians have since then subscribed to, that led to the first Geneva Conference, and was the core of that Conference.

Now, if there is no alternative to peace, then no one can go to the brink of war in the sense that he threatens to go to war. If war is not an alternative, then anyone who threatens war is either mad or is bluffing. If war is not an alternative, then issues have to be compromised. If, as Mr. Dulles' article implies—though he himself must know better—we were the unilateral deterrers in the Far East, we would have enjoyed a military superiority sufficient to make the Communists give in to us on the issues in dispute. In fact, all we have been able to get has been peace on the basis of the military status quo. Both sides have had to accept peace without victory.

Mr. Dulles must have come very near to being the first Foreign Minister who has ever wanted to appear more warlike than in fact he was. Life magazine has painted a picture of a bold and threatening man who has overawed the adversary. The fact is that everybody has been overawed. The Communists have been deterred from aggression beyond the line of the status quo; we have been deterred from liberation beyond that line.

In order to maintain and stabilize that line at which both sides are deterred, we have not only made known that we would fight if that line were crossed by armed forces; we have also given assurances that we ourselves will not cross the line in the other direction.

In Korea we have guaranteed South Korea against aggression from North Korea and from China. In return we have taken the necessary military means to prevent Dr. Rhee from drawing us into an attempt to liberate North Korea.

In Indochina we were deterred from intervening with an air strike to save Dien Bien Phu by the fear that China would then intervene openly by invading northern Vietnam. Such an invasion would have required an air bombardment of China to repel it. That was a course from which we were deterred by the fear that this would cause the Soviet Union to intervene. This is how mutual deterrence works: It worked in Indochina to deter open intervention either by the Chinese or by ourselves and to produce a cessation of hostilities on the basis of the military status quo. There is no point in talking now as if it had all been some kind of victory.

In the Formosa Strait we gave Chiang a treaty of guaranty which was, as Mr. Dulles says, a warning not to attack Formosa. But Mr. Dulles has, in his role of melodramatic hero, omitted the other half of the story. The other half is that we then releashed Chiang firmly and sent word to Peiping through various diplomatic channels that we would not permit, much less would we assist, Chiang to attempt to return to the mainland. In the Formosa affair Chiang got a guaranty of his island refuge and Chou En-lai got the reassurance that Chiang was no longer to be regarded as a serious contender on the mainland.

In sum, the Eisenhower policy in the Far East has operated—as it had to—within the overall condition of a military stalemate. This has led to a series of compromises—probably temporary—based on the military status quo. It is not glorious what we have done; it is merely making the best of things as they are—and striking heroic and melodramatic poses about it is entirely uncalled for.

The article has done damage to the country and to Mr. Dulles' own usefulness as Secretary of State. He has provided the Soviet propaganda with a text which is sheer bonanza. The exasperating thing about it is that, whereas ordinarily we have to contend with untruths that others tell about us, here we have to contend with half-truths that are tantamount to untruths put out by the Secretary of State himself.

For the truth, which will now be obscured by this article, is that United States foreign policy has been more realistic and more responsible than anyone would suppose who had read what Mr. Dulles has allowed to be written about it.

Mr. HUMPHREY. Mr. President, at this time I wish to place in the RECORD several editorials from great English newspapers, commenting on the Life magazine article and the implications it carries for American foreign policy, and also to cite the reported reaction in Dutch and Indian newspapers, as well.

I ask unanimous consent that the editorial entitled "To the Brink," published in the Manchester Guardian of January 12, 1956, be printed in the RECORD at this point in my remarks. The editorial, in part, reads:

Mr. Dulles is no historian and not much of a diplomatist.

The editorial is clearly interesting and perceptive throughout, line by line.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

TO THE BRINK

Mr. Dulles is no historian and not much of a diplomatist. In an interview with the magazine Life, published today, he has given a remarkable account of three occasions when the United States "walked to the brink of war" but by strong action averted it. One was in 1953 and two in 1954, and Mr. Dulles says that on the first two occasions war was averted by an American threat to use atomic bombs on Communist China. The first time, according to Mr. Dulles, was during the Korean truce negotiations in June 1953; he then warned the Chinese through Mr. Nehru that if the stalemate continued the United States would renew the war, extend it to Manchuria, and use tactical atomic bombs. If this is true, it is strange that no substantial account of the warning has been published before and that it should now be made known in this form. Any such warning would have implied a radical change of American policy, which was to limit the war to Korea. ("Taking on Red China," as General Bradley had said earlier, "could lead to a larger deadlock at greater expense.") And, as the world knew at the time, any such change would have caused an unbridgeable rift between the United States and its allies in the United Nations. The second occasion, according to Mr. Dulles, was during the siege of Dien Bien Phu in April 1954; he then proposed joint action with the British, French, and other friendly nations in Asia, and warned the Chinese that if they intervened openly atomic bombs would be dropped on "staging posts" in southern China. Of that affair much is already known, and it does tally with the version given by Mr. Dulles. There was a weekend of feverish discussion at the end of April, with a special Cabinet meeting in London on the Sunday. The French had asked for help, and it was said that Mr. Dulles had agreed to give it subject to certain conditions; these were allied support, congressional approval, and a promise of political independence for Indochina from France. The hope of allied support foundered after the British Cabinet meeting. But the most serious stumbling block was Congress, and President Eisenhower told his press conference on the Thursday that the American decision against immediate intervention had been taken independently of British advice.

Some of the comments in Congress are worth recalling. Mr. NIXON, a few days earlier, had provoked massive alarm among the Senators by suggesting that the United States might have to fight to save Indochina. These were a few of the comments: send no American troops at this time (SALTONSTALL and HICKENLOOPER), send none until other allied contingents are ready (KNOWLAND), send the British from Malaya (DOUGLAS), send money and material only (WILEY), ask the United Nations (KEFAUVER). In the face of such obvious reluctance, not only in Congress but throughout the country, there was little chance of American intervention. How, then, was it possible for Mr. Dulles to send a stiff warning of American intervention with atomic bombs to the Chinese? When did he send it—before or after the weekend of consultation? And, if he sent it, could he expect the Chinese to be overawed by it when they would already have read all the public comment from Senators and others in the United States? One cannot help suspecting that Mr. Dulles' memory has slipped and that he has given Life a mistaken view of events. More important, however, is the deduction which he draws. It applies to policy today. Mr. Dulles evidently believes that on these two occasions, and on the third, the threat of strong American action was the critical factor in deterring the Chinese. More probably, in Korea the Chinese had decided that they might as well liquidate a liability, which the war had become to them; and in Indochina they had decided against direct intervention while the Vietminh were so obviously winning. Over the Formosa Strait, too, it is likely that their plans for economic and social penetration in southeast Asia played as great a role in holding them back as the fear of American retaliation; a direct Chinese attack in the Strait might have raised too many Asian suspicions against them. Mr. Dulles in his press conference yesterday said that Americans should "wake up" to Communist economic expansion in Asia. One wonders whether, when he talked to Life, he had woken up to it himself.

Mr. HUMPHREY. Mr. President, the London Daily Herald of January 13, 1956, published an editorial entitled "Arts of Peace." In part, it reads:

Mr. Dulles would make anyone's hair stand on end. He has given a magazine interview declaring that three times in the past 18 months the United States has been on the brink of atomic war against Communist China, but resolute threats kept the peace. He adds: "The ability to get to the verge without getting into war is the necessary art."

I ask unanimous consent that the entire editorial be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

ARTS OF PEACE

Mr. Dulles would make anyone's hair stand on end. He has given a magazine interview declaring that 3 times in the past 18 months the United States has been on the brink of atomic war against Communist China, but resolute threats kept the peace. He adds: "The ability to get to the verge without getting into war is the necessary art."

This terrible doctrine will shock the United States. What concerns us is his allegation that after a meeting with Sir Anthony Eden he thought Britain had agreed to fight in Indochina.

How did he get that idea? It is so extraordinary that explanations must follow. Let's have no dithering in things like this.

Mr. HUMPHREY. I have in my hand an article from the London Daily Mail of January 13, 1956, entitled, "The Dance of Death," which I also ask unanimous consent to have printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE DANCE OF DEATH

Little did we know (safe in our beds that we were) that three times since June 1953 the world has trembled on the brink of atomic war.

This startling statement is attributed to Mr. Dulles, the United States Secretary of State, in an article in Life magazine, which gives his account of the crises which so nearly loosed catastrophe.

One was Indochina, when two American aircraft carriers were sent speeding toward China armed with atomic weapons.

Another was Korea, when the Americans had selected Manchurian targets for bombing if the war had been resumed. The third was Formosa, when an attack on the Quemoy or Matsu Islands would have started hostilities.

We do not for a moment doubt that the United States had her finger on the trigger at these critical times. If anyone in the world should know, Mr. Dulles is that man. But in some respects his memory is faulty.

ACTION

For example, he says or implies that Britain, France, America, and friendly Asian countries were ready for united action in Indochina, when Britain backed out and let the side down.

Mr. Dulles has misunderstood Britain's intentions. Military action was not in our Government's mind. We have reason to know that before he went to Geneva Sir Anthony Eden had foreseen what form the ultimate settlement must take.

Why did not the United States go it alone, as Vice President NIXON said she would? Because the thought of fighting in Indochina was as unpopular in America as it was in this country.

Nor were either people keyed up to fight again in Korea if the truce talks had broken down. And it is news that the United States would have fought over the Formosan offshore islands.

REACTION

Her reaction to an attack on those places has never before been specifically stated.

What Mr. Dulles wants to prove is that the threat of instant action has thrice served to prevent war. This is the policy of the deterrent and there is everything to be said for it, provided it is rightly applied.

Can Mr. Dulles claim to have done that? He says: "The ability to go to the verge without getting into war is the necessary art. If you cannot master it you inevitably get into war * * * if you are scared to go to the brink you are lost."

It is reassuring to know that the United States is ready at the fall of a hat (or touch of a button) to go into action. She would fail in her duty if she were not so prepared.

POWER

We believe the buildup of strength is the only deterrent to communism. But there is a great difference between providing policy with a solid backing, such as NATO, and embarking on a dance of death up to the brink of the pit and back again.

If this is an art, as Mr. Dulles says, it is the most terrifying art we ever encountered. One false step and the artist is over the edge, taking his H-bombs with him and destroying the world in the process.

To practice it successfully one needs more than skill. One needs, also, a preponderance of power, without which it must fail.

If the day comes when sudden threats can be met with rejoinders of equal force, it will need something more than the art of balancing on a knife edge to save the peace of the world.

Mr. HUMPHREY. Mr. President, there appeared in the London Daily Mirror of January 13, 1956, an article entitled "The Verge of War," which I ask unanimous consent to have printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE VERGE OF WAR

The incredible Mr. Dulles.

Calmly choosing not a State document but Life, the most popular illustrated magazine in the United States, as his vehicle, the American Secretary of State has casually informed the world that he saved it from an all-out hydrogen bomb war by threatening half of it with an all-out hydrogen bomb war.

Not once, or twice, but thrice.

The first time was during the Korean truce negotiations in 1953.

The second time was during the siege of Dien Bien Phu in 1954.

And the third time was also in that year when the Chinese looked as if they might try to invade Formosa.

In Mr. Dulles' artless words "We were brought to the verge of war. The ability to get to the verge without getting into the war is the necessary art."

He was as good as his perilous words, for two aircraft carrying nuclear fission bombs in their bellies were aboard an American aircraft carrier swimming around in the China Sea.

These threats were duly conveyed to the proper quarters in Peking and Moscow by Mr. Nehru.

Sir Anthony Eden, to his eternal credit, would have no part of this deadly game, and the United States swiftly drew back when she knew that she would have to "go it alone."

What the incredible Mr. Dulles seems to have overlooked was the fact that in the Kremlin there were men much cooler than he who also knew the value of getting the first blow in and who also had the means of delivering it.

Heaven protect us from this edgy gambler—and his careless way of making his risky throws known to all the world.

Mr. HUMPHREY. Mr. President, I now read the first paragraph of the article:

The incredible Mr. Dulles. Calmly choosing not a State document but Life, the most popular illustrated magazine in the United States, as his vehicle, the American Secretary of State has casually informed the world that he saved it from an all-out hydrogen bomb war by threatening half of it with an all-out hydrogen bomb war.

Then I have an article entitled, "Mr. Dulles' Version of History Challenged," which appeared in The Times of London on January 14, 1956, and which I ask unanimous consent to have printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MR. DULLES' VERSION OF HISTORY CHALLENGED—SECRETARY OF STATE STANDS BY QUOTED STATEMENTS

WASHINGTON, January 13.—Mr. Dulles was said today to be tolerably pleased with his portrait in Life as the ironman who three times "walked to the brink" and looked atomic war in the face—even if he has been a little unhappy about the stir the matter is causing in more sensitive quarters.

The official spokesman of the State Department said that the Secretary of State, having read the article, did not feel that the statements specifically attributed to him required correction. The loophole here is that he is directly quoted in only 2 or 3 passages; and the spokesman declined to say whether his chief was disavowing the rest of the article, which purports to have been drawn from State Department sources. He added that Mr. Dulles stood by his statement on Wednesday—that, if the Geneva talks on Indochina had broken down Britain and France were ready to go ahead with American plans for joint military operations against south China, in which "appropriate" weapons would have been used.

At all events, Mr. Dulles might well be unhappy, for, after the Goa "blunder," Asian opinion will not have failed to remark that he again spoke of atomic weapons in an Asian context; and the differences created in Western capitals by his version of a British "change of heart" toward united action in Indochina are having their repercussions in Washington. If, as is generally supposed, these disclosures are being made for election purposes, Mr. Dulles can hardly have imagined that they would not be challenged by the Democrats in Congress, who, as the majority party, are so largely responsible for the enactment of his foreign policy. The view which he now acknowledges as his own could not have ignored more completely the bipartisanship of which he is always speaking, to say nothing of consultation among allies.

DISTORTION OF HISTORY

Senator HUMPHREY, Democrat, of Minnesota, a member of the Senate Foreign Relations Committee, has already said that, if this "distortion of history persists," he will move for the publication of what Mr. Dulles told that body in secret about the events in question. He roundly declared in the Senate that the Secretary of State was causing "untold trouble" with America's allies in a "fraudulent reassertion" of an abandoned policy of "massive retaliation"; he was making baseless and partisan claims of Republican victories in world affairs which would lead to political disputes at home and bring allied contempt upon the United States.

Mr. HUMPHREY asserted that what Mr. Dulles had said about his role in the Indochina crisis was so unalterably opposed to his testimony before the Senate committee that one account or other must be false. He said that Mr. Dulles had put the blame on the backs of the British and French for the partition of Indochina, and that, when this partition was arranged at Geneva he had "let down our allies in one of the most disgraceful periods of American diplomacy." Mr. HUMPHREY took great exception to the statement that the "ability to get to the verge of war without getting into war is the necessary art." He claimed that no responsible statesman in their lifetime had ever so described an American diplomatic objective, and he called on the Secretary of State to repudiate it. "The American people do not agree with him," Mr. HUMPHREY said.

MR. ACHESON'S VIEWS

Allowing for short memories on Capitol Hill, trouble seems to be brewing for Mr. Dulles; and Mr. Acheson in one of his rare speeches last night enunciated similar views without referring directly to the Life article.

It was difficult, he said, to find any area in which events of the past few years had moved to the American advantage; the United States had lost the initiative in the cold war, and was drifting away from its Western Allies. Strength had been ebbing rather than waxing in Europe. Germany was drifting dangerously, France was torn by discord, and relations with Britain had become "distant and formal." Mr. Acheson urged the United States to free itself from a cramped, dangerous, and immobile position in the Far East. "Whatever our policy is," he said, "it should not be different from the policy of our allies."

He said that the Quemoy and Matsu Islands were still time bombs, set to go off at an unknown hour, and foresaw that trouble with China might break out again at any moment, involving the United States in a conflict in which the values incurred bore no relations to the risks.

Experienced observers here point out that the Life article bears all the familiar marks of official cooperation and approval, and Mr. Dulles' comments on it are received with what Mr. Arthur Krock calls "total incredulity."

ANOTHER MYSTERY

It is stated, indeed, that the story was checked in the State Department, which presumably accounts for significant deletions from the advance text, and the whole incident is being treated as another of those Washington mysteries. The Secretary of

State's assurance that he had not read or seen the article induces no one to believe that it was published without official authority; and, as in the case of the Yalta papers, many are wondering who among his assistants would have taken responsibility for a version of events that could hardly fail to evoke loud disputation.

Mr. Dulles had another of his recent critics to lunch today—Senator GEORGE, chairman of the Senate Foreign Relations Committee, who said this week that American policy abroad was in anything but a happy posture. If Mr. Dulles was hoping to win the Senator's support for long-term foreign aid, as now proposed by the administration, he must have been disappointed. Mr. GEORGE, who firmly opposes the proposals, said afterward that bipartisan foreign policy may be threatened if the administration insists on these long-term commitments. He said that it was far more important to maintain a bipartisan approach to essential foreign policy matters than to force an issue on long-term aid.

Mr. HUMPHREY. Mr. President, I read from the beginning of the article:

Mr. Dulles was said today to be tolerably pleased with his portrait in Life as the iron man who three times "walked to the brink" and looked atomic war in the face—even if he has been a little unhappy about the stir the matter is causing in more sensitive quarters.

Then I have in my hand also the official British reaction, which appeared in the London Times of January 14, 1956, wherein the British diplomatic correspondent defends the policy on Indochina on the part of Great Britain. I ask unanimous consent to have that article printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BRITISH REPLY—DEFENSE POLICY ON INDOCHINA

(From Our Diplomatic Correspondent)

The Foreign Office yesterday issued a statement—authorized, it is understood, by Sir Anthony Eden—on views expressed by Mr. Dulles at his press conference on Wednesday.

Mr. Dulles stated that in April 1954, just before the Geneva Conference on Indochina, he went to London, * * * "and reached what I thought was agreement on united action." Later it appeared, according to Mr. Dulles's account, that the British had had a change of heart, and preferred to wait and see what came out of the Indochina conference, although it was general knowledge that if the Conference broke down the British Government would go along with American plans for united action.

STATEMENT IN 1954

Yesterday's Foreign Office statement recalled that the British part in these exchanges was fully explained at the time and it made reference to the communique of April 13, 1954, issued after the talks in London. This said that the British and United States Governments were "ready to take part with the other countries principally concerned in an examination of the possibility of establishing a collective defense system within the framework of the Charter of the United Nations to assure the peace, security, and freedom of southeast Asia and the western Pacific. It is our hope that the Geneva Conference will lead to the return of peace in Indochina. We believe that the prospect of establishing the unity of defense purposes throughout southeast Asia and the western Pacific will contribute to an honorable peace in Indochina."

In other words, the British Government were at that time agreed to discuss the possibility of a collective defense system, but evidently had not agreed to any plan for united action.

Apart from this statement there has been no comment from the Foreign Office; British representatives evidently hope that the question will now be dropped.

So far as recent American statements have envisaged the possibility of retaliatory bombing of the Chinese mainland, possibly with atomic weapons, it has often been stated in London that to menace the use of atomic force does not make a settlement of Chinese problems easier, and that more than anything else it alienates otherwise friendly Asian opinion.

Mr. HUMPHREY. Mr. President, I have in my hand an article from the Manchester Guardian of January 14, 1956, which has the headlines,

Mr. Dulles Pierced by Own Follies. Pained Astonishment at an Unloving World. "Why the Criticism?"

It is a very fine article, which I heartily commend to my colleagues as a wonderful display of editorial comment on the subject.

I ask unanimous consent to have the article printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MR. DULLES PIERCED BY OWN FOLLIES—PAINED ASTONISHMENT AT AN UNLOVING WORLD—"WHY THE CRITICISM?"

(By Max Freedman)

WASHINGTON, January 13.—Today's papers have long reports from England in criticism of Life magazine's article on Mr. Dulles as the thrice-blessed savior of world peace. There has been an almost ludicrous flight from responsibility by State Department officials, following the example set by Mr. Dulles in refusing to accept any measure of blame for the article. Pained astonishment, however, has greeted London's complaint that Mr. Dulles' revelations, with their overtones of British bad faith, provide a graceless and provocative prelude to his meeting in a few days with Sir Anthony Eden and Mr. Selwyn Lloyd.

In fairness to Mr. Dulles, it should be explained that he expected no spark from this article to reach his British visitors. Even in his career there has been nothing like this episode to illustrate his quite astonishing capacity for forgetting that he is set on a conspicuous stage and the whole world marks his demeanor. He consented to be blown up into an American hero; for that purpose he sat for a flattering portrait in one of his favorite magazines; and now he is bruised and disenchanted by his discovery that a large part of the world has recoiled from his image.

REPUGNANT

It apparently never occurred to Mr. Dulles that Life's account carried three implications profoundly repugnant to American policy. In the first place it defaced, if it did not actually destroy the image of President Eisenhower as the leader of moderation and peace, able to exercise a salutary veto over the headstrong excesses of American policy. Now we are given the quite contrary picture of the President as the resolute colleague of Mr. Dulles in flourishing the atomic bomb.

Secondly, the article went a long way toward confirming the accuracy of one of Russia's salient criticisms. Russia has often accused American policy of threatening atomic war. Mr. Dulles now boasts that it is an essential principle of his policy to threaten atomic war because he can be trusted to avert a rush of events before it hurries mankind into actual conflict. He believes the normal route of American policy is the edge of the precipice. Is that what President Eisenhower means when he talks about the middle of the road?

Finally there is a deliberate and grievous absence of emphasis on the communion of ideas that alone can sustain the free world's alliance and give it a constant unity which can never be shaken by events or even by the inevitable differences of policy.

CARICATURE EXPORTED

The United States, according to the portrait for which Mr. Dulles has sat so obligingly, stands at the summit of leadership, with the allies performing their most useful functions when they respond with swift agreement to the wisdom and courage of Washington. Not even Mr. Dulles, in his chastened and reflective moments, believes this absurdity; but he has now helped to export his caricature of American conduct to the world.

By an unintended yet illuminating coincidence, Mr. Dean Acheson, the former Secretary of State, spoke in Washington last night while this city was still reverberating with the busy indiscretions of the Life article. How differently American purposes and American policies sounded when defined by Mr. Acheson. He thought it unnecessary and yesterday above all, to enumerate the mistakes of Mr. Dulles, already pierced by his own follies. But he traced in detail the consequences of mistaken policies in Asia as in Europe, and now in the restless intrigues of the Middle East. He lamented the decline in mutual trust which marks the grand alliance today.

What Mr. Acheson once said about Mr. Dulles' policy of massive retaliation can now be applied to the article in Life—"In addition to its other faults, it was a failure." Mr. Dulles said on Wednesday that he had not yet read the article. So be it. But something of its history must be told. On Monday Life distributed advance copies of the article together with the press release, in which it took credit for publishing an exclusive interview with Mr. Dulles. There is no space here to catalog all the changes between this advance copy and the article in its final published form. Only a few representative changes can be indicated.

CHANGES IN TEXT

The advance copy said that Mr. Dulles had always felt that Mr. Acheson "had made a tragic mistake in suggesting, just 6 months before the Communist attack, that the United States would not fight for South Korea." The published article said, quite correctly, that South Korea was outside the "vital perimeter" which the United States would defend by itself if necessary. Korea was defended exactly as forecast by Mr. Acheson—by United Nations action under American leadership.

The advance copy, after describing the decision to use tactical atomic weapons in Manchuria, added: "It was the issue on which President Truman had fired Douglas MacArthur, and Eisenhower and Dulles decided that MacArthur had been right." This sentence was deleted from the published article.

There was no mention in the advance copy that the Allies or the United Nations would be consulted before these atomic weapons were used in Korea. The published article said: "Our allies in the United Nations command would be informed of these decisions when and if the time came to implement them, but meanwhile it was urgent to make sure that the Reds would not again act out of miscalculations."

The advance copy said President Rhee "did not know of Eisenhower's decision to bomb Manchuria and use atomic weapons." The published article omitted this sentence.

The phrase that Great Britain had experienced a "change of heart" over Dien Bien Phu was inserted into the published article. It was not in the advance copy.

This must surely be an inglorious late hour for Mr. Dulles to revive the squalid controversy over Dien Bien Phu. He himself, by a magnanimous gesture once authorized one of his principal advisers to tell all the British correspondents that there had been an "honest misunderstanding" between Mr. Dulles and Mr. Eden (as he then was). The State Department then repudiated all charges that Great Britain had been guilty of bad faith.

On August 14 Mr. Dulles wrote a memorandum proposing "a course for United States policy in the wake of Geneva." The published article omitted the first paragraph of this memorandum (hardly a deletion which will impoverish either contemporary wisdom or the judgment of history). Of considerable significance, however, is the omission from the published article of the statement that the memorandum "has since become the principal yardstick in the National Security Council for judging Soviet action and testing United States policy."

SELF-CONDEMNED

A cloud of aggrieved diplomatists can be summoned in Washington to testify that there never was any agreement that Britain or France would take military action as outlined by Mr. Dulles if the Geneva Conference failed to produce a settlement. But it is unnecessary to summon these witnesses. As Senator HUBERT HUMPHREY, a member of the Senate Foreign Relations Committee, indignantly said yesterday, it is only necessary to summon Mr. Dulles himself.

His secret testimony before the Foreign Relations Committee on the crisis in Indochina and later events involving the defense of the Formosa area can hardly be reconciled with the account as published in Life. Mr. Dulles has simply written an unnecessary footnote to a controversy which should not have been revived.

Mr. HUMPHREY. The Dutch reaction is shown by an article from the Hague, dated January 16, 1956, which I ask unanimous consent to have printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DUTCH PRESS SHARPLY CRITICAL

THE HAGUE, THE NETHERLANDS, January 16.—The Dutch press, which in the past has often found something to praise in the Eisenhower foreign policy, has turned its sharpest editorial comments against Mr. Dulles.

Newspapers ranging from London Catholic to Socialist have unanimously attacked both Mr. Dulles' definition of current United States foreign policy and his recollection of diplomatic history as related in the Life article. Some newspapers accused him of playing partisan politics. That is a charge heard only occasionally here and rarely in responsible newspapers.

The influential Nieuwe Rotterdamse Courant said the Life interview seemed to be a "plea for the Republican Party." This criticism came also from the Catholic De Tijd, which commented Mr. Dulles appeared to have been thinking more of the American electorate than of the United States' allies.

Mr. HUMPHREY. Mr. President, I read from that article:

The Dutch press, which in the past has often found something to praise in the Eisenhower foreign policy, has turned its sharpest editorial comments against Mr. Dulles.

Newspapers ranging from London Catholic to Socialist has unanimously attacked both Mr. Dulles' definition of current United States foreign policy and his recollection of diplomatic history as related in the Life article. Some newspapers accused him of playing partisan politics.

Away over in Holland, Mr. President:

That is a charge heard only occasionally here and rarely in responsible newspapers.

The Indian reaction was shown by the Hindustan Standard and the Times of India, and I ask unanimous consent to have an article from the Chalmer Roberts article in the Post of January 17, 1956, printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

Meanwhile, three independent Indian newspapers—the Indian Express, the Hindustan Standard, and the Times of India—attacked Dulles, Reuters reported.

The Express said the crudities of Dulles' practice of negotiating from strength persuades Russia and her satellites that American foreign policy is a mixture of bluff and blunder. The Standard said Dulles' concept of the art of going to the verge of war condemns millions to men to live in a state of perpetual fear and misery.

The Times said that Mr. Dulles has now increased the area of doubt and confusion, leaving little space on which to found clear and irrevocable convictions. America's friends and allies—and they are not to be scared away by Mr. Dulles—would welcome a clarification that draws the line between personal incompetence and state policy.

Mr. HUMPHREY. Mr. President, I wish also to bring to the attention of the Senate, as my distinguished colleague from Missouri [Mr. SYMINGTON] did yesterday, the article by Gen. Matthew B. Ridgway in this week's issue of the Saturday Evening Post. I wish to associate myself with the remarks of the Senator from Missouri and the Senator from Montana [Mr. MANSFIELD] which were made when the article was referred to.

The effect of General Ridgway's article is to reveal an administration willing to make extravagant boasts about our military capabilities, ready to threaten retaliatory war from a position of strength, and yet physically unable to back up its own threats.

Time does not permit me, under the unanimous-consent agreement, to read all of the three paragraphs which I have in my hand, taken from the January 21 Saturday Evening Post article by General Ridgeway, so I ask unanimous consent to have those paragraphs printed in the RECORD at this point.

There being no objection, the paragraphs were ordered to be printed in the RECORD, as follows:

As Chief of Staff, I quickly learned that though my own recommendations were made on a purely military basis, the decisions of the Defense Department were based on considerations other than clear-cut military needs. They were based on budgetary considerations, on political considerations, on the advantage to be gained in the field of domestic politics by a drastic reduction in military expenditures. I learned, too, with a certain sense of shock, that sometimes I was not expected to present my reasoned military judgment to Secretary of Defense Charles E. Wilson. On the contrary, incessant pressure was brought to bear on me, seeking to persuade me to make my views conform to a preconceived politico-military "party line." I also learned that no matter how strongly my views might differ from those of higher authority, it was not expected that I would let my nonconcurrence publicly be known. It was essential, I learned, that the policies of the Defense Department should be presented to the public as being the unanimous recommendations of the Nation's top military men.

As a combat soldier I have been shot at from ambush and bombed by planes which I thought to be friendly, both of which are experiences that are momentarily unsettling. I do not recall, however, that I ever felt a greater sense of surprise and shock than when I read in President Eisenhower's state of the Union message in 1954 that:

"The defense program recommended for 1955 * * * is based on a new military program *unanimously recommended* by the Joint Chiefs of Staff." [Italics by author.]

As a member of the Joint Chiefs of Staff, who most emphatically had not concurred in the 1955 military program as it was presented to the people, I was nonplused by this statement. The fact is, the 1955 budget was a directed verdict, as were the Army budgets for 1956 and 1957. The force levels provided in all three were not primarily based on military needs. They were squeezed within the framework of preset, arbitrary manpower and fiscal limits, a complete inversion of the normal process.

The pressure brought on me to make my military judgment conform to the views of higher authority was sometimes subtly, sometimes crudely, applied. On one occasion, when force levels were under discussion, Secretary of Defense Wilson pointed out to me that the forces recommended were approved by the President, who was himself a former soldier of wide experience, and that for me to express opposing views would place me in the position of taking issue with my Commander in Chief. "And that," he added bluntly, "would not be good."

My reply was that I had a profound respect for the President's military judgment, and I would hope that my views on military matters would always be in accord with his. However, I added, if my deep convictions led me to take an opposite view, I would adhere to that judgment until purely military arguments proved me wrong. I would not be swayed by arguments that what I advocated would be politically detrimental to the administration or that its cost was greater than a businessman's administration felt the country could afford. As a professional career soldier, these were matters beyond my purview.

I also pointed out that there is no one in the world today better qualified to judge what are the minimum needs of the Army in the atomic age than the Chief of Staff, who has available to him the best professional judgment of the entire Army command. Whatever their past experience might have been, all military men stand today on the threshold of a new and unknown world, and no human being can clearly foresee the form the wars of the future will take.

Mr. HUMPHREY. I merely wish to say that the situation which has developed as a result of the Dulles article, and now as a result of the article by General Ridgway, places this country and this administration in a most embarrassing situation. President Eisenhower had to go to the meeting on the "summit" to reassure the world that a peace-loving American people were in favor of world peace.

Now, because of the actions of our own officials, the President of the United States will again have to reassure the world that our desire is not atomic or hydrogen war, and that our design is not to dangle out on the precipice of peace by threat of retaliatory war. I hope the President will reassert America's position, and at the same time look with care and attention at General Ridgway's article, which severely chal-

lenges the veracity of the administration's claims in terms of defense.

As usual, General Ridgway has proved himself to be a patriot. He has put his country ahead of any partisan politics. I heard his testimony before the joint meeting of the Committees on Foreign Relations and Armed Services. I shall never forget the testimony he gave on the Formosa resolution. I shall never forget his courage, which might have cost him his job. I shall never forget his pointed remarks. I commend the general for his forthrightness.

PRESS CONFERENCE HELD BY THE SECRETARY OF STATE

Mr. SMITH of New Jersey. Mr. President, this morning the Secretary of State held a press conference and at that conference he made a statement with regard to the now famous article in Life magazine. I ask unanimous consent to have printed in the body of the RECORD at this point a press release issued by the Department of State dealing with the press conference this morning.

There being no objection, the press release was ordered to be printed in the RECORD, as follows:

JANUARY 17, 1956.

At his news conference today Secretary of State John Foster Dulles made the following statement:

"An article in Life magazine has attracted much comment. Let me say this: I did not write the article, I did not review or censor the article, or know of its title. I did not know in advance of its publication date and, in fact, I did not read the article until after it was released for publication. Having read it, I authorized our Press Office to say that the statements specifically attributed to me did not require correction from the standpoint of their substance.

"Most of the statements specifically attributed to me are quotations or close paraphrases of what I had already said elsewhere. One is somewhat ambiguously phrased but the ambiguity can easily be resolved if read in context and with reference to the many public statements which I have made.

"I believe that the United States should adopt every honorable course to avoid engagement in war. Indeed, I have devoted my whole life to the pursuit of a just and durable peace. I believe, however, that there are basic moral values and vital interests, for which we stand, and that the surest way to avoid war is to let it be known in advance that we are prepared to defend these principles, if need be by life itself.

"This policy of seeking to prevent war by preventing miscalculation by a potential aggressor is not a personal policy; it is not a partisan policy; it is a national policy. It is expressed in mutual security treaties which we now have with 42 nations and which the United States Senate has overwhelmingly approved. It is expressed in Public Law 4, whereby the Congress, by an almost unanimous bipartisan vote, authorized the President to use the Armed Forces of the United States in the Formosa area, if he deemed it necessary for the protection of Formosa and the Penghus.

"This policy of making clear our position in advance, of course, involves risks. As Senator Vandenberg said about the North Atlantic Treaty, it is a calculated risk for peace. But as we have learned by hard experience, failure to make our position known in advance makes war more likely because then an aggressor may miscalculate. The policy of deterrence is only one aspect of the task of maintaining a just and durable peace. It is necessary to be patient; it is necessary to be conciliatory; it is necessary to make our peace a vital force for justice and human welfare so that all men will aspire to share that kind of peace.

"My views with respect to peace have been made known on many, many occasions and there is no reason to think that they have altered because this article, dealing with complex subjects of foreign policy, inevitably tends to oversimplification and special emphasis."

PROFILES IN COURAGE, BY SENATOR KENNEDY

Mr. NEUBERGER. Mr. President, I believe all Members of the Senate, regardless of political affiliation, are proud of the notable new book written by the distinguished junior Senator from Massachusetts [Mr. KENNEDY], and just published.

The title of this book is Profiles in Courage. It details the careers of eight illustrious American political leaders who have placed loyalty to conscience above survival in public life. These men, their lives detailed faithfully and vividly by the Senator from Massachusetts [Mr. KENNEDY], are John Quincy Adams, Daniel Webster, Thomas Hart Benton, Sam Houston, Edmund G. Ross, Lucius Q. C. Lamar, George W. Norris, and Robert A. Taft.

The book has been issued under the imprint of Harper and Brothers, and it begins with a foreword by the famous historian, Allan Nevins.

Mr. President, it has been my privilege to read this fine book. I should like to say that it is not only a tribute to the eight great men whose bravery is chronicled therein, but also a tribute to the book's author, the Senator from Massachusetts [Mr. KENNEDY]. It tells something about a man who when himself stricken and on a sickbed, decided to occupy his time by preparing a book, and to select as his topic public figures who regarded honor as more important than victory, integrity as something to be desired beyond acclaim and fleeting popularity.

Furthermore, I should like to note briefly the fact that the Senator from Massachusetts has done full justice to a splendid theme. His book has a high literary quality. No American can read Profiles in Courage and fail to acquire a new pride in a Nation which can produce men who serve without selfishness and without fear. The book is particularly an inspiration to a reader who is in public life himself. It induces a sense of shame for past cowardice. It encourages a vow for future independence and bravery at a time of crisis. It emphasizes that there is something beyond political triumph, namely, political integrity.

I knew Senator Norris, one of the subjects of the Senator from Massachusetts [Mr. KENNEDY]. I stood with Senator Norris when he looked down on some of the great Columbia River waterpower projects he helped to advocate. He was a man, as the Senator from Massachusetts describes him, fearless, unselfish, and upright. I never knew Senator Taft, the other statesman of our era whom the Senator from Massachusetts has heralded. Although I did not agree with Senator Taft's views, I always felt that Senator Taft was a courageous and honorable public servant—and his physical valor was attested to by the way he met death. Indeed, I have always been glad that I wrote to him in the hosiptal expressing my admiration for his distinguished career, although of course I doubt if he ever saw the many letters he must have received.

I am certain every Senator has been happy to observe that Profiles in Courage has been reviewed with acclaim by eminent critics and correspondents in the foremost periodicals and newspapers of the day. The publication of this book has added eminence and luster to the Senate in general and particularly, of course, to the book's author, the Senator from Massachusetts. Personally, I should like to congratulate the Senator upon a most valuable literary and historical contribution. I predict that this book will be studied and read by students of government for many decades to come.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its clerks, announced that the House had passed, without amendment, the bill (S. 1745) authorizing the Secretary of the Interior to issue a patent in fee to Nellie Ohlerking Archambeau Moran.

The message also announced that the House had agreed to the amendment of the Senate to each of the following bills of the House:

H. R. 1146. An act for the relief of the Pacific Music Supply Co.;

H. R. 1447. An act for the relief of Aleksandra Borkowski; and

H. R. 3027. An act for the relief of Leo E. Verhaeghe.

The message further announced that the House had agreed to the amendments of the Senate to the bill (H. R. 1496) for the relief of Leong Ding Foon Quon and Ken C. Quon, with an amendment, in which it requested the concurrence of the Senate.

The message also announced that the House had disagreed to the amendment of the Senate to the bill (H. R. 1637) for the relief of Sam H. Ray; asked a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. LANE, Mr. FORRESTER, and Mr. MILLER of New York were appointed managers on the part of the House at the conference.

The message further announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 7588) for the relief of Jane Edith Thomas; asked a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. FEIGHAN, Mr. CHELF, and Miss THOMPSON of Michigan were appointed managers on the part of the House at the conference.

The message also announced that the House had agreed to the concurrent resolution (S. Con. Res. 59) requesting the President to issue a proclamation designating the week of January 29, 1956, through February 4, 1956, as National Junior Achievement Week.

ENROLLED BILLS SIGNED

The message further announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the President pro tempore:

S. 1166. An act to amend section 6 of the act of August 30, 1890, as amended, and section 2 of the act of February 2, 1903, as amended; and

S. 2170. An act to permit sale of Commodity Credit Corporation stocks of basic and storable nonbasic agricultural commodities without restriction where similar commodities are exported in raw or processed form.

ENROLLED BILLS PRESENTED

The Secretary of the Senate reported that on today, January 17, 1956, he presented to the President of the United States the following enrolled bills:

S. 1166. An act to amend section 6 of the act of August 30, 1890, as amended, and section 2 of the act of February 2, 1903, as amended; and

S. 2170. An act to permit sale of Commodity Credit Corporation stocks of basic and storable nonbasic agricultural commodities without restriction where similar commodities are exported in raw or processed form.

Mr. JOHNSON of Texas. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Texas will state it.

Mr. JOHNSON of Texas. Is the morning hour concluded?

The PRESIDING OFFICER. Is there further morning business? If not morning business is concluded, and the Chair lays before the Senate the unfinished business.

AMENDMENT OF THE NATURAL GAS ACT, AS AMENDED

The Senate resumed the consideration of the bill (S. 1853) to amend the Natural Gas Act, as amended.

Mr. JOHNSON of Texas. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Under the order entered on yesterday, the Senator from Arkansas [Mr. FULBRIGHT] is entitled to the floor, and is recognized.

Mr. FULBRIGHT. Mr. President, in one of his essays, Ralph Waldo Emerson observed that we Americans usually look upon history as something that occurred in the past. All too often we neglect the obvious fact that the current events of each passing day are the materials which go to make up the history of tomorrow.

The bill now under consideration—and our decision in regard to this bill—constitute a history-making event of the kind Emerson had in mind.

For the first time in our Nation's peacetime history, a highly competitive segment of our economy has been wrenched from the free enterprise system and converted into a public utility under the direct domination of the Federal Government. For the first time, a Federal agency has been given utility price-fixing powers over a competitively produced commodity at its point of production.

That such a turn of events has resulted, not from the clearly expressed will of Congress, but from a split decision of the Supreme Court, makes the problem even more serious. Under our system of government, only Congress can determine overall national policy in matters of this kind. Only Congress should make the decision—if such a step is deemed to be in the public interest—to scrap competition in favor of this expanded and completely unprecedented utility concept. I personally do not believe that Congress ever intended—or that it intends now—to attempt the Alice-in-Wonderland feat of making a public utility out of an enterprise which has absolutely none of the characteristics of a public utility.

The Supreme Court's 5-to-3 split decision in the Phillips case did nothing to alter the ultimate responsibility of Congress for deciding this issue. Mr. Justice Douglas made this clear in his vigorous dissent to the majority opinion. The history and language of the Natural Gas Act, he said quite correctly, are against direct Federal jurisdiction over the sale of natural gas at its point of production.

If that ground is to be taken—

Mr. Justice Douglas said in his dissent—

the battle should be won in Congress, not here. Regulation of the business of producing and gathering natural gas involves considerations of which we know little and with which we are not competent to deal.

Some of those who oppose this bill have protested that it would reverse a decision of the Supreme Court. That is not a valid objection. Congress is supposed to write the law, the Supreme Court merely to interpret it. As Mr. Justice Douglas indicated, a strong case can be made for the opinion that the Supreme Court majority, instead of simply interpreting the law, actually rewrote the law through the Phillips decision.

Mr. DOUGLAS. Mr. President, would my good friend, the Senator from Arkansas, be willing to yield at this point for questions; or would he prefer to make his speech without interruption, and then have questions asked regarding it? In his presentation, he seems to have reached a point where questions might be appropriate.

Mr. FULBRIGHT. I shall be glad to yield to a reasonable extent for questions.

Mr. DOUGLAS. I thank my colleague.

Is it not true that the act itself provides, in section 1 (b), that it shall apply to the sale in interstate commerce of natural gas for resale for ultimate public consumption?

Mr. FULBRIGHT. That is correct; but the next clause, which gives jurisdiction, provides:

But shall not apply to any other transportation or sale of natural gas or to the local distribution of natural gas or to the facilities used for such distribution or to the production or gathering of natural gas.

Mr. DOUGLAS. Is not the sale of natural gas to a pipeline for interstate traffic a sale in interstate commerce of natural gas for resale?

Mr. FULBRIGHT. I think it is quite clear from the legislative history of the act what the intent was. Mr. Justice Douglas examined that question. I am sure that the eminent Senator from Illinois has deep respect for the great Justice Douglas. They enjoy a common heritage.

Mr. DOUGLAS. He is a very able justice, but he is sometimes mistaken, as he was in this case.

Mr. FULBRIGHT. He may be frequently mistaken, but in this case he wrote a most persuasive opinion. In the Hope Natural Gas case Mr. Justice Jackson, who did not participate in this case, made remarks which I think are very appropriate, and I have no doubt that both of those justices were greatly influenced not only by the legislative history of the act, but by the "facts of life" with regard to the natural-gas industry. Both are astute, curious, and intelligent men. I am sure they realize that it is utterly impracticable, if not impossible, to apply the utility-cost concept to the production of natural gas. Therefore they would not want to do a foolish thing. They would not want to misinterpret an act so as to achieve an utterly ridiculous result, so they both said that the act did not apply to the production of natural gas, including the sale by the producer to the interstate carrier.

Mr. DOUGLAS. Is my good friend from Arkansas saying that the dissenting opinion is really the correct opinion?

Mr. FULBRIGHT. It is the correct opinion. That is often true. I have often heard the Senator from Illinois expound on that question, particularly with regard to opinions by such Justices as the great Justices Holmes, Brandeis, and others. I am sure the Senator would not argue that point.

Mr. DOUGLAS. I was not only intrigued but shocked by the statement of my good friend from Arkansas that the legislative history clearly indicated that there was no intent on the part of Congress to regulate the price of gas sold by producers to interstate pipelines for resale. If the Senator from Arkansas will examine the debates in the Senate he will find that Senator Connally, of Texas, addressed a direct question to Senator Wheeler, of Montana, who was in charge of the bill. The question ran approximately as follows:

"Would this bill regulate the price of gas which producers receive for the gas which they sell to interstate transmission lines?"

The reply of the Senator from Montana was, "Exactly."

The Senator from Arkansas is altogether too scrupulous to advance the argument which has been advanced by others, in connection with the statement by Mr. DeVane in 1936, when he appeared before the committee in that year. Mr. DeVane stated that it was not the intention of the proponents of the bill to regulate the price of gas sold by producers to interstate pipelines. That statement has been frequently quoted.

However, neither the Senator from Oklahoma [Mr. MONRONEY] nor the Senator from Arkansas has advanced that argument.

The truth of the matter is that the DeVane statement was made 2 years before the 1938 bill was passed, and with respect to an entirely different bill, which referred only to transportation, and did not refer to sale in interstate commerce of natural gas for resale.

Mr. FULBRIGHT. Let me say to the Senator from Illinois, that this question was argued at length yesterday. I recall distinctly what the Senator from Illinois said. He certainly has a right to his opinion. I recall what the Senator from Oklahoma [Mr. MONRONEY] said. He has a right to his opinion.

I submit, however, that the question to which reference has been made is largely insignificant and irrelevant, for many reasons. As I shall try to illustrate, the issue now is this: Which system is more practical, and which, in the long run, would more greatly benefit the consumers of the country as well as other interested people, including producers? Should we allow the law to remain as it is, or should we pass this bill?

The debate about the history of the act is interesting as an academic dissertation, and I enjoyed listening to the debate yesterday. I am not criticizing it. I think the question should be covered at least once; but I think it is not particularly pertinent at all times.

My thesis is this: Here we are. We are faced with a decision as to whether or not the traditional utility control concept of cost-plus is the more practical, the more likely to insure the long-term welfare of the consumer as well as the producer, both of whom have legitimate interests in this matter. Or would the pending bill be more likely to promote the welfare of both the consumer and producer? I take the position that the bill is positively, definitely, and I think demonstrably, in the interest of the consumer, especially consumers in the Chicago area, who now are applying for gas and are unable to get gas at any price.

Our figures show that in the Chicago area about 125,000 would-be consumers are without gas. In the northern Illinois territory there are about 250,000 without gas. I am confident in my own mind that enactment of the bill will hasten the time when those people can get the gas, at a price they are willing to pay—a reasonable price, as set by the Federal Power Commission.

That, really, is the only issue involved here. I cited the past history because I thought the Senator would have a considerable regard for the opinion of Mr. Justice Douglas. The last line of his opinion is most significant to me. Justice Douglas said that "this involves considerations of which we know little, and with which we are not competent to deal."

I am quite confident that he felt this case was so complex, involving matters of fact in the gas business, that he did not believe the Supreme Court Justices were competent to deal with such a case. I think that is true. I really do not think it makes much difference what the old-timers said. In the light of experience, I have no doubt that this bill, with its provisions for regulation, under the Federal Power Commission, with the idea of a reasonable market price, is the solution to the difficulty. That is about all the issue there is.

Mr. DOUGLAS. I am very glad the Senator from Arkansas has made that statement. I think the issue is whether we wish to repeal the Natural Gas Act of 1938. Some persons have said, however, that the Harris-Fulbright bill merely interprets the act of 1938, makes it what it was originally intended to be.

Mr. FULBRIGHT. It clarifies it.

Mr. DOUGLAS. Since the Senator from Arkansas seemed to give some support to this misinterpretation by reason of the deservedly high prestige of his record, I thought the matter should be set to rights, and the facts should be known before we proceed to the substantive merits or demerits of the argument.

Now that the Senator has very frankly stated that this is not a matter of importance, the Senator from Illinois is willing to let it pass for the moment; but when he takes the floor in his own right, he will produce, he believes, overwhelming evidence to indicate that the Congress intended such a meaning all along.

Mr. FULBRIGHT. It is perfectly proper for the Senator to bring forth evidence to support his case. All I say is that, as of now, the question is largely irrelevant. It is not of particular importance.

What we are really interested in, in light of experience under the act and in light of all the circumstances now before us, including the facts of the industry and everything else, is not only the history of the act, or the discussions which took place in the Congress, but the way it was interpreted at the time. As was pointed out yesterday in 1938 the members of the Federal Power Commission were given the duty of interpreting the act. In that case there was only one dissent. A man who was well known to the Senator from Illinois interpreted the act in a contrary way.

We are also interested in knowing how the act was interpreted up until 1954, in accordance with the bill which we now submit for action by the Senate.

What it is proposed to do by the bill is to clarify the Natural Gas Act, and, in the interest of consumers, provide a basis for a workable Federal policy in connection with natural gas.

Let me say at the beginning that I do not believe—and I think it is a wrong assumption to make—that the interests of the consumer and the interests of the producer are necessarily antagonistic. I do not accept the idea which seems to be implicit in much of the criticism of the bill, that one or the other must have the advantage. I think that under our system of free enterprise, when it works properly—both sides are treated fairly. Both sides have a legitimate advantage. I believe that is the case here. The passage of the bill will be to the benefit of both consumers and producers. If the bill does not pass, and if the unnatural and wholly unrealistic idea of cost-plus regulation is sought to be applied to the production of natural gas, both sides will be injured in the long run. Therefore I believe it is wrong to assume, merely because one side or the other may favor the passage of the bill, that either side will necessarily be harmed.

I shall say one further word before I proceed with my statement. It is claimed that the consumer, as such, or the individual residential consumer, is opposed to the bill. The only real opposition to the bill comes from the big utility companies, which have a very special interest, one which is not at all necessarily the same as the interest of the residential consumer, but is in retaining a large industrial load in certain areas. That is particularly true on the eastern coast, where there is strong competition from cheap foreign oil. That is a matter we will discuss later. However, it is evident that the consumer opposition is rather slight.

Mr. PASTORE. Mr. President, will the Senator yield for a short question?

Mr. FULBRIGHT. I am glad to yield for a question.

Mr. PASTORE. Based upon what the distinguished Senator from Arkansas has stated, would he be willing to consider favorably an amendment which would modify the strict cost-plus basis by taking into account the nature of the producer's activities, making allowance for the type of business he conducts, and at the same time adhering to a formula which would be just and reasonable, and under which the burden of proof would not be on the Federal Power Commission, as it would be under the pending bill?

Mr. FULBRIGHT. I believe the bill does exactly that. The Federal Power Commission actually does represent the interests of the consumer. That is what Commissioner Kuykendall said in the hearings. He was asked who represented the consumer, and he said, "Our staff represents the consumer."

I believe the bill does exactly what the Senator says, except for the very significant play on words. I know the Senator from Rhode Island is a very distinguished lawyer, and he knows better than I do that the words "just and reasonable" are words of art. He knows that by use over many years in many cases they have come to mean the utility cost-plus basis. That is what they mean. Words of art are not necessarily logical. However, they do achieve a meaning through constant use. That is what those words have come to mean. That is the whole reason for my objecting to their being applied here. We believe that adding them to the bill would make the bill say what the courts have said.

Mr. PASTORE. Would the Senator from Arkansas consider an amendment on page 6, in section 3, to strike out the words "reasonable market price" where they appear on that page, and insert in lieu thereof the words "just and reasonable price"? Beginning on line 22 of page 6 the text would then read:

In determining the just and reasonable price of natural gas under the provisions of this section 5, the Commission shall consider, among other things, whether such price has been competitively arrived at, the effect of the contract upon the assurance

of supply, and the reasonableness of the provisions of the contract as they relate to existing or future prices.

If the Senator from Arkansas is disturbed over the precedented meaning of "just and reasonable," it strikes me that if we were to add as an adjunct to "just and reasonable" the language I have proposed, we would remove ourselves from a man-made market—and I say that advisedly, because all witnesses at the hearings admitted that it was seller's market, not a buyers' market—and we would still adhere to the principle of "just and reasonable" and expand the liberality of the application of that rule to take into account the other circumstances which appear to be so important to the proponents of the bill.

Mr. FULBRIGHT. Mr. President, I say to the Senator from Rhode Island that I will not consider such an amendment, because I believe it is without any merit whatever and adds no virtue to the bill. That is exactly what the bill does. Adding the words "just and reasonable" would merely confuse the issue. Furthermore, there would be uncertainty as to what we were doing.

I also object to the suggested method of controlling the producers. The direct control which results from the court's decision is in itself impractical, aside from the formula. It would be necessary, under the decision in the Phillips case, to deal with nearly 8,000 producers. There are over a thousand recognized gatherers and an estimated 8,000 producers of natural gas. It is an impractical way to achieve the result. It is a very ingenious and effective way of checking approximately 30 important interstate lines. Therefore I would object to the direct application of the formula to the producers.

However, I am frank to say that the bill reaches our objective very well, and I see no reason for quibbling about the meaning of "just and reasonable," when it is perfectly clear what we mean by a reasonable market price, as the term is used in the bill.

On the one hand, the bill perpetuates the competition already prevailing among natural-gas producers and insures that consumers will reap the benefits of this competition. On the other hand, it guarantees consumers that they will not be charged more than the reasonable market wellhead price for natural gas.

In this opening statement, I want to outline briefly the events which led to the introduction of this bill. I want to review with my colleagues the provisions of the bill and tell them why, in my opinion, they offer a sound solution—and a fair solution—to the problem before us. I want to discuss the reasons why enactment of this bill is in the best interests of American consumers everywhere. Finally, I want to touch on some of the bugaboos, some of the statistical specters, and some of the gross misrepresentations on the part of a few which have been raised in opposition to it.

As to the latter point, it might be well to mention right here one of the most flagrant of those misstatements. I refer, of course, to the argument that this bill is a decontrol bill—one which would allegedly place the consumer of natural gas at the mercy of some 8,000 independent producers. That just is not true. Anyone who reads the bill carefully must surely realize that it is not true.

Mr. DOUGLAS. Mr. President, will the Senator yield for a correction?

Mr. FULBRIGHT. In a moment.

I may say that practically every newspaper and every reporter, both on the radio and in the press, have insisted on saying that the bill exempts the producers from control. The issue before us is not one of control versus decontrol. It is not one of regulation as opposed to no regulation. On the contrary, it is one that revolves around the method of control to be used, around the method of regulation.

I now yield to the Senator from Illinois.

Mr. DOUGLAS. I ask the Senator to look at section 5 of the act and, then at section 2, paragraphs 10 and 11 of his amendment. As I understand, what he proposes is that such regulation is to be in effect only after the producer has made his sale to the pipeline. In other words, as I understand, his bill does not regulate the price at which the producer sells his gas to the pipeline. Is that true?

Mr. FULBRIGHT. No; the Senator from Illinois knows that all laws must be interpreted under a reasonable rule. He knows that if a pipeline, which is transporting gas, we will assume, from Louisiana to New York, can expense only a certain amount, the reasonable market price, it will not buy from the producer at an unreasonable price. However, what difference would it make to the consumer if the pipeline should choose to do so in special cases?

It will not do it if it wants to stay in business. There are many alternative sources of supply and if any producer demands a price greater than the pipeline company can expense as the reasonable market price——

Mr. DOUGLAS. But the point I am trying to make is that at best, all the bill of the Senator from Arkansas does is to limit the degree to which the pipeline company can pass on to the distributors the price which they pay.

Mr. FULBRIGHT. That is correct.

Mr. DOUGLAS. The Senator from Illinois and the Senator from Rhode Island think this protection is very inadequate, in that it does not regulate in any degree the price which the pipeline company can pay to the producer in the field. What it does is to substitute, at best, indirect control for direct control.

Mr. FULBRIGHT. There is a perfectly good reason, as I said a moment ago, for substituting indirect control for direct control. Furthermore, the administrative difficulty of dealing with 8,000 different producers would be tremendous.

Mr. DOUGLAS. We can argue the merits of it later. At the moment all I am trying to establish is the fact that the bill proposes, at best, to substitute an indirect type of control for what would otherwise be a direct type of control.

Mr. FULBRIGHT. If all persons would be as fair as is the Senator from Illinois in that connection, I would have no complaint. But it is an absolute misstatement of fact, and it leads to misunderstandings, to say that the bill decontrols. It substitutes indirect control for direct control.

Mr. DOUGLAS. The term "reasonable market price" which the Senator uses as his criterion is ineffective and question-begging.

Mr. FULBRIGHT. If the Senator wishes to assume that the Federal Power Commission is inefficient, that is one thing, but the Federal Power Commission will still be the agency in charge, and, assuming that it is reasonably efficient, it can do one as easily as the other.

Mr. MONRONEY. Mr. President, will the Senator from Arkansas yield?

Mr. FULBRIGHT. I yield to the Senator from Oklahoma.

Mr. MONRONEY. I know my distinguished colleagues, the senior Senator from Illinois and the junior Senator from Rhode Island, in their claim that the control is indirect, are automatically stating that direct control, and only direct control, is effective. I point out that even with the control afforded by the law of supply and demand the price of the raw gas has been held to an infinitesimal amount as compared with the price charged under direct regulation by public utility commissions.

I should like to point out, if I may, that while the gas cost at the wellhead in Denver is 10.9 cents and the city gate cost is 23.8 cents, regulated by the Federal Power Commission, the spread there is at least 20 cents in the case of city delivery. That is an example of the successful direct control such as the two Senators are advocating.

There are a few other examples, such as Cincinnati, with a city delivery cost of 26 cents; also Kansas City, with a 30-cent spread. But there are also costs which seem to show there has been a breakdown of direct control. The rate which the average consumer pays in the city of Chicago is 95 cents for gas which cost 11.2 cents in the field, and the city delivery spread of 71 cents may indicate that direct control is breaking down. Perhaps there are not sufficient funds for the employment of engineering talent for the public utility commission to regulate the spread in the city delivery cost.

We can go on to Milwaukee, where the distinguished senior Senator from Wisconsin [Mr. WILEY] complains about the 9.9 cents cost for the raw gas, but he swallows the 26-cent city delivery charge. Again, does direct control always mean a lower rate to the consumer?

We can go on to the city of Baltimore in the great Free State of Maryland. Some of the gas used there is Appalachian gas, costing 14.8 cents at the wellhead, but it costs 83 cents to take it from the city limits of Baltimore to the burner tip.

In the city of Washington the mains must have been laid out through granite, because the rate is very high for city delivery.

In Philadelphia the gas costs 10 cents at the wellhead, but it costs more than 90 cents to go through whatever the nature of the soil is which underlies the city of Philadelphia.

There is Providence, R. I., with $1.03; New Haven, $1.05; Newark, N. J., $1.42; Brooklyn, $1.90; and New York City, $2.07.

I may say to my distinguished and able colleagues that this represents the simplest operation in the gas business, namely, taking the gas from the city gate to the customer's burner tip. In most of the cities where I have shown the rate is the highest, the consumers are concentrated in groups of 100 to 500 and 1 pipe serves the whole number. The cost of the lateral line is paid by the owner of the apartment house. Direct regulation may not be as good as the reasonable-market-price method. The progressive, forward-looking thinker that the distinguished Senator from Illinois is——

Mr. FULBRIGHT. Is the Senator from Oklahoma asking me a question?

Mr. MONRONEY. In view of the fact that I have pointed out the tremendous spread for the simplest job, that of distributing gas, perhaps I might suggest that in the breakdown of direct regulation the consumer might find that there would be a saving in 50-cent pieces in connection with the cost of the gas.

Mr. FULBRIGHT. I think the Senator from Illinois would admit that except for peacetimes, controls are, generally speaking, indirect. I have heard the Senator from Illinois discuss the matter and say that in peacetime indirect control is more simple, more effective, and more conducive to the free enterprise system than is direct control. In wartimes we have tried direct control, but in the OPA days we did not use the cost-plus formula for control. We used the formula of reasonable market price, which is what we use in this bill.

Mr. DOUGLAS. Mr. President, will the Senator from Arkansas yield?

Mr. FULBRIGHT. I shall be glad to yield, but much of what is being said was said yesterday, and I should like to complete my statement.

Mr. DOUGLAS. The Senator from Oklahoma has conducted an intellectual skirmish against me through the device of a parliamentary question to the Senator from Arkansas which came at the end of a long speech. I wonder if the Senator from Arkansas would permit me to reply to the Senator from Oklahoma, again using the parliamentary device of a question.

Mr. FULBRIGHT. I think I will ask unanimous consent to permit the Senator from Illinois to reply to the Senator from Oklahoma for a minute and a half.

Mr. DOUGLAS. Oh, no.

Mr. FULBRIGHT. Is not that sufficient time?

Mr. DOUGLAS. No; I should like to have at least equal time.

Mr. FULBRIGHT. I did not recognize what the Senator from Oklahoma was doing; otherwise I would have interjected. I thought he would come to the question, and he finally did. How much time would the Senator from Illinois like?

Mr. DOUGLAS. I think the Senator from Oklahoma took 7 minutes.

Mr. FULBRIGHT. I could not possibly allow that much time. I will allow the Senator from Illinois 3 minutes. Is that agreeable?

Mr. DOUGLAS. I shall do the best I can.

Mr. FULBRIGHT. Mr. President, I ask unanimous consent that the Senator from Illinois may have 3 minutes. This is not to be taken as a precedent.

The PRESIDING OFFICER. Without objection, the Senator from Illinois may proceed for 3 minutes.

Mr. DOUGLAS. Mr. President, the Senator from Oklahoma, I believe, tried to lead us down a bypath to discuss a subject not connected with the bill.

The Senate cannot interfere with the local regulation of utility rates. That is a matter for the States and exclusively for them. We can, however, deal with the rates charged by producers to pipelines for natural gas in interstate transportation, and that is what we should deal with. We do not get anywhere with a description of the spread between city gates and burner tip.

I am not here to hold any brief for local gas companies. As a matter of fact, my entry into public matters was to try to get the gas rates in Chicago reduced in the days of Samuel Insull. That effort proceeded for several strenuous years, until Mr. Insull collapsed. I recognize that State regulation in many States has broken down, but I think it is necessary that we keep on trying.

I wish to point out to my good friends from Arkansas and Oklahoma that what they have quoted are residential rates. Furthermore, in some cities I think it will be found that the companies are using mixed gas, and not pure natural gas. Also, there are heavy costs incident to connecting gas mains to the houses and in inspecting, billing, and collecting the accounts and in other managerial and administrative functions plus a return on invested capital.

It should be remembered also, as the chart in the Chamber shows, that during the summer months the residential use of gas falls away to almost nothing, because there is no need to heat houses with gas. As a result, in most cities the companies have to turn to what is called interruptible industries to help fill the gap. Interruptible gas is sold to industry at a very low rate. So if we compute the average price for residential, industrial, and commercial use, it comes to between 43 and 44 cents per 1,000 cubic feet, as compared with an average field price of 10.7 cents. So the field is getting, roughly, 23 percent of the price charged in the cities. The average pipeline price at the city gates comes close to 25 cents. So the average distribution cost is 18 or 19 cents out of a 44-cent charge.

I do not know whether this markup is excessive. I do not know whether the rates are equitable in all localities. But I submit that the situation is not so glaring as the Senator from Oklahoma and the Senator from Arkansas have led us to believe.

We should furthermore remember that the real test is the rate of return upon investment. This is subject to regulation by the State utility commissions. Why do the Senator from Arkansas and the Senator from Oklahoma propose to exclude producers from this type of regulation, to which the distributors are subjected?

I thank the Senator from Arkansas for his courtesy in yielding.

Mr. FULBRIGHT. If the Senator from Illinois will pay very careful attention to my reasoning as to why such regulation is not applicable to the producers, I think he will become convinced, because there is no similarity whatever between the circumstances of the producer and those of the distributor. There is no more relationship between them than, as Mark Twain once said, there is between lightning and a lightning bug. The relationship is about the same.

The relevancy of many of these questions is very remote, and the answers to them would make very little difference. But I call the Senator's attention to the percentage of profit of some of the leading utilities which are opposing the bill. I refer to the profit on their equity capital.

Commonwealth Natural Gas, with a profit of 27.7 percent, is one of the largest ones. Lynchburg Gas Co. shows a profit of 11.8 percent. The one which was mentioned yesterday, considered to be the very choicest morsel of all the local distributing companies, the Minneapolis Gas Co., has averaged for 4 years in the neighborhood of 16.3 percent. I have a list of all the companies before me.

Mr. DOUGLAS. Mr. President, would the Senator be willing to explain his figures? This is not the average rate of return on invested capital, is it?

Mr. FULBRIGHT. No; as I stated it is on equity capital. However, I do not think that is pertinent. I think what is pertinent to the bill is whether or not the method of control of the price will, in the long run, work to the benefit of the consumer and the producer, in a reasonable and fair sense, so that both can continue, the one to stay in business, the other to enjoy natural gas. I think they are mutually interested in a proper solution of the problem.

I do not believe it will do the consumer, and especially those who wish to be consumers, as in Chicago, any good to have a cheap price under a utility formula, but to have no gas. That is really the entire essence of the argument I am trying to make. I am trying to prove that the Senator from Illinois is on the wrong track in seeking to impose a utility type of cost-plus regulation on this business.

I submit, not that it is an original thought, that it would be more in the interest of the orderly conduct of the debate if the Senator from Illinois would permit me to say a few words. Not that what he may say is more or less irrelevant; it is not wholly irrelevant; but what the profits of the distributor or the gas company may be is not the crux of the matter. What the distributor or the gas company may make is really of secondary interest. What we are really interested in is the long-term future of the business, so that the consumers may have gas available in as adequate a quantity as it is possible to supply at a reasonable market price and that the producer will be able to stay in business and continue to develop and supply gas.

Mr. DOUGLAS. I recognize that the Senator from Arkansas has been merely skirmishing, so to speak, up to this point.

Mr. FULBRIGHT. That is correct.

Mr. DOUGLAS. I feel certain the Senator from Arkansas does not mean to say that in the process of skirmishing, which precedes the real conflict of issues, only one side should fire its shots, while the other side should remain completely silent.

Mr. FULBRIGHT. I certainly do not. I think, however, that under the customs of debate in the Senate, it is usual for a Senator to deliver his speech, and then to have comments made more or less in a critical way of specific points. I did not object to the questions asked by the Senator from Illinois; I was merely reminding him that many of the issues were covered yesterday as skirmishing points.

The overriding issue, in short, is this:

Shall we, from among the hundreds of competitive industries in America, single out the producers of natural gas for Federal utility controls? Shall we restrict them to an arbitrary return on their successful ventures, to nothing at all on their unsuccessful ventures, and in so doing completely throttle the incentives of competition?

Or shall we, in the consumer interest, preserve the proven benefits of competition at the producer level and, at the same time, add an additional consumer protection: a guarantee to the consumer that he will not be charged more than the reasonable market price.

The answer given in this bill is a realistic one. It is based on sound and workable controls. Does it not make more sense, is it not obviously more efficient, to control the prices that some 120 pipelines pay for their gas rather than to attempt to fix the prices at which more than 8,000 producers sell the same gas? The method spelled out in this bill is the workable way, the efficient way. The alternative method would create tremendous problems, lead to endless delays and infinite amounts of red tape, result in inescapable inequities, and greatly increase the expense of regulation.

The answer given in this bill is one that recognizes that it is very much in the public interest that competition be encouraged in a field where competition has already built an indisputable record of service to the consumer.

From 1938 through 1953, for example, a 16-year period when competition was the only regulator of field prices, on a national average, the price of gas went up from 4.9 cents a thousand cubic feet to 9.2 cents—an increase of less than a nickel per thousand cubic feet.

I may again call attention to the fact that the increase was less than the increase in the cost of living during the same period. It was less by more than 2 percentage points. Of course, we do not deny that the price of gas has gone up, but it has gone up less than has the general cost of living. Everything has gone up. As I recall, the cost of steel rose about 107 percent between 1943 and 1953. I believe those were the dates. The cost of labor in the oil and gas fields in the same period went up 147 percent. Obviously the price of gas had to go up. The significant thing is that it did not go up as much as did the cost of living index. In other words, gas at the well head actually sold for less in 1953 than it did in 1938, in terms of a constant dollar.

I know of very few of the basic commodities that have as good a record. Take copper, steel, aluminum, coal, and so on. I know of none that has a comparable record.

The alternative answer to the issue—Federal utility control—is not pleasant to contemplate. Under Federal utility controls applied at the producer level, the only result—over the long pull—can be one of less gas at higher prices. Such is the probable consequence of unrealistic Government meddling with the competitive production of consumer goods.

The handwriting has already begun to appear on the wall. During the first 11 months of last year—the figures for December are not yet available—oil-well completions in America increased 8 percent. Gas-well completions, however, dropped 8.6 percent. If this trend continues, and I am convinced it will as long as utility controls are applied at the wellhead, the natural-gas consumer may soon find himself in the same situation as the lady who was pricing hamburger at her neighborhood market. When the butcher told her it was 69 cents a pound, the lady complained bitterly. "Why, down the street," she said, "I can get it for 39 cents a pound."

"Then why don't you buy it there?" the butcher asked.

"Oh, they're out of hamburger," the lady said.

"Well, that's different," said the butcher. "When we're out, our price is only 15 cents." [Laughter.]

The same sort of situation could easily develop in the gas industry. To call a producer of natural gas a public utility, to put him in that category by judicial or legislative fiat, is like classifying a horse as a cow. It may look good on paper, but it is an awfully poor way to increase the production of milk or effectively lower its price.

Of even greater importance, the alternative answer to the issue—Federal utility control—would mean congressional approval of a precedent for applying similar utility controls to the production of other consumer commodities and products. It would mean approving a precedent which could lead to clamping such controls on coal, oil, steel, automobiles, and hundreds of other items, all of which are no less charged with the public interest than is the production of natural gas.

Disraeli once remarked that a precedent embalms a principle. By making gas production a public utility, we shall have prepared a shroud for our competitive enterprise system. We shall have dug the grave into which other constituents of this system shall one day fall.

Such is the issue we face. Let us consider now, for just a few moments, some of the facts and situations which have led up to this issue.

By its very nature, the overall natural gas industry is divided into three separate segments: production, transmission and distribution, each of which performs a distinctly different function.

At one end is the producer, the individual or company that rounds up the necessary amount of risk capital, explores for gas, and—when and if gas is found—develops it for the market. On a national average, only about 1 out of 9 wildcat wells drilled for oil and gas are successful. Of all wells drilled, nearly 40 percent are dry holes.

The Nation's producers, sell about half of the gas they find to consumers within the State where produced. The other half—the part with which we are here concerned—is sold to interstate pipelines which transport the gas to the non-producing areas. There the gas is sold direct to industrial consumers or to local distributors, who then pipe it to the burner-tips of their customers.

Now, of these 3 segments, 2 of them—the interstate pipeline and the local distributor—enjoy a variety of Government-granted advantages. They can avail themselves of the right of eminent domain. They are shielded from many of the risks and vagaries of competition. They are granted marketing franchises in a certain geographical area.

In a word, then, the interstate pipeline and the local distributor are public utilities. Because they are, because they enjoy Government-granted advantages which are tantamount to a legal monopoly, the rates they charge for their services are—and should be—fixed by governmental authority. Their accounting practices are generally uniform. Their costs are easily ascertainable.

In the case of the producer, however, the situation is completely different. No Government agency shields him from competition. He must compete with thousands of other producers for leases before he can drill a single well. Should he be lucky and hit that 1-to-9 shot, he must compete with many other producers for a market. No one guarantees him a return on his invested capital, thus eliminating the tremendous risks he must take. His is inescapably a business of economic imponderables. His costs are almost impossible to ascertain.

The producer, in short, has not a single characteristic of a public utility. He is no more a public utility than is the man in West Virginia who sells coal to an electric company in New York, no more one than the oil producer who sells diesel oil to a railroad, no more one than the Detroit manufacturer who sells buses to our local transit company, no more one than the California manufacturer who sells airplanes to the airlines of America, or no more one than General Motors, which builds the locomotives which pull the trains.

When anyone says that the production of gas is a public utility function, it reminds me of the college professor who was giving a makeup quiz to the star halfback. The crucial question was: What is a lobster?

The answer given by the football star was that a lobster is a red fish which swims backward.

"That's right," said the professor, "except, of course, it isn't a fish, it isn't red, and it doesn't swim backward."

Congress made no mistake of this sort when it passed the Natural Gas Act in 1938. It took into account the fact that the production of natural gas is not a utility function, and the legislative history of the act reveals quite clearly that Congress intended the law to apply only to the interstate carriers of natural gas. It made that quite plain—or thought it did—when it said in section 1 (b) that the provisions of the act "shall not apply to any other transportation or sale of natural gas or to the local distribution of natural gas or to the facilities used for such distribution or to the production or gathering of natural gas."

In 11 separate cases prior to the Phillips decision, the Federal Power Commission observed that exemption. But on June 7, 1954, the Supreme Court rewrote, in effect, the law. It ruled, by a split 5-to-3 vote, that gas producers selling to interstate pipelines were making sales of gas in interstate commerce for resale. Therefore, said the divided court, the Federal Power Commission must assume jurisdiction over these producers, despite the exemption in the act.

The court majority cited consumer protection against exorbitant prices as a primary factor in its decision. But was there, on the field level, any evidence of exorbitant prices? No such evidence has been produced.

The simple facts are that the field price of gas—a price which went unregulated up until June 7, 1954—has been one of the greatest bargains of the postwar era. Even today, in the State of Illinois, there are, I understand, some 265,000 would-be gas-customers who have applied for gas service. Does anyone suggest that these thousands of Illinois citizens—125,000 of them in Chicago alone—are doing their utmost to get natural gas because they are eager to be gouged?

Let us look at a few figures: As of now, on the average about 10 cents of every dollar the residential consumer pays for gas goes to pay for the commodity itself. All the rest, the 90-cent lion's share, goes to the interstate pipelines and the local distributors for the service of transporting and delivering the gas. In some cities, such as New York, the field price actually accounts for less than four cents out of every dollar the household consumer pays. It is in the local distribution segment of the industry, a segment which always has been regulated, that the big mark-up, the big spread over field and city-gate costs, may be observed.

These mark-ups vary widely, as has been pointed out, here on the floor. In Boston, for example, the local distributor's spread is more than $2 on each thousand cubic feet. In Baltimore, it is about $1.18 on each thousand cubic feet. But in Kansas City, it is only about 29 cents on each thousand cubic feet. In all fairness, it should be pointed out that there is a distinct correlation between the amount of gas consumed per customer and the distributor's markup. In Kansas City, the average customer consumes about 222,000 cubic feet a year. In Baltimore, average consumption is 42,800 cubic feet a year. In Boston, the annual volume is only about 22,000 cubic feet a year.

These figures show two things: One is that political control over gas prices is no guarantee of low prices. The other is that the customer's primary interest lies with increased supplies of gas, since the more gas a distributor handles, the lower the cost per unit delivered. Only through increased supply and increased consumption can there be any lasting reduction in the ultimate cost to the residential consumer. If there is one thing which I think stands out in the statistics on this subject, it is the importance of increased consumption, as regards lowering the price.

In the Commerce Committee hearings, even those who opposed the original bill recognized the great risks and the vigorous competition which mark the gas-producing business. Their primary objection was directed at certain types of escalation clauses in the field contracts—clauses by which the producers, who must usually sell their gas for 20 years at a time, had hoped to insure themselves against a decline in the purchasing power of the dollar.

These opponents of the bill, most of them announced, stood four-square for competitive enterprise. But they said that they objected strenuously to the so-called favored nation type of escalator clauses. The bill was amended so as to place on these clauses the ceiling of a reasonable market price—a price the Federal Power Commission will determine. It was amended so as to restore competition to the field level, and to hold to a minimum the burdens of federal control. At the same time, however, these amendments gave the Federal Power Commission full and effective control over the price that a pipeline could pay and then could pass on to the consumer. Such was the compromise that was made.

I may say that another source of great misunderstanding is what has happened to the escalator clauses. Many who recently have written newspaper articles about the bill seem to have overlooked the fact that the favored-nation escalator clauses have been brought under the control of the Federal Power Commission and under the limitation of the reasonable-market-price concept.

Let us look now at the provisions of the bill.

Section 2 amends the definitions of "transportation in interstate commerce" and "sale in interstate commerce", so as to make it clear that the producer is not to be under the direct utility regulation of the Federal Power Commission. That is not the same as saying, however, that the price the producer may get from the interstate pipeline is decontrolled. The bill goes on to set the ceiling of a reasonable market price on the amount that an interstate pipeline may pay the producer and then pass on to the consumer.

The Federal Power Commission is empowered to determine this reasonable market price. In arriving at its determination, the Commission shall consider, among other things, "whether such price has been competitively arrived at, the effect of the contract upon the assurance of supply, and the reasonableness of the provisions of the contract as they relate to existing or future prices."

Section 3 (b) provides that this ceiling of a reasonable market price shall apply to all new and renegotiated contracts entered into after this bill becomes law. Under this section, no price that is greater than the reasonable market price can be passed on to the consumer. To protect the transmission company, section 3 (c) provides for advance determination of this reasonable market price.

Section 3 (d) makes the same ceiling of a reasonable market price apply to all escalation clauses in existing contracts, other than two types: those designed to compensate the producer for tax increases, and those which provide for periodic step-ups of fixed and definite amounts. The latter two types of clauses are fair to all concerned; and there was little, if any, objection to them. This section of the act brings under control the functioning of all so-called favored-nations types of the escalation clauses.

Section 3 (d) prohibits any transmission company from passing on to a consumer, because of such escalation clauses, more than the reasonable market price, as determined by the Commission; and under section 3 (e), the transmission company is not obligated to pay the producer more than such reasonable market price, nor can the producer cancel his contract because of this fact.

Subsections (f) and (g) of section 3 extend the same ceiling of a reasonable market price to gas produced by a pipeline company. The Federal Power Commission has pointed out the advantages of having pipelines own a certain amount of gas in their own right, so they will not be wholly dependent upon purchased gas. This puts them in a better bargaining position. When these pipelines are allowed only a cost-of-service return on the gas, there is very little incentive for them to develop their own supplies. In 1940, for example, 8 major pipelines produced over 47 percent of their gas; but in 1952, 15 major carriers produced only 18.5 percent of their annual requirements. Subsections (f) and (g) of section 3 are aimed at reversing this trend.

Section 4 has to do with applications filed for certificates to build new pipelines. Under this section, in passing upon an application for a certificate the Federal Power Commission must consider whether the price to be paid for the gas under gas purchase contracts supporting such application is the reasonable market price.

These are the provisions of the bill. They will be further elaborated on in the course of this debate.

In opposing this bill, those who favor outright Federal utility control over the competitive producer have conjured up many a dire warning and many a horrendous figure.

They make the prediction that if direct utility controls are not placed on producers, residential consumers will pay $800 million more for their gas. They do not mention the fact that from 1938 through 1953, when no Government control was exercised over the producers' price, these prices did not increase sufficiently to offset the decline in the purchasing power of the dollar.

They do not mention the fact that the widespread substitution of low-cost natural gas for high-cost manufactured gas resulted in great savings to the local distributor which were, or could have been, passed on to the consumer.

But let us look a little further into that $800 million figure. In 1954, the field price of all gas going to residential consumers outside the 7 Southwestern States and California was only $138 million. Now it is claimed that without utility regulation, producers will suddenly increase this field price by more than five times.

Under this bill, such a fantastic increase would be absolutely impossible. Under competition and the added controls of this bill, it just could not happen.

The plain facts are that this is a consumer-protection bill. It protects the consumer interest on three types of transactions between an interstate pipeline and a producer:

First. It guarantees the consumer a reasonable market price on all new purchases of gas.

Second. It guarantees the consumer a reasonable market price on all purchases of gas made under a renegotiated contract.

Third. It guarantees the consumer that he will not have to pay an unreasonable price because of an escalation clause in either old or new contracts.

These guaranties of consumer protection are in addition to the protective features already provided by competition.

In each instance, it will be the Federal Power Commission which determines the reasonable market price, and the factors that enter into such a determination have been spelled out. The opposition charges, of course, that the term "reasonable market price" is too vague.

The charge is unfounded. The bill itself specifies that in determining reasonable market price, the Commission must consider "among other things, whether such price has been competitively arrived at, the effect of the contract upon the assurance of supply, and the reasonableness of the provisions of the contract as they relate to existing or future prices."

The term "reasonable market price" is also fully discussed on page 5 and on pages 39 through 42 of the Senate committee report. There the well established legal meaning of "market price" is pointed out, and there is a full discussion of the limiting term "reasonable" as applied to market price.

As stated in the report, reasonable market price is not "the highest price, the weighted highest price, the average field price, or other price arrived at by the mechanical application of a single criterion. Instead, it is a price which the Commission, exercising its judgment and discretion in weighing a number of relevant factors, determines is the reasonable market price."

The term "reasonable market price" as it relates to natural gas wellhead prices was first used by the President's Advisory Committee on Energy Supplies and Resources Policy—the Flemming committee. In its report dealing with natural gas, the committee said:

> In considering the certification of new lines and applications for increased rates based on new or renegotiated purchase contracts, the (Federal Power) Commission should consider, in order to provide protection for the consumer, not only the assurance of supply but also whether the contract prices of the natural gas which the applicant has contracted to buy are competitively arrived at and represent the reasonable market field price, giving due consideration, in the interest of competition, to the reasonableness and appropriateness of contract provisions as they relate to existing or future market field prices.

"Reasonable market price" in reality constitutes a combination of two well-known and well-defined terms.

The term "market price" has a definite and well-established meaning, both from a historical and a legal point of view. Black's law dictionary defines it thus: "The actual price at which the given commodity is currently sold or has recently been sold, in the open market, that is, not at a forced sale, but in the usual and ordinary course of trade and competition, between buyers and sellers equally free to bargain, as established by records of late sales." This definition is also quoted in *Wall* v. *United Gas Public Service Co.* (152 So. 561, 563; 178 La. 903).

I think this term needs some elaboration, because this is one of the points at which the opposition has especially attacked the pending bill.

Addition of the qualifying term "reasonable" to the well-recognized and well-established term "market price" is merely an indication that the rule of reason shall be applied in the Commission's consideration of what shall be a fair and equitable price for natural gas. It means that the Commission, in establishing price, shall take into consideration any and all factors relating to (a) the particular sale in question and (b) the situation in the natural gas industry generally.

There is ample historical evidence to illustrate quite convincingly that the test of reasonableness can be applied fairly and equitably.

Several illustrations can be taken from the very operations of public utilities.

For example, in establishing the rate of return that public utilities shall be allowed to earn on their investment, public utilities commissions must determine what will be the "reasonable" rate of return. This "reasonable rate of return" customarily is found to be about 6 percent, although it may be slightly higher or slightly lower, depending upon the circumstances involved in the specific case at hand.

Similarly, in utility proceedings, the test of reasonableness finds application in condemnation suits brought under their right of eminent domain. Where buyer and seller cannot agree on a price, a third party is called upon to determine what shall be the reasonable price to be paid to the seller for the property involved. Original cost may or may not be considered, but certainly far more weight is given to the current value of the property.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. FULBRIGHT. I yield to the Senator from Rhode Island.

Mr. PASTORE. Will the Senator admit that the producer is not usually the gatherer, and that many producers serve one gatherer in a particular field?

Mr. FULBRIGHT. It would depend upon the field. I am informed that some fields are largely owned by a single producer, or by 1 or 2 producers, and that in other fields there is a great number of producers—perhaps two or three hundred. Generally speaking, I should say that there are fewer gatherers than there are producers.

Mr. PASTORE. My information is that, as against 8,000 producers, there are about 500 gatherers in the entire industry. Assuming that there are fewer gatherers than there are producers, is not the test which is to be applied under the provisions of this bill that the reasonable market price is not to be fixed at the field of production, but that actually the market price is to fixed beyond the point of gathering, at the terminal point, where, according to the terms of the bill, the gas actually goes into interstate commerce?

In other words, the provisions of the bill are very explicit in stating that the point where the reasonable market price is to be applied is not the producing field, but actually the terminal point, beyond the gathering point, where the gas is put into interstate commerce. The bill would take a wide field of 8,000 producers and restrict them to 500 terminal points. That is what we believe is a sleeper in the bill, because under the bill the small producer would fall under the whim of the gathering company. I say that very seriously, because that is one of the points bothering me about the provisions in the bill.

Mr. FULBRIGHT. I am frank to say that I do not quite understand why that point should worry the Senator from Rhode Island. In a typically large field, as is the case in the State of Texas, particularly, the pipelines extend all over the area, and a pipeline itself has a choice of the gas it takes or buys. We will eliminate for a moment the gas which companies have contracted to take for 20 years. However, the pipelines are constantly making new contracts. In other words, they have alternative places where they can get the gas.

Under the pending bill, the pipeline can ask the Federal Power Commission what would be a reasonable price. A provision in the bill gives the Commission the right to predetermine what would be a ceiling for such a reasonable price. If the pipeline could not pass on the price, it would shop around among other gatherers and producers. I know it is true that there are fewer gatherers than producers. It must be that

way. The gas must be gathered and brought into one central point. I do not know why the Senator from Rhode Island believes that provision is a sleeper.

Mr. PASTORE. I believe it to be a sleeper for this reason: The position taken by the distinguished Senator from Arkansas is to the effect that there is a free and competitive market at the producer level. There are 8,000 producers. Under the provisions of the bill there would be fixed a point where the price formula would be invoked. It would be invoked, not in the field where the gas is being produced, but beyond the gathering point, where the gas is put into the transmission line.

I am willing to admit that there would be far more competition—if it could be called competition—among 8,000 producers than there would be among 500 gatherers.

As a matter of fact, under the terms of the bill I question whether even the independent producers would not become the victims of unscrupulous gatherers.

Mr. FULBRIGHT. I do not know how they could become such victims, because the price charged by the producer and gatherer is subject to review and approval by the Federal Power Commission.

It is the same Commission which would have the responsibility of applying the other proposal. I see no particular harm in this provision, even accepting as true the statement that there are 500 gatherers, if we compare the gas industry with nearly every other industry in our country. In the automobile field there are only about three leading producers. Does the Senator say there is no competition in that field? In the field of farm machinery there are only 3 or 4 producers that amount to anything. Certainly there is competition there. Take the production of cigarettes, for example. Practically 90 percent of the cigarette production is limited to a very few producers. Why should the Senator be so concerned about natural gas because he states there are only 500 producers.

Mr. PASTORE. The Senator means 500 gatherers, I assume.

Mr. FULBRIGHT. The same thing might be true if there were only 500 producers.

Mr. PASTORE. We must take into consideration the character of the business with which we are concerned. After all, as a rule, a pipeline can only go into one gathering area. There would not be 500 gatherers in an area where there were 500 producers. There might be 1 or 2, or perhaps several. As a matter of fact, the character of the business is such that the producers funnel off their supply of gas to a limited number of gatherers. The distinction I make between buying an automobile in the free market and the gathering of natural gas is that after a pipeline has extended its line into a gathering area, it cannot simply pick up its line like a lawn hose and put it down in another State. The pipeline owner is stuck, and is more or less at the mercy of the gatherer.

Mr. FULBRIGHT. I believe the Senator from Rhode Island has completely misunderstood the situation.

Mr. PASTORE. I do not believe so.

Mr. FULBRIGHT. Nearly all the major pipelines go into all the fields. They do not have an exclusive franchise to go into a field, and neither does a gatherer have an exclusive franchise. I have a booklet containing the maps which were used at the hearings, and I can show the maps to the Senator. Let us consider the Texas fields, for example. I may say also that the major pipelines are all tied together. They buy gas from each other. They interchange it. They wheel it for one another. They can draw gas from a number of places. I was told by a friend the other day, that a big pipeline has entered into a new contract, which is now in process of being approved, to bring in gas from Mexico. The gas will come through established lines by means of very short extensions.

The pipelines can at any time extend their lines, and do so. They are not static. They are constantly being taken up where a field has been depleted and extended into other fields. The maps show where they are now. Eventually they will go up into Canada, and they will go up to the Northwest. There is nothing static about them.

Mr. PASTORE. Will the Senator from Arkansas admit that under the bill the price we are talking about, the reasonable market price, is not to be fixed in the production field, but at a point beyond the gathering point, where it goes into interstate commerce? That, I may say, is a horse of a different color.

Mr. FULBRIGHT. That is a significant place. That place, however, cannot be very far from the well. It is utterly fantastic to believe that the pipeline would go to each producer and each well in order to be able to get the volume necessary to serve the huge interstate pipelines. But it is absolutely necessary to gather the gas from more than one producer, because there are very few producers with sufficient production to serve one of these hugh pipelines.

Mr. PASTORE. I should like to make one more observation, and then I shall not bother the Senator any more.

Mr. FULBRIGHT. The Senator is not bothering me. He is asking very pertinent questions.

Mr. PASTORE. The only observation I wish to make is that is the reason why the junior Senator from Rhode Island feels the bill favors the big producers, and is not a bill which favors the small producer.

Mr. MONRONEY. Mr. President, will the Senator yield?

Mr. FULBRIGHT. I do not quite understand the distinction. I shall be glad to have the Senator make his point clear.

Mr. PASTORE. I say that for the reason, as I have stated before, that the fixing of the price is to be at a point which is absolutely beyond the control of the small producer.

Mr. MONRONEY. Mr. President, will the Senator yield?

Mr. FULBRIGHT. I yield.

Mr. MONRONEY. Is it not a fact that in actual practice the long interstate lines connect with the individual well and with the small gathering systems which bring together the production of 5 or 6 or 8 wells, and also the flared gas and collect it. The pipelines are not interested in buying a few thousand cubic feet of gas. Furthermore, there are gathering systems which, under the conservation methods of the various States, bring together many wells. In addition, there are the great fields of gas which are thought to lie in the offshore areas, and which will require gathering lines to collect at onshore points the gas which will be produced perhaps 5 or 6 or 7 miles at sea.

Consequently it is necessary to collect the gas at a point where it enters the long line, after being produced by the individual well or by several small wells or from the tailgate of a gasoline plant or from offshore sources. Therefore, the only way in which a bill could be fair would be to provide that the price shall be determined at the point where the gas enters the long line. Obviously, if a producer is farther away from the terminal point or the entrance point of the long line, some gathering charges will probably be incurred.

Mr. FULBRIGHT. The Senator from Rhode Island does not deny that it is a necessary and natural arrangement to have gathering lines. He seems to make the point that because there are large producers, and the producers have to participate in the gathering line, that fact substantially lessens competition. I do not think that follows at all. Some of the most vigorous competition we have witnessed in this country has been among large operators. In the automobile field or the cigarette field or in any other field, the fact that all the operators are large ones does not mean that there is not vigorous competition.

One of the principal functions of the Federal Power Commission under this bill is to see to it that there is no collusion among the participants in a particular industry; in this case, either among the suppliers or producers or between the long lines and the producers. That is absolutely necessary. That must be done in every case. That has to be done by every regulating agency in this country, whether it be Federal or local. Such agencies have to see to it that there is no collusion that the parties have not gotten together and agreed, and so on. That is a function which regulating agencies have to perform. I see no reason why there will not be active competition even though there are only a few large producers. I do not think the number is important. So long as there is no collusion, the principle of numbers does not control.

Mr. PASTORE. I feel that where an activity is shared in by 8,000 participants we are apt to have a freer market and a more competitive market than if there were only 500 people engaged in the activity. Of course, the Senator is entitled to disagree.

Mr. FULBRIGHT. I did not say I did not agree with that. I say it is not significant.

Mr. PASTORE. Add to that situation the fact that in this particular bill it is

provided that insofar as future contracts are concerned the pipeline company can pay more than the reasonable market price, yet charge it off on a rate base up to the reasonable market price, though in contracts already consummated and existing it is provided that the pipeline company shall not be obligated to pay more. If this is not a "gimmick" which the Senator is trying to use only to activate a market which is already artificial, then why make a distinction in this bill between future contracts and existing contracts? Why not make it obligatory in existing contracts if it is not meant as a "gimmick?"

Mr. FULBRIGHT. I cannot understand in any respect how it can be a gimmick. Under what circumstances would a pipeline company pay more than it is permitted to pass on to the consumer?

Mr. PASTORE. Let us assume that the price of gas is 15 cents a thousand cubic feet.

Mr. FULBRIGHT. The price where? It is never the same everywhere.

Mr. PASTORE. At the point we are talking about, where it goes into interstate commerce, under the bill. Let us assume that the gatherers are asking 16 cents, and they receive offers from a sufficient number of companies so that next year that figure will constitute the market price, even though they have not charged it off. I can see, under the Senator's formula, that the reasonable market price today may not be the reasonable market price a year from now, when we allow an individual, at arm's length bargaining, to pay a price other than the Federal Power Commission said was a reasonable market price. I think that is the only reason why the distinction is made.

Mr. FULBRIGHT. I would not support a bill which undertook to say that whatever is the price this year must be the reasonable price forever. The price of gas has gone up, but it has not gone up as much as has the general cost of living. The only thing we are saying is that the reasonable market price under all the circumstances is the only feasible way to deal with the producer.

Mr. PASTORE. Mr. President, will the Senator from Arkansas yield for another question?

Mr. FULBRIGHT. Certainly.

Mr. PASTORE. Let us assume in my hypothetical case that every pipeline company in a particular field is willing to pay 16 cents a thousand cubic feet when the reasonable market price has been established at 15 cents. If every pipeline company pays 16 cents, why does not 16 cents and not 15 cents become the reasonable market price?

Mr. FULBRIGHT. Under the Senator's assumption it would look as if we were in collusion. I do not see how we can make any progress, however, on a speculative case such as that. There is nothing new about it.

Still a third example in the application of the test of reasonableness in utility operations can be found in the utility's purchase of coal from captive mines. Where this is done, the utility is not permitted to expense more for the coal than what is determined as the reasonable market price—in other words, a price comparable with those being paid at other coal mines that have no affiliation with utilities. It will be noted that this situation is analogous with the case of natural gas.

Apart from the utility field, the rates and tariffs established by the Interstate Commerce Commission in its regulation of the railroads are based on reasonableness and are not a reflection of original costs. Taken into consideration are conditions of service and rates established by competing carriers and alternate types of carriers, among other things.

The test of reasonableness in pricing is also adopted in establishing prices for milk in metropolitan milkshed areas. No notice of cost of providing the milk is taken; the sole determination is the reasonableness of the price, and what level of price is required to bring enough milk into the market to supply the demand.

From these examples, it is evident that there is no valid reason for opposing the adoption of reasonable market price as the standard method of pricing for natural gas. There is ample evidence that the test of reasonableness can be applied intelligently, and that it is not a vague, nebulous concept that is being offered as an experimental procedure.

It will be further noted that the Federal Power Commission, in applying the reasonable market price standard, is not limited to a narrow set of factors that it can consider. The language of the bill specifically provides that several factors be considered, and the committee reports go into considerable detail as to what those factors are and what their significance is insofar as ascertaining the reasonable market price is concerned. Thus the legislative intent is clear. The committees after lengthy hearings and detailed studies of all the evidence, have offered specific counsel and guidance for the use of the FPC in its application of the standard.

Natural gas is a commodity, competitively produced and competitively marketed by the producer. The utility rate base concept, as a practical matter, cannot be applied in determining the field price of natural gas. This risk-taking competitive business cannot continue under a system which allows a 5 or 6 percent return on successful ventures and nothing on unsuccessful ventures. By setting the standard of "reasonable market price" the Commission may consider numerous factors including, as pointed out by the Senate committee, the following:

First. The quality of the natural gas being purchased;

Second. Conditions of delivery;

Third. The level of prices established currently by generally comparable contracts;

Fourth. Prices in different fields in producing areas;

Fifth. Whether such prices and the contract price have been established by arm's length bargaining; and

Sixth. The variation of competitive market prices.

In conclusion, let me repeat that it is in the consumer interest, it is in the public interest, that this Nation have available a large and continuing supply of natural gas at reasonable prices.

These are the goals of this bill. I urge that the Senate vote its passage.

Mr. DOUGLAS. Mr. President, will the Senator yield for some questioning?

Mr. FULBRIGHT. I yield.

Mr. DOUGLAS. On page 4 of the Senator's prepared address, which he was kind enough to share with me, and which he repeated in his discussion, he made the statement on line 5:

> Is it not obviously more efficient to control the prices that some 120 pipelines pay for their gas rather than to attempt to fix the prices at which more than 8,000 producers sell the same gas?

There are two initial factual corrections which I think should be made. First, in practice, 96 percent of the natural gas which moves in interstate commerce is handled by 17 pipelines. Most of the pipelines are relatively insignificant. The real question relates to 17 of these; and really 3 of them do not handle much gas interstate.

Mr. FULBRIGHT. If the Senator will permit me to interrupt him, I agree with that statement. I said that was an inaccuracy because there are the other lines. The Senator's point merely fortifies my argument that it is much simpler, administratively, to control these few lines than it is to control the great number of producers. I think the Senator from Illinois is quite right in that respect.

Mr. DOUGLAS. It is certainly true, so far as the records of the Federal Power Commission show, that instead of 8,000 producers there are only approximately 5,000 producers.

Mr. FULBRIGHT. I think 8,000 is the overall number. It includes a very large number of small producers. I would not quarrel with the Senator; in fact, I have the tables. I think the first 100 producers account for about 78 percent of the production. But I only observe that the concentration of production in this industry is far less than it is in most of the major extractive industries—in fact, all of them except bituminous coal.

So far as there being real competition is concerned, I think it is much more obvious and more certain in this field than it is in most other fields. I mentioned one of the industries in the Senator's own State of Illinois—farm machinery. That is one of the products which, more than any other, affects my constituents. There is the necessity to buy cottonpickers from John Deere or International Harvester, and maybe 1 or 2 other companies. There are only 3 or 4 manufacturers of farm machinery who compete with one another. But we do not complain that there is no greater competition. I have not introduced a bill to try to set farm machinery prices. Perhaps I ought to, but I have not so far. We have relied on competition among 3 or 4 major producers; perhaps it is only 2.

Mr. DOUGLAS. It is four.

Mr. FULBRIGHT. There are two recognized, outstanding manufacturers.

Mr. DOUGLAS. The first two points were made merely in an effort to clear

away the underbrush. The real point which I think the Senator should consider is his implication that he is attempting to control the prices which pipelines pay for their gas.

I thought our colloquy had developed that, at best, all the bill does is to control, or try to control, the price which pipelines may charge for their gas, but certainly it has no direct control over the prices which they pay producers for their gas.

Mr. FULBRIGHT. Does the Senator believe that that is not effective control? Does the Senator really care about what will happen to the pipelines if they do not pass the rate along to the consumers? He has stated he is interested in the consumer. If it is the consumer in whom he is interested, why does he care whether the pipelines should pay another sum?

Mr. DOUGLAS. Once the pipelines make the payment, it will be very hard, as I understand it, under American constitutional law, to say that they cannot later charge that payment as an expense. It is going to be very difficult for the Federal Power Commission, once the pipelines have made the payments, to prevent their being charged as an expense or being passed on to the consumer. I do believe such an act may well be ruled to be confiscatory in nature. If the Commission is deprived of all power to regulate the price charged by the producer, how can it later regulate the amount which can be passed on?

Mr. FULBRIGHT. I do not know what the Senator means. Does he mean that the bill is unconstitutional?

Mr. DOUGLAS. I think there is very serious doubt as to whether this feature of the bill would be constitutional.

Mr. FULBRIGHT. I do not think there is any question about its being perfectly constitutional. The pipelines have the right under the bill—and they will exercise it, if they are prudent businessmen, as we assume they are—to ascertain in advance whether a certain price is a reasonable price, and whether they can pass it on to the consumer—or, I should say advisedly, to the utilities.

I can imagine circumstances under which it would be good business, and perfectly legitimate, for a long line to pay more than it can pass on.

Under certain circumstances, in the interruptible period, summertime, the pipelines might get a large volume, and they could afford to absorb all of it and still make money on it. I can imagine just such a circumstance developing, and I do not think the pipelines ought to be prohibited from doing that, if that should be the case.

Mr. DOUGLAS. Before I pass to another point which I should like to make, the Senator provides in his bill that if the price which the pipelines pay to the producers or carriers has been effected by collusion, then such a price is to be invalid. The Senator is, of course, aware as a lawyer, that collusion is very difficult to establish and to prove. That has been one of the weaknesses of the antitrust laws.

Mr. FULBRIGHT. I may say to the Senator that that would have to be determined under every type of regulation of a utility. That applies to the local distributor. Whatever agency has the regulatory control must be aware of the possibility of collusion and must disallow it.

If the Washington Gas Light Co. paid more than the reasonable market price for coal—if it bought that coal, we will say, from a cousin of the president of the company—it would be the duty of the local regulatory body to disallow that price on the ground that it was not the reasonable market price. That point is involved in every kind of regulation.

Mr. DOUGLAS. I must point out to my good friend that his bill gives to most pipeline companies a direct inducement to pay a high price for gas for that reason. Whereas the Kerr bill exempted from repeal gas produced by pipeline companies themselves and allowed such prices to continue to be regulated and merely confined itself to the so-called independent producers, the bill introduced by the Senator from Arkansas permits pipeline companies to charge any reasonable market price for their gas. Therefore, the more the pipeline companies pay to the independent producers to establish the market price, the more the pipelines will receive and can pass on for the gas which they themselves produce.

The Senator from Arkansas yesterday tried to disparage the importance of this factor by saying such production amounted to only 10 percent of the total. The figures which I have indicate that it amounts to about 20 percent. I think it is in fact 21½ percent.

So the Senator from Arkansas and Representative HARRIS, the distinguished Member of the House whom I see on the floor, and whom we are very glad to welcome, have allowed to be placed in their bill—and I feel certain they did not do so intentionally—a built-in provision which gives an inducement to the pipeline companies to pay higher amounts to the so-called independents, which would then become established as the market price. The pipeline companies could then write up the price of their own gas. This is giving them a bonus for not trying to drive a good bargain.

Mr. FULBRIGHT. Mr. President, I ask unanimous consent to have printed at this point in the RECORD a memorandum which I have prepared on this subject. I do not wish to take the time of the Senate to read it now, but I think, for the purpose of the RECORD, it ought to be inserted at this point.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

PIPELINES SHOULD BE ENCOURAGED TO SEARCH FOR GAS

Everyone admits that assurance of supply is one of the major challenges faced by the natural gas industry. It is fairly obvious that the greater the number of qualified people engaged in exploring and drilling for natural gas, the better the industry will discharge this obligation. The pipelines, certificated by the Federal Power Commission to serve certain areas, should be encouraged to add their efforts to the search for new natural gas reserves.

A regulatory program which, on paper, forces these companies to provide gas for a few pennies less than the going competitive rate but which, in fact, discourages them from undertaking exploration, cannot be defended. The risks and problems of exploration are just as great for a pipeline company as for any other company or person. It has been found that the competitive field price for gas brings supplies forth but an artificially depressed price does not. By permitting pipeline companies to participate in exploration on approximately the same terms as other parties participate, a great deal of strength will be added to the Nation's gas exploration program.

Ownership of gas reserves strengthens the pipeline companies' bargaining position in negotiating gas purchase contracts. When a pipeline company begins plans on an expansion program, for example, it can shop around a little longer and drive a harder bargain if it is not entirely dependent on buying gas from others.

The pipeline company can operate more efficiently and arrive at more effective gas purchase contracts if it has ownership of adequate reserves. Generally speaking, a producer prefers steady deliveries of gas from a well throughout the year. It is preferable to sell moderate volumes of gas each month than to sell large volumes in winter but practically none in summer. If a pipeline company has adequate reserves of natural gas available, it can contract for steady production with nonaffiliated producers and use its own reserves to meet seasonal fluctuations. The pipeline company can also use its own reserves, of course, to keep the pipeline load-factor at a higher level than would be possible without these reserves. Thus, lower prices in the field and higher efficiency in transmission are achieved.

Ownership of reserves by pipeline companies will promote utilization of casing-head gas and, hence, make an outstanding contribution to the conservation of natural resources. Casing-head gas is a joint product with oil. About one-third of the gas in the Nation is in this category. Because casing-head gas is associated with oil production, it varies in production rates according to the rate at which oil is produced. This means that, in summertime, when demand for oil is high, the supplies of casing-head gas are high. In wintertime, on the other hand, when demand for gas is high, production of casing-head gas tends to be low. Pipeline companies with adequate reserves in formation gas wells can readily contract for casing-head gas production, however. In wintertime, production from these reserves is high, making up the deficiencies between demands for gas and supplies of casing-head gas. In summertime, on the other hand, production from dry gas reserves is low and volumes of casing-head gas are utilized to the maximum. Without adequate dry gas reserves, however, the pipeline companies would be handicapped in directing casing-head gas to useful purposes.

In short and in summary, pipeline companies should be encouraged to search for gas because:

1. The additional effort will certainly increase overall supplies.

2. The improved bargaining position will result in lower prices in purchase contracts.

3. The improved efficiency in production and pipeline operation will result in economies which will be passed on to the consumer.

4. The utilization of casing-head gas is enhanced.

Mr. FULBRIGHT. Mr. President, we believe it is good for the pipelines to have a certain amount of reserves to be drawn upon in periods when there is an unusual demand for gas. The Senator has already made the point that

approximately one-third of the gas of this country comes from oil wells. That gas is called casing-head gas. Under our economy, in the summertime there is a high production of casing-head gas—that is, when there is a high production of oil. At that time the pipeline companies shut down on their own reserves.

In the wintertime there is a relatively low production of casing-head gas. That would be the period when the pipelines could draw upon their own reserves.

Therefore, we believe it is a good and proper thing, in order to preserve the balance of the industry, for the pipelines to have some reserves on which they can draw at the well, in addition to the contract gas.

The protection in this case, as in any other, is the reasonable price as determined by the Federal Power Commission. We must assume the necessity of the regulation and the reasonable efficiency of the Commission. It is the duty of the Commission, as I have said, to ascertain whether there is collusion or whether any other factor has entered into the matter to enhance the price. The Commission is quite well aware of this inducement. As the Senator has said, there are many inducements to increase the price. The same is true of harvesting machines from the International Harvester Co., of Chicago, or any other product made in Chicago. But at least we would be putting the Federal Power Commission in control over the prices and requiring that prices not go beyond a reasonable level. I do not know how the Senator can complain about that.

Mr. BUSH. Mr. President, will the Senator yield?

Mr. DOUGLAS. Will the Senator withold his question so that I may complete my thought?

What the Senator is proposing is to set up the market price——

Mr. FULBRIGHT. The reasonable market price.

Mr. DOUGLAS. As the determinant of what the allowed price to be passed on shall be. Then the qualification of reasonableness merely opens the way to ask, "Well, what market price shall we take?" But in order to have a reasonable market price, the buyer must be at least determined to drive a good bargain, namely, so that it is a bargain between parties, each one of whom presumably is trying to get the best bargain. One side should be trying to get as much as possible and one side is trying to pay as little as possible.

But in the case of gas, with the public holding the bag, and with the costs which the pipeline company incurs in all probability being passed on, there is little enough inducement at best for the pipeline really to struggle for a low price. But that is not all by any means. There has been written into the bill the provision that the more that is paid the independent producers, the more they can get for the gas which they themselves produce. So they are given a bonus for becoming an accomplice, so to speak, in boosting the market price. That is the point I make. I should like to hear what the Senator from Arkansas has to say about that.

Mr. FULBRIGHT. I think the Senator misconstrues the bill. I believe, of course, any tendency toward what the Senator has suggested would be considered by the Federal Power Commission. I would say such a situation arises in many cases where regulations exist, and I see no reason whatever for the Federal Power Commission to ignore that very factor. If there exist 5 or 6 different sources of supply, I think there is plenty of competition to overcome any such tendency. The Senator must remember that with respect to a major part of their business, the profits of the pipelines are dependent on the amount of gas going through the pipelines. They will not want to cut down the volume. They get paid for that service. They do not make money on the gas itself, except on that which they own.

Mr. BUSH. Mr. President, will the Senator from Arkansas yie'd in order that I may ask 2 or 3 brief questions?

Mr. FULBRIGHT. I say to both the Senator from Illinois and the Senator from Connecticut that I am sure they understand I have finished my speech.

Mr. BUSH. I am sorry I did not have the advantage of hearing all of the Senator's speech. If I ask questions the answers to which are contained in his speech, the Senator may refer me to the RECORD, but the answers to my questions can be given in a brief time.

I should like to say to the Senator that philosophically and sentimentally I am very much disposed toward his bill, but there are some factors in the bill with which I have been dealing for many weeks. In fact, I do not recall any issue which has been before the Senate to which I have given so much time. I am in a dilemma regarding some phases of the matter.

In the area which I represent the chief opposition to the bill comes from the gas distributors. I am sure that is not news to the Senator from Arkansas, but that is where the chief opposition comes from. That opposition is, I should say, based on 3 points. If those 3 points could be cleared up, I believe much of the opposition to the bill would disappear, and there could be before the Senate a good bill and a sound bill, and one which would benefit all elements involved, from the consumer all the way up to the gas producer.

My first inquiry concerns the most-favored-nations clause. I should like to ask the Senator if he believes that his bill would outlaw the most-favored-nations clause, so to speak.

Mr. FULBRIGHT. I would say the bill would subject the clause to the reasonableness of the increase. By that I mean that the increases are specifically made subject to the overriding consideration of whether or not, if any increase is asked for, it is reasonable and reflects the reasonable market price.

However, I wish to say also I appreciate what the Senator has said about the opposition to the bill. He confirms exactly what I have said, that is, the opposition does come from the distributors and not from the consumers. Nonetheless, the distributors are worthy of consideration. I would not say they are not. They have a substantial problem. I appreciate what the Senator has said about that aspect. However, there has been a great deal of debate as to whether the main opposition did come from the distributors.

Mr. BUSH. I can only answer from what my own observation has been, and so far it has shown that the principal opposition comes from the distributors.

In view of what the Senator has said about the most-favored-nations clause, does the Senator believe that, under his bill, the Federal Power Commission would have a right to void that clause?

Mr. FULBRIGHT. Yes, as such, if it does not conform to the standard of a reasonable market price. Let me say a further word about that matter. There is much misunderstanding about the favored-nations clause.

Mr. BUSH. I agree with the Senator.

Mr. FULBRIGHT. It sounds as if it were something that had happened in Europe or Asia or some foreign land. It is a phrase which was picked up and applied to a situation giving protection to a producer who is required to contract for his gas for 20 years. No other commodity I know of is sold under any such circumstances. The pipeline operators say, "We cannot build a pipeline or give you a market unless you contract for 20 years."

All the producers did was to protect themselves from unreasonable changes in the value of money—as, for instance, during inflation. That was one of several ways. There was nothing vicious about it. But because it was complained of and got a bad reputation, the sponsors said, "Very well; let us outlaw such contracts. No more can be made, and those in existence will be nullified by the bill unless they conform to the standard of a reasonable market price."

Mr. BUSH. In that case, would the Senator from Arkansas accept an amendment which would definitely clarify that point?

Mr. FULBRIGHT. I think it is quite easy to clarify the point, by means of the debate on the floor in regard to what the bill does. Not only will I confirm what I have said about its effect and intention, but I am sure that the Senator from Oklahoma [Mr. MONRONEY] and all other Senators interested in the passage of the bill will do so.

I did not, and I do not yet, quite see what it is that causes any uncertainty about the meaning of the bill. I believe it is very clear that the only two provisions which are not outlawed or are not nullified—I suppose that "nullified" is a better word to use—by the bill are first the one regarding the fixed step-up, which is considered merely a part of the basic price—in other words, the fixed step-up provision, as contrasted to the most-favored-nation provision; and also the tax absorption provision.

Mr. BUSH. Yes.

Mr. FULBRIGHT. There was no real complaint against those two provisions—not even by the distributors. They complained about the favored-nation provision. So the bill does not nullify those two types, but does nullify the rest.

Mr. BUSH. Let me say that, as the Senator from Arkansas has stated, certainly there is considerable misunderstanding about it, because the spokesman for the distributing companies with whom I have talked—and I have talked with a great many of them—are terrified by the most favored nation clause—which name is used only as a handle, in order to get that issue before us.

If the Senator from Arkansas and the other proponents of the bill will accept an amendment which will positively confirm what the Senator from Arkansas says, I believe that will go a long way toward dissolving some of the opposition.

Let me say the same regarding the so-called spiral clause, which I am sure the Senator from Arkansas identifies.

Mr. FULBRIGHT. It is in the same class as the favored nation clause; it is also out.

Mr. BUSH. It is also out?

Mr. FULBRIGHT. Yes.

Mr. BUSH. Then it would seem to me that an amendment which would clarify that in the minds of consumers and gas distributors would also go a long way toward dissolving further opposition.

The third point I should like to make is regarding the question the Senator from Arkansas was discussing a short time ago, namely, as to the reasonable market price. This is the third and vital point in the opposition of those with whom I have discussed this issue. They want a better definition of a way to find a fair price—better than the language "reasonable market price," which does not require the Commission to take into account anything except market factors.

Mr. FULBRIGHT. I believe the Senator from Connecticut is not correct as to that.

Mr. BUSH. I mean so far as the bill is concerned.

Mr. FULBRIGHT. The bill gives substantial advice as to what should be considered, and the hearings give even more.

Mr. BUSH. The hearings contain considerable advice, but that does not constitute the law. I do not believe the bill contains any directive as to what elements should be taken into account in finding a fair market price.

Mr. FULBRIGHT. That is in the report.

Mr. BUSH. Oh, yes; but I am speaking of the bill.

Mr. FULBRIGHT. I do not know; the Senator from Connecticut is asking for something which I think may be quite impractical as a matter of legislative drafting. In that connection it should be pointed out that if we begin to specify in the law that only one thing shall be considered, then we run into the difficulty that the provision becomes exclusive, and bars the consideration of any new development. In that way the law is made quite inflexible.

Just before the Senator from Connecticut entered the Chamber, I obtained consent to have printed in the RECORD a rather long history of the concept of "reasonable market price." That concept is not new in our laws; instead, it is rather ancient, certainly going back as far as the concept of eminent domain, which goes back hundreds and hundreds of years.

In our business and in our law there are many practices which deal with that very concept; that is true both as to the civil law—in other words, the law dealing with our economy and with civil practices—and as to the criminal law. In tort law there is the same standard in the case of reasonable care as a basic concept in regard to negligence. No one ever has been able to spell out in the law just what is reasonable care, and yet that standard is applied every day in the year in thousands of courts. The Interstate Commerce Commission every day applies, in connection with its rulings, the concept of reasonable rates; but that concept is not spelled out in the law, because that could not be done.

I would be very much interested in ascertaining whether the Senator from Connecticut thinks he can spell out a satisfactory, all-inclusive definition of "reasonable market price." But I do not think the Senator from Connecticut can do so, for that standard comes within the type of things which, by their very nature, must be determined in each instance, according to the circumstances which arise.

Beginning on page 6, in section 3, subsection (b), we find the following, commencing in line 22:

> In determining the reasonable market price of natural gas under the provisions of this section 5, the Commission shall consider, among other things, whether such price has been competitively arrived at, the effect of the contract upon the assurance of supply, and the reasonableness of the provisions of the contract as they relate to existing or future prices.

The specific language "among other things" is used because we know we cannot foresee, because no one is wise enough to do so, all the elements which should be considered in arriving at a "reasonable price." So the words "among other things" were specifically included, not for the purpose of causing confusion, but for the purpose of giving the Commission sufficient flexibility, so that it may consider all pertinent and relevant circumstances when the time comes for the Commission to make whatever decision it may deem to be reasonable.

I hope the Senator from Connecticut also will read in the RECORD the remarks I previously made regarding "reasonable market price." I also call his attention to the rather long expansion of that concept to be found on page 39 of the report, which I shall not read now.

Mr. BUSH. I have read that.

Mr. FULBRIGHT. That also would be considered by the Commission in arriving at the reasonable market price.

But what I believe has confused or disturbed some persons is the attack upon this concept as if it were something new. However, it is one of the oldest concepts to be found in the law—namely, the concept of reasonableness in arriving at the decision, in contrast to the cost-plus concept, which arose under utility regulation, as applied to monopolies. The cost-plus concept is much newer and more restrictive, and can be applied effectively and justly only under the circumstances of a utility, where all the elements are subject to direct control.

Mr. BUSH. I thank the Senator from Arkansas very much, and I assure him that I shall read his remarks in the RECORD.

I also wish to say that, regardless of his very able discussion of what reasonable market price means, and its history, there is still a great deal of terror in the minds of opponents of the bill. They are quite terrified about that language, and they have a very strong desire to have substituted for it some such language as just and reasonable price, and a definition of the factors which the Commission shall take into account, perhaps not exclusively, but inclusively, in arriving at a just and reasonable price and in arriving at the Commission's determination of that price. I hope the Senator from Arkansas will work toward that end. I will say to the Senator that I am working on such an amendment.

Mr. FULBRIGHT. I hope the Senator will do so. I think one of the serious criticisms of the opposition is that they have not come forward with a really workable alternative. We still believe that the pending bill offers the most workable formula that has been developed.

Mr. BRIDGES rose.

Mr. FULBRIGHT. I will say to the Senator from New Hampshire that I have concluded my speech. I am willing to yield the floor, but I agreed to yield for a few brief questions by the Senator from Illinois [Mr. DOUGLAS]. I am worn out.

Mr. DOUGLAS. Mr. President, I refrained, during the middle portion of the address of the Senator from Arkansas, from interrupting with too many questions, in order that the Senator from Arkansas might have an opportunity for uninterrupted delivery of the latter portion of his address.

I would appreciate it if the Senator from Arkansas would look at page 9 of the bill, in subsection (f), which reads:

> (f) In regulating the rates and charges of a natural-gas company, the Commission shall allow as an operating expense of such natural-gas company, for natural gas produced by it, the reasonable market price of such natural gas at the point at which the gas is delivered into the transportation facilities of the natural-gas company in or within the vicinity of the field or fields where produced, and for gas purchased from an affiliate, the amount paid to such affiliate for such gas up to but not in excess of the reasonable market price of such natural gas at the point at which the gas is delivered into the transportation facilities of the natural-gas company in or within the vicinity of the field or fields where produced.

As the Senator from Rhode Island [Mr. PASTORE] has pointed out, this means that the Federal Power Commission must accept as the reasonable market price the price in the vicinity of the point where the gas enters the pipeline system.

The term "vicinity" has a somewhat restricted meaning. I have looked it up in various dictionaries. It does not have a broad coverage. It does not mean

within 40 or 50 miles, as some have implied. It has a restricted meaning. It is quite possible that the Commission would give it such a restricted meaning. It might, indeed, give it such a restricted meaning that it would say that the price which would be allowed in the vicinity of the point at which the gas entered the system was the price paid at the point where the gas entered the system; and in this way the circular nature of the reasoning of the bill would become clearly evident. The reasonable market price would be the price which was paid.

I had thought that what we were trying to determine was whether the price was fair, whether the price was just; but apparently the present bill is so restrictive, with these clauses in it, that, in effect, it would be very difficult for the Power Commission to recognize as reasonable any other price except the price actually charged. The term "in the vicinity" is of crucial importance.

I wonder what the Senator from Arkansas has to say on that subject.

Mr. FULBRIGHT. All I can say is that when Mr. Kuykendall, the Chairman of the Commission, was asked whether or not the formula in the bill was a reasonable one or could be administered, he said, "Yes. We can work with it, and it is a great deal better than the one we have."

He is a better expert than I am on what is administratively possible. If the Senator would like to have me do so, I shall read what he said——

Mr. DOUGLAS. Another member of the Commission, to whom the Senator from Illinois accords greater credence, is Commissioner Draper. In his very able dissenting opinion he came to exactly the opposite conclusion. The experience of Commissioner Draper in the administration of the gas industry has been much more extensive than that of Chairman Kuykendall, who is a recent appointee. Such experience as the latter has had has been primarily in the field of electrical power.

Mr. FULBRIGHT. If the Senator does not wish to have me cite any authority, I shall have to rely on my own authority.

It is just as easy for the Commission to arrive at a reasonable price for the gas belonging to the pipeline as it is for anyone else. The Commission must take everything into consideration—vicinity and everything else.

Mr. DOUGLAS. The bill says "in the vicinity." That could have a very narrow and restricted meaning.

Mr. FULBRIGHT. It could have a very broad meaning, too.

Mr. DOUGLAS. The Senator from Illinois will introduce later definitions of the word "vicinity," which indicate that it is not a broad term. It means nearby, close at hand, adjacent to.

Mr. FULBRIGHT. I would welcome the introduction by the Senator from Illinois not only of that kind of definition, but also a detailed description as to how to arrive at the cost of gas as it is actually produced in the gas field.

Mr. DOUGLAS. If the bill were honestly and conscientiously administered, I think we should find that there would be more redtape involved in the Senator's bill than there is in the provisions of the present law.

Mr. FULBRIGHT. I assure the Senator that after the next election we shall have a better Commission.

Mr. DOUGLAS. I think we shall have a better Commission after next year's election. That is why I do not want to repeal the present law. It can be made to work if the Commission would only get down to the job.

Mr. President, there are 1 or 2 additional questions I should like to ask.

Mr. FULBRIGHT. Cannot the Senator ask them tomorrow?

Mr. DOUGLAS. By that time the Senator will have left the Chamber, and the subject will be forgotten.

Mr. FULBRIGHT. I will be here.

I yield only for a question, not for any further speeches.

Mr. DOUGLAS. If this bill has in it all the protections for the consumer which the Senator says it contains, what is really the need for it? Why not take the present act? If this is a measure for the defense of the consumer, why repeal the present act, which sets up as a standard "just and reasonable rates"?

Mr. FULBRIGHT. Is that a question?

Mr. DOUGLAS. That is a question.

Mr. FULBRIGHT. Because the two concepts are entirely different. I have explained that point at length. If the Senator will read the RECORD, he will find my explanation of it.

Mr. DOUGLAS. The present term, in section 5, is "just and reasonable rate."

Mr. FULBRIGHT. I explained that to the Senator from Illinois.

Mr. DOUGLAS. The Senator from Arkansas does not have a prejudice against justice, does he? He is not going to say that he wants an unjust rate, is he?

Mr. FULBRIGHT. I will say to the Senator, as I said to the Senator from Rhode Island, that the term is a "word of art." Not being a lawyer, the Senator from Illinois does not know what that means, but it has a special significance, which is not necessarily either a logical or a reasonable significance. These words have acquired a special meaning by long usage in various laws.

Mr. DOUGLAS. Is it not true that if the word "just" is a legal word of art, the word "reasonable" is a word of cubistic art, devoid of beauty, indefinite and intangible, which violates all rules of logic by indulging in circular definition?

Mr. ANDERSON. Mr. President, will the Senator yield to me?

Mr. FULBRIGHT. Mr. President, I have already answered that argument in my previous statement.

Mr. DOUGLAS. Mr. President, will the Senator further yield?

Mr. FULBRIGHT. I yield for another question, not for another statement.

Mr. DOUGLAS. Does it not come down to this: The Senator wants to apply to the gas industry the same principles which are followed when the Government takes property under its right of eminent domain. I have not read the Senator's memorandum, but I understand that it is based upon those principles.

Mr. FULBRIGHT. That is an analogous situation.

Mr. DOUGLAS. Under the Constitution, when the Government takes private property for public use, it pays, and should pay, what the owner of the property could get in the market.

Mr. FULBRIGHT. The reasonable market price.

Mr. DOUGLAS. Yes. But when we deal with utilities, we do not recognize that the market price is necessarily the proper price, because we apply the category "utilities" to those commodities or services with respect to which there is no free and full competition, but with respect to which, in the public-interest regulation, rather than what the market will bear, or what the traffic will bear, should be the proper principle. Is that correct?

Mr. FULBRIGHT. I say to the Senator that I distinguish the production of gas from a utility. I believe they are entirely different. I have done so very thoroughly during the course of my remarks, and I do not think I should do it again. Our colleagues are getting tired. There is no similarity between the production of gas and a utility.

Mr. DOUGLAS. Mr. President, it is very interesting that gas, when it comes from the burner tip, is a utility, and also when it moves from the pipeline to the distributing utility, but it is not a utility when it enters the pipeline.

Mr. FULBRIGHT. The Senator knows that the mining of coal is not a utility. However, when it comes out of an electric iron in the form of electricity, after it has been converted into electricity, it is a utility. Those changes are common in our economy. The Senator knows that.

Mr. DOUGLAS. I wonder whether my good friend from Arkansas would not consent, since he is in such an amiable mood and has been so receptive toward the suggestions of the Senator from Connecticut—although I am not quite certain that that is true——

Mr. FULBRIGHT. The Senator is very discriminating in his judgment about this bill.

Mr. DOUGLAS. I wonder whether the Senator from Arkansas would not accept two other criteria of whether the price is reasonable; namely, first, the effect which the price the producer will obtain has on the price which the consumer must pay. I wonder whether we should not consider the effect upon the consumer, whom the Senator from Arkansas says it is his purpose to protect.

Mr. FULBRIGHT. The bill protects the consumer.

Mr. DOUGLAS. Why not say so in the bill?

Mr. FULBRIGHT. I have said so.

Mr. DOUGLAS. Why not put it in the bill?

Mr. FULBRIGHT. It is in the bill. It inheres in every line of the bill.

Mr. DOUGLAS. Why not let us add another definition? I am glad to have the Senator's definition. Why not add to the three vague present criteria the effect which the prices paid to the producers will have on the price paid by the consumers? Is that agreed to?

Mr. FULBRIGHT. I am sure the Commission would consider it.

Mr. DOUGLAS. Let us put it in the bill.

Mr. FULBRIGHT. It is a little late to put it in the bill.

Mr. DOUGLAS. No.

Mr. FULBRIGHT. I would suggest that we continue this discussion tomorrow.

Mr. DOUGLAS. Very well.

LIBERTY: A GOOD TO BE IMPROVED AND NOT AN EVIL TO BE LESSENED

Mr. BRIDGES obtained the floor.

Mr. JOHNSON of Texas. Mr. President, will the Senator from New Hampshire yield, so that I may suggest the absence of a quorum, with the understanding that he will not lose the floor?

Mr. BRIDGES. With that understanding, I yield.

Mr. JOHNSON of Texas. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BRIDGES. Mr. President, during the past 25 years, our country has undergone a tremendous growth. Population has increased from 122 million to 167 million. Today we are standing on the threshhold of a $400-billion economy—in terms of output of goods and services.

Yet when we look at the future, this growth seems almost insignificant. Some very interesting documents, prepared by a group of American economists, recently published by the 20th Century Fund, one of our leading research institutions, bear this out. They indicate that within 5 years, there will be in this great country of ours 177 million consumers and 69 million jobs.

Fundamentally, there is little difference between one country and another. Everywhere we find natural resources, tools, and people. There are countries with larger populations than ours and perhaps with larger physical resources than we possess. But this country has become the envy of the world. It is the greatest country in the world. For never have so many had so much. What is the basis for our success where others have failed?

The people who settled the Atlantic shores of Virginia and my own New England knew one thing—everyone had to work and live from the fruits of his own labor. The first Americans made their own way, wrote their own guiding principles of conduct. The Mayflower Compact was no accident. It was men thinking for themselves, creating their own rules of life. The Declaration of Independence was a declaration of what had already been accomplished through years of venture, danger and cooperation.

In America's colonial days there was keen competition among traders and merchants. There was even competition between American and English merchants. Had it not been so there would have been no Boston Tea Party. American shipping merchants contested with English and Spanish merchants for maritime trade. Boston, New York, and Charleston were competing towns. This struggle for profitable trade developed able businessmen. It helped make young America capable of carrying on a long and bloody war that brought liberty and independence, self-government, and a constitution that fostered commerce. It is so written into our fundamental law.

From this humble, hardy beginning came such famous men as Henry Clay, Andrew Jackson, Sam Houston, Daniel Webster, Abraham Lincoln, and Theodore Roosevelt. These men helped to make a nation that loved freedom, and would die for it. Others like U. S. Grant, Robert E. Lee, Phil Sheridan, John Stark, John Pershing, and Dwight Eisenhower represented America on the battlefield. John Paul Jones, George Dewey, Chester William Nimitz and a score of others on the sea had individual initiative. Ask the enemy. In the air were Billy Mitchell, Hap Arnold, and Carl Spaatz. All that is America.

Some time ago, one of our businesses decided that it wanted to find out the elements in the American scene that people consider responsible for their high living standards. The comment of one young man from a town in my native State of New Hampshire seems to me to hit the nail on the head. When asked how America's present standard of living was achieved, he replied: "By giving people freedom to explore and develop their best abilities and by reassuring them that the Government would not take that freedom away."

In the American economy we have relied chiefly on private initiative, in search of profits, or higher wages, to get things done. If consumers as a group wanted something badly enough, they were willing to pay for it. An increased demand bid up the price at first, yes, but as know-how was acquired and more producers were attracted, competition among producers pushed down the price. The result again and again was that people had a new, improved product at a reasonable cost.

Ours was a decentralized economy and must continue as such if we are to maintain our present way of life. There are really only two ways in which resources can be allocated. Either they will flow into productive channels through the persuasion of an impersonal price system or they must march there under the fiat of personal planning or dictation.

When inroads upon the price system become so numerous as to hinder its operation, a free private enterprise economy will no longer exist. Then the government-directed, government-planned economy will be here. When the consumer's voice no longer brings forth responsive changes in our economy, when a few do the thinking and choosing for the many, then the vote cast at the ballot box, too, will have become an empty gesture. It was not pure coincidence that the political philosophy expressed in the "Spirit of '76" was accompanied in that year by the publication of Adam Smith's Wealth of Nations.

Let me make one quotation from the economic spirit of '76. Said Adam Smith:

> The natural effort of every individual to better his own condition, when suffered to exert itself with freedom and security, is so powerful a principle, that it is alone and without any assistance, not only capable of carrying on the society to wealth and prosperity, but of surmounting a hundred impertinent obstructions with which the folly of human laws too often encumbers its operations.

A year later, Edmund Burke, conceding that liberty must have some restraints, gave this advice:

> It ought to be the constant aim of every wise public counsel, to find out by cautious experiments, and rational, cool endeavors, with how little, not how much, of this restraint the community can subsist; for liberty is a good to be improved, and not an evil to be lessened.

Over the years, this system of ours has been challenged from without and within. Twice in this century were we called upon to defend our way of life against the totalitarian beliefs of a Kaiser, Hitler, and Mussolini. Today we again find ourselves involved in a ceaseless struggle with evil forces which deny to the individual his God-given right to follow the pursuit of happiness as he may see fit.

The greater our capacity to satisfy peaceful economic wants, the greater our capacity will be to defend ourselves. For we shall have a better economic machine to turn from peace to war production. No doubt, that is one of the prime reasons why our system is today under attack from without. There is equally no doubt in my mind that President Eisenhower, as a former military man, realizes that. His knowledge that military power is nothing but the cutting edge of economic power and his profound love for our institutions speak out of the following statement made by him last May:

> We can differentiate between a government that is based upon individual opportunity, and one that is based upon regimentation, in this way: Opportunity brings that richness of productivity in which all may share. Individual initiative, harnessed together for the good of the whole, is the most productive inspiration and impulse we have. * * * Regimentation does nothing but distribute deficits—deficits that occur when we do not take advantage of these great impulses in the human heart and mind to produce what we can for ourselves and for our society.

Our President has seen Americans bleed and die for their country and its beliefs. He knows that we cannot be strong in war unless we are strong in peace. His experience, knowledge, and fundamental creed lead him to say:

> We want no regimented state. We want no direction from the Federal Government where that is not necessary. We want, in our individual sense, the maximum of freedom so long as we do not trespass on the freedom of others.

Mr. President, thanks to the heroism and courage of our fighting men, we have successfully so far withstood threats to our way of life from without. But there were those among our own ranks who,

for one reason or another, wanted to make States into Federal districts and introduce a system under which a handful of people would run the lives of the many. Early in our history when Thomas Jefferson found himself in serious and extended controversy with the Government, he encouraged the formation of what were then called Democratic clubs to resist the encroachments of the central Government upon local governments and upon personal liberties.

The continued emphasis on more Federal laws to protect the public seems to me to be wrong on several grounds. Continued increases in Federal agencies, the concomitant of more Federal laws, tend to destroy our system of a federated republic. Agencies, like the amoeba, multiply. In the words of my distinquished colleague, the Senator from Virginia [Mr. BYRD]:

> It is difficult to generalize or summarize the Federal expansion and to determine what part of it may have been directly attributable to emergencies, what part may have been attributable to normal progress, what part may have been a result of a combination of these developments, and what part has been due to the multiply-by-division characteristics of bureaucracy.

More Federal agencies make the balancing of the budget more difficult; they make tax reduction less likely.

Increasing Federal bureaucratic interference with the price mechanism of the market place will, as I have said before, eventually bring on the totalitarian economy and state. Above all, the idea that people must be prevented from doing this is un-American. This country has been built by the hands of millions of people. It has not become great because somebody wanted to tie the people's hands behind their backs.

With our magnificent accomplishments under the free-enterprise system, one would suppose that there would be unanimity of opinion that this great system should remain unimpaired and unshackled. But not so.

There are always those who would place more and more power in government and leave less and less freedom in the individual. Some of this is done in ignorance of the consequences, much of it is by design of those who would overthrow our system of government and substitute socialism or communism or some other form of dictatorial power.

Nearly 200 years ago Edmund Burke said:

> The people never give up their liberties but under some delusion.

That statement is as true today as it was then. Some of our people, led by self-appointed spokesmen who assume to represent the public interest, are urging the retention of Federal control of gas producers. This control was imposed upon them recently by a decision of the Supreme Court purporting to say what Congress intended when it passed the Natural Gas Act in 1938. These people do not know that what they seek is the undermining of their own liberty. They do not understand that Federal regulation of natural gas means Federal regulation of oil, from which much of the gas is produced; that it means regulation of the manufacturing of natural gasoline. Nor do they understand that unless we are to act arbitrarily and capriciously by singling out one industry for control which cannot be distinguished from hundreds of others, we must also extend Government control to the production of coal, lead, zinc, copper, and all other mining. Nor do they know that on the same basis we must extend Federal control to the manufacture of automobiles and motor parts, to the manufacture of cigarettes, steel, and in fact to four-fifths of all the manufacturing industries in this country. But most important of all, they do not know that the extension of Government utility control of these important industries would be the end of our competitive enterprise system which has made our Nation great.

Those of our people who do not care for principle but look to their own immediate selfish interest do not appreciate that success in what they seek would mean the slowing down of the flow of natural gas in their homes and higher prices to be paid for the meager quantities which reach their homes.

Production of natural gas is a competitive enterprise charged with the responsibility of discovering and supplying this Nation with adequate supplies of natural gas at reasonable prices. Competition has been effective in the accomplishment of this task. For these reasons, the imposition of Federal utility regulation upon the gas-producing industry by the Supreme Court should be corrected by Congress.

I speak advisedly when I suggest that the Court misinterpreted the intent of Congress when it held that Congress intended to subject independent producers of gas to regulation by the Federal Power Commission. I was in the Senate at the time. I know I had no such intent, and I believe I speak for the vast majority of Senators and Representatives who were here at that time. The legislative history of the act shows clearly that if any Members of Congress had any such thought, they carefully concealed it from the rest of us. There is nothing in the legislative history to the effect that the independent producers should be regulated by the Federal Power Commission. On the other hand, the record is full of assertions that no such purpose was in mind. The act passed both the Senate and the House without a record vote. Does anyone doubt that there would have been terrific opposition to the bill from the southwestern gas-producing States, if from no other area, if it had been thought that such revolutionary changes in our free enterprise system were involved?

In my opinion, it is our clear duty to enact the legislation now under consideration. I did not believe in utility regulation for producers in 1938—I do not believe in it today. It is the duty of Congress to make the laws; and if the courts make a new law by a misinterpretation of Federal legislation, then it is the duty of Congress, in my judgment, to rectify the error promptly. Otherwise we would abdicate our constitutional power and function in favor of the judiciary.

When I cast my vote for this bill, I feel that I am rendering a distinct service to the whole country, but particularly to the citizens of my own State of New Hampshire.

In New Hampshire and in most New England States we only recently obtained natural gas. We are about as far away from the present source of the supply as one could be and still be in the United States.

We who live in New Hampshire are in the northeastern part of the United States, in what might be termed the thumb of the Nation. Natural gas is not cheap in our area, but, even so, many of our citizens prefer it to other fuels.

I find that there is a great deal of confusion and misunderstanding about the prices for natural gas and what goes to make up the price which the consumer ultimately pays. The opponents of this legislation have contributed to that misunderstanding. They claim that the producers are responsible for the high prices in some areas, such as New England. Actually, the prices the producers receive for the gas in the gas fields which ultimately serve our New England States approximates 10 cents per thousand cubic feet. The total average price paid for the same gas in our New England homes is $2.40 per thousand cubic feet, or 2,400 percent of the amount the producers receive. If there were some way to completely eliminate the price which the producer receives—if the producers could be persuaded or compelled to give their gas to the pipelines—the savings in our New England homes would be so small as to be almost unnoticeable. They would be practically nothing—negligible.

There are three distinct segments in the gas industry—the producers who discover and produce the gas, the pipelines which transport it from the gas fields to the markets, and the local distributing companies which deliver the gas to our homes. The smallest part, by far, of the cost of gas in our homes is the producers' share; the next is the share of the pipelines; and the greatest, by far, is the share of the local distributing companies. Due to the great distance of the New England States from the Southwestern gas-producing States, we may expect the pipelines' charges to be higher than for areas closer to the gas fields. But, even so, the pipelines' charges of 50 cents and the producers' charges of 10 cents combined constitute only about one-fourth of the cost paid by the household consumer. The balance goes to the local distributor.

It is my understanding that the distributors' margins in the principal gas consuming cities vary widely from a low of around 30 cents per thousand cubic feet in some areas to as high as $2.40 in other sections.

Experience shows that distributors' as well as pipe lines' charges can be reduced as the volume of gas going through the lines increases. It costs almost as much to operate pipe line and distribution facilities at half capacity as at full capacity. Consequently, by increasing the volume of gas, revenue increases, sometimes doubles or triples, without substantial additional cost. In other

words, the more gas that goes through the pipe lines, the less it will cost the consumers.

Consumers must look to increased volumes of natural gas if they hope to get lower prices and more of this convenient fuel. There is room for substantial or even large reductions in local distributors' margins and for reduction in the pipe lines' charges by increasing the volume of natural gas handled. This is the only hope of substantial price relief for the consumer.

Utility regulation of natural gas producers is a road-block to any great price relief to New England natural gas consumers. It will also prevent many of our citizens from obtaining natural gas for their homes.

Increased volumes, which is the key to our problems, must come from the producers in the field.

There is no law that compels them to sell it to us or to the pipe line serving our State. Only by making it attractive to the producers can we expect to get the necessary supplies of natural gas. We do not make it attractive, in fact we drive them away when we say: "If you sell the gas to our pipe line, you must be regulated as a public utility on a basis whereby you get nothing for the gas which you own; you will only get a sum sufficient to repay the cost of producing the gas with interest on your money at 6 percent per annum." If Senators were producers, they would not care to sell natural gas under those circumstances. Nor would I.

Not only is utility regulation of natural gas producers bad in itself, but in actual practice it has operated to discriminate against our own citizens in favor of foreign producers and foreign gas.

Quite recently the Federal Power Commission has authorized the importation of natural gas from Canada. It is my understanding that this gas will cost 22 cents per thousand cubic feet at the border. A number of similar projects are under consideration. Recently natural gas has been discovered in Canada only a short distance from New Hampshire and Vermont. It may shortly be coming into our country.

Neither the Federal Government nor any State government has any power over the producers' price of this gas or over the transportation charges to the Nation's boundary.

It is ironical that we should subject the producers in our country to the burdens of utility regulation and at the same time admit into this country higher priced gas from neighboring countries over which our regulatory agencies have absolutely no control.

Not only is this sort of treatment destined to dry up our own gas supplies—and if the pending bill fails of passage, Mr. President, you will see if it does not work out that way—but to drive from our borders into Canada and Mexico our own producers in order that they may have more freedom in supplying gas to our citizens.

Can this be America?

These bills come to us with recommendations for adoption from high sources—from sources whose concern for the public interest and only for the public interest cannot be doubted. Shortly after the Supreme Court's decision, the President of the United States, Dwight D. Eisenhower, took action. He appointed an Advisory Committee on Energy Supplies and Resources Policy, composed of the Director of the Office of Defense Mobilization as chairman, and members of the President's Cabinet. This committee reported unanimously as follows:

> In the interest of a sound fuels policy and the protection of the national defense and consumer interests by assuring such a continued exploration for and development of adequate reserves as to provide an adequate supply of natural gas, we believe the Federal Government should not control the production, gathering, processing, or sale of natural gas prior to its entry into an interstate transmission line.

That is the report of the committee appointed by the President of the United States to make this thorough study for all the people of this country.

The Federal Power Commission, with an experience of 18 years in regulating natural-gas companies under the Natural Gas Act, is in a preferred position to appraise the effects of its control over producers of natural gas. The Chairman of the Federal Power Commission reported to the House committee, when it was considering the Harris bill, as follows:

> We support this proposed legislation because we firmly believe that such legislation will, in the long run, result in the greatest good to the largest number of people in this country.

The pending legislation conforms with the principles laid down by President Eisenhower on a number of occasions. I quote the President as follows:

> I want to say this one thing: One of my special jobs is to see that the Federal Government does not establish such monopolies over our lives, such directive power in our communities and in our States, that it becomes the greatest vested interest of all; and, finally, is an instrument for attacking the individual lives of each one of us.

If I were not fully convinced in my own mind—and I am convinced—of the wisdom of his legislation, I should prefer to follow the principles laid down by our President and the specific findings and recommendations of the two expert bodies—the President's Cabinet committee and the Federal Power Commission—than to listen to those who are less well informed or whose motives may spring from their own self-interest rather than for the public good.

If we do not at least partially restore the freedom which the Congress intended gas producers to have, we may well expect further encroachments upon our freedoms by the courts, the administrative agencies, and even by the Congress.

Mr. President, my remarks on the bill have been from the point of view of free enterprise, which I have always supported. In the nearly 20 years I have been a Member of the Senate of the United States, I have consistently supported that principle, and I shall consistently continue to support it. Regardless of the fact that some Members of the Senate from time to time have wandered aside with views which have bordered on socialism and other isms, I have followed that principle. I am not so familiar with the details of the industry, so far as the actual production of gas is concerned, as are some other Members of this body, and as are the experts, but I do know the principles of free enterprise. I was a Member of the Senate when the original bill was passed. I have been one since, and I expect to be for several years to come. The issue now before the Senate is a vital one. It is important in considering the whole free-enterprise system, and in contemplating the future of our country.

If the Federal Government can regulate the price of gas at the wellhead, it can regulate the price of any other fuel, of any agricultural or manufactured commodity. It could even regulate the cutting price of timber on a small woodlot in New Hampshire. I could hardly be guilty of exaggeration when I say that a New Hampshire farmer raising chickens for the Boston market could have his price laid down by Washington under such a statute. That is not the kind of America which I, for one, want.

Mr. PURTELL. Mr. President, will the Senator yield for a question?

The PRESIDING OFFICER (Mr. CURTIS in the chair). Does the Senator from New Hampshire yield to the Senator from Connecticut?

Mr. BRIDGES. I yield.

Mr. PURTELL. First of all, I wish to compliment the distinguished Senator from New Hampshire, and, I might say, my beloved friend, for his well prepared and well delivered address. I am sure he will be glad to answer some questions I have, because I, too, am from New England.

I am inalterably opposed to the proposed legislation. I should like to ask the Senator from New Hampshire whether he can tell me what State, if any, has the right to regulate a public utility in interstate commerce. I believe it is the Federal Government alone which has that right.

Mr. BRIDGES. That is correct.

Mr. PURTELL. The Senator has said much about free enterprise. For 30 years I have not only believed in and practiced free enterprise, but I have gone over the land preaching free enterprise. I believe in it as vigorously as does my distinguished colleague.

What is free enterprise? It must be not only free, but it must be competitive. When our system of capitalism is destroyed, if it ever is, it will be destroyed because of abuses rather than anything else. It is not free enterprise when there is no competition, when there exist captive consumers and a captive market at the end of the pipeline, when consumers must pay any price demanded of them, and have no choice. Freedom of competition? There is no freedom of competition. Freedom of determination? There is no freedom of determination.

People who have invested their money in gas-burning equipment must pay the price or deny themselves the use of that fuel. There is a public utility involved, and it is controlled at the State level to the extent that a State can control it. There is only one other agency that can control the fuel in interstate commerce,

and that is the Federal Government. Until the fuel is competitive and truly free, we must look after the interests of the people and see that they are protected.

Does the Senator believe there is free competition and free enterprise for the householder in Connecticut or in New Hampshire who must today pay 10 cents for gas, and possibly 20 or 30 cents for it tomorrow? He is not buying the pipeline, I may point out. He is buying gas delivered through a pipeline, and he may be asked to pay 30 cents tomorrow.

In the hearings which were held, evidence was presented to the effect that perhaps 20 or 30 cents would be the right price, and not 10 cents. Until we have real competition in our system of competitive capitalism, we are in fact not doing our best to save capitalism

Mr. BRIDGES. Mr. President, I should like to say first that I respect the feelings and the approach of the Senator from Connecticut. He is an able United States Senator, and a good friend, from my own section of New England.

I think there is competition. For instance, let me say that in the production of electric energy in my State, for example, some is produced by means of hydroelectric power, but a great portion of it is produced by means of the use of coal or oil. Both those methods, which go to provide the great part of the electric power, are not controlled in price, insofar as the producer is concerned. I say that case is in exactly the same situation.

Mr. PURTELL. Mr. President, let me call the attention of the Senator from New Hampshire to the fact that the two situations are not at all analogous. In one instance, coal which can be obtained from many sources is available through the same means of transportation. But in the case of a State in which there is one pipeline for natural gas, one source of that gas, the people have no choice at all.

I am sure that those who purchase electricity are protected at the State level by the public utility commission. However, in the case of gas, the people must pay the price that is asked. They have no choice and no freedom of determination as to what they may get at the end of the line. I say to the Senator from New Hampshire that in my opinion the two situations are not at all comparable.

Mr. DOUGLAS. Mr. President, will the Senator from New Hampshire yield to me?

Mr. BRIDGES. I yield.

Mr. DOUGLAS. I rather infer from the remarks of the very able senior Senator from New Hampshire that he was implying that the administration has approved the bill. Is that the case?

Mr. BRIDGES. I was saying very definitely that the President of the United States appointed a Cabinet committee, headed by the Director of Mobilization, Mr. Flemming; and the committee made a thorough study and made definite recommendations regarding the need for legislation of such type. The committee did not specifically approve the Fulbright bill or the Harris bill or any other bill, but approved the objectives the committee sought.

Mr. DOUGLAS. Does the Senator from New Hampshire believe this bill constitutes the policy of the White House?

Mr. BRIDGES. I cannot speak for the White House; I am not in a position to do so.

But from the record, which shows what I have stated, I can only assume that that is correct.

Mr. DOUGLAS. What does the Senator from New Hampshire assume is correct?

Mr. BRIDGES. I assume that the report of the committee, recommending the conclusions I have stated, is correct; and certainly the committee was instituted by the President of the United States.

Mr. DOUGLAS. Has the President of the United States ever made a public declaration in favor of this bill?

Mr. BRIDGES. I do not think the President of the United States has specifically commented on this bill; no. I think he has commented on the general principles involved.

Mr. DOUGLAS. Would the Senator from New Hampshire mind answering a somewhat delicate question? He has great abilities, which have been recognized by his party and by the Nation. Is he speaking this afternoon as a Senator from New Hampshire, or is he speaking also as chairman of the Republican Policy Committee of the United States Senate?

Mr. BRIDGES. I say to the distinguished Senator from Illinois that I speak wholly as an individual Senator, as a Senator from New Hampshire, not as chairman of the Republican Policy Committee or as the occupant of any other post which I may hold in the Republican organization.

Mr. DOUGLAS. Therefore, let me express the hope that the other Republican Senators, on that side of the aisle, may not feel committed by ties of party loyalty to this bill, but, instead, that they will follow the able and distinguished Senator from Connecticut [Mr. PURTELL], rather than the Senator from New Hampshire.

Mr. PURTELL. Mr. President, if the Senator from New Hampshire will permit me to make a brief observation, let me say that I am sure the Senator from Illinois did not understand in any way that the Senator from New Hampshire was attempting to define the position taken by the Republican Members of this body. I did not so understand what he said, and I am sure he did not intend his remarks to be so understood.

Mr. DOUGLAS. I am glad to have that point cleared up, Mr. President.

Let me also say that in fighting the bill we who are trying to defend the consumers are very glad to have the able assistance of the distinguished Senator from Connecticut.

Mr. PURTELL. I thank the Senator from Illinois, and I am glad he is on the same side of the issue. However, let me point out that I am not here to lend assistance to him or to any other Senator. All of us are Members of the United States Senate, and we are here to do our duty as Senators.

Mr. DOUGLAS. We are coworkers in the cause of protecting the consumers. It is a pleasure and honor to work with my good friend from Connecticut.

Mr. PURTELL. Mr. President, will the Senator from New Hampshire yield to me for a moment?

Mr. BRIDGES. Mr. President, I have yielded the floor, and have previously agreed to have another Member suggest the absence of a quorum.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that at this time the Senator from New Hampshire may yield to the Senator from Connecticut.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BRIDGES. Then, Mr. President, I am glad to yield to the Senator from Connecticut.

Mr. PURTELL. I thank the Senator from New Hampshire.

Mr. President, I believe that marvelous presentations in connection with the bill have been made on this floor by various Members of this body. I believe it is most wholesome that we are exploring the subject in so friendly and able a way.

However, I wish to make it very clear that our belief in our system of competitive capitalism is not here at issue at all. I would stand up and defend that system with all my ability and with My last breath. But, Mr. President, mark you, I use the words "competitive capitalism." Other countries have forms of capitalism which are not similar to ours; and many times their systems have been destroyed because they were not competitive capitalism and were not free.

So, Mr. President, in defending my position on a bill of this type, I believe that I am, in truth, defending our particular type of competitive capitalism.

ORDER OF BUSINESS—ORDER FOR RECESS UNTIL TOMORROW

Mr. KUCHEL obtained the floor.

Mr. JOHNSON of Texas. Mr. President, will the distinguished Senator from California yield to me for a moment?

Mr. KUCHEL. I am glad to yield.

Mr. JOHNSON of Texas. First, Mr. President, I wish to express my deep appreciation to the distinguished Senator from California for extending to the leadership the courtesies he has extended today. I am very grateful to him.

I now ask unanimous consent that when the Senate concludes its business today, it stand in recess until tomorrow, at 12 o'clock noon.

The PRESIDING OFFICER (Mr. MONRONEY in the chair). Is there objection? Without objection, it is so ordered.

Mr. JOHNSON of Texas. Mr. President, if the distinguished Senator from California will indulge me further, let me say that at the conclusion of his

remarks, I shall appreciate it if he will make the point of the absence of a quorum, in order that the Senator who is to speak next may come to the floor.

Mr. KUCHEL. I shall be delighted to accommodate my friend, the Senator from Texas.

Mr. JOHNSON of Texas. I thank the Senator from California.

SAD PLIGHT OF THE TUNA INDUSTRY

Mr. KUCHEL. Mr. President, out of order, I ask unanimous consent that the Senator from Washington [Mr. MAGNUSON] and I be permitted to submit a resolution with respect to the tuna fish industry.

The PRESIDING OFFICER. Without objection, it is so ordered. The resolution will be received and appropriately referred.

The resolution (S. Res. 186) was referred to the Committee on Finance, as follows:

Resolved, That the United States Tariff Commission make an investigation, as provided for in section 7 (b) of the Trade Agreement Extension Act of 1951, to determine whether, as a result of the concession made to Japan, in a trade agreement entered into on June 7, 1955, binding the duty-free treatment of fresh or frozen albacore tuna, this product is being imported in the United States in such increased quantities, either actual or relative, as to cause or threaten serious injury to the domestic industry producing like or directly competitive products.

Mr. KUCHEL. Mr. President, at a time when the people of the United States are enjoying a magnificent peacetime economy, one segment of the people in the Far West faces a continuing and widening danger to their very economic survival. I speak of the United States citizens in the States of California, Oregon, and Washington, particularly, who over the years have made their living in the tuna fishing business.

Mr. President, I have been very glad to support reciprocal trade legislation, as recommended by the President of the United States. I do not believe it was the intention of the Congress, in fashioning that legislation, to promise any segment of the economy of the Nation that it would be eviscerated or destroyed. Indeed, I believe that sufficient evidence of the intention of the Congress to the contrary may be found in the wording of the statute which sets forth such protection as the so-called peril-point and escape-clause provisions.

Today, Mr. President, I am delighted to join with my distinguished colleague from the State of Washington [Mr. MAGNUSON], its senior Senator, in sponsoring a resolution which can be of assistance in solving this tragic and intricate problem. It will be but the first of a series of pieces of legislation which, together, we shall offer to Members of the Senate and the House of Representatives in an effort to have the authority of the Federal Government enlisted in assisting an industry which desperately needs the help that is available in Washington.

Today we are submitting jointly a resolution which I shall read:

Resolved, That the United States Tariff Commission make an investigation, as provided for in section 7 (b) of the Trade Agreement Extension Act of 1951, to determine whether, as a result of the concession made to Japan, in a trade agreement entered into on June 7, 1955, binding the duty-free treatment of fresh or frozen albacore tuna, this product is being imported in the United States in such increased quantities, either actual or relative, as to cause or threaten serious injury to the domestic industry producing like or directly competitive products.

I very greatly hope that this resolution may receive the prompt attention of the committee to which it has been referred, and that it may be promptly approved.

I wish to outline today some of the criteria which the Tariff Commission should utilize in any such investigation it makes pursuant to this resolution, and, along with those criteria, to indicate something of the facts requiring the speedy approval of the resolution.

One of the factors which the Tariff Commission unquestionably will use in finding injury as we allege is the increased imports, either actually or relative to domestic production.

What are the facts?

The facts are that imports of frozen tuna have increased fantastically since 1948, all free of both duty and quota. In 1948 the frozen tuna imports totaled more than 9 million pounds. In 1954 frozen imports of tuna totaled more than 123 million pounds. Think of it, Mr. President. That is an increase of 1,250 percent.

This figure represents a loss of about 285,000 fishing days for the domestic fishermen.

The year 1955 brought no decline in this uptrend. Imports for the first 8 months of 1955, 115 million pounds, were running at a rate 20 percent over those for the previous year of 1954.

Our good neighbor, Japan, is the principal supplier, with its more than 2 million pounds in 1948, spiraling to 98 million pounds in 1955. This represents about 80 percent of all the imports of this item.

Importation of canned tuna has also increased. Unlike frozen tuna, canned tuna is dutiable, canned tuna in oil being dutiable at 35 percent, and canned tuna in brine being dutiable at 12½ percent.

Combined imports of both types totaled more than 8 million pounds of processed weight in 1948, rising to more than 31 million pounds in 1954, after having reached a peak of more than 34 million pounds in 1953.

Last year, in 1955, for the first 5 months, canned imports were running well below those for 1954. At the end of 8 months, however, the amount was nearly up to the 1954 level, with the rate indicating that 1954 figures would be exceeded.

Expressed in terms of tons of fish deliveries, canned-tuna imports in 1954 represented more than 30,000 tons of frozen tuna.

I think it is crystal clear that tuna imports have skyrocketed to the grievous wrong of the American fisherman.

Under our resolution, the Tariff Commission will, we allege find a decline in the proportion of the domestic market supplied by domestic producers. Indeed, we believe a decline of such magnitude will be established as clearly to indicate severe injury.

The domestic market is made up of canned goods processed from tuna landings by the domestic fleet and from imported frozen tuna, plus imports of canned tuna and tuna-like fish.

In 1948 domestic producers—and that phrase, as I use it, includes both fishermen and boatowners—supplied about 91 percent of the domestic market. That percentage has been on a toboggan. In 1953 the domestic producers' share was 60 percent, and 57 percent in 1954.

At the end of 8 months of 1955 the American producers' share was 46 percent. Thus, the foreign share of our market has grown from less than 9 percent, in 1948, to 43 percent, in 1954, with the first 8 months of 1955 showing 54 percent lost by domestic producers. The most cursory examination of these statistics ought to establish beyond any peradventure of a doubt what is happening to our own people.

The Tariff Commission will be interested—and so will you, my brethren, in whether or not there has been a downward trend in production. There has been, and that statement is susceptible to abundant proof.

The domestic producers—fishermen and boatowners—is composed of the very numerous albacore fleet sailing from all ports in California, Oregon, Washington, Alaska, and Hawaii, the purse seine fleet from San Pedro and northern California, together with the bait boat or tuna clipper fleet operating from San Diego and San Pedro.

In 1948 this combined fleet produced almost 160,000 tons of fish, which total increased to 196,000 tons in 1950. As importation went up, our own production went down, with 160,000 tons produced in 1951, roughly equivalent to the amount produced in 1954. In 1955 the total production was estimated at 145,000 tons.

And, as those in this sick industry have stated, that is not all. The fleet was larger in 1951 than it was in 1948 and 1950, so the return per vessel was materially less.

The Commission, and all our people, will be vitally interested in the impact on American employment by this continuing importation. There has been a significant decrease in employment in the American tuna fishing industry. Indeed, in the bait boat fleet the number of births available has declined from 2600 in 1950 to less than 2100 in 1955.

The utilization of this skilled work force is another evidence of decline. We utilized our fleet 17 percent less in 1951–1954 than we did in 1948–50. We are utilizing it 30 percent less this year. These are the figures the industry gives me. These are what it is ready to prove.

We do not employ as many fishermen. Those who are employed have less opportunity to go fishing and earn their shares.

During November and December I met with groups of fishermen and their wives and families in the cities of San Francisco, San Petro, and San Diego. I know at firsthand of the unemployment which exists among the men who over a lifetime, have gone to sea as fishermen. It is a tragic plight. It is one which certainly merits the assistance of Congress and of the Federal Government.

Wages, Mr. President, and what has happened to them in the tuna business, must be a concern of the Commission under our resolution.

A fisherman's earnings are based on a share of the fish catch. In the tuna bait boat fleet the percentage is determined by means of a labor agreement negotiated between unions and boatowners.

Because of declining prices and reduced volume of production for the fleet and for each vessel, share earnings have sharply declined.

Using 1948 earnings as an index of 100, earnings in 1951, when imports were sharply felt, dropped to 71.4 percent of 1948 earnings. They remained constant in 1952, rose in 1954, and a decline to about 60 percent is indicated for 1955. These, too, are susceptible to proof, and, being proved convincingly demonstrate an injury to some of our fellow citizens.

What about prices, Mr. President? This too is an important factor. Here there has been a downward trend, and such a downward trend ought to indicate serious injury to a domestic industry.

Prices of yellowfin and skipjack are now at levels averaging 69.4 percent of prices received by boatowners in the year 1948.

Two factors combine to cause this decline to have far greater impact upon the boatowners than the percentage decline:

First. Sharp increases in all areas of costs in the same period.

Second. Sharp declines in ability of vessels to go fishing.

Profits of owners and earnings of crew members arise from what remains after expense is deducted from income. The foreign supplier of foreign fish, has been able to undersell the domestic producer.

There again I am sure that the facts brought before the Tariff Commission will indicate that serious injury has already occurred and continues.

Profits are a relevant factor. The story on profits is appallingly clear.

Using 1948 as the base year and as an index of 100, the year 1955 will show losses almost 50 percent as great as the total profits for 1948. In the years 1951 through 1955 the average profit or loss position of the bait boat fleet has been just about zero. On an average basis, boatowners have been keeping their heads above water because of their depreciation allowances.

Other factors will be taken into consideration by the Tariff Commission under the resolution which the Senator from Washington [Mr. MAGNUSON] and I are submitting.

One of these is investment in new boats or in the replacement of boats lost through obsolescence or casualty.

The bait-boat fleet totaled 161 vessels at the end of 1947. By year end 1952 there were 210 active vessels. Presently there are 165 vessels in the fleet, a decline of 21 percent in the number of vessels and 14 percent in capacity tonnage.

From 1953 to 1955 only four new vessels were commissioned. The fleet has progressively declined in size and increased in age.

The purse seine fleet has similarly declined. Over 100 vessels bought licenses and fished tuna a few years ago. This year less than 70 vessels were available for this operation. There is no appreciable new construction of tuna boats, to speak of, in all America.

The health of a business can be gaged by new investment in it. Let us consider these figures:

First. The Japanese high seas tuna fleet increased from 272 vessels at the end of 1951 to 436 vessels at the end of 1954, an increase of over 60 percent. Its tonnage capacity increased 151 percent.

Second. The United States high seas tuna fleet, using the bait boats as a measure, has declined by 21 percent in number and 14 percent in capacity in the same period.

I wish to make one more comment. During the days of World War II, on many occasions, the United States Navy, commented on the magnificent work in behalf of the people and in the defense of the United States which was done by those who went down to the sea as fishermen. They constituted an additional outpost for our Navy. They engaged in patrolling many long days any many long months. They need fairer consideration at our hands.

For all these reasons it would be tragic if, by rapid attrition, the American tuna industry were to die. I believe the Tariff Commission could do a worthy act in behalf of an important segment of the economy of our Western States, and, indeed, of our country, were it rapidly to conduct the investigation sought by the resolution that we have submitted. I am sure its findings would point the way to better days.

I ask the Members of the Senate, if they will take the time to acquaint themselves with the appalling statistics which I have read into the RECORD. It seems to me they indicate exactly the situation which Congress had in mind when it provided in trade legislation for such exceptional situations as the application of peril point and escape clause provisions.

If this resolution is adopted, an inquiry can then, with dispatch, proceed.

Mr. KUCHEL subsequently said: Mr. President, I ask unanimous consent that there be printed in the body of the RECORD a statement prepared by the able senior Senator from Washington [Mr. MAGNUSON] on the subject of the resolution with respect to the tuna fish industry.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR MAGNUSON

I am pleased to join with my good friend, the distinguished junior Senator from California, in introducing the following Senate resolution:

"*Resolved*, That the United States Tariff Commission make an investigation, as provided for in section 7 (b) of the Trade Agreements Extension Act of 1951, to determine whether, as a result of the concession made to Japan, in a trade agreement entered into on June 7, 1955, binding the duty-free treatment of fresh or frozen albacore tuna, this product is being imported in the United States in such increased quantities, either actual or relative, as to cause or threaten serious injury to the domestic industry producing like or directly competitive products."

The purpose of this resolution is to put into operation the "escape clause" machinery provided for in our trade agreements legislation in order to insure that domestic industries will not become the victims of ill-considered tariff reductions or other concessions made to foreign nations under the reciprocal trade program.

Gentlemen, it has been 4 long years since the sorry plight of our American tuna fishing industry has been given adequate consideration by this body. Four years during which our Government has calmly sat by to watch this important segment of our west coast economy slowly scuttle in a sea of cheap foreign imports, principally from Japan. Our Government's record of inaction in the face of this situation is a curious history indeed.

Most Senators will remember that in 1952 fishermen appealed to Congress for a modest, 3 cents per pound, tariff on imports of fresh and frozen tuna. They presented us with a very convincing argument. They showed that, whereas virtually every other important fisheries product enjoyed some form of tariff protection, fresh and frozen tuna had always been allowed to enter this country in unlimited quantities, duty-free. Because of this bonanza, Japan and others began shipping in more and more whole tuna until, by then, the level of imports had reached the staggering total of over 60 million pounds per year—10 times the prewar annual average. It was obvious to any reasonable person that American tuna fishermen could not fairly compete on this level with grossly underpaid foreign labor, and that the industry was seriously in trouble. Despite these facts, a bill giving fishermen the tariff relief to which they were clearly entitled was defeated on this floor by a handful of votes after passage in the House. Instead, Congress shifted responsibility to the executive branch for finding a solution to this problem.

Four years have gone by and still nothing has been done. Fresh and frozen tuna imports are now slightly more than double what they were in 1952, and there seems to be no end in sight to the upward spiral. What was then a serious problem has become little less than a catastrophe for the tuna fishing industry. I know from first hand experience; a few short weeks ago our Merchant Marine and Fisheries Subcommittee held a series of hearings on problems affecting the fishing industry along the west coast. I saw literally hundreds of tuna boats tied-up in southern California ports, boats that had not put out all summer because their owners had no money to hire a crew, or boats with a full catch rotting in their hold, unable to find a ready market in competition with lower-priced imported fish. I talked to fishermen and their wives from Seattle and San Pedro; ship chandlers, merchants, and bankers from San Diego; boatowners, boatbuilders, and labor leaders from Tacoma and the Puget Sound area. Everywhere they told the same story: lost income, exhausted credit and savings, canceled contracts, younger men turning away from fishing for a more secure livelihood. And everywhere they gave the same reason: foreign competition has made fishing unprofitable; until some way can be found to hold imports to a reasonable level, the entire tuna fishing industry and all those dependent upon it will be in grave danger of collapse.

In the meantime, far from taking any effective measures to relieve the burden of imports, our Government has acted only to compound the problem. In a trade agreement with Japan, signed last summer, we agreed to bind albacore tuna, the principal imported species, to the duty-free list. Not only have we failed to protect our domestic industry; now, by Executive action, we declare to the world that we have no intention of ever doing so. If allowed to stand, this concession will certainly stimulate an even greater flow of tuna imports, and also make it impossible for Congress ever to deal with the problem of regulation of tuna imports on an overall basis.

Thanks to the escape-clause procedure, however, there is still a way open to correct this error. I am sure that the investigation called for in this resolution will establish beyond doubt the serious injury suffered by the domestic tuna industry as a result of the binding of the duty-free rate on albacore. All we ask now is that the fishermen be allowed to present their case before the Tariff Commission. Later on I hope to present legislation dealing with all other varieties of tuna fish and providing for an equitable program of regulation for fresh and frozen fish.

Mr. KUCHEL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CLEMENTS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT OF THE NATURAL GAS ACT, AS AMENDED

The Senate resumed the consideration of the bill (S. 1853) to amend the Natural Gas Act, as amended.

Mr. ANDERSON. Mr. President, the problem with which the pending legislation is concerned is not new to the Senate; many of the Senators have, like myself, been through this debate once before, and all the Senators have had occasion to become informed about and acquainted with the subject over a period of years.

What we have done in the past is, I certainly agree, not binding on what we do now. We are here to make policy, and that requires us to look at the facts as they are now—not as they were in 1938 or in 1950 or in some other year.

Six years ago I was among those who voted for legislation dealing with the subject of which the bill treats. I will have to say that I was not an active participant in that debate. I made no speeches and no statements.

To the best of my understanding, I believed that the policy we then had in force was working satisfactorily and I saw no reason for that policy to be changed. On the basis of the facts then available, I voted to leave our policy unchanged.

Much has happened since then. In my opinion, the facts have changed—and changed considerably. As a result, my own attitude has changed, also.

We are working from an entirely different set of facts today than were before us in 1950. What we did then was largely dependent upon conjecture. Both sides were saying at that time that if we go this way, such-and-such will be the result, and if we go another way, the result will be different. But there were no hard facts on which to determine definitely which side was right.

That is not the case now. The facts we need for a sound decision are before us. I believe that we can look at those facts and decide what is best for the consumer, what is best for the producer, and what is best for the Nation.

On that basis, I have come to the conclusion that this bill now before the Senate is not only desirable but that its passage is absolutely essential for the protection of the consumers of this Nation. For that reason I feel a very strong compulsion to enter this debate and speak for the first time on this subject. It may be of benefit to some who are giving this matter thoughtful attention to know the factors which have influenced my own change in thinking.

At the outset, I think it is important to admit that all here are concerned with the consumer's welfare and protection. That is not an issue between us. The issue is how such protection can best be accomplished. On that question different men with different experience can be expected to reach different conclusions, and that has happened.

Those who know the natural-gas industry from the utility company viewpoint are inclined to the conclusion that the whole industry should be regulated on the same basis as the utilities. On the other hand, those who know the producing end of the business are unanimously convinced that such regulation would not work successfully.

For those who may know little about either segment, the choice between these arguments becomes very difficult. Fortunately, at this point I think we are able to look back over recent years and see from actual developments where these arguments are right and where they are wrong.

In 1950, when this basic question was before us last, we had the same two positions advanced—the utility viewpoint and the producer viewpoint.

I remember quite well that those advocating the utility view then said that if Federal price controls were imposed on production, the consumer would benefit. They dismissed the suggestion that such controls might have any adverse effect upon the supply of gas available; they said that the search for gas would continue, as it always had; that as new gas reserves were found they would be sold readily into interstate commerce, as had always been done.

The arguments made then are again being heard now.

In response to that argument, when it was presented here in 1950, those who understood the producing end of the industry told the Senate that if such controls were imposed a situation would be created in which an artificial scarcity would develop. We were told that the search for gas would decline, that less and less gas would be dedicated to the interstate markets, and that the consumer rather than benefiting would, in a very short time, begin to lose the benefits which natural gas had brought him.

Mr. President, when we were having a discussion before the Policy Committee the other day as to whether this bill should be brought before the Senate, in the course of the very few remarks I made, I turned to the able senior Senator from Oklahoma [Mr. KERR] and said, "I wish that, somehow, there could be brought before the Senate the argument you made in 1950 pointing out that the price of gas would go up if uncertainty came into the production of it."

Since that time I have thought that perhaps it might be useful to look up a few statements which were made in 1950, so I am going to refer to them.

In the CONGRESSIONAL RECORD, volume 96, part 3, page 3450, the able senior Senator from Massachusetts [Mr. SALTONSTALL] said:

> I ask the same question of the Senator from Oklahoma I pronounced earlier: Will the so-called Kerr bill, in his opinion, help to get natural gas to Massachusetts or retard it?

The senior Senator from Oklahoma [Mr. KERR] responded as follows:

> It will insure the opportunity of getting natural gas into Massachusetts at a reasonable price. The defeat of the bill will retard the process.

Subsequently, on page 3458, the senior Senator from Oklahoma said:

> I will say that I was quoting from the petition of the applicant, the Michigan-Wisconsin Pipeline Co., in which they themselves state that if they are permitted to increase their capacity on the basis applied for, and which will utilize the increased volume of gas which they obtain through the renegotiated contract, their unit cost of transportation will be sufficiently lowered to enable them to absorb the slight increase by the producer, and still deliver the gas at the gate of the city in Michigan or Wisconsin at a less price than would have been in effect had they not been able to renegotiate their contract for the doubled amount of gas.

The senior Senator from Oklahoma was trying to point out that the supply of gas had some connection with its price.

On page 3476, the then Senator from Pennsylvania, Mr. Myers, said:

> I have said before that in the committee, when we held hearings on the bill, the evidence which was submitted was that if the bill is enacted, the price of natural gas will go up.

The senior Senator from Oklahoma said:

> I certainly do not agree with the Senator from Pennsylvania.

The senior Senator from Oklahoma, was trying to point out why he felt the increased production would be of assistance.

On page 4016 there is this comment by the senior Senator from Oklahoma:

> Monopoly cannot begin or survive where independents are willing and able to operate and compete. But if S. 1498 is defeated, independents will be either forced out of operation in interstate areas or compelled to become regulated utilities. That would not only encourage monopoly, it would compel it.

While I do not wish to quote at great length from a subsequent portion of the debate, I find there a reference to the

fact that the industry is impossible of monopoly when there are the striking differences which occur at the producer level. In his statement, the senior Senator from Oklahoma said:

The average value at the wells per thousand cubic feet ranges from as low as 2.7 cents in New Mexico to 24.1 cents in Pennsylvania.

I submit that monopoly does not occur when there is that great a difference in the producer's cost. I happen to know of a contract which now exists in Eastern New Mexico, where gas is produced incidentally to the oil; not as a primary purpose of the drilling program, but in a low-pressure area where gas is simply received from the separators. The gathering company there pays an average of 5.5 cents a thousand cubic feet for it. But the gas price in high-pressure wells, where gas is delivered directly to the pipeline at the pressure of the pipeline has been 9 cents on the average.

Subsequently, Senator KERR said:

The Senator from Oklahoma knows that if S. 1498 is defeated the volume of gas will be reduced, the unit cost of transportation will be correspondingly increased, and the cost to the consumer will be higher for less gas, rather than cheaper for more gas, which would be the situation if S. 1498 were passed.

I point out that that was a pretty accurate prophecy, as things have worked out.

In the CONGRESSIONAL RECORD, volume 96, part 3, page 4020, Senator KERR said:

Senate bill 1498 not only is an anti-monopoly bill but is the best insurance policy for reasonable prices for natural gas, not only to the millions of consumers now using it but to the millions of consumers who seek to have the opportunity to use it.

A little further in the debate, he said:

If threatened regulation has brought some scarcity and some increase in prices, I ask Senators, what will actual regulation bring? The answer must be still greater scarcity and, thus, still higher prices.

Then, at page 4039, Senator KERR said:

If in the future he is left in the same position as he has occupied in all the 12 years since the act was passed, he will be able to continue furnishing gas in such abundant quantities that the volume handled by the transporters and the distributors will make it possible for them to pass on to the consumers still further savings.

And a little further:

If the situation continues to be in the future what it has been in the past, so that the producer will be able to continue freely to supply natural gas in ever-increasing amounts, savings in the part of the operation where the cost is high can continue to be made and continue to be passed on to the consumer.

On page 4095, Senator KERR said:

Moreover, if the bill is enacted, reserves which have been found, but which have not thus far been made available by contract to interstate carriers, will be made available. In short, I am saying that by reason of the enormous amount of gas which will be available from those two sources—and in the aggregate it is greater in volume than all the gas now being sold by independents to the transporters—there will be far more competition among the producers for the markets available, with the result that the price, even at the producer level, will either be held down or will be forced down, and a greatly increased volume of gas thereby will be made available, and that will result, first, in cheaper operation for the pipelines; second, in a reduction of rates to the consumers; and third, in twice as many consumers as now are enjoying natural gas being able to have an opportunity to enjoy cheap fuel in the form of this, the most desirable of all the fuels we know.

Finally, on page 4115, Senator KERR said:

Is not the Senator aware of the fact that the defeat of Senate bill 1498 will compel every independent producer of gas, as such, to go out of the business, and they will have to take the route the Delhi Co. recently took in selling out to one of the regulated companies, because of the fact that the little fellow cannot spend his lifetime coming to Washington to make rate bases, and to file applications for permits to drill wells and to expand, all subject to the Federal Power Commission's regulation, which will require him to limit his return to the cost of operation plus 6½ percent?

I have read from the debate in 1950 merely because it is interesting to recognize that the very situation in which we now find ourselves was so accurately depicted 5 years ago.

What has happened since then is, of course, history; but history has made its record. The bill which the Senate passed in 1950 did not become law. In time, though, the utility viewpoint did prevail through a Supreme Court decision, and the utility regulation of production has become the practice of the Federal Government.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. ANDERSON. I yield.

Mr. DOUGLAS. Is the Senator contending that since the defeat of the Kerr bill we have had Federal regulation of the price of gas as it enters the interstate pipelines?

Mr. ANDERSON. I think the fact that the Kerr bill was not passed, and the Supreme Court gave its decision, has had the effect of discouraging, certainly, increased efforts to find gas, and has, in a way, been reflected in the price which has been paid at the field.

Mr. DOUGLAS. Is it not a fact in reality that although the Kerr bill was defeated, nevertheless, for all practical purposes, the principles of the Kerr bill were put into effect by the Federal Power Commission by administrative action, when in the Phillips case the Commission refused in 1951 to take jurisdiction over the price at which gas furnished by the Phillips Co. entered the Michigan-Wisconsin Pipeline Co. lines? And in this case, Phillips was the sole supplier of the pipelines and many of the port cities and States which it served. So the Federal Power Commission, by administrative order—and I think this decision was in 1951—put into effect the Kerr bill, and it turned out that we had won a very hollow victory on the floor.

As the Senator from New Mexico is well aware, this case was then appealed to the Federal courts by the cities of Milwaukee and Detroit and by the States of Wisconsin and Michigan.

The circuit court of appeals, in 1953, handed down an opinion overruling the Federal Power Commission, and the Supreme Court, in June of 1954, upheld the decision of the circuit court of appeals. So for at least 4 years the principles of the Kerr bill were put into effect administratively.

I shall discuss the period since June 1954 in a moment, but certainly up to June 1954 the Kerr bill was dominant because of the refusal of the Federal Power Commission to take jurisdiction.

Mr. ANDERSON. I shall be glad to have the Senator from Illinois develop that point. I know how strongly he feels about it. All I say to him is that those in the oil-producing part of the country know that the fact that the Kerr bill was vetoed by the President, and vetoed in strong terms, gave ample indication of the fact that, regardless of what the Federal Power Commission did, the question of the regulation of these sales was not settled. Every oil and gas producing company in my section of the country was constantly faced with that threat, and realized that it was going to be faced with it by another decision. Not only was that decision appealed, but it was not long before the Supreme Court took it up. The Supreme Court did not settle it until 1954, but I assure the Senator that if he had been living in an area where gas was being produced he would have known that the question was being considered constantly in the minds of the producers. It was not settled, but might come to life at any time.

For some 18 months, we have had the kind of regulation in force which those who oppose this bill—and who opposed a similar bill in 1950—say we should have. They said in 1950, as they are saying now, that this method of regulation can be trusted, that we have nothing to fear from following it.

What does the record itself show?

One. Federal control at the wellhead has not decreased the price of gas to the consumer, as we were led to believe it would.

Two. Federal control at the wellhead has decreased the supply of natural gas entering interstate commerce, as we were told it would not do.

In 1952, 5,300,000,000,000 cubic feet of natural gas was committed to the interstate market; in 1953, the amount reached 6,400,000,000,000. In 1954, the year Federal controls were imposed, the committments fell to only 2,300,000,000,000. Two-thirds less gas went to the interstate market in that 1 year.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. ANDERSON. I yield.

Mr. DOUGLAS. Is it not a fact that the sale of gas by the utilities constantly increased during that period? The only place where one could get gas would be, of course, in the main, from the Southwest. Is it not true that interstate shipments of gas constantly rose during that period? The Senator from New Mexico is using the term "commitment," and, of course, that has a technical meaning. So far as shipments are concerned, the record is clear, however, that shipments of natural gas constantly increased and that the consumption of natural gas constantly increased during the period. Far

from there being a smaller supply for the public, there was a larger supply. The Senator knows that to be so.

Mr. ANDERSON. I not only know it, but I know the supply would have been much larger if there had not been Federal control. In this country we face an expanding population and an expanding market and an expanding demand for natural gas which is far out of proportion to the ability to supply the demand. I have merely pointed out that the amounts committed were necessarily decreased.

Mr. DOUGLAS. Is it not true that the sale of gas by the utilities increased by approximately a half billion feet in 1954 and another half billion feet in 1955, so that instead of what was sold in 1953, approximately 5.1 billion feet, the utilities sold approximately 6.1 billion feet in 1955?

Mr. ANDERSON. Yes, and if the producers had had the advantage of the Kerr bill they would have been selling 7 billion feet, which is what I should have liked to seen them do.

Mr. DOUGLAS. The plain historical truth is that instead of having a diminishing supply of natural gas, the country has had an increased supply of natural gas.

Mr. ANDERSON. I have tried to indicate that I was not saying that. I was talking about the amount of gas committed at the gas wellhead.

Mr. DOUGLAS. I think that figure ought to be placed in conjunction with the actual shipments and consumption of gas during that period. The Senator from New Mexico knows the Senator from Illinois has a high opinion of him, but I simply want to keep the record straight.

Mr. ANDERSON. I am anxious to have that done. At no time did I make the statement that the shipment and consumption of gas had decreased.

Mr. DOUGLAS. That is true, but when the Senator talks about commitments, the unwary reader might think a commitment meant a shipment, whereas it does not.

Mr. ANDERSON. I realize that.

I now continue with my statement:

Third. Federal control at the wellhead has adversely affected the search for new supplies of natural gas, as we were told it would not do.

For the first 11 months of 1955, the industry drilled 7.4 percent more wells than in 1954. The number of oil wells drilled increased 8 percent, but the number of gas wells declined 8.9 percent.

Mr. DOUGLAS. Mr. President, will the Senator yield for a discussion of the actual facts?

Mr. ANDERSON. Does the Senator question the facts?

Mr. DOUGLAS. They certainly need amplification.

Mr. ANDERSON. The Senator from Illinois asked if I would yield in order to have the actual facts stated. Does he question my figures?

Mr. DOUGLAS. They do not give the full picture.

Mr. ANDERSON. The statement was that I had distorted the actual facts. What are the facts, if these are not true?

Mr. DOUGLAS. The facts are, as the Senator well knows, and as General Thompson testified, that one does not drill for gas as such; one drills for oil——

Mr. ANDERSON. I know General Thompson, and I knew him when he was a colonel, and I met him when he was mayor of Amarillo, but when the Senator states that he said no one drills for gas, I say he has been misquoted, because I have seen people drill for gas, and Ernest Thompson is too smart to have made that kind of statement.

Mr. DOUGLAS. Here is his statement on page 54 of the hearings. I shall read from the hearings——

Mr. ANDERSON. I can find it.

Mr. DOUGLAS. The statement appears at about the middle of the page:

> But as far as drilling for gas is concerned, hardly anybody drills for gas. They get gas accidentally when they are looking for oil.

This is the statement of the star witness, who was brought up from Texas to testify in behalf of the Fulbright bill, and he certainly would not be prejudiced against the bill. I accept him as an authority on this point.

Mr. ANDERSON. Having accepted him as an authority on that point, I hope the Senator from Illinois will be willing to get the actual evidence on the point. The witness is talking about wildcatting. As a general rule, drilling for natural gas is unprofitable before one discovers a field. Most people do start out drilling for oil, and if they happen to find natural gas, they do sometimes drill for natural gas.

If the Senator from Illinois would only at sometime take the time to visit the Four Corners section, he would find hundreds of well there that are drilled only for gas, Ernest Thompson to the contrary notwithstanding; but I do not believe he meant that.

Mr. DOUGLAS. I hold in my hands figures referring to weekly well completions for both developmental and wildcat wells. They come from the Oil and Gas Journal, Weekly Well Completions. The total wildcat wells drilled in 1950 was 8,554; in 1955 it was 12,302, an increase of approximately 3,800, or 45 percent.

Mr. ANDERSON. What do those figures prove?

Mr. DOUGLAS. They certainly do not prove that exploration for gas has diminished.

Mr. ANDERSON. Would the Senator show how that in any way contradicts the statement I have made?

Mr. DOUGLAS. I think the full statistics give a much clearer and more accurate impression.

Mr. ANDERSON. A clearer impression to whom?

Mr. DOUGLAS. Again I would say, to the unwary reader and to the unwary listener to the speech of the Senator from New Mexico. Unless corrected, he would draw an improper conclusion.

Mr. ANDERSON. The Senator from Illinois completely downgrades the intelligence of the average person.

Mr. DOUGLAS. Not at all; I upgrade the intelligence of the Senator from New Mexico.

Mr. ANDERSON. When the Senator says the number of wildcat oil wells increased by 8 percent, but the number of gas wells decreased by 8.9 percent, the reader does not need anyone to warn him against anything.

Mr. DOUGLAS. Let us consider the developmental wells, as distinguished from the wildcat wells. In 1950, a total of 34,725 developmental wells were drilled. In 1955, a total of 44,885 were drilled, or in excess of 10,000 more than five years before.

The Senator from New Mexico may ask, "What about gas wells?" Very well, Mr. President; let us consider the figures for gas wells alone, amongst the figures for developmental wells: In 1950, 2,622 gas wells were drilled. In 1955, 3,416, or approximately 800 more gas wells, were drilled. There has been an increase in virtually every year except from 1954 to 1955, when there was a very small decrease of 162.

Mr. ANDERSON. Certainly.

Mr. DOUGLAS. The Senator from New Mexico takes that one figure and plays it up as if it would indicate a decrease in exploration, whereas the record for the 5 years as a whole indicates that more and more wells were being drilled.

Mr. ANDERSON. Except the Senator from Illinois does not recognize that the Supreme Court's decision occurred in 1954.

Mr. DOUGLAS. Incidentally, let me point out that more wildcat wells were drilled in 1955 than in 1954—or 12,302 in 1955, as compared with 11,280 in 1954, an increase of more than 1,000. Let me point out, further, that the total developmental wells increased in that year by 2,235.

Mr. ANDERSON. I am perfectly satisfied with the statistics the Senator from Illinois has introduced, because when we read them tomorrow, we shall find that, by his own figures, he has pointed out that during the year 1955, the production from gas wells and the drilling of gas wells have declined. That is the statement I made, and that is the statement he tried to make accurate.

Mr. DOUGLAS. But in the case of gas wells, there were approximately 800 more than the number in 1950.

Mr. ANDERSON. Yes.

Mr. DOUGLAS. And I wish to point out that in the case of wildcat wells—as to which General Thompson correctly says the operators drill for oil, and sometimes they find gas—there has been a steady increase.

Mr. ANDERSON. With reference to General Thompson, I would only say that he is one of the finest men I know, and the Texas Commission is composed of persons as fine as any I have ever encountered. They are wonderfully talented and wonderfully well-qualified persons.

But when the Senator from Illinois refers to gas obtained from all parts of the country, I hope he will not be drawn away from a correct analysis by what has occurred in his own State.

It is true that most of the wells drilled in Texas are drilled primarily in a search for oil; but it is also true that the production in the San Juan area of

New Mexico, particularly in the Pictured Cliffs area and other similar areas, comes from an area that is known as a gas-producing area; and in the case of the gas which originally was brought into California from the northwestern corner of New Mexico, that production resulted in the development of all those properties as gas producers.

If I may trust to memory for a moment—and in doing so, I may be badly mistaken—as I recall, sometime around 1930, or perhaps earlier than that, there was discovered a small oilfield in northwest New Mexico which the Continental Oil Co. obtained; and it ran a pipeline down to meet the Santa Fe Railroad at Gallup, N. Mex.; but the Barker Dome development and all the other developments which followed have been in a gas area.

Mr. President, I have set forth the facts. I find them hard to argue against.

I might be able to disregard these facts, except for one thing. This behavior of natural gas production to utility regulation is exactly what those who know the producing business said it would be in 1950, and it is exactly opposite to what those who know the utility business thought it would be. That I cannot disregard.

I do not question for a moment the sincerity or good faith of either side. On the basis of this evidence, however, I do question whether we can afford to follow the advice of men who so obviously do not know how production will react to the controls they recommend. This is a further point to be made here.

In 1950 the men who know the production business came to us and said, "The policy of the Federal Government toward natural gas production is confused; there is a state of extreme uncertainty in the field. Congress ought to act to remove that uncertainty, because if that is not done, these will be the consequences." They told us then what would happen.

"First," they said, "a state of uncertainty will gradually cause the search for and development of new reserves to slow down. It may not stop, but it will decline."

"Second," the men who know production said, "a state of uncertainty will cause producers to adopt a 'wait-and-see' attitude toward dedicating reserves to interstate markets. Some gas will be sold, but must of it will be held back."

"Third," they said, "when this begins to happen in the field, the pipelines, the distributing utilities, and the distant cities and municipalities are going to become concerned about their long-term supplies. They will, as a result, be coming into the Southwest, and bidding fiercely against each other for gas already discovered; and the field price will go up, even though searches for new reserves may not be intensified." We were told, too, that this bidding up of the field price would have an adverse effect upon prices for the Southwestern consumers, too.

Once again, the record demonstrates that those who know the producing end of the business were highly accurate in their estimate of its behavior. More important, though, is this: The producers, in 1950, said again and again that whatever Congress does, this state of uncertainty ought to be cleared up by affirmative action.

The utility position then—as now—was that Congress did not need to act: That the problem of uncertainty was, in reality, no great problem. Yet, we can look back now over the past six years, and can see that the very problem which the utilities are complaining about is the problem which the producers said would arise from an uncertain state of the law.

Mr. DOUGLAS. Mr. President, will the Senator from New Mexico be gracious enough to yield at this point for a question?

Mr. ANDERSON. Certainly; of course I yield.

Mr. DOUGLAS. Then I take it that what the Senator from New Mexico is complaining about is the uncertainty as to the status of the law.

Mr. ANDERSON. No; I am complaining about the situation, in view of the advice of those who knew the production business, and who said uncertainty would result if Congress did not pass a bill then. That prediction has been proved to be correct. So I believe it clear that the uncertainty should have been cleared up.

Mr. DOUGLAS. Could not the uncertainty have been cleared up by having the oil and gas industry conform to the law?

Mr. ANDERSON. I think they were doing so.

Mr. DOUGLAS. The uncertainty was caused by their refusal to accept the decision of the United States Supreme Court in 1947, and by their refusal to accept the action of Congress in 1950 in refusing to override the President's veto, and by their action in 1951 in getting the Federal Power Commission to reverse itself by their trying to reverse the 1954 decision of the Supreme Court and by their fighting regulation every inch of the way. That is what created the uncertainty.

Certainty could have been created if they had conformed to the decisions of the Supreme Court and if they had conformed to the position taken by the Power Commission in 1948–50, before the composition of the Commission was changed—and it was changed, as the Senator from New Mexico well knows, in large part because of the attitude of some Commissioners in regard to this issue.

Mr. ANDERSON. I think it could have been made clear. But they felt they were living up to the section of the law which stated that the production of natural gas should be exempt. Undoubtedly they felt they were doing what was right.

Undeniably, the search for new gas reserves has diminished. Undeniably, producers have adopted a wait-and-see attitude toward selling into the interstate market. Undeniably, the pipelines and the distributors and the municipalities have entered the field to bid upward the prices offered for available gas.

Prior to 1950, the only negotiations in the field were between pipelines and producers. In recent years, however, as the record shows, distributing utilities have been entering that field, and even some municipalities have sought to purchase gas directly.

This is where the higher field prices are coming from—coming from the realization on the part of transporters and distributors that they must have larger supplies, and that supply is related to price.

When we are asked now not to pass this bill, we are being asked to perpetuate the very situation which the utilities say is not in the consumer's interest.

Let me emphasize that the high field prices we are hearing about are not setting off a search for new gas. The search is diminishing, even while the price rises. Why is this so? Because as long as the state of the law is uncertain, normal economic relationships between price and supply have no effect. Uncertainty about Federal policy is the consumer's worst enemy, because the higher prices are not stimulating the search for gas which must begin again if the consumer's interest is to be fully protected.

In New Mexico, for example, we produce great quantities of natural gas. Since 1950, however, a disturbing trend has developed. From out-of-State demands, the field price has been driven to new heights. But, instead of this touching off record exploration, the reverse has occurred. The New Mexico commissioner of public lands, for example, has been unable to secure bids on proved gas acreage offered for lease. A few years back that would have been an unheard of situation. The same situation, however, is true throughout the gas country.

Only a few days ago the Governor of our State appeared before a meeting of the Interstate Oil Compact Commission. Our State has been honored by his election as President of it. In the statement which Governor Simms made he referred to the fact that there was confusion. I read briefly:

> Since the Federal Power Commission's regulation of the natural gas industry was substantiated by the United States Supreme Court the industry has been in a quandary. Its dilemma is being reflected in the fields. In New Mexico, for example, the leasing of State lands in two major gas producing areas has shown a marked decline since the Phillips decision was announced. Gas completions throughout the Nation have followed a downward trend.

Here is an individual whose interest is in trying to see to it that the schools of our State obtain the revenues which normally flow to them from the development of our oil and gas areas. He has been disturbed because the State Land Commissioner advises me that when the State Land Office, which had been obtaining fine premiums for this gas land, offered these two tracts for sale at a recent auction—and I have a letter in my files relating to the situation—no bids whatever were received on the proven gas reserve.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. ANDERSON. I yield.

Mr. DOUGLAS. When the Senator from New Mexico says that the trend of exploration has been downward, I am prompted to make a comparison with

respect to the specific number of developmental gas wells completed from 1950 to 1955. I should like to have the RECORD show that according to the Oil & Gas Journal Weekly, the total number of gas wells in 1950 was 2,622. That number had increased to 2,771 in 1951. In 1952 the number was 2,987; in 1953, 3,439; in 1954, 3,578; and in 1955, 3,416.

The only decrease—and that was a very slight one of not more than 4 percent—was in 1955, the figure being 3,416.

So the trend, except for a very slight downturn in 1955, has been upward. The slight downturn in 1955 was true only with respect to the specific developmental gas wells. Wildcatting actually showed a large increase in 1955. So did all developmental wells.

So I submit that the Senator's argument—which I know has been made in perfect good faith, because the Senator is a very honorable man—simply does not conform to the figures for the industry as a whole. If these figures are wrong, I will now submit them to the Senator to be checked. We have checked them again and again in our office.

Mr. ANDERSON. The Senator keeps repeating that the trend was downward in 1955, and yet he says the general trend is upward. I do not see how it could be both downward and upward at the same time. I merely say that the industry reached a certain point after the decision in 1954, when it turned downward; and the figures the Senator has given support that statement. What conclusion should be drawn, I am unable to say. I draw my set of conclusions. The Senator from Illinois has a perfect right to draw his. I merely say that, as I travel over my State, and as I talk to people who are in the business of drilling for gas or producing the gas, they tell me that drilling for gas is going downward.

The prices which are being paid in the field to get natural gas for the interstate market are simply not getting the new gas required.

This does not surprise me, and it should not surprise the Senate. I have had some experience with the problems of meeting this Nation's need for essential commodities. I know from that experience—as the Senate knows—that production of commodities never flourished in the state of uncertainty. Furthermore, I know that when the problem is that of increasing production, governmental controls have not had the desired effect.

After World War II, when I was Secretary of Agriculture, there were great fears that American agriculture would not meet the food demands of the free world. There were, also, great fears about taking off OPA price ceilings. I said then that the best OPA in the world is supply. Supply will keep the price down, when controls will not. It was my recommendation that controls be removed from American agriculture, and that it be given a chance to produce. The result today is that we have an overabundance of agricultural commodities and we are more concerned about the farmers' prices being too low than about them being too high.

Price controls have never created abundance, and they never will. The gas consumer today needs an abundance of supply, and, if we accept that, we cannot accept price controls, also.

It so happens that in yesterday's mail there came to me a letter from Hon. Earl Elijah, who is apparently a member of the State Senate of the State of Iowa. I have known Mr. Elijah as a very competent and able producer of hogs in the State of Iowa. As I was going through my mail I thought perhaps I ought to add to this discussion the first paragraph from his letter, dated January 12. He says to me:

> Possibly you will recall the occasion during World War II when you headed a congressional delegation which held a hearing in Chicago in an effort to discover the best means of inducing increased agricultural production, especially pork. Willian Yungclas and I both appeared before your committee and took the position that the hogs would be forthcoming, providing sufficient financial incentive was offered. This position, with action on your part to implement it, got the job done.

Mr. Yungclas has written me frequently. He also is a very able and fine farmer in the State of Iowa.

It was the recommendation of these two farmers that if we needed more meat on our shelves, the way to get it was to make production attractive to the producers. I think the same thing is applicable today with reference to natural gas.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. ANDERSON. I yield.

Mr. DOUGLAS. Would the Senator say the same principle should be true of electrical rates, and that in order to get more electricity we should increase electrical rates?

Mr. ANDERSON. No. I think it is desirable to have a stimulus to increase production. Therefore I have believed in the development of new types of production, such as atomic energy. I have believed in the development of huge power dams, which develop power from falling water. I believe in all those things which I think are inducements to the citizens of our country to produce more and more. I do not believe that price increases are necessarily the best way to increase electrical consumption. I have thought that they have not been.

Mr. DOUGLAS. That is just the point involved here. Would the Senator say that price increases are the best way to develop the consumption of gas?

Mr. ANDERSON. No. I am saying that whatever is required to obtain increased production is the best way to protect the consumer, and that if the uncertainty which exists in the present law could be dispelled, and if the uncertainty as to what the future holds could be dispelled, I think we would see an increased production of natural gas, which would be helpful to consumers.

Mr. DOUGLAS. Would the Senator advocate a higher price of gas in order to induce additional production?

Mr. ANDERSON. It is not the price paid to the producer at the well head which is causing the trouble. It seems to be the distribution cost in cities such as Washington, which is holding back the development and expansion of the market. I believe that if we could get enough production, we might be able to break up certain situations involving exorbitant prices. I do not believe we can blame the producer at the farther end of the pipeline.

Mr. DOUGLAS. Is it not true that if we increase the prices of natural gas as it enters the pipelines, it will be necessary to increase the prices charged by the distributing companies, and the distributing companies will have to increase the prices to the consumer? Once the increase starts upstream, it flows downstream to the consumer.

Mr. ANDERSON. Perhaps. I merely point out that if the dividend of the Washington Gas Light Co. was reduced to the 1950 level, as the Senator has suggested, the price at the well might be considerably increased without raising the price locally.

There is another instance, too, I would like to call to mind for the Senators. That is the matter of our Government's experience in the production of uranium.

A few years ago, we were faced with a critical shortage of uranium. Our national security was in jeopardy. The only road ahead seemed to be that of buying uranium at exorbitant prices from abroad.

We decided, instead, to see what would happen if we established an incentive, an incentive price. The rest is history. From that moment on, the search for native deposits of uranium has been intense. Our supply problem no longer exists. More importantly, when the Government begins paying for this uranium in a few years we will have saved billions of dollars.

There was filed, about July 2, 1952, a report from a subcommittee of the Joint Committee on Atomic Energy. It was a report on raw materials. I happened to be chairman of that subcommittee. We tried our very best to point out that the country needed a program to bring about a rapid expansion in the production of uranium, and that that would be the best guarantor with respect to prices that we could have.

Some of this uranium, I might point out, will be used to run the atomic generation plants of some of the utilities which are against this legislation on natural gas. Uranium will be a component of their electric power rates, just as natural gas is a component of their delivered gas rates. If we applied the logic the utility position offers here to the uranium field, we would be regulating the uranium prospectors as public utilities. I know and the Senate knows that if this were the case, we would not be getting the uranium we must have.

Over and over, we hear that because there are so many gas customers, with so much invested in equipment, we ought to have a Federal utility control over production.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. ANDERSON. I yield.

Mr. DOUGLAS. Does not the Senator from New Mexico realize that this is not the position of those of us who oppose the bill? What we say is that there is only one way of transporting natural gas, namely, through gas mains and pipelines,

and that the producer, the pipeline company, the distributor, and the consumer are all tied organically together, and that it is impossible to separate them. To try to chop off any part at the point where the gas enters the pipeline is like Solomon threatening to cut the child in half, with the intention of awarding one-half of the child to one putative mother and the other half to the other putative mother.

Natural gas is unique in that it must move through pipelines.

Mr. ANDERSON. I think that perhaps I should explain to the able Senator from Illinois that when I refer to opposition to the bill I am not confining myself to what he has said, but to what others have said, and to articles which have been written and statements which have been made, completely off the floor of the Senate and completely outside the text of the debate in the Senate. Therefore, if at times there appears to creep into the debate something that seems to be critical of something the Senator has said, he will bear in mind what I have just stated.

Mr. DOUGLAS. I know that the Senator from New Mexico is always charitable. The Senator from New Mexico knows I have for him only the highest esteem. The Senator from New Mexico also knows, I am sure, that if this were purely a matter of personal friendship and esteem, nothing would please the Senator from Illinois more than to have the Senator from New Mexico agree with me or for me to agree with him.

Mr. ANDERSON. I know that.

Mr. DOUGLAS. We are, however, protagonists of caluses and interests in which we believe.

Mr. ANDERSON. I say frankly that I have enjoyed very deeply the many occasions in which we have been partners in the same ventures, even though some of those ventures looked dubious at the time.

Mr. DOUGLAS. I hope that we may be partners many times more.

Mr. ANDERSON. I certainly hope so. All I say is that my experience in my part of the country has persuaded me that a certain course is correct. I do not ask the Senator from Illinois to adopt that course. I know him well enough to know that if he is persuaded on another course and believes the other course to be correct, he will not budge from his position.

Mr. DOUGLAS. What both of us are doing is making an appeal to the Senate—although there are not many Senators on the floor—and to the country, and the country will, I hope, consider the matter from the standpoint of the national interest.

Mr. ANDERSON. The Senator is correct. I believe I neglected to have included in the RECORD a telegram which I received from the American Farm Bureau Federation. Many persons know that I am deeply attached to the American Farm Bureau Federation. I make it a practice to attend the federation's conventions. The federation was kind enough recently to give some special recognition to me and to the Senator from Vermont [Mr. AIKEN]. Therefore, I should like to put into the RECORD a telegram which has been sent to me. It reads as follows:

Hon. CLINTON P. ANDERSON,
Senate Office Building:

Enactment Harris bill to terminate Federal regulation field prices natural gas respectfully recommended. A free market in competitive conditions is most effective guaranty of continuing adequate supply and best assurance interests of producers will be protected.

JOHN C. LYNN,
American Farm Bureau Federation.

I have read the telegram only because my complete agricultural philosophy has been that adequate supplies are the best guarantors of a decent price we have had in all our experience.

Mr. DOUGLAS. Mr. President, will the Senator yield for an observation?

Mr. ANDERSON. I yield.

Mr. DOUGLAS. The president of the American Farm Bureau Federation is an honored resident of my State. He is Charles P. Schuman.

Mr. ANDERSON. He is a very fine man.

Mr. DOUGLAS. He is indeed a splendid man. I count him as a personal friend, even though we do not always agree on farm policy.

However, excellent man though he is, it is nevertheless a fact that on the whole farmers do not consume much natural gas from gas mains. In the main, natural gas is consumed in the cities and towns. Farmers, as a rule do not consume much natural gas. They consume some bottled gas—propane and butane. However, not many farms are tied into the gas mains.

Mr. ANDERSON. I merely wish to say to the able Senator from Illinois that on my farm I am probably the largest individual consumer of natural gas in the county.

Mr. DOUGLAS. The Senator from New Mexico is a very prosperous farmer.

Mr. ANDERSON. Oh no; on the contrary, if I did not have a prosperous business I could not afford to be a farmer.

Mr. DOUGLAS. The Senator operates a very large farm, then, for the sake of psychic income.

Mr. ANDERSON. No, not for the sake of psychic income, but because I happen to be the son of a Swedish immigrant who loved the soil, and I cannot get it out of my blood.

I use natural gas to pump water. I have had long experience with various types of pumps. I have three large wells on my farm. I say to the Senator from Illinois that the first and oldest well is powered by electricity. The second well is powered by diesel power. I run my caterpillar tractor down to the well and pump from that well and irrigate about 200 acres of land with that kind of power.

The central pump is supplied by natural gas. It costs me less than a third as much to operate my natural-gas pump as it does to operate my caterpillar tractor. It costs me less than one-fifth to operate the gas pump than the electric pump.

I am therefore trying to make sure that such a blessing will continue to flow to farmers.

Mr. DOUGLAS. I appreciate the Senator's eulogy of natural gas.

Mr. ANDERSON. It is a great product.

Mr. DOUGLAS. My good friend from New Mexico is correct, and I join him in his eulogy. However, does the Senator from New Mexico get his gas from a gas main or from a local gas well?

Mr. ANDERSON. I get my gas from a gas main. The gas comes from Barker Dome in northwestern New Mexico, and it comes many miles by pipeline to my part of the State and is supplied to me on my farm.

Mr. DOUGLAS. As a general rule as the Senator from New Mexico knows distributive gas mains are not extended into the rural areas to any great extent, because the number of consumers per gas main is relatively low. The distributive gas mains are generally in the towns and cities, where a large volume of gas is carried by the mains. The Senator knows that to be the fact. Of course there may be some prosperous farmers, like the Senator from New Mexico, who have that kind of service.

Mr. ANDERSON. Mr. President, I could not disagree more with the Senator from Illinois than I do in the statement he has just made. I wish to say to him that what I have said is based on my experience. If the Senator were to go out into the country and find out what is actually going on, he would get an entirely different viewpoint.

I have recently acquired a farm in the eastern part of New Mexico, where I have never farmed before. I realize my new farm is not in accordance with the trend for family farms. I bought three farms on which the farmers were starving to death. I am trying to make one prosperous operation out of all three.

The one thing we have done in that area is to bring in natural gas for all the neighbors. I had to pay the gas company to extend the natural gas main to my farm. That was done. The farmers were not prosperous farmers. They were striving to keep a cover on that drought-stricken area. The greatest blessing to that area is natural gas.

I hope the Senator from Illinois will honor us someday by coming into our State and looking at our farms, which are not so fortunate as are the farms in his part of the State of Illinois, which I have visited many times and where I have seen great agricultural progress. If he comes to our State, he will see the efforts which we have to make and the dependence we have on the natural-gas industry.

Every time competition in the form that has been mentioned comes into the area, with the utilities in the Southwest expanding and with pipeline after pipeline being laid in an effort to buy natural gas and get more of it for municipalities, the farmers there have to pay higher prices because of the bidding.

We want a great supply of natural gas. I assure my able and distinguished friend that he would be surprised if he knew how many farmers depend upon pumping in order to carry on their business and depend upon natural gas to operate the pumps.

Mr. DOUGLAS. I have some knowledge of the farmers of Illinois. It is news to me that the majority of the farmers of Illinois have natural gas supplied to them from gas mains.

Mr. ANDERSON. I did not say that. I should not want the Senator from Illinois subsequently to hold up his statement and say that I said that.

Mr. DOUGLAS. The major portion of the consumers of natural gas who get their gas from gas mains are in the towns and cities, and a much larger proportion of them get their gas that way than is the case with farmers.

Mr. ANDERSON. I think that is true.

Mr. DOUGLAS. And, therefore, the Farm Bureau Federation, excellent as it is, does not really represent the consumers of natural gas.

Mr. ANDERSON. I think I would grant that; and I think, in view of the fact that the able Senator from Illinois referred to the President of the American Farm Bureau Federation, it might not be improper for me to say that when I visited the American Farm Bureau convention in Chicago the president of the bureau expressed some very kind things about the Senator from Illinois.

Mr. DOUGLAS. We are warm personal friends, and he is a very fine citizen.

Mr. DANIEL. Mr. President, will the Senator from New Mexico yield?

Mr. ANDERSON. I yield.

Mr. DANIEL. Those farmers are producers. Is it not possible that the members of the Farm Bureau do not want to see the Federal Government set a precedent which someone someday might try to apply to the things they produce on their farms and send into interstate commerce?

Mr. ANDERSON. I am sure that is the point on which the Farm Bureau adopted its resolution.

Mr. DOUGLAS. I should like to suggest that beef, pork, cotton, and corn are not shipped through pipelines. I mean, actual pipelines, not verbal pipelines.

Mr. ALLOTT. Mr. President, will the Senator from New Mexico yield?

Mr. ANDERSON. I yield.

Mr. ALLOTT. Is it not a fact that in the past 2 years since the war many agricultural institutions have had trouble fighting off the invasion of Federal bureaucracy in its attempt to control them?

As an example, I think the Senator will recall that it was necessary to get a specific exemption so that certain companies in the West would not have to come under social security. There was also an effort at that time to place them under the provisions of the Minimum Wage Act. So the statement of the distinguished Senator from New Mexico is not out of line. It is in accordance with the fear that many farmers have of an attempt to extend the horizon of Federal control over every activity they undertake.

Mr. ANDERSON. I would agree with the Senator from Colorado.

I was discussing the fact that gas consumers are not anxious to have Federal utility control.

I say that it is for that very reason we ought not to have a utility system of control in the field. Utility regulation has nothing to do with assurance of supply; no utility commission in the United States has ever caused any commodity to be produced. Because we do have more than 25 million gas consumers, because natural gas does constitute nearly 25 percent of our energy supply, our Federal policy toward production ought to be a policy encouraging the development of new supplies. That is the best protection on price, that is the best protection for the consumer's economic position.

Mr. DOUGLAS. Mr. President, will the Senator from New Mexico yield?

Mr. ANDERSON. I yield.

Mr. DOUGLAS. How would that development be encouraged? Is the Senator saying that the way to encourage it is by removing the uncertainty or by increasing the price?

Mr. ANDERSON. I think the more important thing would be to remove the uncertainty.

Mr. DOUGLAS. And that would give the certainty of an increase in price?

Mr. ANDERSON. No; I do not think so at all. I do not believe the oil industry wishes to face the possibility that not only gas but oil and uranium are going to pass through the hands of the Federal Power Commission.

Mr. DOUGLAS. That is the bogey—oil, coal, copper, and so forth. As we have pointed out again and again, there are alternative methods of transportation in these cases, so that if a consumer is held up by one producer or one distributor the consumer can bypass him and go to others and can have these commodities shipped by railroad, by truck, by barge, and so on; but because of the peculiar nature of natural gas, it has to go through mains and pipelines. That this then altogether and largely removes the possibility of alternative sources of supply.

Mr. ANDERSON. I would only say that if the experiences I have had in the oil fields are any criterion, a great deal of the oil has to move by pipeline. It is frequently a long distance away from a railroad. It is not satisfactory to put it into a tank. It has been sometimes essential for the producers to build their own pipelines.

Mr. DOUGLAS. There are alternative methods in the case of oil which are very widely used.

Mr. ANDERSON. Mr. President, today there are instances in which I believe we can see clearly what is involved here. In Louisiana, during the past year, a well has been drilled to a depth of more than 22,000 feet into the earth. This is the deepest penetration of the earth's surface that man has ever made. Natural gas has been found.

The net result of this discovery is the equivalent of finding a new continent of natural gas. Everywhere man has drilled before, to shallow depth, he can now drill deeper with the hope of finding natural gas. Until now, it was not known whether wells could be taken so far into the earth. This is truly a landmark in our petroleum history. It should cause every consumer to rejoice.

That well, however, has not been drilled without cost. When it is completed, the well may cost well over $2 million. There will be more tons of steel in that hole than in the utility systems under many smaller communities.

To supply a major city, as many as one hundred such wells would have to be drilled and brought in. For each successful well, the explorers would have many dry holes. At the normal ratio of producing wells to dry holes, then, we can figure that producers would have to invest something close to $1.5 billion—one and a half billion dollars—to supply one city. More than one billion of that amount would likely be for dry wells—nonproducing holes.

The Nation's utilities do not have, individually, investments of that magnitude or risks of that magnitude. It is all well and good for a local utility to say, "We live with utility regulation; why cannot the producer?" That is easy to say. It seems even to be a logical and relevant approach; but is it?

The utilities distribute natural gas, but they do not find it. They do not produce it. They know very little about what is involved in finding it or producing it.

We have seen already, from the record available, that the utilities and their spokesmen were wrong—greatly wrong—in what they told us would happen if utility controls were imposed upon production.

Mr. DOUGLAS. Just a moment, to keep the record straight. Is the Senator implying that the distributive utilities were opposed to the Kerr bill in 1950?

Mr. ANDERSON. I think they are now.

Mr. DOUGLAS. Let it be clear that in 1950 the local utilities sat that bill out and took no sides. Those of us who fought the Kerr bill on the floor did so without any support from the distributors. I am happy that they have joined our ranks at this time, and I do not like the way they are being made whipping boys by the producing interests. I wish to make it clear that those who opposed the Kerr bill in 1950 and who took the stand we did were acting independently. But I think there has been altogether too much abuse of the distributive utilities in the past few days because they have had the courage to defend their own interests.

Mr. ANDERSON. Of course I think they might have been exempt under the Kerr bill. That may have been the reason why they decided to sit it out.

Mr. DANIEL. Mr. President, will the Senator from New Mexico yield?

Mr. ANDERSON. I yield.

Mr. DANIEL. The same distributors came in last year and obtained an exemption from Federal control by a bill passed by the Congress of the United States. Is not that true?

Mr. ANDERSON. Yes.

Mr. DOUGLAS. Which the Senator from Illinois opposed. I have been consistent in this matter. I do not know whether the Senator from Texas voted with me on that occasion or not.

Mr. DANIEL. I do not recall whether it was a roll-call vote.

Mr. DOUGLAS. I think there was a yea-and-nay vote.

Mr. DANIEL. I doubt that.

Mr. DOUGLAS. Does the Senator mean that we were not able to get enough Senators to have a yea-and-nay vote?

Mr. DANIEL. I think that is the situation, but I am not sure.

I was wondering if the Senator from Illinois remembers criticizing those distributor utilities——

Mr. DOUGLAS. The Senator from Illinois does not criticize people or companies. He tries to stand for principles which he believes to be correct, but he knows it is only human for people to defend their interests. On the whole, as his hair gets whiter, he learns not to attack a person's motives.

I believed when the Hinshaw bill came up that the State utilities commissions had the right to obtain information from the Federal Power Commission. That was the fundamental issue in the Hinshaw bill, and I was merely following in the path which the present Justice Burton, then Senator Burton, formerly the mayor and the city solicitor of Cleveland, had followed when he wanted the city of Cleveland to be able to get information from the Federal Power Commission as to what the real investment of the East Ohio Gas Co. was.

I still think we should not foreclose the State commissions from getting such information from the Federal Power Commission. That was the major issue in the Hinshaw bill. I believe my position to have been fundamentally correct. I think the distributing utilities, which sponsor the Hinshaw bill, were wrong, but I did not condemn them then. I frankly do not like to see them made the whipping boys now because they are defending their interests. Those interests are legitimate, and I am happy that in this case they coincide with the interests of the consumers whom I am trying to defend.

I am not condemning the producing interests, and no Senator has heard me do so. They are defending their interests. It is natural that they should.

I simply say that we in Congress should try to decide what is in the national interest.

Mr. ANDERSON. I had not accused, and I am sure I do not in any way accuse, the Senator from Illinois of taking an inconsistent position. Rather, I have sat beside him and watched him vote for so long, when bills have come to the floor, that I have a box score of almost 90 percent accuracy in calculating which way the Senator from Illinois will vote. My guess would be, even if there was not a yea-and-not vote, that unquestionably the Senator from Illinois voted against the Hinshaw bill because of the principles which I know he has long espoused.

We have seen that they were wholly wrong in their assurances that there would be no adverse consequences to leaving the state of Federal policy uncertain.

On the other hand, we can see even more clearly that those who know the producing business were right. All that they said would happen from utility regulation of production has happened. All that they said would happen from uncertainty over policy has happened.

Which leadership shall the Senate follow now?

I cannot justify staying with a course which is, every day, proving more and more to be against the consumer's interest. The present practice of Federal regulation at the wellhead is failing, failing in the most dangerous possible way. The supply of gas is diminishing. The search for new gas is declining. If we continue on this course even for a matter of months, we may strike a crippling and permanent blow against the consumer.

There simply will be no consumer benefits to talk about if there is no gas.

In the course of 18 months, we have seen the supply picture reversed. From a picture which promised abundance, we are now headed directly and visibly toward scarcity and exhaustion.

Those who know production told us this would happen. Those whose advice prevailed, however, said that it would not happen. I am sure they did not think it would happen, but history proves that they did not know.

In this situation, I do not find it hard to decide for myself what I believe to be in the consumer's interest.

This situation did not exist when we had the policy in force which this bill will restore. It did come into existence—and exists now—as a direct result of the Nation's following the plan laid out by the opposition to this bill.

If we stay with the policy of utility control over production, we must do so blindly. We must do so in the face of overwhelming evidence that it would not work, that it has not worked, and that it is working against the consumer—not for him. There is not even a gamble involved. The policy has not worked, and nothing can make it work.

In 1950, these facts were not before us. The logic of the utility argument may have had some appeal then, because it was not tested. But the past 6 years have given us an opportunity to see whether it would work—and the policy has failed critically. I believe, therefore, that we have no choice but to turn back to a policy which we know will function successfully, and for that reason I believe strongly that this bill should be passed.

Mr. DANIEL obtained the floor.

Mr. DOUGLAS. Mr. President, will the Senator from Texas yield for a unanimous-consent request?

Mr. DANIEL. May I first compliment the Senator from New Mexico?

I wish to express my appreciation to the Senator from New Mexico for the way in which he has presented this matter. I congratulate him upon the able way in which he has explained the bill to the Senate today, together with the reasons why he is taking an active interest in the proposed legislation.

The PRESIDING OFFICER (Mr. MONRONEY in the chair). If the junior Senator from Texas will yield to the temporary occupant of the chair, the junior Senator from Oklahoma also wishes to express his appreciation to the distinguished junior Senator from New Mexico for the clear, concise, factual manner in which he has presented the case for those of us who support the bill. He has made a real contribution to the working knowledge of the situation.

Mr. DANIEL. Mr. President, I now yield to the junior Senator from Illinois, provided I do not lose the floor.

Mr. DOUGLAS. Mr. President, I wish to join with other Senators in saying that it is always a pleasure to listen to the junior Senator from New Mexico. He is always in good temper, he is very congenial, and he is an effective and very sincere debater, too.

I also wish to thank the junior Senator from New Mexico for the tone with which he has conducted the debate, although I find myself in disagreement with him on his alleged facts and conclusions.

Mr. President, I now ask unanimous consent that I may be permitted to insert in the RECORD at the conclusion of the speech of the junior Senator from New Mexico statistics which I have developed and have had checked, with reference to wildcat wells drilled in the United States by years from 1950 to 1955, and developmental wells drilled in the United States during that period.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

RECESS

Mr. CLEMENTS. Mr. President, will the junior Senator from Texas yield for a privileged motion?

Mr. DANIEL. I yield.

Mr. CLEMENTS. Pursuant to the previous order, I now move that the Senate stand in recess until 12 o'clock noon tomorrow.

Mr. DANIEL. Mr. President, is it understood that the Senator from Texas will have the floor when the Senate reconvenes?

The PRESIDING OFFICER. May it be understood that following the morning hour tomorrow, the junior Senator from Texas will be recognized?

Mr. CLEMENTS. Mr. President, in order that there will be no question about it, I ask unanimous consent that at the conclusion of the morning hour tomorrow, the junior Senator from Texas [Mr. DANIEL] will have the floor.

The PRESIDING OFFICER. Does the Senator from Kentucky include that as a part of his motion?

Mr. CLEMENTS. I do.

The PRESIDING OFFICER. Is there objection? The Chair hears none.

The question is on agreeing to the motion, as modified, of the Senator from Kentucky.

The motion was agreed to; and (at 5 o'clock and 57 minutes p. m.) the Senate took a recess, the recess being under the order previously entered, until tomorrow, Wednesday, January 18, 1956, at 12 o'clock meridian.

NOMINATION

Executive nomination received by the Senate January 17 (legislative day of January 16), 1956:

DIPLOMATIC AND FOREIGN SERVICE

John J. Muccio, of Rhode Island, a Foreign Service officer of the class of career minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Iceland, to which office he was appointed during the last recess of the Senate.

CONFIRMATION

Executive nomination confirmed by the Senate January 17 (legislative day of January 16), 1956:

COLLECTOR OF CUSTOMS

Charles J. Walker, Sr., of Texas, to be collector of customs for customs collection district No. 22, with headquarters at Galveston, Tex.

HOUSE OF REPRESENTATIVES

TUESDAY, JANUARY 17, 1956

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D. D., offered the following prayer:

Almighty God, who hast called us to be peacemakers, may all the citizens of our beloved country seek more earnestly during this year to make peace and good will among men their personal concern.

Help us to understand that it is not enough that a few sincere and high-minded men of church and state should assemble to plan for the peace of the world.

Grant that we may see that all our programs and efforts will depend ultimately for their realization and achievement upon a finer moral and spiritual life rising in the hearts of men everywhere.

Make us more confident that there are reserves and resources of divine strength on which we have not yet drawn and springs of splendor in human nature still to be explored and tapped.

God forbid that we should ever surrender to moods of apathy and despair, but may we have a clear vision of the dawning of that better day when a nobler spirit shall rule the mind of man and all nations shall follow the ways of reason and righteousness.

Hear us in the name of the Prince of Peace. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Carrell, one of its clerks, announced that the Senate had passed without amendment bills and a concurrent resolution of the House of the following titles:

H. R. 938. An act for the relief of Mrs. Elena Apostolescu Bustiuc;

H. R. 1015. An act for the relief of Mr. and Mrs. Derfery William Wright;

H. R. 1022. An act for the relief of Antonio Andrea Chitato;

H. R. 1145. An act for the relief of Ora L. Powers;

H. R. 1183. An act for the relief of Baldomero R. Garcia, Teresa Garcia y Braganza, Francisco Garcia, Teresita Garcia, and Eduardo Garcia;

H. R. 1219. An act for the relief of the estate of Mrs. Margaret A. Swift;

H. R. 1752. An act for the relief of Johanna Juresic Grgurich;

H. R. 1768. An act for the relief of the Jefferson and Plaquemines Drainage District and certain persons whose properties abut on the Federal Government's right-of-way for Harvey Canal in Louisiana;

H. R. 1910. An act for the relief of Blanka Goldstein;

H. R. 2273. An act for the relief of Der Chuck Yee and Wu Mei On;

H. R. 2278. An act for the relief of Consuelo Calderon de Villarreal;

H. R. 2296. An act for the relief of Simone Gilliland;

H. R. 2466. An act for the relief of Marino and Giselda Proni;

H. R. 2467. An act for the relief of Ivo and Elia Monari;

H. R. 4582. An act to amend the Internal Revenue Code of 1954 with respect to deductions from gross income of amounts contributed to employees trusts;

H. R. 5428. An act to amend the Internal Revenue Code of 1939 with respect to the period of limitation for filing claims by certain transferees and fiduciaries for credit or refund of income taxes;

H. R. 7036. An act to amend section 37 of the Internal Revenue Code of 1954 with respect to the earned income limitation on retirement income;

H. R. 7282. An act relating to the allowance of the credits for dividends received, for dividends paid, and for a Western Hemisphere trade corporation in computing the alternative tax of a corporation with respect to its capital gains;

H. R. 7364. An act relating to the application of the documentary stamp tax to transfers of certain obligations paid for in installments; and

H. Con. Res. 94. Concurrent resolution favoring the waiver of State residence requirements in certain elections.

The message also announced that the Senate had passed, with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H. R. 1146. An act for the relief of the Pacific Music Supply Co.;

H. R. 1447. An act for the relief of Aleksandra Borkowski;

H. R. 1637. An act for the relief of Sam H. Ray; and

H. R. 5844. An act to increase the fee for executing an application for a passport from $1 to $3.

The message also announced that the Senate had passed bills and concurrent resolutions of the following titles, in which the concurrence of the House is requested:

S. 31. An act for the relief of Shih Ming Wang;

S. 83. An act for the relief of Ottilie Hitzlberger Lachelt;

S. 133. An act for the relief of Mrs. Maria Michela Federico;

S. 267. An act for the relief of Ellen Kjosnes and Unni Kjosnes;

S. 277. An act for the relief of Jean Pfeifer;

S. 318. An act for the relief of Chih Shing Hwa;

S. 419. An act for the relief of Eli E. Hood;

S. 499. An act for the relief of Giuseppe Airo-Farulla and Joseph Antoine Airo-Farulla;

S. 508. An act for the relief of Victoriana Areitieo Berincua;
S. 551. An act for the relief of Anthony Agustino Scrivanich;
S. 897. An act for the relief of Erich Anton Helfert;
S. 993. An act for the relief of Eugene Alexander Figueiredo;
S. 1009. An act for the relief of Kathleen Schrater;
S. 1034. An act for the relief of Mr. and Mrs. Donald D. Parrish;
S. 1037. An act for the relief of Chung Herp Youn;
S. 1055. An act for the relief of Domenico Leonardi and his wife, Clara Corradi Leonardi;
S. 1062. An act for the relief of Renato Noe and Angiola Maria Anna Noe;
S. 1067. An act for the relief of Tibor Horvath;
S. 1182. An act for the relief of Haim Cohen (Haim Braun);
S. 1183. An act for the relief Dr. Rose Hu Chen;
S. 1193. An act for the relief of Moosa Ebrahimian;
S. 1375. An act for the relief of Pingfong Ngo Chung and Pearl Wah Chung;
S. 1616. An act for the relief of Sumiko Ariumi Bilson;
S. 1629. An act for the relief of Peter B. Vardy and his wife, Lillian M. Vardy;
S. 1651. An act for the relief of Felisa Ho (nee Chang-Kuon);
S. 1672. An act for the relief of Bruno Romeo;
S. 1686. An act for the relief of Mohammed Akbar Ashraf;
S. 1793. An act for the relief of Balbino Acusin Ariasa;
S. 1827. An act for the relief of Adel Kamal;
S. 2020. An act for the relief of Carmen Aguado;
S. Con. Res. 60. Concurrent resolution authorizing the printing of additional copies of the hearings in automation and technological change for the use of the Joint Committee on the Economic Report;
S. Con. Res. 61. Concurrent resolution authorizing the printing of additional copies of the joint committee print entitled "Federal Tax Policy for Economic Growth and Stability," for the use of the Joint Committee on the Economic Report; and
S. Con. Res. 62. Concurrent resolution to print as a document a pamphlet entitled "A Handbook for Americans."

GENERAL RIDGWAY

Mr. FLOOD. Mr. Speaker, I ask unanimous consent to adress the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania

There was no objection.

Mr. FLOOD. Mr. Speaker, I am a member of the Army Appropriations Subcommittee. Today I propose to ask my subcommittee to conduct a full and complete investigation of the statements made by the former Chief of Staff of the United States Army, General Ridgway. I use as the basis for that the following quotation from this morning's Washington Post, and I quote the statement allegedly made by General Ridgway:

In my job as Chief of Staff, I say in all earnestness and sincerity that I felt I was being called upon to destroy, rather than to build, a fighting force on which rested the world's best hope for peace.

Mr. Speaker, in view of that extaordinary statement by the former Chief of Staff of the United States Army, I want to offer to him the record of my committee upon which he may spread all charges and all statements so that this House and this Nation may have the full benefit of this unusual and this historic incident.

In the first of a series of articles prepared for the Saturday Evening Post, Gen. Matthew B. Ridgway, former Army Chief of Staff, set forth the most serious indictment of shocking and far-reaching charges, striking at the heart of our national defense, ever brought against those responsible for the national defense at the highest level in the history of the Nation.

General Ridgway states that he was forced to cut nearly one-third of the Army manpower at a critical time in our history, that he was subjected to pressure from the White House and the Secretary of Defense, Charles E. Wilson, when he tried to make a formal protest.

The retired four-star general, whom the administration did not appoint to a second term as Army Chief of Staff after he differed with Defense Department policy, states further that President Eisenhower, in his state of the Union message in 1954, declared that the 1955 military fiscal year program "was based on a new military program unanimously recommended by the Joint Chiefs of Staff," and as a matter of fact that this was not so as a fact, and that Secretary of Defense Mr. Wilson knew, or should have known, that the statement was not true and correct.

General Matt is a soldier's soldier, a general's general, and a great American whose character, reputation, and integrity cannot be intelligently questioned, and that he was not a desk jockey officer but was the brave leader of combat troops in the field against the Nation's enemies in two wars. We have here no mealy-mouthed sycophant bucking for stripes, shades of Gen. Billy Mitchell.

At a time when the world situation was and is in the most perilous state since World War II, General Ridgway shows why politics, rather than military necessity, is shaping the size and strength of our Armed Forces, particularly the Army. Paragraph by paragraph in this indictment General Ridgway tells step-by-step of how politics and politicians are jeopardizing our fighting power. The frankness and the scope and the quality and the nature of General Ridgway's charges make it imperative to the national safety and welfare that the Congress and the Nation know to the fullest the entire story.

I do not believe that in American military history a Chief of Staff and one of the highest ranking generals in American military records found it necessary to use the following language in exposing what amounts to criminal negligence in the preparation of a defense budget:

In my job as Chief of Staff, I say in all earnestness and sincerity that I felt I was being called upon to destroy, rather than to build, a fighting force on which rested the world's best hope for peace.

As a member of the Army Appropriations Committee of the House of Representatives, it is my duty to ask said committee to begin an immediate, and to continue therewith, a full and impartial investigation of these charges made by General Ridgway and to invite and subpena to the extent that the power subpenaed under the circumstances will permit all persons who might be identified in the background and the development of this appalling and scandalous sequence of events.

PACIFIC MUSIC SUPPLY CO.

Mr. LANE. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H. R. 1146) for the relief of the Pacific Music Supply Co., with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Page 2, lines 3 and 4, strike out "in excess of 10 percent thereof."

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The Senate amendment was concurred in, and a motion to reconsider was laid on the table.

ALEKSANDRA BORKOWSKI

Mr. LANE. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H. R. 1447) for the relief of Aleksandra Borkowski, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Page 2, lines 7 and 8, strike out "in excess of 10 percent thereof."

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The Senate amendment was concurred in, and a motion to reconsider was laid on the table.

LEO E. VERHAEGHE

Mr. LANE. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H. R. 3027) for the relief of Leo E. Verhaeghe, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Page 2, line 9, strike out "in excess of 10 percent thereof."

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The Senate amendment was concurred in, and a motion to reconsider was laid on the table.

SAM H. RAY

Mr. LANE. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 1637) for the

relief of Sam H. Ray, with a Senate amendment thereto, disagree to the Senate amendment, and request a conference with the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts? [After a pause.] The Chair hears none and appoints the following conferees: Messrs. LANE, FORRESTER, and MILLER of New York.

THE GOOD NAME OF THE STATE OF MISSISSIPPI

Mr. RIVERS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, to revise and extend my remarks, and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. RIVERS. Mr. Speaker, I am placing in the CONGRESSIONAL RECORD an article by Davis Lee, a Negro who publishes a newspaper called the Telegram, in Newark, N. J. That is in answer, Mr. Speaker, to an article appearing in Look magazine written by William Bradford Huie, who tried to libel and slander the admirals of the United States Navy because he could not get certain consideration, et cetera, in his book, The Case Against the Admirals, during the time he was a naval officer. The article in question appears in Look magazine of this month in which this man vilified, slandered, libeled, with unmitigated vituperation the good name of the State of Mississippi, the people of Mississippi, the courts of Mississippi, and held out to the Nation that the State of Mississippi is one of the worst places on earth.

Mr. Speaker, I want you to read what a colored man had to say, who went down to Mississippi and spent 7 weeks there; what he found, and what he published in his newspaper north of the Mason and Dixon line.

Mr. Speaker, it is a tragedy when the good name of a State is held up for dramatic purposes, to ridicule, and to scorn at the hands of these headline seekers, such as the one that appears in Look magazine. I want you to read this article written by this man who had nothing to gain in writing the article.

The article follows:

[From the Newark (N. J.) Telegram of January 15, 1956]

MISSISSIPPI SURVEY—STATE NO WORSE THAN ANY OTHER; WHITE'S PATERNALISM KEY TO NEGRO UNDERSTANDING

(By Davis Lee, publisher)

In recent weeks the entire world has been led to believe that the 1 million Negro citizens of Mississippi are in constant fear for their lives; that they are ruthlessly exploited, deprived of every right as American citizens.

The murder of the Reverend George Lee of Belzoni, the Emmett Till kidnap murder, and other similar tragedies have given numerous distorted reports the appearance of being true. And those who have never been to Mississippi, from what they read, naturally conclude that it is the worst place on earth.

After spending 7 weeks in the State, touring its 82 counties, meeting and talking with Negro and white citizens of every walk of life, I am convinced that Mississippi is no worse than any other State in the Union, and what has happened there could happen in any of the 48 States with sufficient provocative agitation, and that the decent citizens deplore violence.

My trip to Mississippi was not in search of propaganda material designed to stimulate interest in any alleged righteous cause, nor was I sent by any publication with instructions to dramatize the slightest incident. I went in search of the truth. I didn't go in search of the worst that I could find in the State; I endeavored to find the good.

Naturally my findings will be criticized, but I don't care. Most people would rather believe a false report than a true one.

When I arrived in Mississippi, I began my tour at Biloxi and the first man I met was the able head of the chamber of commerce. He extended a cordial welcome and offered to give me any assistance I wanted. I have never met a man more gracious and considerate.

My next stop was Gulf Port and Bay St. Louis resort towns, with large Negro populations. There are many prosperous Negro businesses in these cities, and some of the finest homes are owned by Negroes.

I visited all of the coastal towns and cities and found no racial tensions. In every community an honest effort is afoot to give the Negroes equal schools.

When I arrived in Jackson, I went by to see Gov. Hugh White, who was glad to see me and talked at some length about the State's efforts toward improving the economic and educational stature of the Negro citizens.

Before leaving Jackson, I conferred with officials of the State department of education, and learned that the State is spending considerably more money for Negro education than it is spending for white. At Leland, I was told, the State had spent $1 million for a Negro elementary and high school.

Because of the wide publicity given the citizens' council I decided to meet with the heads and find out first hand the purpose for the organization, its objectives, and the type of people who head it.

I drove to Winona where I met Mr. Robert B. Patterson, the secretary. I spent some 3 hours with him. He is a native of Mississippi, young, energetic, and believes that our Creator intended that there should be a separation of races.

Mr. Patterson is an intelligent, fairminded southerner who doesn't believe that integration offers a solution to our racial problem. And his opinion and convictions are based on a lifetime with Negroes.

He operates a plantation at Indianola where he has some 80 Negro families. He travels extensively and leaves his wife and daughters in the care of his Negro help.

In one sentence, Mr. Patterson, in referring to the fact that his Negroes cared for his family, gave me the southern view, the South's feeling, in a nutshell.

"When I am away," he said, "I know that my Negroes will not let anything happen to my wife and children. In fact, they are my children, too."

It is this feeling of parenthood, of paternalism that people outside the South don't understand. Southern white people do regard their Negro employees as their children, their responsibility.

This fact was evident everywhere that I went. White people in Mississippi love and respect their Negro employees and they resent outsiders who interfere with local custom.

To further illustrate the workings of paternalism, I visited Drews, a small town not far from Money. I met a plantation owner who had 150 Negro families on his spread.

Some of these Negroes had been on that plantation all of their lives. The owner is a Mr. Smith, an educated, cultured man. He loves his Negroes as if they were his children.

Recently he missed 35 tons of fertilizer. A private detective was called in. In short order the fertilizer was located in Mound Bayou, the all Negro town. The fence who bought the stuff agreed to pay for it and no charges were made.

Shortly thereafter Mr. Smith missed several bales of cotton. The detective was called in again and given a retainer of $100 to locate the cotton. The next day the detective called and informed Mr. Smith that the bales of cotton had been found in Mound Bayou. The detective informed the plantation owner that one of his Negro employees had sold the cotton.

Mr. Smith sent for the alleged thief, a young man in his twenties who had been born and reared on the place. He readily admitted taking the cotton. The sheriff was summoned and the young man arrested and jailed.

A few days later, at the trial, the young man was fined $200, with the alternative of a jail sentence if he could not raise the money. Mr. Smith walked forward, paid the fine, and took the young man back to the plantation.

Since the Emmett Till tragedy I have read exaggerated reports by Negro reporters that they had to disguise themselves in dilapidated cars in Mississippi. I traveled the entire State, was well dressed, and rode in a late model convertible.

I was not even stopped and asked to show my driver's license during the entire trip. I went on dozens of plantations and talked with hundreds of Negroes, and not one planter questioned me about my being there.

THE PRESIDENT'S BUDGET

Mr. CHUDOFF. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. CHUDOFF. Mr. Speaker, the budget sent to the Congress by the White House yesterday contains not a shred of help for the rural cooperatives in Georgia or Alabama, nor even a hint of aid for the power-starved towns and cooperatives in southern Idaho. Nor could I detect a single new power start in the Pacific Northwest, where new generation is sorely needed. Under it, the administration continues to cast the rural electric cooperatives to the private utilities.

Apparently, Interior is willing to continue to "flout the intent of Congress" by permitting the Georgia Power Co. and other private utilities to retain their power monopolies undisturbed, despite the revelations before the Public Works and Resources subcommittee in hearings last year.

I have learned that the negotiations between the Department of the Interior and the Georgia Power Co. are again deadlocked and that, as a result the rural cooperatives in Georgia are still without the Federal power to which they are entitled under the preference clause, as recently made very plain in an opinion by the Attorney General of the United States.

Interior Secretary McKay had hidden the July 15 1955, opinion of the Attorney General until questioning by my subcommittee revealed its existence on October 11, 1955. Apparently, Interior Secretaries McKay, Davis, and Aandahl

are still hoping to evade that opinion's clear reaffirmation of the congressional intent that rural cooperatives and other public preference customers get the power to which the law entitles them. The administration has failed even to request study funds for transmission lines in Georgia and Alabama. No wonder the Georgia Power Co. is holding out for a deal on its own terms, when the Department refuses to come to the aid of its preferred customers, the farmers, and small towns.

Failure to transmit this power from Clark Hill Dam will continue to pile up for the taxpayers a deficit in the operations of the Southeastern Power Administration. This loss in revenue by June 1, 1955, had already reached $1.5 million, and by this time, it should be close to $2 million. The transmission lines, if built, would not only pay for themselves, but also would enable the Government to end this loss.

Because the Appropriations Committees last year issued an ultimatum to the Department, they have recently signed a contract with the Carolina Power & Light Co. for the marketing of the North Carolina one-third of John H. Kerr Dam power. That contract leaves something to be desired, but at least it will at long last make Federal power available to cooperatives and towns in eastern North Carolina. No such solution is in sight for Georgia.

Altogether the budget submitted by the President yesterday is most disappointing. Unless the Congress makes some drastic revisions in this budget, the administration will continue to default on its obligations under the preference clause. It will continue to sell Federal power at cheap dump rates to private utilities instead of making it available to rural electric cooperatives, municipalities, and other public agencies in accordance with the law and with increased revenues.

The President's budget will continue to permit the sound program of multiple-purpose integrated river-basin development first advocated by President Theodore Roosevelt to deteriorate. It will leave what little new development there may be of this country's vast remaining water-power resources safely in the hands of the private monopoly utilities who will supply lesser amounts of power at higher cost, and it will deprive preferred customers of the Government the increasing amounts of lowcost power Congress intended them to have.

The present administration's program is calculated to cripple rural electric cooperatives and municipals and other public-power groups so that the private utility monopolies may continue well protected from their only possible source of competition. And this budget well reflects that policy.

PERSONNEL IMPLICATIONS OF THE PRESIDENT'S BUDGET MESSAGE

Mr. DAVIS of Georgia. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. DAVIS of Georgia. Mr. Speaker, I am greatly disturbed over the implications of the President's budget that there will be increases in the total number of Federal employees, particularly in those agencies outside of the Defense Establishment. As chairman of a subcommittee charged with making, for the Congress, a comprehensive review of the use of employees throughout the Federal Government, it is indeed discouraging to be faced with such an extravagant proposal for expanding the Federal payroll.

According to an analysis, the President's budget contemplates that there may be as many as 2,390,000 Federal employees on the payroll at the end of the next fiscal year. This is indeed most disturbing, and not only unnecessary, but directly in conflict with assurances of the administration transmitted to me.

Last fall I was told that the administration would give our subcommittee unstinting cooperation.

Just what the budget means in terms of payroll costs, and to the taxpayers, can be visualized when it is pointed out that there would be a difference of 250,000 employees on the payroll if an average of 10-percent reduction, as compared to a 1-percent increase, would be brought about. The average employee's salary is $4,400 a year. This would mean well over a billion dollars in payroll costs would be unnecessarily expended.

Studies by our committee demonstrates that our Federal payroll can reach a more reasonable size.

There has been a downward revision in the total number of employees in those agencies that have cooperated with us in instituting a supervisor's review of positions, surveying functions for essentiality and reducing employment by attrition.

I am convinced, and I know that the majority of the people in this country are convinced, that the necessary tasks of the Federal Government can be carried out by 2 million or less Federal employees. We can do this through the elimination of duplication of positions, duplication of effort at all levels, unnecessary delegations of authority, and inflation of payrolls for purposes of giving certain favorite employees higher grades.

Unless the heads of Federal departments and agencies, and this includes the Bureau of the Budget and the Office of the President, will cooperate in bringing about a reduction in these payroll costs through attrition and proper utilization of employees the only other alternative is to cut by means of reduced appropriations.

I intend to direct the attention of the House at the proper time to conditions existing in the various departments as we have found them. I believe that the Members will agree with me that these departments can get along with a much reduced payroll cost and that it should be brought about by a reduction in the request for funds. If these reduced requests, based upon careful planning, are not forthcoming, the taxpayers may rightfully expect the Congress to arbitrarily reduce appropriations which will bring about the desired results.

This is not in as orderly fashion as we originally hoped for, but at least it will be some means of putting a checkrein on the unnecessary hiring of employees.

FOOD INDUSTRIES AMENDMENTS

Mr. ROOSEVELT. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. ROOSEVELT. Mr. Speaker, I have today introduced a bill to amend the Fair Labor Standards Act of 1938, as amended, to provide greater coverage for employees of food industries whose activities affect interstate commerce, and for other purposes.

The food industries amendments will compliment and work hand in glove with the omnibus bill, which will be introduced to benefit labor in all industries.

I think the time has arrived when we must do something positive to enhance the economic lot of the many employees of food industries who are either wholly or partially exempted from the present act. I sincerely hope that the Members of this House will look with favor upon this legislation to provide greater coverage for employees of food industries whose activities affect interstate commerce. This bill which has been introduced today will correct the many injustices in the Fair Labor Standards Act which specifically plague employees of food industries.

Mr. Speaker, the Congress at the last session amended the Fair Labor Standards Act to increase the minimum wage from 75 cents to $1 an hour. The new minimum wage will go into effect on March 1, 1956. However, Congress did nothing to extend the coverage of the act. The extension of coverage is even more important to the employees of food industries than the increase in the minimum wage, because of the large number of employees who will benefit from such effective extension of coverage.

The purpose of the FLSA is to end "labor conditions detrimental to the maintenance of the minimum standard of living necessary for health, efficiency and general well-being." To accomplish this it establishes a minimum wage—$1 an hour as of March 1, 1956; provides for the payment of time and one-half for work of more than 40 hours a week, and forbids oppressive child labor—oppressive child labor is work by children under 16, and in some cases under 18, in industries found hazardous by the Secretary of Labor.

However, only 24 million of 44 million Americans in private employment excluding proprietors, self-employed persons, unpaid family labor and executive, administrative and professional employees, are covered under the act. Of the other 20 million, some 16 million are more or less justifiably excluded from coverage. For example, they are not engaged in work that concerns interstate commerce or are employed in small es-

tablishments. Nevertheless, for some 4 million workers there is no justification for exclusion from the provisions of the act. The act also contains special exemption from the overtime provisions. These exemptions, involving some 2.5 million workers, should also be ended. The largest groups exempted either from the act as a whole or from all or some of its overtime provisions are agricultural workers, employees of retail stores, laundry and cleaning store workers, fishermen and fish processors, transit workers, seamen, taxi drivers, cannery workers, some lumberjacks and loggers and some telephone switchboard operators.

Virtually all retail establishments are now exempt from both the minimum wage and overtime provision—section 13 (a) (2) of the act. The Food Industries amendments would have the act cover all retail establishments with more than 5 stores or with an annual gross income of more than $500,000. The enactment of the amendments would bring the 40-hour week immediately to scores of thousands of retail workers.

In regard to fish-processing exemption, any employee catching, taking, harvesting, cultivating, or farming any kind of fish, shellfish, crustacea, sponges, seaweeds, or other aquatic form of animal or vegetable life is exempted from both the minimum wage and overtime provisions. This exemption includes employees loading, unloading, or packaging the products for shipment or in processing, other than canning, marketing, freezing, caring, storing, or distributing it—section 13 (a) (5) of the act. The food-industries amendments would completely strike out this exemption. As a result, the $1 minimum wage and 40-hour week would be brought to this industry.

Workers employed within the area of production, handling, storing, ginning, compressing, pasteurizing, drying, preparing, or canning agricultural or horticultural products are not covered by any part of the act—section 13 (a) (10). The area of agricultural production is defined by the wage and hour Administrator as open country or a rural community. A rural community is any community of less than 2,500 population which is more than 1 mile from the city limits of a 2,500 to 50,000 population community or more than 5 miles from a community with more than 500,000 population. Several other technical factors affect the applicability of this exemption. The food-industries amendments would completely strike out this section. More egg candlers, poultry workers, and cannery workers would thereby come under the provisions of the act.

Employees engaged in food processing, canning, or packing perishable or seasonal fresh fruits and vegetables are exempted from the overtime provisions of the act for 14 weeks a year. For another 14 weeks, time and one-half need be paid only after 12 hours of work per day or 56 hours of work per week—section 7 (b) (3) and 7 (b). The food industries amendments would strike out the two sections which provide for these exemptions.

The act concerns only industries "engaged in commerce or in the production of commerce." This is another factor narrowing the coverage. For example, it results in the exclusion of retail establishments. The food industries amendments add the word "industries affecting commerce," thereby enlarging the scope of the act.

The FLSA is aimed at ending conditions "detrimental to the maintenance of a minimum standard of living," but some of the exemptions involve the very workers who need protection the most. Unorganized retail employees and poultry and canning workers earn some of the lowest wages in the United States. In part this is due to the present exemption existing in the act. The existence of these exemptions makes for unfair competition against the employers who maintain good working conditions for and good working relations with their emplyees. The enlightened firms which bargain collectively with their employees feel the pinch in competition with the companies that take full advantage of the low wages and long hours of work made possible by the exemption. Employees not covered under the act are made to feel like second-class citizens. Of course, there is no justification for this.

The retail-grocery industry is currently becoming more and more dominated by large supermarket chains. In 1954 supermarkets handled 52.3 percent of $18.2 billion of grocery sales. Many of these supermarkets are parts of large chains which immensely affect commerce. The A. & P. Tea Co. and Safeway stores, for example, have some 2,000 stores each across the Nation. There is no economic justification for not covering large retail enterprises. The small and purely local stores will still be exempted under the food-industries amendments.

The fish processing exemption is another loophole that has no economic reason for existing. Other food processing is not exempted as long as it is not in the area of production.

The area of production exemption is equally groundless. The worker employed in a small community or near the farm is not covered, but a worker doing the same job in a city is covered. Both workers have the same needs and requirements. The poultry worker in a rural Texas town, doing the same work as the poultry worker in Clinton, Iowa, should certainly have the same basic rights.

The seasonal overtime exemption provision has been a factor in keeping down the wages paid to cannery workers as a whole. The wages of these workers are below the national average and even below wages in nondurable manufacturing, and worse still, average cannery wages are steadily falling further behind.

Mr. Speaker, I hope that this bill to amend the Fair Labor Standards Act of 1938, as amended, will have the support of both Democrats and Republicans for I believe it is economically sound and certainly just, inasmuch as it will provide much greater coverage for employees of food industries whose activities affect interstate, and for other purposes. This injustice to a large segment of employees throughout the Nation should be speedily rectified by the 84th Congress.

HOMEWORK FIRST

Mr. HOFFMAN of Michigan. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. HOFFMAN of Michigan. Mr. Speaker, my guess—it is nothing but a guess—is that our ticket will be Eisenhower and NIXON.

As a candidate for the Republican nomination for Congressman at the August primary, if nominated and elected I intend to give, as I have in the past, vigorous support to the administration's legislative program.

That does not mean, however, that I will either speak or vote for everything and anything that may be suggested by anyone and everyone who presumes to speak for the administration. If all Congressmen followed that course, there would be no need to elect Congressmen. Just give the elected President blank ballots and let him fill them in as occasion might arise. Who wants a rubber-stamp Congressman?

Vigorously have I supported the administration's successful efforts to keep us out of war, to insure prosperity, to get the Government out of business competition with the taxpayer, and its many other constructive proposals. Much of my time and effort during the last 9 months has been given to a defense of the administration against the false, vicious charges of political opponents.

Of that service, the Departments concerned have expressed appreciation.

We need roads; we need schools; some of our unfortunate, some of our aged need additional assistance; our farmers will need help in extricating themselves from the farm policies given us during the war by the Democratic administrations. In my humble judgment, there are not enough dollars to take care of our own needs and to pledge billions of dollars each year for the next 10 years to aid other nations.

Since World War II, we have given other nations $38 billion for economic aid, $17 billion for military aid, a total of $55 billion. Additional billions of dollars worth of military property was given to friendly and enemy countries in the closing days of the war. It is doubtful if today even one of these nations will wholeheartedly go along with us in any program where it thinks its own interest might adversely be affected.

Until our tax rate can be lowered, our national debt reduced, the farm problem solved, the needs of our own people more adequately met, I cannot by my vote promise to, for 10 years, each year send billions of dollars abroad. Regardless of the desirability of such a program, this Congress cannot bind future Congresses to make appropriations.

Let us first take care of the needs of our own folks, make adequate our program for national defense. Does not homework come first?

PRIVATE CALENDAR

The SPEAKER. This is Private Calendar day. The Clerk will call the first individual bill on the Private Calendar.

CLARENCE CHRISTENSEN

The Clerk called the bill (H. R. 1952) for the relief of Clarence Christensen.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That sections 15 to 20, inclusive, of the Federal Employees' Compensation Act are hereby waived in favor of Clarence Christensen, St. Paul, Minn., and his claim for compensation for personal injuries sustained on February 28, 1947, while he was employed as a supply inspector by the Department of the Air Force at Fort Snelling, Minn., shall be acted upon under the remaining provisions of such act if he files such claim with the Bureau of Employees' Compensation, Department of Labor, within 60 days after the date of the enactment of this act.

With the following committee amendment:

Strike out all after the enacting clause and insert the following: "That sections 15 to 20 of the Federal Employees' Compensation Act are hereby waived in favor of Clarence Christensen, St. Paul, Minn., and his claim for compensation for personal injuries alleged to have been sustained on February 28, 1947, while he was employed as a supply inspector by the Department of the Air Force at Fort Snelling, Minnesota, shall be acted upon under the remaining provisions of such act in the same manner as if such claim had been timely filed, if such claim is filed within 60 days after the date of the enactment of this Act: *Provided*, That no benefits shall accrue by reason of the enactment of this act for any period prior to its enactment, except in the case of such medical or hospitalization expenditures which may be deemed reimbursable."

The committee amendment was agreed to.

The bill was ordered to be engrossed, and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ESTATE OF GRADY WARD

The Clerk called the bill (H. R. 2472) for the relief of the estate of Grady Ward.

Mr. AVERY. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Kansas?

There was no objection.

ISABELLE S. GORRELL, ET AL.

The Clerk called the bill (H. R. 2522) for the relief of Isabelle S. Gorrell, Donald E. Gorrell, Mary Owen Gorrell, and Kathryn G. Wright.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay to Isabelle S. Gorrell, Donald E. Gorrell, Mary Owen Gorrell, and Kathryn G. Wright, jointly, the sum of $10,500. The payment of such sum shall be in full settlement of all claims of the said Isabelle S. Gorrell, Donald E. Gorrell, Mary Owen Gorrell, and Kathryn G. Wright against the United States for damage to real property formerly owned by them, described more particularly as farm unit "P," lots 46 and 55 of township 54 north, range 100 west, in the Shoshone Irrigation District, Wyoming, allegedly resulting from water seepage and direct flow of water from the Heart Mountain Division of the Shoshone project of the Bureau of Reclamation: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Page 2, line 6, strike out the words "in excess of 10 percent thereof."

Mr. LANE. Mr. Speaker, I offer a substitute amendment.

The Clerk read as follows:

Substitute amendment offered by Mr. LANE: On page 2, line 6, after the word "act" restore the following language "in excess of 10 percent thereof."

The substitute amendment was agreed to.

The committee amendment, as amended, was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

EMANUEL MATHES

The Clerk called the bill (H. R. 2712) for the relief of Emanuel Mathes.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Emanuel Mathes, of 180 West 93d Street, borough of Manhattan, city of New York, the sum of $1,000. The payment of such sum shall be in full settlement of all claims of said Emanuel Mathes against the Government of the United States, in connection with the $1,000 departure bond posted by the said Emanuel Mathes, on behalf of Shalom Mathes on December 10, 1948: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ALBERTA S. ROZANSKI

The Clerk called the bill (H. R. 3032) for the relief of Mrs. Alberta S. Rozanski.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the annual national service life insurance (FV 121 71 65, V 124 19 35) granted in the amount of $10,000 to the late Dr. Frank S. Rozanski, effective January 26, 1951, shall be held and considered to have been in full force and effect at the time of his death on March 5, 1951, and the Administrator of Veterans' Affairs is authorized and directed to pay such insurance to Mrs. Alberta S. Rozanski, widow of the said Dr. Frank S. Rozanski and designated beneficiary of such insurance.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

EDWARD M. THOMPSON

The Clerk called the bill (H. R. 3043) for the relief of Edward M. Thompson.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Edward M. Thompson, of Ridgecrest, Calif., the sum of $2,200. The payment of such sum shall be in full settlement of all claims of the said Edward M. Thompson against the United States for reimbursement of an airplane, voluntarily offered by Edward M. Thompson to the United States Government in searching for persons known to have crashed in another airplane, during which search said plane of Edward M. Thompson crashed, resulting in a total loss to claimant: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

On page 2, lines 3 and 4, strike out "in excess of 10 percent thereof."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CONVEYANCE OF CERTAIN REAL PROPERTY TO EILEF RUE

The Clerk called the bill (H. R. 3650) to provide for the conveyance to Eilef Rue of certain real property situated in Cassia County, Idaho.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior is authorized and directed to donate and convey to Eilef Rue, Fresno, Calif., all of the right, title, and interest of the United States in and to certain real property situated in Cassia County, Idaho, and more particularly described as follows: The northeast quarter of section 31, township 10 south, range 22 east, Boise meridian. The conveyance of such property to the said Eilef Rue shall constitute full exchange for (and full settlement of all of his claims with respect to) the homestead property which was

formerly owned by the said Eilef Rue (the southeast quarter of section 28, township 6 north, range 31 east, Boise meridian), and which was taken from him for use by the Navy under a Declaration of Taking filed August 24, 1943, and Final Order of Condemnation No. 1227, filed April 22, 1946, in the United States District Court for the District of Idaho.

With the following committee amendments:

Page 1, line 4, strike out the word "donate" and insert in lieu thereof the word "grant."

Page 1, line 9, strike the word "conveyance" and insert in lieu thereof the word "conveyance."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

LOIS O. JENNINGS

The Clerk called the bill (H. R. 4466) for the relief of Lois O. Jennings.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is hereby authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Lois O. Jennings, Washington, D. C., the amount certified to him by the Secretary of the Air Force under section 2 of this act.

SEC. 2. The Secretary of the Air Force shall determine and certify to the Secretary of the Treasury the amount of compensation which would have been paid to the said Lois O. Jennings for the periods beginning February 3, 1953, and ending March 17, 1953, both dates inclusive, and beginning March 22, 1953, and ending July 21, 1953, both dates inclusive, if she had not been separated from her position on February 2, 1953, and had continued to serve on Okinawa during such periods in the position and in the grade which she held on February 2, 1953: *Provided,* That no part of the amount paid under this section in excess of 10 per centum thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendments:

On page 2, line 6, after the date "February 2, 1953" insert the following: ", except that such compensation shall be computed in the manner as prescribed in the act approved June 10, 1948 (Public Law 623, 80th Congress), had that act applied to her position on February 2, 1953."

On page 2, lines 7 and 8, strike out "in excess of 10 percent thereof."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

LT. COMDR. MORTIMER T. CLEMENT

The Clerk called the bill (H. R. 4873) for the relief of Lt. Comdr. Mortimer T. Clement, Medical Corps, United States Navy, retired.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That Lt. Comdr. Mortimer T. Clement, Medical Corps, United States Navy, retired, is hereby relieved of all liability to repay to the United States the sum of $6,638.66, which sum represents an overpayment of retired pay received by him for the period June 1, 1942, to July 31, 1949, inclusive.

SEC. 2. The Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Lt. Comdr. Mortimer T. Clement, Medical Corps, United States Navy, retired, the sum of $1,651.33, which sum was repaid by him to the United States through a checkage of his retired pay account pursuant to a decision of the Comptroller General (B-105596, February 4, 1952) disallowing payment of such retired pay for the period August 1, 1949, to December 31, 1951, inclusive.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MRS. JENNIE B. PRESCOTT

The Clerk called the bill (H. R. 5544) for the relief of Mrs. Jennie B. Prescott.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the 1-year time limitation upon the filing of applications for waiver of premiums contained in the last proviso of the fourth sentence of section 602 (n) of the National Service Life Insurance Act of 1940 is hereby waived with respect to any application for waiver of premiums on national service life-insurance policy No. N-17603908 (issued on the life of Hobert E. Prescott, Veterans' Administration claim No. XC-9016903) filed by Mrs. Jennie B. Prescott within the 1-year period which begins on the date of enactment of this act. Any payments made pursuant to such application shall be paid from the national service life-insurance appropriation.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MRS. BERTHA K. MARTENSEN

The Clerk called the bill (H. R. 6279) for the relief of Mrs. Bertha K. Martensen.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the 10-year period (prescribed in the act of October 9, 1940 (31 U. S. C., sec. 71a)) within which claims against the United States must be filed is hereby waived with respect to the claim of Mrs. Bertha K. Martensen, New Orleans, La., against the United States for payment of the 6 months' death gratuity, and accrued pay and allowances, due her by the reason of the death of her son, Victor J. Martensen, if the said Mrs. Bertha K. Martensen files a claim therefor with the General Accounting Office within the 6-month period which begins on the date of enactment of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JOSEPH J. TIERNEY

The Clerk called the bill (H. R. 6283) for the relief of Joseph J. Tierney.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is hereby authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Joseph J. Tierney, of 142 D Street, South Boston, Mass., the sum of $184.60. Such sum represents reimbursement to the said Joseph J. Tierney for paying out of his own funds a judgment rendered against him in the courts of Massachusetts, under date of December 29, 1954, arising out of an accident occurring when he was performing his duties as a chauffeur in the post office in Boston, Mass.: *Provided,* That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Page 2, line 2, after the word "act", strike out "in excess of 10 percent thereof."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PHILIP COOPERMAN ET AL.

The Clerk called the bill (H. R. 4773) for the relief of Philip Cooperman, Aron Shriro, and Samuel Stackman.

Mr. VAN PELT. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection?

There was no objection.

FRED MAZAN

The Clerk called the bill (H. R. 5626) for the relief of Fred Mazan.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That Fred Mazan is hereby relieved of all liability to refund to the United States the sum of $241.35. Such sum represents compensation received by the said Fred Mazan as a temporary employee of the New Haven, Conn., post office from July 7, 1949, to October 8, 1949, while he was also employed by the Springfield, Mass., ordnance district, as an inspector and was receiving dual compensation from the United States at a combined annual rate in excess of $2,000. In the audit and settlement of the accounts of any certifying or disbursing officer of the United States, full credit shall be given for the amount for which liability is relieved by this act.

SEC. 2. The Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the said Fred Mazan, an amount equal to the aggregate of the amounts paid by him, or withheld from sums otherwise due him, in complete or partial satisfaction of the claim of the United States for such refund.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ENS. CHARLES A. BINSWANGER

The Clerk called the bill (H. R. 6190) for the relief of Ens. Charles A. Binswanger.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Ens. Charles A. Binswanger, Baltimore, Md. (U. S. Coast Guard Reserve, retired), the sum of $5,224.-18. The payment of such sum shall be in full settlement of all claims of the said Ens. Charles A. Binswanger against the United States (1) for reimbursement of medical, surgical, and hospital expenses incurred by him during the period beginning January 30, 1946, and ending on September 22, 1949, and (2) for unpaid amounts due him at the time of his retirement in 1946 for mileage from Rochester, Minn., to Baltimore, Md.: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

LT. MICHAEL CULLEN

The Clerk called the bill (H. R. 7164) for the relief of Lt. Michael Cullen.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Lt. Michael Cullen, of Honolulu, T. H., the sum of $1,100. Such sum shall be in full settlement of all claims of said Lt. Michael Cullen against the United States for reimbursement for expenses incurred by him in connection with educational benefits under the appropriate laws governing the rehabilitation and training of veterans.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ANTONIO PENNA

The Clerk called the bill (H. R. 4588) for the relief of Antonio Penna.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, notwithstanding the provision of section 212 (a) (9) of the Immigration and Nationality Act, Antonio Penna may be admitted to the United States for permanent residence if he is found to be otherwise admissible under the provisions of that act: *Provided*, That this exemption shall apply only to a ground for exclusion of which the Department of State or the Department of Justice had knowledge prior to the enactment of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NELLIE OHLERKING ARCHAMBEAU MORAN

The Clerk called the bill (S. 1745) authorizing the Secretary of the Interior to issue a patent in fee to Nellie Ohlerking Archambeau Moran.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior is authorized and directed to issue to Nellie Ohlerking Archambeau Moran a patent in fee to the following described lands allotted to her on the Fort Belknap Indian Reservation, Mont.: Northeast quarter northwest quarter section 20, township 26 north, range 26 east; west half southeast quarter northeast quarter, southwest quarter northeast quarter, south half north half northeast quarter, south half north half north half northeast quarter, east half southeast quarter northeast quarter section 14, township 26 north, range 25 east, principal meridian, Montana, containing 180 acres.

SEC. 2. Said patent in fee when issued shall contain a reservation to the Fort Belknap Indian Community, in accordance with the provisions of the act of March 3, 1921 (41 Stat. 1355), of all minerals, including coal, oil, and gas.

SEC. 3. Pursuant to the provisions of the act of March 3, 1921 (41 Stat. 1355, 1357), and the act of March 7, 1928 (45 Stat. 200–210), as supplemented by the act of July 1, 1932 (47 Stat. 564, 565), said patent in fee when issued shall contain a provision that any of the above-described lands which may be situated within a Federal irrigation project are subject to a lien, prior and superior to all other liens for the amount of costs and charges due to the United States for and on account of construction, operation, and maintenance of the irrigation system or acquisition of water rights by which said lands have been or are to be reclaimed.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

THE LATE HONORABLE MARTIN P. DURKIN

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to address the House and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Speaker, Martin Patrick Durkin, president of the United Association of Journeymen and Apprentices of the Plumbing and Pipe Fitting Industry, died November 13, 1955.

He was 17 years old when he joined his union as an apprentice steamfitter, and he rose through the ranks to be elected in 1943 to the position he held at his death. His life was closely associated with the growth of his union, except for a period of 8 years as director of the Illinois State Labor Department and 8 months as United States Secretary of Labor.

Martin Durkin was known to his friends as a man possessed of high moral values, of strong will and determination, but also kindly, patient, and calm even under the most trying circumstances. A close friend of Durkin, who knew him for 30 years, said that he never heard Durkin raise his voice except in prayer. He was known to be a pious man of deep faith, full of charity and compassion for his fellow man. A devout Catholic, he is reputed not to have missed daily Mass and communion even during the busiest days of his life.

Possibly the best illustration of his personal charity became public when he was appointed Secretary of Labor. It appears that Martin Durkin made it a practice to support one needy family. When the fortunes of one family rose, he would adopt himself another poor family which needed help. But he did not consider it sufficient to just help the family with cash, and he would himself go out once a week to shop for his adopted friends. He took personal interest in the needs of his dependent family and consulted with his wife and children about the appropriate objects that he should buy for each of the members of the poor family. Once the purchase had been made, he would send over the package by one of his sons or by a messenger. Even close friends of Durkin did not know about this practice, and the facts were disclosed through the work of a newspaperman who ferreted out the story and published it when Martin Durkin became United States Secretary of Labor.

Martin Durkin was a man of high principles. He was always willing to discuss controversial issues and hear the views of opponents. But, once he made up his mind and in his own consciousness determined the righteous and correct path of action, he would follow it to the end, no matter what personal sacrifices it involved.

His resignation from the position of Secretary of Labor illustrates this trait. He stated that he was highly honored to be chosen for an appointment to the Cabinet and to act as United States Secretary of Labor, but when he felt that he would not be able to pursue in that position a program which he felt was right, he gave up his high office without hesitation.

The Very Reverend Monsignor George G. Higgins stated that Martin Durkin was an extraordinary man "and deserves to be honored as such for the consolation of his family, to which he was so tenderly devoted, but, even more important, for the inspiration to his associates in the labor movement, which he loved more than anything else in the world except his God, his family, his country, and his church. He loved the labor movement so well for the better part of his life precisely because he regarded it as a necessary bulwark of the family and the flag and because he knew it to be the normal means of putting into practice in his working life the principles of justice and charity which were handed down to him by the church to which he was so passionately devoted."

This country is a better place to live in because of the life and activities of Martin Patrick Durkin. To his loved ones I extend condolences.

Mr. MADDEN. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. I yield to the gentleman from Indiana.

Mr. MADDEN. Mr. Speaker, I wish to endorse the statement made by our distinguished majority leader regarding my friend and the friend of millions throughout the country, the late Martin Patrick Durkin, former Secretary of Labor. He contributed greatly throughout his adult life's work to the welfare and the furthering of the cause of labor. I know that millions throughout the country mourned his loss when they learned he had departed from this earth.

I wish, Mr. Speaker, to recall an outstanding decision during his service as a Cabinet officer in which Mr. Durkin showed to the millions of laboring people throughout the country that his heart was really with the cause of organized labor. As Secretary of Labor he learned that he was unable to secure the necessary and long-promised revisions of the Taft-Hartley law, which was promised by his superiors, he resigned. I think that was one of the greatest demonstration that his heart was really beating for the cause and the welfare of the laboring men and women of America.

Martin Durkin was born in Chicago, Ill., and received his education in the parochial and evening schools of that city. He was a veteran of World War I and upon returning from the service, entered into the labor movement as an assistant business manager with local 597 of the Plumbing and Pipefitters union. He progressed up the ladder in the councils of organized labor and was appointed Director of Labor for the State of Illinois by Governor Horner in which position he served up until 1941. The high standing held by Mr. Durkin not only by his friends in labor but also people in all walks of life can best be exemplified when he was selected as a member of President Eisenhower's Cabinet in January 1953. The record that he made in successfully carrying out every task or assignment which his labor union, the State and Federal Government assigned to him is well known to all his friends and coworkers.

Not only has organized labor lost a great friend and leader, but the people of his community, State, and Nation mourn his passing. On behalf of organized labor in the first congressional district of Indiana, along with numerous other citizens, I wish to extend to his wife and family, our condolences in their great loss and bereavement.

Mr. O'HARA of Illinois. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. I yield to the gentleman from Illinois.

Mr. O'HARA of Illinois. Mr. Speaker, I am glad that our distinguished majority leader, Mr. McCORMACK, has mentioned the passing of one of the greatest of the sons of Illinois and has paid such a glowing and moving tribute to the memory of Martin Durkin. I wish to join him in his remarks.

It was my privilege to know Martin from the very early days of his life and it was also my privilege to be with him at a great dinner tendered to him in the city of Chicago not many weeks before he died. I knew him in his days of triumph and victory and also in his days of disappointment and of struggle. I always found him enveloped in the robe of simplicity and of understanding. It seemed to me he derived his great strength from the spiritual values within him. In high office he was as simple and as approachable, as kindly and sympathetically understanding, as when in his younger years he labored shoulder to shoulder, a worker among the workers who do with dignity the hard labor of the world.

The last time I saw him at the dinner not long before his death he had been a member of the President's Cabinet. He had been called to this high post of public service, hoping to help the President, the administration, the Government, the working people of the United States. But he found that according to his interpretations there were limitations, that the counsel he would give seeking to help laboring people might not be sympathetically received or might not be understood. So, without giving it another thought, he gave up this high honor, this position of member of the President's Cabinet and attained by few men in any generation and retired to private life. He came with dignity, and he departed with dignity—the dignity of a great man whose strength is in the spiritual values. If ever there was a man who lived close to God, if ever there was a champion and leader of labor who saw God's work in the elevation of the toilers and in that work his mission, it was Martin Durkin. His place in American history is secure. Generations yet unborn will be thrilled and inspired by the story of this great man of spiritual character who became Secretary of Labor in the Cabinet of a President whom he had not supported and for whom he had not voted, hoping that through his influence, a greater understanding might ensue and a harsh and barbarous law, born in passion and in prejudice, might be replaced with legislation restoring labor to the plane of full and equal partnership with management. When he failed, not for lack of effort on his part, but finding not the response for which he had hoped, he withdrew quietly and with the dignity that always characterizes men of stature.

At this dinner given him in Chicago a great tribute was paid him by the people of Chicago that he had known for many years. Everybody of influence was there. It was a great dinner I think, maybe without intention, there was a little needling. They would needle him to say something in a spirit of irritation or disappointment, but from Martin Durkin came only the words of a strong spiritual man, not quarrelling with what had happened, not making controversy of the incident of his engagement in and departure from the Cabinet, but a message of hope, a message of a greater future, a reflection of the great spirituality that was the strength of one of the greatest of all the sons of Illinois, a great American, Martin Durkin.

Mr. McCORMACK. Mr. Speaker, I yield to the gentleman from Illinois [Mr. MURRAY].

Mr. MURRAY of Illinois. Mr. Speaker, I should like to add my endorsement to the remarks of our distinguished majority leader and my distinguished colleague from Illinois [Mr. O'HARA] in connection with the passing of Martin Durkin.

Mr. Durkin for many years prior to his death resided in my district on the southwest side of Chicago. He was beloved by residents of Chicago, the citizens of his district, and by everyone interested in the welfare of the laboring man in the United States.

I attended his funeral in the Church of the Little Flower in my district. I recall the sermon delivered by Monsignor Higgins, of Georgetown University, in connection with his death, in which the monsignor described that the guiding principle behind Martin Durkin was that contained in the beatitude:

> Blessed are the meek, for they shall inherit the earth.

Monsignor Higgins disclosed that Martin Durkin's life showed that through the virtue of meekness one can achieve not only great goodness but great success. I think that we can all learn a great deal from the life of Martin Durkin. His passing is a great loss to the country.

Mr. McCORMACK. Mr. Speaker, I yield to the gentleman from Minnesota [Mr. WIER].

Mr. WIER. Mr. Speaker, I take this occasion also to pay tribute to one of the finest and cleanest men it has been my experience to meet in 28 years of association in the trade-union movement. I met Mr. Durkin on several occasions. I met with him in his office, I met with him at conventions, and I met with him in negotiations. And, he was an exceptionally able leader in the labor movement because of the cleanliness of his morals and his habits. He was one who just could not associate himself with anything but the highest of ideals and morals. I say to you, Mr. Speaker, that no President of these United States could have ever made a better choice for the position of Secretary of Labor than the President made when he chose Mr. Durkin, because Mr. Durkin led a clean life and a wholesome life, his sincerity, honesty, and integrity were beyond reproach. He was a great family man and a man in whom the workers of this Nation had a great deal of confidence. The trade-union movement of this country has lost a great leader and a great man when they lost Martin Durkin.

Mr. McCORMACK. Mr. Speaker, I yield to the gentleman from Illinois [Mr. BOYLE].

Mr. BOYLE. Mr. Speaker, I am very happy to be accorded an opportunity to participate with the other Members of this House in paying my respects and my tribute to Martin Durkin. On the occasion of the 250th anniversary of Benjamin Franklin's birth, it might be well to pause and to look at a 20th century individual whose life, talents, and energy have given to this generation in history, contributions that will serve the world in good stead for the next hundred years or even longer. Martin

Durkin, like Franklin, was a great American, a great philosopher, and a great sage. Like Franklin, he was known throughout the world and although he did not write his name at the foot or end of the Declaration of Independence, the treaty of peace with England in 1783, or the Constitution of the United States. He wrote his name and inspiration into trade unionism. It is not hard to appreciate the dimensions of his talents because in his selection and elevation to a Cabinet post he was given an opportunity to participate in the conduct of his Government on an administrative level which indicated that he measured long and well by the yardstick of esteem that merits approval everywhere. Too often and too long have people deprecated public service. Too long and too often have people maligned and thought little of those men who dedicated their lives for the public good. I think we will begin to appreciate as history goes along that they serve very well who make little contributions or big contributions to the commonweal. I think Martin Durkin, as one of the champions of labor, has made just such a contribution, and I think that history will long record what he has done for the labor movement and for the laboring man. I think that as the world comes into one of its most crucial eras, the laboring man will become more and more articulate, and the things that Martin Durkin has done for him and all humanity will stand up in sharp relief. It is a real pleasure for me as a Chicagoan representing a far north side of Chicago district to say it should be our concern in tribute to his memory to keep in mind the goals that Martin Durkin strove for in championing the cause of labor and the cause of all the people not only of the United States but of the world.

Mr. McCORMACK. Mr. Speaker, I yield to the gentlewoman from Illinois [Mrs. CHURCH].

Mrs. CHURCH. Mr. Speaker, I wish to pay my tribute and express here the respect in which Martin Durkin was held in Illinois throughout many long years. He belonged not only to the people of Illinois. He served with equal distinction in the national area. I took pride in his appointment as a Republican Cabinet member in Washington; and I would like to say that in the ranks of labor or elsewhere I have nowhere found a man of higher personal standards or integrity, a man who operated with such fairness at all times. Perhaps you would let me point out that his fine family did him as much credit as any of his other works. We in Illinois mourn the passing of Martin Durkin and are proud to list him as one of those who has done great service for those within his State and for his country.

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that all Members who so desire may extend their remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. MACK of Illinois. Mr. Speaker, I join my colleagues in expressing a deep personal loss in the untimely passing of one of our Nation's outstanding labor leaders, Martin P. Durkin.

I am proud of the fact that Martin P. Durkin was not only born and reared in the State of Illinois, but that under his leadership the department of labor for the State of Illinois became a model and example for the rest of the country to follow. As Secretary of Labor of the United States, he devoted his life to improving conditions of the laboring man. The monument which he has left to the working men and women of our great country will forever stand as a symbol of his greatness.

Mr. GORDON. Mr. Speaker, I wish to join with the distinguished majority leader, with my colleagues from Illinois and elsewhere in what from their hearts they have said about Martin Durkin. To his wife and family I extend my deepest sympathy.

Martin Durkin was not only a great, outstanding and devoted leader in organized labor. He was interested and active in every movement that had for its objective the elevation of mankind and the advancement of human contentment and the dignity of man.

He was a deeply religious man, and placed always his reliance in God. Illinois and the world can ill afford to lose men of the character, the stature, the ability, the devotion and the spirituality of Martin Durkin. I grieve in the passing of a dear friend, in every sense and by any measure a great American, Martin Durkin.

Mr. KLUCZYNSKI. Mr. Speaker, one of the Nation's most outstanding labor leaders, Martin P. Durkin, died on November 13, 1955. His passing was a great loss to the labor movement, which he so ably represented, and to his legion of friends.

The parents of Martin P. Durkin were Irish immigrants, and his father was an ardent trade unionist and head of a large family.

Martin P. Durkin was born and reared in the back-of-the-yards district on the southwest side of Chicago, the district which it is my privilege to represent. After attending elementary school and high school, he then went to night school to further his education. He started to work as an apprentice steamfitter, a trade which he followed during his lifetime.

In 1933, during the dark days of the depression, Gov. Henry Horner appointed Martin Durkin as director of labor for the State of Illinois. At that time I was a member of the General Assembly of the State of Illinois and served on the labor committee in the house.

It was during that time that I really got to know Martin Durkin and his great work in recommending legislation for the benefit of the laboring man.

To Martin P. Durkin belongs a great deal of credit for the passage in the State of Illinois of the minimum-wage law—an 8-hour working day for women—a law establishing the public-employment service and providing for unemployment compensation. He assisted greatly in obtaining improvements to the State workmen's compensation law. Under his leadership the Department of Labor for the State of Illinois became a model and example for the rest of the country to follow.

In 1953 Martin Durkin was selected by President Eisenhower to become a member of his Cabinet as Secretary of Labor, a position which he filled with distinction.

Martin Durkin had many outstanding characteristics, but to me his greatest virtue was his deep humility. He was a very religious man, and would never sacrifice principle.

To his widow, Anne McNicholas, and their sons, Martin and William and John, I wish to extend my genuine and sincere sympathy.

Mr. GRAY. Mr. Speaker, coming from the extreme portion of southern Illinois, it was not my privilege to know Martin P. Durkin as intimately as some of my colleagues who have been eulogizing this great labor leader today, but with my casual acquaintance and the knowledge of his great work with the masses of our working class of people, I had come to admire and respect him both as an individual, and as a great labor leader.

During the administration of our great Gov. Henry Horner of Illinois, Martin Durkin served as director of labor for the State, and great pages of history were written in behalf of the labor movement during that administration. He was always recommending legislation for the benefit of the laboring man. He was active in pressing for the minimum-wage law, an 8-hour working day for women, and many other worthwhile pieces of legislation. Under his leadership, the department of labor for the State of Illinois became a model, an example for the rest of the country to follow. I have neither the time nor words to adequately expound upon his many outstanding characteristics and accomplishments. He was a very religious man and possessed a deep sense of humility.

I join with my fellow colleagues and citizens in mourning his passing, and extend my deepest sympathy to his family.

Mr. O'BRIEN of Illinois. Mr. Speaker, I knew Martin Durkin for 30 years. He was one of my close and beloved friends. I never knew him to do a small or mean act. He was kind and sympathetic. He always gave a helping hand to one in need, and his leadership and his counsels in organized labor made a tremendous contribution to the cause of working men and women. His was a life rich in service, and the world in which we live is a better world because of the life of Martin Durkin. He rose to the high and lofty position of Secretary of Labor, member of the President's Cabinet, and abandoned this mighty position of power and prestige when the convictions of an honest nature conflicted with what he was expected to do. I extend my deepest sympathy to the members of his family. Illinois and the United States have lost a great son. I have lost a close and dear friend.

BENEFITS FOR CADETS AND MIDSHIPMEN

Mr. MADDEN. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 367 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 5055) to provide that service of cadets and midshipmen at the service Academies during specified periods shall be considered active military or naval wartime service for the purposes of laws administered by the Veterans' Administration. After general debate, which shall be confined to the bill, and shall continue not to exceed 1 hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Veterans' Affairs, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. MADDEN. Mr. Speaker, I yield 30 minutes to the gentleman from Oregon [Mr. ELLSWORTH] and at this time yield myself such time as I may consume.

Mr. Speaker, this resolution calls for the consideration of H. R. 5055. This bill will give credit to the cadets and the midshipmen who were at the Military and Naval Academies during the Spanish-American War and during the period of World War I.

This bill merely equalizes the situation of students at the two academies and places them on the same basis as students who were at the two academies during World War II and during the Korean war.

It does not affect very many veterans, because the cadets who were at the academies during the Spanish-American War in a great number of instances have now passed away. A great many of those who are still alive have already sufficient military service to qualify for all benefits under the various veterans' acts. So it is only a small number of veterans of the Spanish-American War who would be affected. The same is true of those who were at the academies during World War I. Only a small number of those would be affected by this legislation.

Mr. Speaker, I do not know of any opposition to the bill.

Mr. ELLSWORTH. Mr. Speaker, the gentleman from Indiana [Mr. MADDEN] has explained the nature and purpose of this bill. In the 78th Congress, it was decided by Congress to establish the principle of allowing service at the academies to count as military service. That having been done with reference to service during World War II, the bill before you now merely extends the same rights to those very few men now living who were attending the academies during the First World War and prior to that time, the Spanish-American War.

Mr. Speaker, I yield such time as he may desire to the gentleman from Massachusetts [Mr. MARTIN].

BENJAMIN FRANKLIN'S 250TH ANNIVERSARY

Mr. MARTIN. Mr. Speaker, America recalls today the 250th anniversary of one of its most illustrious sons—diplomat, writer, scientist, Benjamin Franklin. Few men made greater contributions to the building of America than he.

Philadelphia elaborately and Boston with a quieter program observe today this notable event. But the appreciation of this great man is nowhere greater than the town which bears his illustrious name—Franklin, Mass.

In the early days of Franklin, Mass., the need of a library was evident and Benjamin Franklin came to the aid of the early settlers. He gave them the books which formed the basis of the library. In appreciation, the townspeople adopted his name for the town.

The town of Franklin later was to give the country that famed educator—Horace Mann, known everywhere as the founder of the American public-school system. His education was furthered by the library Franklin established.

Franklin is also the site of Dean Academy and Junior College, which for 90 years has been one of the leading preparatory schools of New England. These students profit by the library.

Benjamin Franklin was born in Boston on January 17, 1706. He was descended from freeholders and blacksmiths who, for three centuries, lived in Northamptonshire, in England, the same county that was the home of the more aristocratic ancestors of George Washington.

The abilities and accomplishments of Benjamin Franklin were so vast that volumes might be written on any of them—it is as America's first diplomat that he is best remembered; and it is as a man of letters that he perhaps made his greatest contribution. For it was his excellence in the latter that led to much of his success in diplomacy.

Although the great accomplishments of his life took place during his residence in Pennsylvania, and it is as a Pennsylvanian that he is well remembered, the seeds of his greatness were sown in the colony of Massachusetts Bay.

His father, Josiah, came to America in 1685 and became a candlemaker. It was from him that Benjamin, the 14th and favorite of his 20 children, inherited one of his most distinguishing characteristics—the art of settling disputes.

This ability was developed early by Franklin, as were the other attributes that were to serve him and his country throughout his lifetime.

He was still a youth in Boston when his personality became marked by other characteristics:

His commonsense was revealed as a child, when he suggested a general blessing for all the week's provisions, rather than daily grace at the table—to save time.

His inventiveness became apparent when, with other Boston boys, he learned to swim. He tried to fasten panels on his hands and feet for speed, but though they enabled him to swim faster, they also tired him. His alternative was to fly a kite, lie on his back, and be towed across the pond.

He liked discussions, and early abandoned his native dogmatism in favor of the persuasive and modest manner that was to become famous throughout the Western World.

Most important of these early traits, however, was his passion for reading and study. In his own words, he was anxious to become "a tolerable English writer."

Benjamin Franklin's formal education was limited to less than 3 years, but his life was devoted to learning, reading, the acquisition of knowledge—and he advocated that program for others no less than himself.

It was this thirst for knowledge that led him into an apprenticeship to his brother, James, a printer, and set the course for his life. Here he began his practice of reading every book he could acquire, sometimes staying up all night to do so, and here he began his satirical writings.

His Mrs. Silence Dogood articles, written anonymously for his brother's paper, the New England Courant, brought fame and eventual trouble with the Boston authorities to the paper; and finally led to the disagreements between the brothers that started him out to seek his fortune at the age of 17.

His original plan was to seek his fame in New York, but finding no work there he moved on to Philadelphia, and the die was set.

Franklin was only 22, and a veteran printer and editor, when he formed a partnership with another printer and bought his own printing business. By the time he was 26 he had become sole proprietor of the business.

It was during these years that he began to set the pace for American learning. He organized the Junto, patterned after the London tavern clubs he had known, and the father of the present-day Rotary Clubs. This group of young men met to discuss topics of the day, the classics—any subject that came to hand. And they prepared and circulated papers relating to their discussions. It was while a member of this group that Franklin conceived the idea of a subscription library.

His plan was for a circulating library to replace the rather casual lending of books by one member to another. There was no marked enthusiasm for the project at first, because there were few who were willing to donate the initial 40 shillings, and pay the additional 10 shillings a year, just to promote the learning of Benjamin Franklin.

His gift for diplomacy came to the fore—he circulated the story that the library was the plan of a number of friends, who had asked him to invite all real booklovers to belong—and his dream was realized. Some 50 young men joined at once.

This was the first public library in America. The books were ordered from London, and the first order arrived in October 1732. Success was immediate and, judging from the number of public libraries throughout the country today, sustained.

At the base of all Franklin's actions was one motivation, his desire for civilization. This motive, coupled with his natural abilities, led him to the scientific experiments, the writings, the diplomatic service that marked his life. He was to the world at his time—and still is to many, the prototype of the typical American—the rugged individualist who made his own way, who was at ease with lords and laborers, who fiercely believed in the rights of man.

His career was marked by firsts, the first fire-fighting brigade; the first to attract electricity from lightning; the first to build a stove which would heat a whole house; and the first in this country to advocate a school of English in institutions of higher learning, forsaking the tradition of Latin and Greek. He conceived the plans which led to the Philadelphia Academy, later to become the University of Pennsylvania and, although he had to give ground on Latin and Greek in order to get the academy, he managed to carry the idea of his English school.

It was during these years in Philadelphia that he began publication of Poor Richard's Almanac, in which are recorded many of his philosophies with regard to the conduct of men and of nations. In 1741, he commented:

> Enjoy the present hour, be mindful of the past; And neither fear nor wish the approaches of the last.

In the same vein, Poor Richard observed:

> The ancients tell us what is best; but we must learn of the moderns what is fittest.

It was perhaps this reasoning that led him, as agent of Pennsylvania and later of other colonies, to work for the building of a great British Empire that was his dream; then, when it appeared that the Empire would become the tyrant, to work diligently and successfully for the Revolution as the agent appointed by the Congress of the United States of America to propose and negotiate a treaty of amity and commerce between France and the United States. That letter of designation was the first official diplomatic act of the United States.

Franklin believed that "right however opposed becomes right at last." That was his sentiment at 20, and it remained his sentiment at 60. It is noteworthy that in his life, distinguished by politics, he made only one major speech—his plea for the adoption of the Constitution in 1787.

But his writings, as left to us, number well over 30,000. In them are revealed his character, his wit, his inventiveness, his wisdom. They are a fitting monument to America's first man of letters.

Mr. ELLSWORTH. Mr. Speaker, I have no further requests for time.

Mr. MADDEN. Mr. Speaker, I move the previous question.

The previous question was ordered.

The resolution was agreed to.

Mr. TEAGUE of Texas. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 5055) to provide that service of cadets and midshipmen at the service Academies during specified periods shall be considered active military or naval wartime service for the purposes of laws administered by the Veterans' Administration.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H. R. 5055, with Mr. LANDRUM in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

Mr. TEAGUE of Texas. Mr. Chairman, I yield such time as he may desire to the gentleman from Tennessee [Mr. EVINS], a former very fine member of the House Committee on Veterans' Affairs and the original author of this bill.

Mr. EVINS. Mr. Chairman, the chairman of the House Committee on Veterans' Affairs just called my attention to the fact that the committee has again favorably reported the bill of which I was the author and which passed the committee on 3 previous occasions and also passed this House on 3 separate occasions. The bill was never taken up in the Senate. Fortunately, perhaps this time there may be success on the measure. I certainly trust so as it has long been advocated by members of the Reserve Officers Association throughout the United States.

As has been pointed out by previous speakers, the bill is designed to equalize the giving of credit to men who served in World War I and the Spanish-American War who are entitled to compensation or pension benefits. The great bulk of the compensation for this will not go to the men of the Korean war or World War II, who are most numerous. This will give equality to those who had this service and who attended the Academies—the number is very small.

Each year the bill is delayed there will be fewer who will benefit under the provisions of the law.

Under Public Law 144 of the 78th Congress service performed in World War II at the Military, Naval, or Coast Guard Academies is considered to be active service for the purposes of laws administered by the Veterans' Administration. This bill, H. R. 5055, seeks to extend the same provisions to cadets and midshipmen who served at the Academies during War I and the Spanish-American War.

Mr. EDMONDSON. Mr. Chairman, will the gentleman yield?

Mr. EVINS. I yield to the gentleman from Oklahoma.

Mr. EDMONDSON. I would like to express my appreciation to the gentleman from Tennessee, who has a great record for constructive veterans' legislation, for making this contribution to the laws of the land with regard to our veterans. I think this bill is one that does nothing but create equity in existing legislation. I think the gentleman has done a substantial service to the veterans of our country by offering this bill to the House.

Mr. EVINS. I thank my friend and the chairman of the committee. May I say that among the most pleasant years of my service in the House were when I served on the Committee on Veterans' Affairs.

With regard to the pending bill, I may say, for the record, that the number of individuals involved is comparatively small.

In the Spanish American War there were 1,069 cadets at West Point, and 568 midshipmen at Annapolis. The Coast Guard Academy did not come into existence until after World War I, so only 37 officers, 54 cadets, and 1,242 enlisted men of the Coast Guard would be covered by this bill.

Many of this number, as we can appreciate, have now passed on.

As to the cost, the Veterans' Administration is not able to provide an accurate estimate, but it is stated that increased benefits under this bill would by no means be great that they would be very negligible and very small.

Mr. JOHNSON of California. Mr. Chairman, will the gentleman yield?

Mr. EVINS. I yield.

Mr. JOHNSON of California. I want to associate myself with the sentiments of the gentleman from Tennessee and commend him for introducing this bill. It happens that I am a World War I veteran. Everybody knows that a great many of those men are getting to a very critical age in life. I hope the bill will pass, and I am quite sure it should pass. We must not forget the sacrifices of those who entered the military services to protect and safeguard our beloved country. The bill is a very modest step in that direction.

I thank my friend. The committee is endeavoring to make the laws uniform for all groups and classes of veterans wherever possible.

Mr. O'HARA of Illinois. Mr. Chairman, will the gentleman yield?

Mr. EVINS. I yield.

Mr. O'HARA of Illinois. Mr. Chairman, I commend the gentleman from Tennessee for bringing in this bill. I wish to take advantage of this opportunity to point out to some of my colleagues who may have thought that the Spanish-American War was a long time ago that the figures here of "known dead 273 and presumed living 295" is proof that the Spanish American War veterans are more alive than dead.

Mr. EVINS. I will say to my friend, the gentleman from Illinois [Mr. O'HARA] who is, himself, a distinguished veteran of the Spanish-American War that he is very vigorous and very able, and we are delighted that he continues his useful service here in the Congress.

Mrs. ROGERS of Massachusetts. Mr. Chairman, I shall not take more than a moment or two of the time of the committee. I happily endorse this bill as well as other bills designed to liberalize the benefits given to Spanish American War veterans and the World War I veterans so that they may have benefits

which today they do not have and that other veterans of other wars have. I think no one can be against it. The cost is small, but after all it is the principle of the legislation that is right. I would like to say that we are very sorry to lose the gentleman from Tennessee [Mr. EVINS] as a member of our committee, but I believe, perhaps, he can serve us even better on the Committee on Appropriations where he now is. He served us well last year on the Appropriations Committee. I congratulate the gentleman from Illinois [Mr. O'HARA], the Spanish American War orphan—the only one in the House—for his great vigor and the fine character of the work he has done for Spanish American War veterans legislation. I include as part of my remarks the committee report on H. R. 5055:

BENEFITS FOR CADETS AND MIDSHIPMEN SERVING IN SPANISH WAR AND WORLD WAR I

Mr. TEAGUE of Texas, from the Committee on Veterans' Affairs, submitted the following report:

The Committee on Veterans' Affairs, to whom was referred the bill (H. R. 5055) to provide that service of cadets and midshipmen at the service Academies during specified periods shall be considered active military or naval wartime service for the purposes of laws administered by the Veterans' Administration, having considered the same, report favorably thereon without amendment and recommend that the bill do pass.

EXPLANATION OF THE BILL

Public Law 144 of the 78th Congress provides that service during World War II at the United States Military Academy, the United States Naval Academy, or the United States Coast Guard Academy shall be considered active military or naval service for the purposes of laws administered by the Veterans' Administration.

This bill seeks to extend the active wartime service status to cadets and midshipmen who served at the Academies during periods deemed to be World War I and Spanish-American War periods.

In the interest of providing uniformity for veterans of all wars, the committee believes that this bill has merit and that it is a most reasonable proposal. As indicated in the report from the Veterans' Administration, "It is believed that relatively small numbers of persons would be affected and the cost of paying additional or increased benefits granted under this bill would not be great." In addition, the information available to the committee during the 82d Congress by the Defense and Treasury Departments shows that relatively few men are involved. For example, in the Spanish War there were a total of 1,069 cadets at West Point, 568 midshipmen at Annapolis. Comparable periods for World War I are 1,930 men at West Point, 2,535 at Annapolis. In the case of the Coast Guard Academy, in World War I there were 37 officers, 54 cadets, and 1,242 enlisted men. While no definite figure can be given, there is no doubt that a considerable number of this total are no longer living. The Department of Defense has advised that of the numbers in its jurisdiction listed above only 3,809 are alive. Further, the committee believes that the vast majority of the living veterans who had service at one of the Academies also had active military or naval service adequate for most purposes under the veterans' laws and thus would not receive any additional benefits by the enactment of this legislation.

The reports of the Veterans' Administration and the Department of Defense follow:

VETERANS' ADMINISTRATION,
OFFICE OF THE ADMINISTRATOR
OF VETERANS' AFFAIRS,
Washington, D. C., April 18, 1955.

Hon. OLIN E. TEAGUE,
Chairman, Committee on Veterans' Affairs, House of Representatives, Washington, D. C.

DEAR MR. TEAGUE: Reference is made to your request for a report by the Veterans' Administration on H. R. 5055, 84th Congress, a bill to provide that service of cadets and midshipmen at the service Academies during specified periods shall be considered active military or naval wartime service for the purposes of laws administered by the Veterans' Administration, which provides:

"That section 10 of the Act of July 13, 1943 (Public Law 144, 78th Cong.; 38 U. S. C. 730), is hereby amended to read as follows:

"'SEC. 10. For the purposes of laws administered by the Veterans' Administration, service as a cadet at the United States Military Academy or as a midshipman at the United States Naval Academy during the period from April 21, 1898, to July 5, 1902, shall be considered active military or naval service in the Spanish-American War; such service, or service as a cadet at the United States Coast Guard Academy during the period from April 6, 1917, to November 12, 1918, shall be considered active military or naval service to World War I; and all such service during the period December 7, 1941, to December 31, 1946, shall be considered active military or naval service in World War II.'"

Section 10 of the act of July 13, 1943 (Public Law 144, 78th Cong.), which the bill proposes to amend, presently provides as follows:

"SEC. 10. Service as a cadet at the United States Military Academy or as a midshipman at the United States Naval Academy or as a cadet at the United State Coast Guard Academy on or after December 7, 1941, and before termination of hostilities incident to the present war as determined by proclamation of the President or by concurrent resolution of the Congress shall be considered active military or naval service in World War II for the purposes of laws administered by the Veterans' Administration."

For many years it has been the general rule that cadets at the United States Military Academy and midshipmen at the United States Naval Academy were not, while pursuing their regular courses of instruction, in the active military service within the meaning of that term as used in laws administered by the Veterans' Administration. By the enactment of section 10 of the mentioned act of July 13, 1943, Congress provided for an exception to this rule in the case of service at the Academies during World War II, but cadets and midshipmen who attended the Academies during the periods of other wars, and who were disabled by reason of wounds or injuries or disease contracted while pursuing the prescribed course of instruction and in line of duty are not entitled to wartime rates of compensation unless they were so disabled while assigned to duties constituting war service, which includes practice cruises at sea but excludes practice maneuvers at West Point. However, cadets and midshipmen who were disabled while attending the Military and Naval Academies during war periods or any other period are entitled to compensation at peacetime rates as prescribed by law (Veterans Regulation No. 1 (a), pt. II) by virtue of having had a "pensionable status" as officers of the Army and Navy under the general pension law. If suffering from permanent total disability not connected with any period of service, the pension rates authorized therefor are payable only if the service requirements thereof were met while such persons were assigned to practice cruises or otherwise actually assigned to active duty during the period of hostilities as specified in said regulation.

In connection with the legislation extending active service status to cadets and midshipmen who attended the Academies during hostilities of World War II (December 7, 1941, to noon, December 31, 1946), the Committee on World War Veterans' Legislation, in House Report No. 463, to accompany H. R. 2703, 78th Congress, 1st session, stated, in pertinent part, as follows:

"* * * As many of those who are now being enrolled or inducted in the active military or naval service are continued or enrolled in schools for prescribed courses of instruction as a part of their military training for service during the present war, it is believed that cadets at the United States Military Academy and midshipmen at the United States Naval Academy and cadets at the United States Coast Guard Academy, particularly in view of the intensive training programs prescribed for these groups, should occupy a similar status and that their service while pursuing courses of instruction at these Academies for any period on or after December 7, 1941, and prior to termination of hostilities incident to the present war, should be considered as active military or naval service."

If enacted, H. R. 5055 would render a cadet or a midshipman, disabled while attending a service academy as the result of injury or disease contracted in line of duty during the period from April 21, 1898, to July 5, 1902, or the period from April 6, 1917, to November 12, 1918, eligible to receive compensation at the wartime rate. Also, a cadet or a midshipman who attended a service academy between the specified dates would, if otherwise eligible, become entitled to pension for nonservice-connected permanent total disability without the present requirement of having been assigned to the particular duty noted above. Further, service as a cadet or a midshipman between April 21, 1898, and July 5, 1902, would be cognizable for the purpose of service pension under the service pension acts reenacted by Public, No. 269, 74th Congress. The benefit of hospitalization for nonservice-connected disabilities, now available to veterans with war service, would also be authorized for the persons concerned if the bill is enacted.

With respect to death benefits, the widow, child, or dependent parent of an individual who died as the result of injury or disease incurred in or aggravated by service as a cadet or midshipman during the specified periods would, if otherwise eligible, become entitled under H. R. 5055, if enacted, to compensation at the wartime rate prescribed by law. In addition, the surviving widow, child, or children of a deceased person who served at one of the service academies during the mentioned periods would apparently become entitled to the Spanish-American War service pension under the mentioned service pension acts or to the World War I service pension provided under Public, No. 484, 73d Congress, June 28, 1934, as amended by Public Law 483, 78th Congress, provided the other requirements thereof were met.

The bill, if enacted, might be construed to entitle midshipmen and cadets who served on or after April 6, 1917, and before November 11, 1918, to automatic insurance under the provisions of section 401 of the War Risk Insurance Act as amended by section 12, Public, No. 104, 66th Congress, which granted automatic insurance to any person in the active service on or after April 6, 1917, and before November 11, 1918, who, prior to the expiration of 120 days after October 15, 1917, or 120 days after entrance into active service, died or was disabled without having applied

for insurance. Due to the lapse of more than 30 years since the service in question was performed, provision for automatic insurance for such individuals who claim to have become permanently and totally disabled during the time such insurance was in force would require administrative determinations of facts which occurred many years ago, which facts are not now readily ascertainable.

It is not clear whether the bill is intended to render midshipmen or cadets of the World War I period eligible for adjusted compensation under the World War Adjusted Compensation Act, as amended. This act provides that adjusted service credit be computed upon the basis of active service after April 5, 1917, and before July 1, 1919 (38 U. S. C. 601); that application for benefits be filed on or before January 2, 1940 (38 U. S. C. 612); and that in computing adjusted service credit no allowance be made for service as a cadet or midshipman (38 U. S. C. 602).

Information is not available upon which to base an estimate of the cost of the bill, if enacted. However, it is believed that relatively small numbers of persons would be affected and that the cost of paying initial or increased benefits granted under the bill would not be great.

As previously indicated, it has been the general rule that cadets and midshipmen at the Academies have not been considered in the active military or naval service within the meaning of that term under laws administered by the Veterans' Administration. In the case of such persons serving during World War II, however, Congress made an exception to this general rule by section 10 of the act of July 13, 1943, supra. It should also be noted that by virtue of a specific provision in the Servicemen's Indemnity Act (Public Law 23, 82d Cong., April 25, 1951), cadets and midshipmen are now deemed to be in the active service for the purposes of the $10,000 free death indemnity. The pending bill presents a question of policy for determination by the Congress, upon which the Veterans' Administration has no recommendation. In this connection, it may be of interest to note that similar bills in previous Congresses, H. R. 7739, 81st Congress, and H. R. 2384, 82d Congress, passed the House of Representatives on May 15, 1950, and June 20, 1951, respectively. Neither bill received favorable consideration by the Senate.

For the purposes generally of laws administered by the Veterans' Administration the Spanish-American War period (including the Philippine Insurrection) extends from April 21, 1898, to and including July 4, 1902, and the period of World War I extends from April 6, 1917, to and including November 11, 1918. Accordingly, if the bill receives further consideration by your committee, it is suggested that it be amended to change the terminal dates of each of these periods and, for clarity, to add the word "inclusive," after each stated period, as well as the World War II period. It is also noted that the word "to" in line 6, page 2, should be "in."

Advice has been received from the Bureau of the Budget that there would be no objection to the submission of this report to your committee.

Sincerely yours,

JOHN S. PATTERSON,
Deputy Administrator
(For and in the absence of the Administrator).

ASSISTANT SECRETARY OF DEFENSE,
Washington, D. C., July 11, 1955.

Hon. OLIN E. TEAGUE,
Chairman, Committee on Veterans' Affairs, House of Representatives.

DEAR MR. TEAGUE: The following information is forwarded in response to a telephone request from Mr. Patterson of the House Veterans' Affairs Committee to Mr. John Driver of this office:

Midshipmen serving at U. S. Naval Academy, Annapolis

	Number of midshipmen	Status as of June 30, 1954	
		Known dead	Presumed living
Spanish-American War (Aug. 13, 1898–July 5, 1902):			
Total serving	568	273	295
Graduates	488	236	252
Nongraduates	80	37	43
World War I (Apr. 6, 1917–Nov. 11, 1918):			
Total serving	2,535	381	2,154
Graduates	1,943	337	1,606
Nongraduates	592	44	548

Cadets serving at U. S. Military Academy, West Point

	Number of cadets	Status as of June 30, 1954	
		Presumed dead	Known living
Spanish-American War (Aug. 13, 1898–July 5, 1902):			
Total serving	1,069	-------	-------
Graduates	722	434	288
Nongraduates	347	(1)	(1)
World War I (Apr. 6, 1917–Nov. 11, 1918):			
Total serving	1,930	-------	-------
Graduates	1,329	257	1,072
Nongraduates	601	(1)	(1)

[1] Not readily available.

We trust that this limited information will be helpful to you.

Sincerely yours,

W. J. MCNEIL.

RAMSEYER RULE

In accordance with clause 3 of rule XIII of the Rules of the House of Representatives, the changes made in existing law by the bill are shown as follows (existing law proposed to be omitted is in black brackets; new matter is in italics; existing law in which no changes are proposed is shown in roman):

"SECTION 10, PUBLIC LAW 144, 78TH CONGRESS

"SEC. 10. *For the purposes of laws administered by the Veterans' Administration,* service as a cadet at the United States Military Academy or as a midshipman at the United States Naval Academy or as a cadet at the United States Coast Guard Academy [on or after December 7, 1941, and before termination of hostilities incident to the present war as determined by proclamation of the President or by concurrent resolution of the Congress shall be considered active military or naval service in World War II for the purposes of laws administered by the Veterans' Administration.] *during the period from April 21, 1898, to July 5, 1902, shall be considered active military or naval service in the Spanish-American War; such service during the period from April 6, 1917, to November 12, 1918, shall be considered active military or naval service in World War I; and such service during the period December 7, 1941, to December 31, 1946, shall be considered active military or naval service in World War II.*"

COMMITTEE ON VETERANS' AFFAIRS, HOUSE OF REPRESENTATIVES, OLIN E. TEAGUE, CHAIRMAN

SERVICE IN ACADEMIES IN SPANISH WAR AND WORLD WAR I

H. R. 5055

Title: To provide that service of cadets and midshipmen at the service Academies during specified periods shall be considered active military or naval wartime service for the purposes of laws administered by the Veterans' Administration.

Mr. TEAGUE of Texas (by request). Introduced and referred March 18, 1955.

Analysis: Existing law permits veterans of World War II to count time spent in the Military, Naval, or Coast Guard Academies as service in World War II. This bill would extend this privilege to those who served in the Academies during the Spanish War or World War I.

Digest of Report (Veterans' Administration):

"* * * If enacted, H. R. 5055 would render a cadet or a midshipman, disabled while attending a service academy as the result of injury or disease contracted in line of duty during the period from April 21, 1898, to July 5, 1902, or the period from April 6, 1917, to November 12, 1918, eligible to receive compensation at the wartime rate. Also, a cadet or a midshipman who attended a service academy between the specified dates would, if otherwise eligible, become entitled to pension for non-service-connected permanent total disability without the present requirement of having been assigned to the particular duty noted above. Further, service as a cadet or a midshipman between April 21, 1898, and July 5, 1902, would be cognizable for the purpose of service pension under the service pension acts reenacted by Public, No. 269, 74th Congress. The benefit of hospitalization for non-service-connected disabilities, now available to veterans with war service, would also be authorized for the persons concerned if the bill is enacted.

"With respect to death benefits, the widow, child, or dependent parent of an individual who died as the result of injury or disease incurred in or aggravated by service as a cadet or midshipman during the specified periods would, if otherwise eligible, become entitled under H. R. 5055, if enacted, to compensation at the wartime rate prescribed by law. In addition, the surviving widow, child, or children of a deceased person who served at one of the service Academies during the mentioned periods would apparently become entitled to the Spanish-American War service pension under the mentioned service pension acts or to the World War I service pension provided under Public, No. 484, 73d Congress, June 28, 1934, as amended by Public Law 483, 78th Congress, provided the other requirements thereof were met.

"The bill, if enacted, might be construed to entitle midshipmen and cadets who served on or after April 6, 1917, and before November 11, 1918, to automatic insurance under the provisions of section 401 of the War Risk Insurance Act as amended by section 12, Public, No. 104, 66th Congress, which granted automatic insurance to any person in the active service on or after April 6, 1917, and before November 11, 1918, who, prior to the expiration of 120 days after October 15, 1917, or 120 days after entrance into active service, died or was disabled without having applied for insurance. Due to the lapse of more than 30 years since the service in question was performed, provision for automatic insurance for such individuals who claim to have become permanently and totally disabled during the time such insurance was in force would require administrative determinations of facts which occurred many

years ago, which facts are not now readily ascertainable.

"It is not clear whether the bill is intended to render midshipmen or cadets of the World War I period eligible for adjusted compensation under the World War Adjusted Compensation Act, as amended. This act provides that adjusted service credit be computed upon the basis of active service after April 5, 1917, and before July 1, 1919 (38 U. S. C. 601); that application for benefits be filed on or before January 2, 1940 (38 U. S. C. 612); and that in computing adjusted service credit no allowance be made for service as a cadet or midshipman (38 U. S. C. 602).

"Information is not available upon which to base an estimate of the cost of the bill, if enacted. However, it is believed that relatively small numbers of persons would be affected and that the cost of paying initial or increased benefits granted under the bill would not be great. * * *"

Reported July 26; House Report 1418.

Mr. Chairman, I now yield such time as he may desire to the gentleman from Indiana [Mr. ADAIR], one of the most valuable members of our committee.

Mr. ADAIR. Mr. Chairman, as previous speakers have pointed out, there are 2 or 3 things in particular that ought to be remembered about this proposed legislation. The first is that it has been reported favorably by the Committee on Veterans' Affairs and passed by this House on previous occasions. So it is before us again for action here, and subsequently, we hope, by the other body which has not heretofore considered this measure, as I recall. Secondly, it does tend to equalize and make equitable certain rights which, once granted, are administered by the Veterans' Administration. Those of us who have given thought and study to this legislation feel that it is proper, long overdue and very much worthwhile.

Mr. TEAGUE of Texas. Mr. Chairman, I have no further requests for time.

Mrs. ROGERS of Massachusetts. Mr. Chairman, I have no further requests for time. It is unanimous on this side apparently.

The CHAIRMAN. There being no further requests for time, the Clerk will read.

The Clerk read as follows:

Be it enacted, etc., That section 10 of the act of July 13, 1943 (Public Law 144, 78th Congress; U. S. C. 730), is hereby amended to read as follows:

"SEC. 10. For the purposes of laws administered by the Veterans' Administration, service as a cadet at the United States Military Academy or as a midshipman at the United States Naval Academy during the period from April 21, 1898, to July 5, 1902, shall be considered active military or naval service in the Spanish-American War; such service, or service as a cadet at the United States Coast Guard Academy during the period from April 6, 1917, to November 12, 1918, shall be considered active military or naval service to World War I; and all such service during the period December 7, 1941, to December 31, 1946, shall be considered active military or naval service in World War II."

Mr. TEAGUE of Texas. Mr. Chairman, I have two perfecting amendments at the desk, and I ask unanimous consent that they be read and considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read as follows:

Amendment offered by Mr. TEAGUE of Texas:

On page 2, line 7, strike out "to" and insert "in."

Page 2, line 8, after December 31, 1946, insert "inclusive."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas [Mr. TEAGUE].

The amendments were agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. LANDRUM, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H. R. 5055) to provide that service of cadets and midshipmen at the service Academies during specified periods shall be considered active military or naval wartime service for the purposes of laws administered by the Veterans' Administration, pursuant to House Resolution 367, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gross.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE TO EXTEND REMARKS

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to extend my remarks and include the report on the bill.

The SPEAKER. Is there objection?

There was no objection.

Mrs. ROGERS of Massachusetts. I ask unanimous consent, Mr. Speaker, that all Members may have 5 legislative days in which to extend their remarks on the bill just passed.

The SPEAKER. Is there objection?

There was no objection.

NATIONAL JUNIOR ACHIEVEMENT WEEK

Mr. CELLER. Mr. Speaker, I ask unanimous consent for the immediate consideration of Senate Concurrent Resolution 59.

The Clerk read the title of the Senate concurrent resolution.

The SPEAKER. Is there objection to the present consideration of the Senate concurrent resolution?

There being no objection, the Clerk read the resolution, as follows:

Whereas it was the initiative, the sense of individual dignity, and the determination to mold their own futures that motivated those who founded this Nation; and

Whereas Junior Achievement, Inc., through its "learn-by-doing" program is inculcating those ideals in American youth by helping them to set up and operate their own small-scale business enterprises; and

Whereas their experience in running Junior Achievement companies will provide these young people with a heightened understanding of the privileges and duties of citizenship and better prepare them to assume the responsibilities of community leadership; and

Whereas thousands of American businessmen voluntarily give unstintingly of their time, their counsel, and their experience for the benefit of the members of Junior Achievement; and

Whereas it is understood that the week beginning January 29, 1956, and ending February 4, 1956, will be observed as National Junior Achievement Week: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the President of the United States is requested to issue a proclamation designating the week of January 29, 1956, through February 4, 1956, as National Junior Achievement Week and urging all citizens of our country to salute the activities of Junior Achievers and their volunteer adult advisers through appropriate ceremonies.

The Senate concurrent resolution was read a third time, and passed, and a motion to reconsider was laid on the table.

JANE EDITH THOMAS

Mr. CELLER. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 7588) for the relief of Jane Edith Thomas, with a Senate amendment thereto, disagree to the amendment of the Senate, and ask for a conference.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from New York? [After a pause.] The Chair hears none, and appoints the following conferees: Mr. FEIGHAN, Mr. CHELF, and Miss THOMPSON of Michigan.

LEONG DING FOON QUON AND KEN C. QUON

Mr. CELLER. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H. R. 1496) for the relief of Leong Ding Foon Quon and Ken C. Quon, with a Senate amendment thereto and concur in the Senate amendment with an amendment which I send to the desk.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Line 4, strike out "and Ken C. Quon."

Amend the title so as to read: "An act for the relief of Leong Ding Foon Quon."

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the amendment offered by the gentleman from New York to the Senate amendment.

The Clerk read as follows:

Amendment offered by Mr. CELLER to the Senate amendment: On line 5, strike out the words "returning resident aliens" and substitute therefor "a returning resident alien."

The amendment to the Senate amendment was agreed to.

The Senate amendment was agreed to, and a motion to reconsider was laid on the table.

THE LATE HONORABLE BERTRAND WESLEY GEARHART

The SPEAKER. Under the previous order of the House, the gentleman from California [Mr. SISK] is recognized for 45 minutes.

Mr. SISK. Mr. Speaker, it is with deep regret and sorrow that I rise to inform the House of the death on October 11, 1955, of the Honorable Bertrand Wesley Gearhart, who served with distinction in this House from 1935 to 1949 and who numbered many present Members among his multitude of friends.

Those Members who served with Congressman Gearhart will better remember him as Bud, a childhood nickname which followed him through a long and distinguished career and by which he was affectionately known in the Halls of Congress, on the battlefields of France, and in his native city of Fresno, Calif., which I now have the honor to represent.

Bud Gearhart's passing at the age of 65 in the Stanford Lane Hospital of San Francisco brought to an end a lifetime of service to his community, State, and Nation, but he will be equally remembered and his memory cherished because of his warm human qualities, his readiness to extend help where it was needed, and his tenacious adherence to the right as he saw it.

Though Bud and I were of different political parties, this did not cause him to withhold the hand of friendship. Upon my election and the taking of my seat here, Bud Gearhart offered me his help and the background of his long experience, in accustoming me to strange and new surroundings and in doing a better job for the people he had represented and that I now represent. Since my return to Washington for this session, I have learned from other Members that as a colleague Bud helped many of them over the rough spots all of us face as newcomers here.

Congressman Gearhart was born May 31, 1890 in the city of Fresno. Until 1952 he lived in the house in which he was born. He came from distinguished ancestors, including the Capt. Jacob Gearhart who served in the Revolutionary War under George Washington, and who gathered the boats with which General Washington and his troops made the successful crossing of the Delaware River at Trenton on Christmas Eve, 1776. His family were pioneers in the San Joaquin Valley of California, and his maternal grandfather was the original surveyor of large areas of the valley.

Bud was a graduate of Fresno High School and of the University of Southern California, where he was awarded a bachelor of laws degree. He engaged in the practice of law in Fresno from 1913 until his death.

During the first World War he enlisted in the Army and was sent to officers training school, where he was commissioned a second lieutenant and served in France, assigned to the 811th Aero Squadron.

He was one of the founders of the American Legion, helping to draw its constitution and serving as a member of the committee which selected the emblem the organization uses. Beside many other posts of distinction in that organization, he served as commander of the Department of California and as a member of its national executive committee.

In his career of public service, Bud Gearhart served as district attorney of Fresno County, as a member of the State athletic commission, as a director of the California Veterans' Home, as a delegate to a State constitutional convention, and as a member of a Board of Freeholders of the City of Fresno. He enjoyed active membership in many fraternal and club organizations in California and here in Washington and was ever ready to serve with a multitude of committees, advisory boards and organizations devoted to community service.

During his 14 years in this House, Congressman Gearhart contributed substantially to the important work of the Congress through his membership on the Ways and Means Committee. In his city and State he will be long remembered for his sponsorship and successful work for such important measures as the Central Valley project, the construction of a veterans' hospital in Fresno, and the location of the Castle Air Force Base at Merced.

Although his services were great in many fields, Bud Gearhart probably will be longest remembered in the hearts of his fellows for his life-long concern and interest and his great contribution toward recognition and fulfillment of our country's obligations to its veterans.

Many veteran organizations in my district have asked that we recognize and commemorate Bud Gearhart's work in the field of veteran affairs and notably his assistance to disabled and ailing veterans by naming the veterans' hospital in Fresno after him, and I want to advise the Members at this time that I will introduce a bill to designate that institution as the B. W. Gearhart Veterans' Hospital. I bespeak support for this merited recognition.

In speaking here this afternoon I know I am expressing the regret and sorrow of a multitude of Bud Gearhart's friends out in California and here in the Halls of Congress. All of them, I know, will want to join me in expressing our sympathy to his sister, Mrs. Clara Gearhart Williams, and in this tribute to a comrade and friend, with a last "Well done."

A number of Members have asked the opportunity to express their thoughts on this occasion. I will be most happy to yield time to them. Others, unable to be here, have requested that I ask permission to have their remarks inserted in the RECORD at this point, and I so ask.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. SISK. I am glad to yield to the distinguished majority leader.

Mr. McCORMACK. I am very sorry to hear of the death of Bert Gearhart, but I am pleased to be here on the floor of the House while my friend is paying a deserved tribute and eulogy to him. I join with the gentleman from California in the remarks he has made in relation to my late friend.

I knew Bert Gearhart very well; he and I developed a very close friendship. He was one of the hardest working Representatives in the Congress; a man devoted to public service, and a man who voted in accordance with his conscience and his convictions. I deeply respected him, and I join with the California delegation in expressing a deep sympathy to those who are bereaved by his passing.

Mr. RAYBURN. Mr. Speaker, will the gentleman yield?

Mr. SISK. I yield.

Mr. RAYBURN. It was my pleasure for a good many years to serve with our friend, Bud Gearhart. He was always sane, he was always sound, he was always a patriotic American. He was one of the most delightful persons it has ever been my privilege to serve with in the House of Representatives.

I deeply regret his passing, and my deepest sympathy goes to everyone who loved him.

Mr. McDONOUGH. Mr. Speaker, will the gentleman yield?

Mr. SISK. I yield to the gentleman from California.

Mr. McDONOUGH. Mr. Speaker, I want to join with the others in commemorating the services rendered in this House and to the Government and the Nation by our late colleague Bud Gearhart. I recall when I first came to Congress the attention he gave to new Members, the advice, and counsel he gave, his pleasing personality, and the competent grasp he had of all phases of the Government. He was a great help to me when I first came here. I know he was highly respected in the community he represented. He represented it honorably and capably for many years. His passing was a shock to me.

I was hoping when he left Congress that he would enjoy life for many years, because he always appeared to be in very robust health. Unfortunately he is not with us any longer, and it is very becoming that we should commemorate his association with us while he was a Member of the House of Representatives. California and the Nation have lost a great and good man. Bud Gearhart was the kind of a man that all of us took great pride in, in calling him a friend. He was a devoted and loyal American.

Mr. PHILLIPS. Mr. Speaker, will the gentleman yield?

Mr. SISK. I yield to the gentleman from California.

Mr. PHILLIPS. Mr. Speaker, I am very glad the gentleman took this time to speak of our late friend and colleague, Bud Gearhart. It was a shock to me, as it must have been to many Members of the House, to hear of his death last fall. As our distinguished Speaker has pointed out, he was a man of friendly disposition and great ability.

For most of the first session after I came here I lived at the University Club. Bud had lived there for several years, certainly the latter part of his service anyway. I got to know him very well. We had breakfast every morning with other Members at the round table in the club. We drove down in his car. Bud Gearhart was always the same, good-natured, hard-working, able.

At that time, as we on this side of the aisle will remember, he was a member of the minority leader's strategy committee and he was the representative from my State on the committee on committees. We were the beneficiaries of his interest in committee appointments. I repeat, I was profoundly shocked to realize Bud had reached an age when his time had come. Most of us looked upon him as a younger man with a great many years ahead of him. I shall miss him very much, but I shall look back on his service in the Congress, his membership on the Ways and Means Committee, his friendliness to all of us, and his help. As the gentleman from California [Mr. SISK] has pointed out, we regret his passing.

Mr. ENGLE. Mr. Speaker, I was a very, very close friend of Bud Gearhart. When I came to Congress in 1943, I became acquainted with Bud Gearhart, who was one of the most friendly men in the California delegation. He was then an important and powerful member of the House Committee on Ways and Means. I was just one of the new Members. To me Bud demonstrated his capacity for friendship which has been referred to by our colleague from Los Angeles [Mr. MCDONOUGH].

I was also one of those who was a friend and a neighbor of Bud Gearhart at the University Club. As our colleague from southern California [Mr. PHILLIPS] has stated, Bud Gearhart lived for many years at the University Club. I lived at the same club for about a year and a half after I first came to Congress. Bud Gearhart sponsored my membership in the University Club.

Mr. Speaker, Bud Gearhart was a man of outstanding ability and, as has been stated, he was a man of great patriotism. It has not been mentioned up to this time that Bud Gearhart was one of the originators, one of the first sponsors, of the American Legion. He took a great deal of pride in telling me, and I often heard him repeat it, about the little meeting they got together some place over in France initiating the idea of starting the American Legion, which has become, of course, the greatest and the most famous veterans' organization in this country, and perhaps in the world.

We were all shocked, I am sure, to hear that a man of Bud Gearhart's affability, friendliness, and his apparent youth, should pass away so unexpectedly. We never regarded him as a man of many years, even though some of us knew when he left the House he was getting along somewhat in age.

It came with a distinct shock to me when I heard he had passed away. Although I have not had the pleasure of seeing him in recent years, I do hold the recollection of him in very deep affection. I send my sincere sympathies to his many, many friends and to the members of his family.

Mr. JOHNSON of California. Mr. Speaker, I was also very much shocked to hear that Bud Gearhart had passed away because I thought he was in perfect health although I had not seen him for some years.

I knew Bud Gearhart long before he came to Congress. He and I were in the group that organized the Department of California, American Legion. Later on I helped elect him our State commander. But I remember him most during my first term in the Congress when we had the famous Ruml plan up here for consideration which he was very bitterly opposed to, and I was, too. We joined with the gentleman from Tennesee [Mr. COOPER] and fought as hard as we could to point out to the Congress that we were giving fabulous sums of money away to very large taxpayers. We continued the fight as long as we could, but it finally was passed in a modified form, but we each voted against it.

Bud Gearhart was very close to his mother. After she died he was very, very lonely, and he disliked to drive the long distance to California to see his friends. In my opinion, that was something that sort of disinterested him in Congress. He lost his mother and he lost several friends, and he was not as active as he used to be.

It has been pointed out here that he was a very friendly, kind individual. He would do everything he could to help you. In the committee on which he served, the Committee on Ways and Means, he would go into very great detail and explain the problems to us. Another thing that is very interesting is that he was elected in 1935 when very, very few Republicans were elected. It showed the strength that he gathered through his activities in the American Legion and also throughout California, especially down in his own district and city of Fresno.

I extend my deepest sympathy to his family survivors and to his many friends who were saddened by his passing.

Mr. SISK. I yield to the distinguished minority leader, the gentleman from Massachusetts [Mr. MARTIN].

Mr. MARTIN. Mr. Speaker, it was with deep regret that I learned of the death of Bud Gearhart. He was one of my very closest and dearest personal friends. From the very first day he entered Congress until he left to resume life in California, we were warm friends. I came to know the patriotism, the ability, and the zeal which Bud Gearhart put into his work. He was a firm believer in the West, its progress, and great future. He worked tirelessly for his beautiful California valley, the State of California and the rest of that great western country. As a veteran, he was very much interested in the welfare of the Legion and its membership. Mention has been made of the fact that he was in Paris with young Teddy Roosevelt, Han McNider, Piatt Andrew, Ham Fish and others when the idea of the American Legion was born. He was a great advocate of military preparedness and fought to keep this country a strong, sound, sane America. His great hero, if I may say it, was Hiram Johnson, whose progressive policies he followed throughout the years.

Mr. Speaker, Bud had a legion of friends and all heard with keen regret of his death. California, his district, and the Nation have lost a great citizen. A great American has ended a useful life and gone to the reward he richly deserves.

Mr. SISK. Mr. Speaker, I ask unanimous consent that all Members desiring to do so may extend their remarks in the RECORD at this point.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. HILLINGS. Mr. Speaker, I wish to join my colleagues in the House of Representatives who are today paying tribute to the late Bertrand W. Gearhart.

Although Bud Gearhart, as he was affectionately known throughout the State of California, had left Capitol Hill before I was elected, I had an opportunity to observe his public service. The years that he spent in the service of his country as a member of the armed services in World War I, as assistant district attorney and district attorney of Fresno County, Calif., as a member of the State athletic commission, as a member of the board of directors of the California Veterans Home, as a delegate to the California constitutional convention and the 14 years he served in this body, have set a standard to which all should aspire.

Mr. SCUDDER. Mr. Speaker, it was with deep sorrow that I heard of the passing of a close friend of long standing, the Honorable Bertrand W. "Bud" Gearhart.

I have known Bud Gearhart over a span of many years. During the course of our long friendship, I have admired his ability as a leader in the American Legion and as a member of the United States House of Representatives. As a Member of this body, as in every other position, he served with distinction.

He was an outstanding personality, respected for his ability, devotion to duty, and qualities of leadership. During his fruitful lifetime he acquired a wide circle of friends and I am, indeed, proud to have been included among those whose privilege it was to work with and associate with Bud Gearhart.

I shall always treasure his memory, and extend my sympathy to the members of his devoted family over their great loss.

Mr. ALLEN of California. Mr. Speaker, the first Member of Congress whom I met subsequent to my first election in November of 1946 was the Honorable Bertrand W. Gearhart. He wired me from his home in Fresno, Calif., to arrange a meeting in the San Francisco Bay area so that we might become acquainted. Bud was a member of the committee on committees. We got together in a San Francisco hotel, and I talked for the first time concerning the routine, practical affairs which govern

the daily lives of those of us who serve in this House.

When I came to Washington in January of 1947, it was to Bud to whom I went for advice and guidance—how do I get an office, where should we live in Washington, what committee I should seek to be on, and many other considerations which at the time seemed something of a mystery. He became a warm friend and a very valuable one.

Bud was an able, colorful, courageous, and humorous associate in this House. He was an able legislator, particularly in the field of legislation which came before his Committee on Ways and Means. He was a great Republican, but never a petty partisan. His signature to a letter was as inimitable as was Bud himself.

He always stood and always will stand high in my affection. I am sorry that we will no longer enjoy his company, even as infrequent as his visits became in recent years. He did a great service, and the Nation and his community lost a great citizen when he passed on.

Mr. SISK. Mr. Speaker, I yield to the gentleman from Minnesota [Mr. O'HARA].

Mr. O'HARA of Minnesota. Mr. Speaker, when my colleague from California announced the passing of my good friend, Bud Gearhart, I was indeed shocked and saddened. I had not heard of his illness. I had the pleasure and the richness of the experience of being associated with him and numbering Bud Gearhart while he was here among my very close friends. I had a very high regard for his ability. I know he came to Congress with an exceptionally fine reputation as a lawyer. Certainly his training and his ability as a lawyer was much in evidence in the work which he performed in the Congress. For all of the years that we served together he was on the Committee on Ways and Means until he retired from the Congress. I do not think there was a more conscientious or more able individual who served on that great committee than Bud Gearhart of California.

It is certainly with a feeling of deep sadness that I receive the announcement by our colleague today that my good friend has passed away.

Mr. SISK. I thank the gentleman for his remarks.

FOREIGN POLICY OF THE EISENHOWER ADMINISTRATION

Mr. DEROUNIAN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. DEROUNIAN. Mr. Speaker, I submit herewith for the information of my colleagues a joint statement issued by seven Members of the House of Representatives, on January 14, 1956, which is self-explanatory.

The people of the United States will be the best judge as to whether they want the Acheson policy of stutter and stammer of the Eisenhower-Dulles policy of firmness and strength.

JOINT STATEMENT BY REPRESENTATIVE STEVEN B. DEROUNIAN, OF NEW YORK; REPRESENTATIVE PATRICK J. HILLINGS, OF CALIFORNIA; REPRESENTATIVE JOSEPH F. HOLT, OF CALIFORNIA; REPRESENTATIVE JOSEPH P. O'HARA, OF MINNESOTA; REPRESENTATIVE HAROLD C. OSTERTAG, OF NEW YORK; REPRESENTATIVE JOHN J. RHODES, OF ARIZONA; REPRESENTATIVE JOHN M. ROBSION, JR., OF KENTUCKY

WASHINGTON, January 14.—The continuation of the present foreign policy of the Eisenhower administration is our Nation's best guaranty for maintaining peace.

Our visit last fall to the Soviet Union and other areas behind the Iron Curtain convinced us that our present policies of maintaining peace and encouraging the restoration of free government to captive nations is the best policy for this Nation to pursue.

The Soviet orbit thrives on weakness. It squirms in the face of courage and strength.

Secretary of State John Foster Dulles has rendered outstanding service to our country in the manner in which he has guided and directed this foreign policy which has brought peace to the world today. Americans are not afraid of the truth.

The recent politically inspired attacks on this policy indicate that these critics have failed to recognize that the old Truman-Acheson policy of appeasement and surrender to the Communists could lead us to war in the future as it has in the past. Our conversations with top Red officials and our on-the-scene observations in the Communist world, have convinced us that the primary thing the Communists understand is strength.

The President of the United States has a firm grasp of this fact. In his state of the Union message on January 5, 1956, he said:

"We know the Communist leaders have often practiced the tactics of retreat and zigzag. We know that Soviet and Chinese communism still poses a serious threat to the free world. And in the Middle East recent Soviet moves are hardly compatible with the reduction of international tension."

This we endorse with firmness.

A return to a policy of weakness in the face of Soviet threats would be inviting disaster.

During those dark years when our country followed the old policy of appeasement and retreat, we saw 600 million people fall into Communist slavery, a war broke out in Korea, and many American boys were killed or maimed. In addition, we found the Communists, drunk with power, were threatening at other points throughout the world. The Eisenhower-Dulles policy of boldness and strength has changed all this.

The Russian leaders today know that further aggression will not be tolerated. Because they know this, they will not take a chance on starting another war.

It is still the intention of the Communist leaders to rule the world and they will capitalize on any weakness the free world may show. That is why we must not only maintain a vigorous national-defense program, but also a diplomatic leadership with the courage to face the facts realistically and stand firm in the face of Red tyranny. To do otherwise would be to invite war.

We have seen at firsthand the respect of the Red leaders for the massive retaliatory power built up by this Nation through the military experience of President Eisenhower and the diplomatic genius of Secretary Dulles. Under their leadership peace has been brought to this Nation.

No one could seriously suggest that we scrap this new firmness and return to the vacillating uncertainty which plunged us from crisis to crisis in pre-Eisenhower days.

AGRICULTURAL LEGISLATION

The SPEAKER pro tempore (Mr. GRAY). Under previous order of the House, the gentleman from Colorado [Mr. HILL] is recognized for 60 minutes.

Mr. HILL. Mr. Speaker, I have asked for this time this afternoon to discuss agricultural legislation and to develop information as to how this legislation came into being.

Mr. Speaker, the farmers are in a price squeeze. There can be no question or argument about that. The continuance of many of our farmers in the line of their chosen profession, if you wish to call farming a profession, has been handicapped and hindered by economic conditions over which they have had no control whatsoever.

I might say, as an introductory remark, that the farmers or the producers of food and fiber in any country, not only the United States, but in any nation in the world, are in a peculiar position in that they cannot curtail their production according to the economic conditions that face them. It has been true throughout the history of the human race that the farmer has always had to plan his production long, long in advance of the sale of his product.

So I was quite concerned, Mr. Speaker, when I heard remarks on the floor of this House from my Democratic friends on my right, indicating that the Republican Party was responsible for the price squeeze now afflicting agriculture in these United States of ours. As a Republican, if that were true, I would be the first Member of this House to accept the consequences. But by no stretch of the imagination does the historical background square with the charge that the Republican Party is responsible for bringing on the farmers' price squeeze.

Personally I am amazed, and astonished, and surprised, to put it mildly, at the lack of knowledge displayed by these attackers. I know they should understand what they are saying.

Mr. Speaker, many of my colleagues have been so vocal and so critical at the beginning of this session of Congress on this agricultural difficulty that it seems to me they are trying their best to give a false impression, a misleading understanding of what the actual situation is. I am not so sure that some of these Democratic friends of mine are not more interested in using agriculture as a political block or a sounding board or a diving board, if you please, from which they plan a program to defeat candidates for office in 1956.

Let me quote from the RECORD of January 12, 1956:

I want this farm program referred to as a Republican farm program; yes, the Eisenhower farm program.

From the rest of this colleague's address I gather from reading between the lines that he is more interested in having the program fail than he is in helping the farmers, regardless of what he says. Are we forced to listen to such stuff and nonsense and not answer back?

Let me quote again from the RECORD of January 5, 1956:

Yesterday was black Wednesday for the farmers of America, for this was the day that Secretary of Agriculture Ezra Taft Benson took steps to deliver the future of the fortunes of the farmers of America to the whims

and the fates of the Republican Party. Now, Mr. Speaker, we all know that this so-called new program, conceived in secrecy and now being birthed in partisan politics, whatever form it takes, will be Mr. Benson's unwanted child.

Mr. Speaker, those are fighting words in our country, when you talk about an unwanted child. I suppose that part of it was in jest, for he continues:

In all seriousness, this will be a child of political expedience.

I have heard this statement on the floor—and this is even worse. I heard a Congressman say, but I notice he took it out of the RECORD, "You Republicans are buying the farm vote with the program suggested by the President."

Mr. Speaker, charges of such nature do not help the farmer, the consumer nor anyone else.

If you legislate for the Republican farmers you legislate for the Democrat farmers, as well as for his neighbor and for the entire community.

You are legislating for the State and the Nation. To hear remarks such as I have read gives you a feeling that someone is off base.

Now I want to talk about the basic agricultural act, and point out to you how these agricultural acts came into existence. I am accusing no one of writing any type or kind of agricultural legislation unless he believed it was to help the people of the United States, and that applies to Members on both sides of the aisle. But let us get the history straight.

In 1938 the basic agricultural legislation was passed in this House by an administration completely controlled by the Democrats. Not only was the House controlled by the Democrats and every committee controlled by the Democrats but every appointive office in my district and my State was under the control and domination of the Democrats.

Let us look at this basic agricultural act that was passed by this House. The basic agricultural act contains in it six crops. I should like to analyze those but time prohibits me from going into detail. There are some very peculiar and unusual things in the selection of these basic crops. Listen to them. The basic crops, as passed by the 1938 legislation, were cotton, corn, wheat—I should stop there and forget the rest of them, but I must not because there are six and the others are tobacco, peanuts, and rice. Leaving out—notice what was left out—livestock, dairy products, poultry, potatoes, and all perishable crops. I have never quite understood how in Heaven's name an Agriculture Act could provide that peanuts, rice, and tobacco are to be considered basic crops with no such consideration given to the most important agricultural product of all, livestock, or why such basic foods as milk, potatoes, and poultry were omitted. Now someone might say, "Oh, we could not do that." You certainly could. They did not want to do it and they did not do it. Of course, the Republican Party went along with that legislation, but the responsibility for writing the acts rests squarely on the shoulders of the Democratic Party. They were in charge of everything, and of every type and kind of official action in this House, and you could not even—yes; that is right—you could not even get a bill on the floor of the House without the consent of the leadership.

Mr. JONES of Missouri. Mr. Speaker, will the gentleman yield?

Mr. HILL. No; I will not yield, Mr. Speaker. I will not yield. I take very little time on the floor of this House. This is probably the second or third time I have ever asked for time going on 16 years of service in the House. So I served notice to Republicans and Democrats alike that I want to finish making my statement before I am asked to yield.

Mr. Speaker, here again let us look at the record. The Republican Party, and here we will surprise you as well as some of my Republican friends, the Republican Party has controlled both the executive and the legislative branches of our Government for only 2 years—2 years in the last 25 years. Gentlemen, by no stretch of anybody's imagination can you blame the Republican Party for any type or kind of legislation that you have had for the past 25 years. In fact, the Democrat Party must assume the responsibility for the present condition of the farmer since the Republican Party has controlled both the executive and legislative branches of our Government only 2 years out of the last 25. Actually from 1931 until the present time the Democrats have had control of Congress 84 percent of the time and in the face of this record my colleagues on the majority side are still trying to convince the farmer that the Republican Party is responsible for his present serious economic situation.

That cannot be done. And I am not going to take it lying down from any Democrat because we are not to blame. Back in 1931, the Democrats controlled the House under President Hoover and ever since then they have controlled either the executive or the legislative branch except for the 2 years beginning with 1953. Let us keep these facts in mind. In 1933 the House and Senate and the executive department came under the control of the Democratic Party. Let us return to the Agricultural Act of 1938.

It took 5 years after the Democrat Party had control of both the Administrative and the legislative branches of our Government before the basic Agricultural Act was passed in 1938. During that time the Democrat Party controlled every action of the House, every committee, and had all patronage. Still the records will show that hogs were selling for 5½ cents a pound and cattle for 7½ cents after 6 years of Democrat assistance to the farmer. The only solution they could offer was the killing of pigs and plowing up of corn and cotton until the war came along in 1941 and bailed the farmer out of his plight.

Mr. Speaker, that is a terrific statement to make. If it was important then to bellyache and find fault with an agricultural program, it certainly had some basis of fact. At the present time, Mr. Speaker, I ask you to consider the price of hogs and the price of cattle. Just remember that after 6 years—6 years of complete control the only thing they could do was to suggest knocking little pigs in the head and plowing up every third row of corn. This type of program is no solution to the farmer's problem.

I have always felt that any program set up for the farmer could not be cut off at one fell swoop. It takes time to go into these things. If we are going to control agriculture by legislation, we must take time to decontrol it.

Now I would like to discuss another crop, and I want to show how the program has been working. Of course it is always nice to receive information from an old maid about how to raise a family. So it is nice for me to talk about cotton, because all I know about it is what I have read. Let me say to the Democrats if there is any program that is in difficulty, it is the program for cotton.

Let me read from the World Agricultural Situation 1956, published by the USDA:

The world supply of cotton for 1955–56 estimated at 61.8 million bales, is 3.3 million bales higher than a year earlier. World production also constitutes a new record high and the world consumption is expected to be nearly equal to the 1954–55 record. However, world production during the past 4 years has exceeded world consumption by 10 million bales, with the result that the end-season stocks increased by that amount between 1951 and 1955. The increase in United States stocks amounted to 8.8 million bales, or 90 percent of the world increase.

More than 50 percent of the world's cotton stocks had accumulated in the United States by July 31, 1955, while most other countries, both exporters and importers, had reduced their stocks to minimums in anticipation of some action on the part of the United States Government to reduce the price of cotton for export. The prices of foreign growths of cotton declined sharply between 1954 and 1955, for the same reason and at the beginning of the 1955–56 season they were as much as 8 cents a pound below those for similar-quality United States cotton.

If I get my figures correctly you will find in this publication some striking information on cotton. This cotton legislation that we Republicans supported was supposed to assist our cotton growers. This legislation is actually putting American cotton growers out of business.

In the 1935–39 period the average of cotton acreage in the United States was 27,788,000 acres, and in 1955–56, you had reduced their acreage down to 16,882,000 acres.

Look at your production. In 1935–39 the bales of cotton produced in the United States, according to this record, was 13,149,000 bales. After the program had cut the acres almost 40 percent you produced in 1955–56, 14,663,000 bales, an increase of more than 1½ million bales after drastic acreage reduction.

That is a fine way to take care of the cotton growers.

Listen as I tell you what Mexico did for her cotton growers. In the period 1935–39 Mexico had 725,000 acres in cotton and produced 334,000 bales. In the 1955–56 crop year they had 2,685,000 acres in cotton and produced 2,050,000 bales. That is Mexico. You cannot control cotton production in Mexico. Neither can our cotton producers compete in the world market.

There is another program I want to talk about and that is potatoes. We passed a potato bill, legislation we thought would help the potato growers. I will tell you how it helped the potato growers: To this very day you cannot pass a piece of potato legislation through this House because of the fact that that legislation was a real farce and a delusion and destroyed the potato grower instead of helping him. When Mrs. Hill was having to buy potatoes at the rate of three pounds for a quarter in the Washington stores, just a few hundred miles outside the city they were pouring coal oil on potatoes and burning them or staining them with blue vitriol.

Some agriculture programs are working. In 1955 this House with practically no opposition passed a sugar act. It is over in the Senate at this time. There is an act which all through this whole period has been continued and has worked well because it is based on right premises. It was passed, of course, years ago with Democratic support and with the support of the Democratic leadership.

After the Korean war the 83d Congress came into power in the House and we went to work to try to remedy this over-production that had been brought about by the fact there was no way to control a farmer's production. Until that is done terrific surpluses are bound to build up. Today we have on hand in loans and purchase programs by the CCC some $8,400 million worth of farm surpluses. We have therefore a real Sword of Damocles hanging over the head of every farmer who produces those types of crops.

Some of you forget that when Republicans came into power the parity price of farm products had been on the decline for 18 months. If my figures are correct they had dropped from well over 100 percent down to perhaps 91 or 92 percent by January 1953. Immediately President Eisenhower asked for power to dispose of surpluses. Now we are back here today with identically the same request.

Three things should be emphasized and stressed, and this House as a unit should see that agricultural surpluses are disposed of in every manner whatsoever because you can have obsolutely no stabilization of agricultural prices as long as you have terrific surpluses.

We arranged it so that the Secretary of Agriculture could barter and trade these farm surpluses off for strategic minerals throughout the world. We placed very few roadblocks in his way. That is a program that should be doubled and trebled, and I hope the House makes up its mind to do just that. Of course, some money will have to be furnished to the Secretary to carry out the program. It does not do much good to order him to carry out a program, then throw up roadblocks by refusing to give him the necessary appropriation.

We also provided that the Secretary of Agriculture could trade these surpluses for foreign currency. That is a real good piece of legislation, a wonderful thing, in my opinion, regardless of the value of the currency involved. We can hold that currency and we can dispose of it to suit ourselves.

We also provided for the disposition of agricultural products to needy communities, to needy people, not only in the United States but throughout the entire world. There were few ifs and buts in that legislation, so the Secretary can go ahead and do that. I hope he does more of it in the future than he has in the past, because it is vitally necessary that we dispose of these surplus agricultural products.

Here is another thing that is important, and something that has been greatly neglected in the United States: We have had no outstanding, able agricultural salesmen in various parts of the world. We have tried to sell simply on price when little attention was paid to the quality of the goods we were trying to sell. A bill was passed to transfer all agriculture attachés from the State Department to the Agriculture Department. Why should an agricultural attaché of ours in a foreign country be under the jurisdiction of the State Department? In my opinion, if properly handled, we can tell the world what is the quality of our agricultural products and how cheaply they may be purchased. We set up provisions for the sale of our surplus dairy production. The record on that is excellent, and we have been reducing dairy surpluses.

We also increased the consumption of meat. I think it will be found that 1955 stands at the top so far as the consumption of beef is concerned, and also ranks high in the consumption of pork.

We also expanded the off-farm and on-farm grain-storage program. We made it easy for a farmer to store his grain nearer home. We also made it easy for the CCC to supply money to construct additional storage so that they could store this grain as near the production area as possible.

Mr. Speaker, I say that the 84th Congress has done little or nothing for agriculture, and I stand on that statement. That is the record. Notice I said "the Congress"—I did not say "the House." I hope you note the difference.

On April 27, 1955, President Eisenhower sent a message to the Congress. This message will be found in the RECORD. Among other things, he said:

An immediate start is extremely important on the following suggestions.

I may say to you, Mr. Speaker, before I read further, that my committee, as far as I know, has never even brought this message up in committee.

The President said:

No. 1: "We should authorize the FHA to make loans for part-time farmers."

We need that legislation now. What do we mean by "part-time farmers"? He said that means a farmer who must work on the side to keep up his payments on his small farm. No consideration was given this suggestion.

No. 2: Appropriate new money outside the regular budget for extensive research, soil conservation, farm loans, and related services.

Nothing was done.

No. 3: Provide special funds outside the present agricultural budget for a formula to conduct pilot programs to extend aid to the low-income farmer.

Those are important things and they should have been done long ago, and I say to you frankly we should be doing them, but we are not.

No. 4: Authorize $30 million for loans by the Farmers' Home Administration. That was knocked out by a point of order by a Democrat and never an extra dime given. Now, the FHA has done a wonderful job in my district. It has done a wonderful job in any district where it has really been organized properly. I was called to make a trip into western Texas when the 83d Congress was in session to look over that terrific drought area and the effect of those terrible wind storms, and we did set up a loan program. We did save the stock growers in that area as well as we did the stock growers in my area. I think the FHA really has more possibilities to help out the farmer who is in a price squeeze or in a tight financial situation than any other organization presently in existence.

Now, I would like to mention a few things that I think we ought to act on just as quickly as possible. I think one should be the easing of farm credit. We should say to our banks and friends in the financial world that young men who have gone into farming under these high prices should not be closed out. We should go further and say to those men who live in emergency areas, where it has been dry for 4 or 5 years, that we are going to go along with you and extend you credit if you wish to stay on the farm, because as we know full well, the worm will turn. We will have good crop years in that area. And I might say that we have here a program for the high plains area that will do that very job. That program was sent to the House just lately. It is a program involving 10 States. In those 10 States dwell 17 million people, and here we have a setup so that we can begin to work out a farm program, a permanent farm program.

For those farmers who live and want to live there and who have everything they have in the world invested in those farms and in the livestock, here is the program. I would like to mention 1 or 2 things about this program. It requires action to be taken by the Department to classify this land—one of the most important things we could possibly do—and see that the farmer who lives on the land, if he wishes to receive any support from his Federal Government, follows the classification of his soil. There is no reason in the world why a man should plow up land that will blow away at the first gust of wind. I am fearful of another cycle of terrific dust storms. It is so dry in three counties in my district that they have little water for their livestock. They have had no snow, practically no moisture since last fall. So, a windstorm

in that area would bring about a serious situation.

Another important section of the Great Plains program is its credit section handled by the Farmers' Home Administration.

The Farmers' Home Administration has developed and placed in operation in a great many counties a credit program designed especially for landowners and operators. In substance, its provisions are as follows:

(a) Loans for reseeding and the establishment of grasslands and other approved conservation and land use practices.

(b) Loans for soil and water erosion control measures.

(c) Loans for the improvement and development of domestic and irrigation water supplies, for the repair and improvement of existing farm buildings, and for the purchase of such additional land as may be necessary to enlarge a farm into a family-type size unit.

(d) Loans for the purchase of livestock, farm equipment, seed, fertilizer, feed for livestock, insecticides, farm supplies, and for farm equipment repairs, the payment of interest, insurance, and taxes, including the refinancing of existing debts, where necessary.

(e) Assistance to both creditors and debtors in effecting voluntary debt adjustments so that the debt load on the farmer or rancher will be held to a point within his ability to repay.

(f) Loans will be predicated on farming operations that are consistent with recommended land use and farm management practices for the area.

(g) Terms in all instances will be geared to the expected repayment ability of the borrower.

(h) Interest rate will be 3 percent on loans made under this new special loan program.

The other day I dropped a bill in the hopper to relieve the farmer from the payment of any Federal tax on gasoline. He should never have had to pay it in the first place. In the bill that I dropped in the hopper it is provided that he pays the tax, but gets credit to be applied on any Federal tax that he pays. This method will make it easy to administer.

Mr. Speaker, in closing let me urge this House to act with dispatch on the suggestions on agriculture made by the President of the United States. Today I dropped in the hopper a bill that will carry out the suggestions of our President. There can be no justification for delay in relieving the price squeeze which is now afflicting, plaguing our agriculture.

Certainly we should not allow partisan politics to interfere with or block any of this important legislation.

NATURAL GAS EXEMPTION

Mr. HESELTON. Mr. Speaker, yesterday I outlined the record before the House Committee on Interstate and Foreign Commerce, the Rules Committee, and here on the floor as to the bill to exempt natural gas from regulation by the Federal Power Commission.

I stated that it now seemed more than likely that the bill will go to conference and that, because of the probability that we will have another opportunity to pass judgment on it, I believed the matter was worthy of renewed consideration by all of us.

On July 19, 1955, I placed in the Appendix of the daily RECORD, page A5299, a statement that, according to the uncontradicted evidence before the House Committee on Interstate and Foreign Commerce, there were slightly over 211.1 trillion cubic feet of known recoverable reserves of natural gas in this country at the end of 1954 and that the best information I could secure at that time showed that 30 of the largest and most prosperous oil and gas companies controlled approximately 63 percent of these reserves.

I summarized the information I had as to these companies and their known gas reserves stated in trillion cubic feet as follows:

1.	Humble	18.0
2.	Phillips	17.9
3.	Texaco	10.5
4.	Standard of Indiana	9.9
5.	Socony-Vacuum	7.5
6.	Shell	7.0
7.	Cities Service	6.3
8.	El Paso Natural Gas Co	4.5
9.	Standard of California	4.0
10.	Gulf	4.0
11.	Continental	3.8
12.	Sun	3.8
13.	Pure Oil Co	3.7
14.	Panhandle Eastern	3.5
15.	Colorado Interstate	3.3
16.	Chicago Corp	2.5
17.	Skelly	2.4
18.	Atlantic	2.2
19.	Ohio Oil	2.1
20.	Republic Natural	2.1
21.	Cities Service Gas Co	2.0
22.	Tidewater Association	1.8
23.	Sinclair	1.7
24.	Union Oil	1.6
25.	Superior	1.5
26.	Sunray	1.5
27.	Natural Gas Pipeline	1.5
28.	Southern Production	1.3
29.	Pan American Petroleum and Transportation	1.3
30.	Arkansas-Louisiana	1.1

Of itself, this decisive control of so much of the Nation's natural gas reserves might mean little to the average person.

But considered in the light of other important factors, which I intend to discuss soon, it is most significant.

These 30 giants are among the most vocal and insistent of those who demand that the Phillips case of the Supreme Court of the United States must be overruled and that they must be freed from any Federal regulation.

Why?

No one disputes the fact that no State has the constitutional power to regulate the wholesale rates of natural gas moving in interstate commerce.

Therefore, if the Phillips case can be overruled by this bill, there cannot be and there will not be any effective regulation at the in-put end by any governmental body.

If this bill becomes law, the interests of over 25 million gas consumers will be exclusively in the hands of those who own and control the reserves and can dictate prices without regard to anything but their own interests.

Is it not crystal clear why such a powerful group is determined to free itself from the possibility of any effective regulation by the Federal Power Commission?

They protest piously in their extensive advertising and their expensive propaganda that they have no desire or intention of raising their prices. I shall shortly discuss the record as to that even at this time while the Phillips case is still law.

Confining myself to the significance of this dominant control of natural gas reserves and of the inevitable pressures to increase their value, what are the facts?

As a matter of simple arithmetic, an increase of 1 cent in the value of the Nation's reserves would mean a write-up of over $2 billion. Every additional increase of 1 cent would add another writeup of at least $2 billion.

How would that value be realized?

Of necessity, it could only be through increasing the bills of the ultimate consumers.

Let us take the individual cases of those who own the 10 largest amounts of reserves. The additional value of every cent of increase to them would be as follows:

1.	Humble	$180,000,000
2.	Phillips	179,000,000
3.	Texaco	105,000,000
4.	Standard of Indiana	99,000,000
5.	Socony-Vacuum	75,000,000
6.	Shell	70,000,000
7.	Cities Service	63,000,000
8.	El Paso Natural Gas Co	45,000,000
9.	Standard of California	40,000,000
10.	Gulf	40,000,000

So the 10 largest of these gas and oil companies have at stake an irreducible minimum of $896 million, if they can increase the value of their reserves by only 1 cent. The obvious temptation in an additional increase in value of nearly a billion dollars for each additional cent is quite understandable. But how it can be explained in terms of the interests of over 25 million natural gas consumers or in terms of the public interest remains to be demonstrated.

That is but one side of the coin. The other is the means by which this added increase in values could be taken from the ultimate consumers.

The last rate of use I have been able to secure is that of 1953. I expect to have the 1954 rate soon and I shall submit it when I receive it.

On the basis of the 1953 rate of use, an increase of 1 cent per thousand cubic feet to the consumers would amount to $53,766,700 each year; an increase of a nickel would amount to $107,533,000 annually; and an increase of a dime would amount to $537,699,000 annually.

This explains the seemingly plausible argument that enacting this bill into law would amount to a few dimes, or a few quarters, or at most a few dollars yearly to the average consumer. What the proponents hope will be overlooked is

that there are now over 25 million of these consumers with millions more looking for natural gas.

But no one can possibly overlook the gold mine the holders of these reserves see and are driving for through the repeal of the Supreme Court decision.

PAUL LEACH

Mr. ARENDS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ARENDS. Mr. Speaker, I rise to pay tribute and express affectionate well wishes to Paul Leach, who has just retired as the Washington bureau chief of the Chicago Daily News.

He has been a newspaperman for 45 years. Always he reported the news objectively. Never has he violated a confidence. Always he was true to the great traditions of our American free press—ferret out the facts and report the facts, without fear and without favor.

I know I speak for the entire Illinois Republican delegation in Congress when I say that Paul Leach is not only one of the best newspapermen we have known, he is one of the finest men of character we have been privileged to know.

As he enters upon his well deserved retirement, he takes with him our fond regards for himself and his charming wife, and our very best wishes for the years ahead.

LEAVES OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. SAYLOR (at the request of Mr. BOW), for January 18 and 19, 1956, on account of personal business.

Mr. CEDERBERG (at the request of Mr. BENTLEY), for the balance of the week, on account of illness in family.

Mr. MATTHEWS (at the request of Mr. BENNETT), for today and the balance of this week, on account of illness in family.

Mr. WALTER, from January 18 until February 11, 1956, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House following the legislative program and any special orders heretofore entered, was granted to:

Mr. HESELTON, for 15 minutes today.

Mr. CURTIS of Missouri, for 15 minutes tomorrow.

Mrs. ROGERS of Massachusetts, for 5 minutes today.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. LANE and to include extraneous matter.

Mr. MCGREGOR.

Mr. WIGGLESWORTH and to include extraneous matter.

Mr. SMITH of Wisconsin and to include extraneous matter.

Mr. AYRES.

Mr. CURTIS of Missouri and to include an article.

Mr. MULTER (at the request of Mr. MCCORMACK) and to include extraneous matter.

Mr. REES of Kansas and to include a report from the Postmaster General.

Mr. KIRWAN (at the request of Mr. BOLLING) and to include extraneous matter.

SENATE BILLS AND CONCURRENT RESOLUTIONS REFERRED

Bills and concurrent resolutions of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 31. An act for the relief of Shih Ming Wang; to the Committee on the Judiciary.

S. 83. An act for the relief of Ottilie Hitzlberger Lachelt; to the Committee on the Judiciary.

S. 133. An act for the relief of Mrs. Maria Michela Federico; to the Committee on the Judiciary.

S. 267. An act for the relief of Ellen Kjosnes and Unni Kjosnes; to the Committee on the Judiciary.

S. 277. An act for the relief of Jean Pfeifer; to the Committee on the Judiciary.

S. 318. An act for the relief of Chih Shing Hwa; to the Committee on the Judiciary.

S. 419. An act for the relief of Eli E. Hood; to the Committee on the Judiciary.

S. 499. An act for the relief of Giuseppe Airo-Farulla and Joseph Antoine Airo-Farulla; to the Committee on the Judiciary.

S. 508. An act for the relief of Victoriana Areitieo Berincua; to the Committee on the Judiciary.

S. 551. An act for the relief of Anthony Agustino Scrivanich; to the Committee on the Judiciary.

S. 897. An act for the relief of Erich Anton Helfert; to the Committee on the Judiciary.

S. 993. An act for the relief of Eugene Alexander Figueiredo; to the Committee on the Judiciary.

S. 1009. An act for the relief of Kathleen Schrater; to the Committee on the Judiciary.

S. 1034. An act for the relief of Mr. and Mrs. Donald D. Parrish; to the Committee on the Judiciary.

S. 1037. An act for the relief of Chung Herp Youn; to the Committee on the Judiciary.

S. 1055. An act for the relief of Domenico Leonardi and his wife, Clara Corradi Leonardi; to the Committee on the Judiciary.

S. 1062. An act for the relief of Renato Noe and Angiola Maria Anna Noe; to the Committee on the Judiciary.

S. 1067. An act for the relief of Tibor Horvath; to the Committee on the Judiciary.

S. 1182. An act for the relief of Haim Cohen (Haim Braun); to the Committee on the Judiciary.

S. 1183. An act for the relief of Dr. Rose Hu Chen; to the Committee on the Judiciary.

S. 1193. An act for the relief of Moosa Ebrahimian; to the Committee on the Judiciary.

S. 1375. An act for the relief of Pingfong Ngo Chung and Pearl Wah Chung; to the Committee on the Judiciary.

S. 1616. An act for the relief of Sumiko Ariumi Bilson; to the Committee on the Judiciary.

S. 1629. An act for the relief of Peter B. Vardy and his wife, Lillian M. Vardy; to the Committee on the Judiciary.

S. 1651. An act for the relief of Felisa Ho (nee Chang-Kuon); to the Committee on the Judiciary.

S. 1672. An act for the relief of Bruno Romeo; to the Committee on the Judiciary.

S. 1686. An act for the relief of Mohammed Akbar Ashraf; to the Committee on the Judiciary.

S. 1793. An act for the relief of Balbino Acusin Ariasa; to the Committee on the Judiciary.

S. 1827. An act for the relief of Adel Kamal; to the Committee on the Judiciary.

S. 2020. An act for the relief of Carmen Aguado; to the Committee on the Judiciary.

S. Con. Res. 60. Concurrent resolution authorizing the printing of additional copies of the hearings in automation and technological change for use of the Joint Committee on the Economic Report; to the Committee on House Administration.

S. Con. Res. 61. Concurrent resolution authorizing the printing of additional copies of the joint committee print entitled, "Federal Tax Policy for Economic Growth and Stability," for the use of the Joint Committee on the Economic Report; to the Committee on House Administration.

S. Con. Res. 62. Concurrent resolution to print as a document a pamphlet entitled "A Handbook for Americans"; to the Committee on House Administration.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enroll bills of the Senate of the following titles:

S. 1166. An act to amend section 6 of the act of August 30, 1890, as amended, and section 2 of the act of February 2, 1903, as amended; and

S. 2170. An act to permit sale of Commodity Credit Corporation stocks of basic and storable nonbasic agricultural commodities without restriction where similar commodities are exported in raw or processed form.

BILLS PRESENTED TO THE PRESIDENT

Mr. BURLESON, from the Committee on House Administration, reported that that committee did on Monday, January 16, 1956, present to the President, for his approval, a bill of the House of the following title:

H. R. 5614. An act to amend the Communications Act of 1934 in regard to protests of grants of instruments of authorization without hearing.

ADJOURNMENT

Mr. HALEY. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 1 o'clock and 50 minutes p. m.) the House adjourned until tomorrow, Wednesday, January 18, 1956, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1383. A communication from the President of the United States transmitting the report by the Presidential Advisory Committee on Water Resources Policy (H. Doc. No. 315); to the Committee on Public Works and ordered to be printed.

1384. A letter from the Secretary of Defense, transmitting a report covering the

professional and scientific positions established in the Department of Defense covering the calendar year ending December 31, 1955, pursuant to Public Law 313, 80th Congress, as amended by Public Law 758, 80th Congress; to the Committee on Armed Services.

1385. A letter from the Administrator, Veterans' Administration, transmitting a draft of proposed legislation entitled "A bill to increase the maximum amount payable by the Veterans' Administration for mailing or shipping charges of personal property left by any deceased veteran on Veterans' Administration property"; to the Committee on Veterans' Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. CELLER: Committee on the Judiciary. S. Con. Res. 59. Concurrent resolution requesting the President to issue a proclamation designating the week of January 29, 1956, through February 4, 1956, as National Junior Achievement Week; without amendment (Rept. No. 1647). Referred to the House Calendar.

Mr. WALTER: Committee on Un-American Activities. Annual report for the year 1955 of the Committee on Un-American Activities, pursuant to House Resolution 5 (84th Cong.); (Rept. No. 1648). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ADDONIZIO:

H. R. 8531. A bill to amend and revise the laws relating to immigration, naturalization, nationality, and citizenship, and for other purposes; to the Committee on the Judiciary.

By Mr. BASS of New Hampshire:

H. R. 8532. A bill to assist areas to develop and maintain stable and diversified economies by a program of financial and technical assistance and otherwise, and for other purposes; to the Committee on Banking and Currency.

H. R. 8533. A bill to provide for an experimental national flood indemnity and reinsurance program and for other purposes; to the Committee on Banking and Currency.

By Mr. CURTIS of Massachusetts:

H. R. 8534. A bill to authorize the extension of patents covering inventions whose practice was prevented or curtailed during certain emergency periods by service of the patent owner in the Armed Forces, or whose owners granted royalty-free licenses in aid of war or national defense efforts; to the Committee on the Judiciary.

By Mr. ENGLE (by request):

H. R. 8535. A bill to amend the act of July 4, 1955, relating to the construction of irrigation distribution systems; to the Committee on Interior and Insular Affairs.

By Mrs. FARRINGTON:

H. R. 8536. A bill to establish a national policy with respect to commercial fisheries; to establish the Office of Assistant Secretary of Commerce for Commercial Fisheries, and define his functions, powers, and responsibilities; to strengthen the commercial fisheries segment of the national economy, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. FASCELL:

H. R. 8537. A bill to provide for adjusted payment for accrued leave upon final separation of re-employed civil service retirement annuitants; to the Committee on Post Office and Civil Service.

By Mr. FINO:

H. R. 8538. A bill to increase from $600 to $700 the personal income tax exemptions of a taxpayer (including the exemption for a spouse, the exemption for a dependent, and the additional exemption for old age or blindness); to the Committee on Ways and Means.

By Mr. FORD:

H. R. 8539. A bill authorizing an increase in the funds available for increasing the consumption of fluid milk in certain schools; to the Committee on Agriculture.

By Mrs. GRIFFITHS:

H. R. 8540. A bill to require the use of humane methods in the slaughter of livestock and poultry in interstate or foreign commerce, and for other purposes; to the Committee on Agriculture.

By Mr. HALE:

H. R. 8541. A bill to provide for Federal disaster insurance and reinsurance; to the Committee on Banking and Currency.

H. R. 8542. A bill to provide for the issuance of a special postage stamp in honor of Rear Adm. Robert Edwin Peary; to the Committee on Post Office and Civil Service.

By Mr. HOPE:

H. R. 8543. A bill to provide for the protection and conservation of national soil, water, and forest resources and to provide an adequate, balanced, and orderly flow of agricultural commodities in interstate and foreign commerce, and for other purposes; to the Committee on Agriculture.

By Mr. HILL:

H. R. 8544. A bill to provide for the protection and conservation of national soil, water, and forest resources and to provide an adequate, balanced, and orderly flow of agricultural commodities in interstate and foreign commerce, and for other purposes; to the Committee on Agriculture.

By Mr. JONES of Alabama:

H. R. 8545. A bill to amend paragraph 207 and schedule 16 of the Tariff Act of 1930; to the Committee on Ways and Means.

By Mr. KEATING:

H. R. 8546. A bill to amend title 18, United States Code, so as to prohibit intrusion upon the privacy of Federal juries; to the Committee on the Judiciary.

By Mr. KILBURN:

H. R. 8547. A bill to revive and reenact the act entitled "An act authorizing the Ogdensburg Bridge Authority, its successors and assigns, to construct, maintain, and operate a bridge across the St. Lawrence River at or near the city of Ogdensburg, N. Y."; to the Committee on Foreign Affairs.

By Mr. McDOWELL:

H. R. 8548. A bill to readjust postal classification on educational and cultural materials; to the Committee on Post Office and Civil Service.

By Mr. McGREGOR:

H. R. 8549. A bill to prohibit the use of real property owned by the United States for the production of agricultural commodities which are to be disposed of by sale; to the Committee on Agriculture.

By Mr. MATTHEWS:

H. R. 8550. A bill to amend the Internal Revenue Code of 1954 to relieve farmers from the excise tax on gasoline and lubricating oils used exclusively in farm tractors or farm machinery or for other agricultural purposes; to the Committee on Ways and Means.

By Mr. POFF:

H. R. 8551. A bill to provide that certain retired enlisted men shall be advanced on the retired list to the pay grade in which they served during World War II; to the Committee on Armed Services.

By Mr. ROBESON of Virginia:

H. R. 8552. A bill to authorize the Secretary of the Navy to grant to the town of Chincoteague, Va., permanent easements on certain lands for the purpose of taking subterranean water; to the Committee on Armed Services.

By Mr. ROOSEVELT:

H. R. 8553. A bill to amend the Fair Labor Standards Act of 1938, as amended, to provide greater coverage for employees of food industries whose activities affect interstate commerce, and for other purposes; to the Committee on Education and Labor.

By Mr. SILER:

H. R. 8554. A bill to provide an increase of 10 percent in all rates of pension and compensation payable under laws administered by the Veterans' Administration; to the Committee on Veterans' Affairs.

By Mr. SPENCE (by request):

H. R. 8555. A bill to assist areas to develop and maintain stable and diversified economies by a program of financial and technical assistance and otherwise, and for other purposes; to the Committee on Banking and Currency.

By Mr. THOMPSON of New Jersey:

H. R. 8556. A bill to authorize a 5-year program for expansion of medical education and research; to the Committee on Interstate and Foreign Commerce.

H. R. 8557. A bill to provide for full public reports from certain tax-exempt foundations; to the Committee on Ways and Means.

By Mr. TRIMBLE:

H. R. 8558. A bill to provide for the establishment of the Pea Ridge Battlefield National Park, in the State of Arkansas; to the Committee on Interior and Insular Affairs.

By Mr. YOUNG:

H. R. 8559. A bill to require that hunting and fishing on military reservations, when permitted, shall be in full compliance with the game and fish laws of the State or Territory wherein such military reservations are located; to the Committee on Merchant Marine and Fisheries.

H. R. 8560. A bill to recognize and confirm the authority of arid and semiarid States relating to the control, appropriation, use, or distribution of water within their geographic boundaries, and for other purposes; to the Committee on Interior and Insular Affairs.

H. R. 8561. A bill to amend the Small Business Act of 1953, as amended; to the Committee on Banking and Currency.

By Mr. UDALL:

H. J. Res. 476. Joint resolution directing the Secretary of the Interior to conduct a study and investigation of Indian education in the United States; to the Committee on Interior and Insular Affairs.

By Mr. METCALF:

H. Con. Res. 203. Concurrent resolution requesting the Secretary of the Interior to refrain from granting further geological and geophysical prospecting permits; to the Committee on Interior and Insular Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolution were introduced and severally referred as follows:

By Mr. BAKER:

H. R. 8562. A bill for the relief of Jiryis S. Harb; to the Committee on the Judiciary.

By Mr. BARRETT:

H. R. 8563. A bill for the relief of Elfriede Unterholzer Sharble; to the Committee on the Judiciary.

H. R. 8564. A bill for the relief of Mrs. Hildegard Martin; to the Committee on the Judiciary.

By Mr. CHUDOFF:

H. R. 8565. A bill for the relief of Leslie Sharon Jacobs; to the Committee on the Judiciary.

By Mr. COUDERT:
H. R. 8566. A bill for the relief of Rebecca Levy Berger; to the Committee on the Judiciary.

By Mr. EDMONDSON:
H. R. 8567. A bill for the relief of Elaine Shartouni Koury and Elie S. Shartouni Koury; to the Committee on the Judiciary.

By Mr. GRANAHAN:
H. R. 8568. A bill for the relief of Carlito Ladores; to the Committee on the Judiciary.
H. R. 8569. A bill for the relief of Erika Gorenstein; to the Committee on the Judiciary.

By Mr. HILLINGS:
H. R. 8570. A bill for the relief of Joseph L. Searcy; to the Committee on the Judiciary.

By Mrs. KELLY of New York:
H. R. 8571. A bill for the relief of Gian Giacomo Vuxani; to the Committee on the Judiciary.

By Mr. MINSHALL:
H. R. 8572. A bill for the relief of Edward F. O'Hare; to the Committee on the Judiciary.

By Mr. PATMAN:
H. R. 8573. A bill for the relief of James M. Ripley; to the Committee on the Judiciary.

By Mr. THOMPSON of New Jersey:
H. R. 8574. A bill for the relief of Mrs. Aurora Costa Harty; to the Committee on the Judiciary.

By Mr. WALTER:
H. R. 8575. A bill for the relief of Antonio Bruno Coletta; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

438. By Mr. GROSS: Petition of 31 residents of Iowa Falls, Iowa, urging passage of legislation to prohibit the transportation of alcoholic beverage advertising in interstate commerce and its broadcasting over the air; to the Committee on Interstate and Foreign Commerce.

439. By Mr. LECOMPTE: Petition of citizens of Centerville, Iowa, urging the adoption of legislation to prohibit the transportation of alcoholic beverage advertising in interstate commerce; to the Committee on Interstate and Foreign Commerce.

EXTENSIONS OF REMARKS

Dean Sayre Is Critical of UNESCO

EXTENSION OF REMARKS
OF
HON. THOMAS B. CURTIS
OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES
Tuesday, January 17, 1956

Mr. CURTIS of Missouri. Mr. Speaker, I am placing in the CONGRESSIONAL RECORD a news item from the January 16, 1956, Washington Post, headlined, "Dean Sayre Is Critical of UNESCO: Churchman Sees Missionaries Doing More Effective Job Winning Friends."

The article does not go into much detail of the dean's speech. I am anxious to read all that he said because it is about time that the church leaders of this country brought their lights out from under the bushels which have been hiding them. For 6 years I have been saying in one public speech after another that UNESCO and point 4, desirable and helpful as they were, were nothing new to Americans and other enlightened societies of the world. They were merely Government programs attempting to do what our great missions had been doing for many decades, indeed for over centuries. Indeed, I resented the propagandizing that went along with these programs which overshadowed the great missionary work in the very same fields, medical missions, educational missions, sanitary missions, missions to teach economic skills, and so forth.

I pointed out that here, as in the field of economic endeavor, political government was moving in to take over private enterprise—for, indeed, in this regard our missions are private enterprise, just as our community chests are private enterprise as contrasted to Government endeavor.

I pointed out that just as in the fields of economic endeavor political government did not lend itself well by its very structure to performing these functions, so in the field of missionary work, political government was not well suited to perform these functions.

The reasons were quite clear to me. If political governments tried to do the job they perforce had to deal with and through the political government which existed in the society they were trying to help. In all too many instances the political government was on the backs of the peoples in the society and many of their basic troubles lay with that government. Yet by channeling economic, educational, medical, or any of these aids through the political government, to a large extent this assisted in keeping that particular political government on the backs of the people. Indeed, the Comintern made much of this argument. It pointed out to the peoples we were trying to assist through these programs that we were keeping a particular political government on their backs and maintaining the status quo. The missionary programs on the other hand were essentially person to person rather than government to person or government to government relationships.

Second, the missionary programs which were most effective were those where the persons engaged in the work were living with the people they were trying to help. To subject oneself to the living conditions of a backward people requires an attitude of humility and dedication to service which is most often found in our great religious institutions. The persons employed by political government, on the other hand, are motivated more by the wages they will receive and the conditions under which they will live, the promotions they may expect, and so forth. And this is not meant to be critical of them, because government service in relation to employment in private enterprise requires a certain amount of dedication. However, security plays a great role in choosing government service as a career. The result has been, as might be expected, those who have been administering the UNESCO and point 4 programs do not usually live with the people whom they are trying to help. I want to point out there are many splendid exceptions to this generality, but these exceptions would work well under a missionary program—missionary programs are not all attached to churches, some educational missions have been set up by educational institutions, many health missions by private individuals. Furthermore, the Government programs conducted by these people are almost without exception the least costly and the most effective programs toward gaining real friends abroad.

I will never forget the time I inadvertently came across an item in the foreign-aid budget for 100 air conditioning units to be sent to a spot in India. Certainly it was hot in that section of India but I wondered just how these point 4 persons were going to work with the people of India in air-conditioned offices. No; they were not for hospitals.

In 1954 I successfully sponsored an amendment to our tax code which gave an additional 10 percent deduction for donations to medical, educational, and religious institutions. I did not have in mind our domestic institutions, although I was happy to know they would benefit also. I had in mind a little discussion I had with a Congregational minister after I had spoken before a symposium held at his church along the lines of this present talk. He said to me: "This is all well, but the problem is so vast that some source like the Federal Treasury is necessary in order to meet the need." Well, it is true that the problem is great but I do not think money will solve it. Money will help if channeled into the proper places. This tax credit, as far as I am concerned, was to help a little in getting money channeled into our private missions so we could get friends abroad.

Essentially the problems of our would-be friends abroad will never be solved until they take from the limited success experienced in our society the things that have produced this success, and eschew the things that in our society still block our advancement to greater success. These things can neither be sold nor given away. They can be taken freely, however. It is merely a philosophy of life * * * the golden rule applied to modern economics with proper attention paid to the parable of the three servants. If only our missionaries and Government servants engaged in work abroad knew just a little more about the economics of the American society they would be less intent on selling socialism abroad in the belief that because of its professed love of the people it did love them. Which son did the will of his father—the one who said: "I go, sir," and went not—or the one who

said: "I will not" but went? Do men gather grapes of thorns, or figs of thistles?

The article follows:

DEAN SAYRE IS CRITICAL OF UNESCO—CHURCHMAN SEES MISSIONARIES DOING MORE EFFECTIVE JOB WINNING FRIENDS

(By Kenneth Dole)

The Very Reverend Francis B. Sayre, Jr., dean of the Washington Cathedral, declared yesterday that UNESCO was inferior to church missionary work in promoting world friendship.

Relating how he once attended a conference of the United Nations organization, he said he came away with a "poignant" sense of futility.

"All those ambassadors of culture, those emissaries of art and learning and national handicraft * * * were ablaze for the cause of mutual understanding and peace," he said, " * * * yet the drawstring that could draw all together was lacking, and all I heard at the last was aimless talk."

A generation ago many of those at the conference would have been missionaries, he said, "but now religion is a word that is strictly taboo at their meetings."

In the second of 2 sermons on church missions, Dean Sayre told how Episcopalians could, through the Overseas Mission Society, promote the spread of the Christian religion, which, he said, "has done a far more effective job of winning the friendship of others in the world than any secular institution."

The dean used his text, "I Will Go," to point up the sacrifice of the 5 missionaries who were killed in Ecuador last week by Indians. One of them, the Reverend Nathaniel Saint, was the son, he said, of Lawrence Saint, the stained-glass artist who made the Cathedral's rose window.

"All honor," said the dean, "to those 5 young men, on whose lips the Word was strangled; for in their deaths they bore a nobler witness, not so much to God's last judgment, as to His forgiving love."

To Prohibit the Leasing of Government-Owned or Controlled Land for the Purpose of Farm Commodity Production To Be Disposed of by Sale

EXTENSION OF REMARKS

OF

HON. J. HARRY McGREGOR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 17, 1956

Mr. McGREGOR. Mr. Speaker, I have today introduced a bill which will prohibit the use of real property, owned by the United States, for the production of agricultural commodities which are in surplus and are to be disposed of by sale. I believe that if this bill were enacted, it would be of great help in reducing our enormous surpluses of agricultural commodities. These Federal lands, purchased and owned by the Government, such as, abandoned military posts and reservations, flood-control projects, and so forth, are usually leased at a very nominal sum to individual farmers who then produce on these lands the very crops that are adding to our already great surplus of commodities.

This land could be retired to grass and other soil conserving legumes and then in the event of a future emergency could be put into high crop production. The bill provides that no officer or agency of the United States shall use, or permit the use, of any real property owned or controlled by the United States for the production of agricultural commodities which are to be disposed of by sale. May I further emphasize that this would help reduce our present surpluses and at the same time provide a valuable land bank for the future.

Dulles Deals From Strength

EXTENSION OF REMARKS

OF

HON. PAUL B. DAGUE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 17, 1956

Mr. DAGUE. Mr. Speaker, it must be a source of great satisfaction to every American who believes in firmness in dealing on the international scene to learn from a recent magazine article the steps taken by Secretary of State Dulles, with the full approval of President Eisenhower, which have resulted in a termination of hostilities or an avoidance of new hostilities in three specific instances.

In short, what Secretary Dulles has reinserted into our diplomatic policy is that which was first proclaimed by Theodore Roosevelt; namely, "speak softly, and carry a big stick."

In the case of Korea, the Reds were unquestionably impressed with the word relayed to them by Nehru that unless they negotiated with sincerity and stopped their senseless shenanigans, we would without hesitation use the atom bomb on their Manchurian installations. In any event, an armistice was agreed upon and the killing was stopped. Score one for Dulles.

In the second instance we encountered the not unusual experience of having the British run out on us at the last minute in the matter of Indochina, and we found them dealing offside with the Reds while we were staging a show of force in the South China Sea. Despite their about-face, however, England and France were able to bargain with the Reds from Dulles' show of strength and an agreement of sorts was reached, not perfect certainly, but avoiding another explosion in southeast Asia and at least rescuing from Red domination a part of Indochina. Score two for Dulles.

The situation in the Formosan Straits is more clear-cut than that in the case of either Korea or Indochina for the simple reason that the position taken by Secretary Dulles and President Eisenhower had the full backing of the Congress as expressed in the resolution—drafted by Dulles—and passed by an overwhelming vote in both Houses. And corollary to the defense of Formosa and the complete freedom of the Formosa Straits was the President's evident determination to defend Quemoy and the Matsus. Score three for Dulles.

As Dulles himself points out, in any program of retaliation there must always be a calculated risk. In his words, "You have to take chances for peace, just as you must take chances in war. Of course we were brought to the verge of war. The ability to get to the verge without getting into war is the necessary art. If you cannot master it, you inevitably get into war. If you try to run away from it, if you are scared to go to the brink, you are lost. We've had to look it square in the face—on the question of enlarging the Korean War, on the question of getting into the Indochina war, on the question of Formosa. We walked to the brink and we looked it in the face. We took strong action."

The test of any nation's foreign policy is the avoidance of war—the ability to walk to the brink—to skirt the edge of the abyss—without plunging in. Three times we have walked to the brink and, walking from strength and with firm resolution, we have avoided war.

The bankruptcy of a nation's foreign policy occurs when it goes to war. Three times within my generation we have seen such collapse; in 1917, in 1941, and again in 1950. In each instance we were not prepared to fight and advertised the fact in advance. Three times we paid for indecisiveness and vacillation in the blood of our citizens.

Thank God, that era of doubletalk is past. From here on we shall continue to walk softly and without a chip on our shoulder. But withal we shall continue to step forward firmly and resolutely. From here on our policies will be formulated in Washington and not in London and Paris. And we shall continue to prayerfully and gratefully acknowledge the leadership we have in President Eisenhower and his Secretary of State, John Foster Dulles.

Llewellyn J. Scott

EXTENSION OF REMARKS

OF

HON. WILLIAM H. AYRES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 17, 1956

Mr. AYRES. Mr. Speaker, Mr. Llewellyn J. Scott is the founder and director of Blessed Martin de Porres Hospice. The average person, after hearing that, might be inclined to say, "so what?" But to the unfortunate man who finds himself without a friend, Mr. Scott and the Blessed Martin de Porres means comfort.

Who is Llewellyn J. Scott? On October 5, 1955, this humble man appeared on the TV program This Is Your Life. Those of you who saw it were impressed with this man, small in stature, dark of skin, slow in speech, strong in his faith in God, and devoted to the belief that there is some good in every human being. You would have been thrilled to share my experience last evening.

I met Mr. Scott, visited with the unfortunate, attended the inspirational service and saw the gleam in Mr. Scott's eye when he said:

If only people will have faith in God. I tell all those who come to me for help: "trust in Him—I can give you only temporary shelter and food."

On entering the Blessed Martin Hospice I was tempted to turn back—15 wretched humans on the stair steps—10 more in the hall—the smell of alcoholic breath—damp clothes. Why were they there? It was time for church. The pastor was present and soon said the rosary. Although I was raised a Methodist, the service was an inspiration to me.

It would be helpful for every member of Congress to visit the Blessed Martin de Porres Hospice, meet Mr. Scott and see first hand the work he is doing for those who find themselves in difficulty. Incidentally, it is only a few minutes walk from the Capitol—38 I Street NE.

Mr. Scott is grateful beyond words to those of you who have helped with the work he directs. He has wanted to thank you personally for the assistance many persons gave him after his TV appearance. You would all have heard from him if he had had a secretary—but there are only two in this work—God and Mr. Llewellyn J. Scott—Mr. Scott thanks you and God will bless you.

Anniversary of Ukrainian Independence

EXTENSION OF REMARKS

OF

HON. MICHAEL J. KIRWAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 17, 1956

Mr. KIRWAN. Mr. Speaker, January 22 marks the 38th anniversary of the proclamation of Ukrainian independence. The centuries-old struggle for freedom and independence on the part of the Ukrainian nation constitutes an impressive chapter in the annals of human history. This indomitable will for national freedom clearly crystallized itself in the old Ukrainian Kievan state from the ninth to the fourteenth century; in the Ukrainian Kozak state from 1648 to 1783 and more recently in the Ukrainian national Republic from 1917 to 1920.

As one of the first victims of Soviet imperialism, Ukraine, since the very inception of alien Bolshevik tyranny, has proved to be the Achilles heel of the Soviet Union.

The destruction of its national churches, the horrible manmade famine of 1932–33, the mass murder at Vinnitsia in 1937–39, and the vast purges and deportations decreed by Moscow have failed to exterminate the spiritual and moral resources for national freedom in Ukraine. The historic capital of Kiev, with centuries of rich tradition and culture conserved in its vaults, still symbolizes today the indestructible hope and passion of a nation destined to be sovereign, free, and independent.

During the Second World War millions of Ukrainian patriots seized the short-lived opportunity of the German invasion to realize once again this hope, only to be frustrated in their valiant efforts by the scourge of another imperialism. But this unbending will continues to be strong and powerful in the epic struggle of the Ukrainian insurgent army (UPA) against the evil forces of Soviet imperialism, and in the resistance of the Ukrainian people.

As a nation of over 40 million people—the largest non-Russian nation behind the European Iron Curtain—Ukraine stands as one of our most important and natural allies in the eventual defeat of Soviet imperialism. Its historic claim to national freedom and independence cannot be ignored. Its place as a sovereign and equal partner in the mutual construction of the free Europe of tomorrow must be assured, if the foundation of permanent peace among freedom-loving nations is to be impregnable.

Guide to 73 Improvements Made To Simplify and Improve Mailing Procedures, Services, and Privileges for Mail Users

EXTENSION OF REMARKS

OF

HON. EDWARD H. REES

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 17, 1956

Mr. REES of Kansas. Mr. Speaker, under permission approved by the House, I am including a report from Postmaster General Arthur Summerfield entitled "Guide to 73 Improvements Made To Simplify and Improve Mailing Procedures, Services, and Privileges for Mail Users." I am sure the Members of the House will be impressed with the improvements that have been made in the Post Office Department designed to bring about better and more efficient mail service for the public:

GUIDE TO 73 IMPROVEMENTS MADE TO SIMPLIFY AND IMPROVE MAILING PROCEDURES, SERVICES AND PRIVILEGES FOR MAIL USERS

CERTIFIED MAIL

1. The Post Office Department has established a new, low-cost domestic mail service, known as the certified mail service, by which postal patrons may obtain evidence of mailing and delivery for documents, receipts, notices, replaceable papers of importance, and so forth. Since certified mail service costs are lower than those for registered mail, mail users, who formerly sent such materials by registered mail, are now enabled to make savings in their mail costs.

2. Certified mail service was extended to and from the Canal Zone in 1955.

C. O. D. MAIL

3. A new easily understood card form has been provided to notify patrons of the arrival of c. o. d. mail. This notice for the first time makes provision for showing the exact date on which the mail, if not accepted, will be returned to the sender.

4. In addition to the notice customarily left with or for the addressee after an unsuccessful attempt to deliver collect-on-delivery mail, a second notice now is sent to the addressee on the new form after 5 days so that he may have every reasonable opportunity to accept delivery if he wishes to do so.

5. Also, addressees are now permitted to use the new notice-of-arrival card to mail instructions to their postmaster, without any postage charge, telling him that they wish the c. o. d. parcel delivered to their home at a certain time when they will be in.

6. Mailers of shipments of baby chicks sent c. o. d. no longer lose a standard 5 percent of the total value of the chicks if the entire shipment is lost, when claiming insurance indemnity for the shipment. Formerly, where the entire mail shipment of chicks was lost and where it was covered by insurance, the Post Office Department deducted 5 percent of the value, on the theory that 5 percent represented the normal death rate in such shipments.

7. The period during which c. o. d. parcels may be held at offices awaiting delivery to the addressee has been increased from 15 days to 30 days.

CERTIFICATES OF MAILING

8. Certificate of mailing, (p. o. d. form 3817), a form prepared by the sender and authenticated by the postal clerk for a small fee, and which shows evidence of mailing for ordinary mail, has been improved. The amount of postage paid, a record-keeping item of importance in many cases for larger mailers, may now be entered upon the certificate. Also, a facsimile of this form may be reproduced directly on copies of documents and authenticated in the same manner as the individual certificates on form 3817.

REGISTERED MAIL

9. New surcharge rates, which are more equitable for registered mail of higher value, have been set up. Surcharge rates formerly were based on an inflexible rate per $1,000 of value for the zone of destination. After the first million dollars of value, progressively lower rates are now prescribed, and authority exists for quotation of surcharge rates for shipments valued over $15 million, based on considerations of weight, space, and value. At the same time, the nuisance surcharge rates from 2 to 10 cents, covering values up to $1,000 formerly subject to surcharge, have been discontinued entirely. Surcharges on registered mail do not provide additional insurance coverage by the Government, but are intended to cover the additional costs incident to the extra care used in handling these valuable shipments.

10. Senders, who are required by law to declare the actual value of the mail they present for registration, are no longer required to declare as the value of nonnegotiable securities the estimated cost of their duplication if lost or destroyed. Such securities may now be declared as having no intrinsic value, thus permitting payment of lower registration costs than formerly on this matter. However, the mailer may optionally insure nonnegotiable securities with the Post Office Department against possible costs of duplication by payment of one of the higher registration fees.

11. The form used to notify the sender of a registered article that it is undeliverable because the addressee is not known at the place addressed, or because the address borne by the article is not good, has been revised so that it may also be used to notify the sender when the post office of address is unable to deliver a registered letter because the sender has restricted delivery to the addressee only and the addressee declines personally to receipt for it. This new notice permits the sender to lift the restriction if he wishes to do so, thus enabling the post office to deliver the mail to the agent of the addressee.

12. Safer internal procedures have been put into effect in the handling of registered mail. Formerly, a shipment of numerous items of registered mail of limited value were

"bulk billed;" that is, described only by the total number of items on the bill enclosed with the articles in registered pouches and jackets. Under this arrangement it could not be determined whether a particular registered article had been dispatched or received, and the dispatching employee was responsible only for seeing that the total number of articles he enclosed in the pouch or jacket was shown on the bill. The receiving employee was responsible for checking the number of articles received against the number shown on the bill. In case of a shortage, it was not possible to determine the particulars of the missing article. With the inauguration of the new certified mail service, to which millions of articles formerly registered are being diverted, bulk billing was discontinued. Now, employees handling registered mail must list the particulars of all registered mail dispatched and check the particulars of all articles received against their description on the dispatch bill.

13. Mail that is intended by the sender to go by registered mail, and which contains adequate postage to go registered, but which is inadvertently deposited with a regular mail shipment, now is promptly dispatched as registered mail by postal employees, and a receipt is mailed to the shipper. Formerly, such items intended for registry were delayed until further checks were made with the sender.

14. The value of registered mail that can be transported over star routes (routes over which mail is carried by certain contractors who are not employees of the Post Office Department) has been increased consistent with safety.

CLAIMS FOR MAIL LOST OR DAMAGED

15. The form provided for use by mailers in making application for payment of indemnity on domestic insured and c. o. d. mail has been greatly simplified.

16. The function of adjusting and paying claims for indemnity on domestic insured and c. o. d. mail has been centralized in 15 offices within the postal service, rather than in 57 offices as before, providing speedups in adjustments of claims, and considerable savings to the Post Office Department.

17. Senders of insured and c. o. d. mail that is damaged in transit can now recover damages more easily. Usually, a simple statement of value from them is adequate.

18. The 15 claims-paying post offices also have been authorized to pay many types of claims which formerly had to come to Washington for settlement. This has greatly speeded adjustments.

19. In a good many instances involving claims for damaged mail items started by the sender it is no longer necessary for the addressee to file a declaration about the damages. This applies in instances where the addressee has received a damaged article in the mail and has sent it back to the mailer, or where the article was returned to the sender as undeliverable mail. In these instances, only the mailer needs to file—not both the mailer and the sender, as was the case formerly.

20. Payment of damage claims on parcels that have been accepted by the Post Office Department for insurance is no longer denied because of inadequate packing.

21. If a mailer pays an inadequate fee to cover the requested insurance on a mailed article, because of an error by the postal employee who accepted the item for mailing, the mailer will nevertheless be reimbursed in full if the item is damaged or lost. The Post Office Department made this full reimbursement policy available by seeking on its own initiative a reconsideration of former adverse rulings by the Comptroller General.

22. Mailers who have legitimate claims on insured mail articles can now mail the completed claims forms to the post office. Formerly they had to go in personally to do this. This saves a great deal of time and trouble for many mailers.

METERED MAIL

23. A bothersome requirement imposed on meter users, that they had to furnish a statement of their postage meter readings every day to post offices has been abolished.

24. The Post Office Department has provided a convenient record book for use by meter users in keeping records of meter operations.

25. The requirement that the day date of mailing be shown in meter stamps on fourth class (parcel post) mail has been eliminated. This formerly caused much trouble for large fourth-class mailers where, for instance, parcels intended for mailing on a certain day were delayed. In such cases, the post office frequently would not accept parcels with outdated meter stamps, involving red tape and delay in getting new meter stamps placed on the packages.

26. The requirement for labeling of metered mail with special identification labels from the mailer has been eliminated.

27. Mailers were authorized to deposit metered letter mail in any street or office building mail receptacle within postal district where their meter is registered, thus eliminating trips to the post office for many mailers.

28. The 10-percent penalty that used to apply for those presenting certain metered mail that contained an incorrect date (for example, a piece of mail showing a meter date on the first of the month, but presented for mailing on the 5th) has been eliminated.

REFUNDS OF POSTAGE

29. The processing of claims for refunds of postage was decentralized from Washington to local post offices to speed up payment and eliminate red tape.

30. The minimum amount for which postage refund would be paid was eliminated; now any claim of any amount may be considered.

NOTICES TO SENDERS OF UNDELIVERABLE THIRD- AND FOURTH-CLASS MAIL

31. Where a sender of third- or fourth-class mail requests that he be notified if the piece is not deliverable as addressed the post office marks on such mail, which is not deliverable locally or forwardable, the reason for nondelivery, or a new address if it has one, and sends the piece of mail back to the sender. This enables him to correct his mailing list without delay. Formerly, in such cases, the Post Office Department held the mail and engaged in correspondence, on card forms, with the senders, regarding the mail that was held, why it was not delivered, and so forth. The new procedure is much faster and more direct.

ISSUANCE OF MAILING PERMITS

32 Authority was extended to postmasters to issue meter, imprint, precancel and business reply permits, without obtaining prior approval of the Department from Washington, resulting in much faster action on such applications.

33. The application and authorization forms for these permits have been simplified and combined, to make it easier for mail patrons to obtain and use these permits when needed.

ENDORSEMENT OF MAILER ON SEALED PARCELS

34. The regulations have been changed to remove the requirement that the sender's authorization that parcel-post parcels may be opened for inspection be printed. Such endorsements may now be placed on wrappers or labels in handwriting, or by handstamp or other means.

PREPAID AIR PARCEL POST

35. The regulations have been changed to authorize onward dispatch and collection of postage due upon delivery of air parcel post which does not bear enough postage, provided it bears at least 50 percent of the postage chargeable. This has eliminated requirement for holding such mail and speeded delivery in many cases where mailers have inadvertently neglected to affix adequate postage.

RELAXATION OF MAILABILITY RESTRICTIONS ON PARCEL POST

36. Many complex restrictions on mailing various types of items and their containers have been simplified to give mailers, particularly those sending merchandise through the mails, access to the mails for their products. For example, standard types of aerosol containers are now accepted in the mails where restrictions once barred them.

REVISION OF PACKAGING SPECIFICATIONS

37. Regulations to authorize use of wrapping and cushioning materials recently developed for preparation of products for mailing have been put into effect; formerly, technical requirements banned use of such materials in the mails.

WINDOW ENVELOPES

38. Formerly only a single address window was permitted in envelopes. Now regulations have been relaxed to permit use of other windows—for advertising or display purposes for example, or for return address. Also, more latitude is permitted on where the windows may be located in the envelopes and printing may now be placed closer to the windows than formerly.

MAIL OF NONPROFIT ORGANIZATIONS AT SPECIAL THIRD-CLASS RATES

39. Application and authorization forms for nonprofit organizations to qualify for mailing at special third-class rates have been simplified and combined. Procedures for handling have been revised to speed issuance of authorizations to applicants.

INFORMATION PAMPHLETS

40. Two new publications have been issued for free distribution to the public, to assist in their mailing: 1. POD publication No. 2, containing instructions and illustrations on packaging and wrapping parcels for mailing, and 2. POD publication No. 3, containing all domestic postage rates and fees.

KEYS AND IDENTIFICATION DEVICES

41. Supported bill which became law extending the special postage rate for hotel and steamship keys to all keys and identification devices which have attached, or which bear, a name and address and guarantee to pay postage on delivery.

SECOND CLASS MAIL (NEWSPAPERS AND PERIODICALS)

42. Eliminated from regulations definition of "sample copies" which was impracticable to administer and unnecessarily restrictive.

43. Eliminated the regulation which arbitrarily limited the mailings of sample copies to three a year to the same individual.

44. A regulation was adopted making it easier for publishers to mail separate editions of their publication. This eliminated a mass of involved regulations, fee charges and so forth which formerly prevailed on mailings of such editions.

45. A regulation was adopted permitting "split run" advertising in publications mailed by second-class mail. For example, a publication mailed to one section of the country may contain a certain ad on a certain page slanted especially to that section, while the same edition of the same publication that is sent to a different section may contain on that same page a different ad, especially slanted to the other section.

46. A regulation was adopted permitting advertising pages to be die cut, deckle-edged, or prepared for folding out horizontally, vertically, or both. These technical changes provide important liberations for

mailers of second-class mail, giving them more leeway in what types of advertising they may accept.

47. As another major improvement, the Post Office Department adopted regulations which permit use of all kinds of modern papers for pages of magazines. This removed former strict and outdated requirements regulating use of papers used in magazine publication.

48. Regulations were adopted which define and permit the reasonable use of novelty pages, for publishers, including such pages as those containing paper doll cut-outs, coupons, and so forth.

49. New commonsense policies for determining distinctions between advertising and non-advertising content of publications were adopted.

50. The Department simplified the manner in which publishers mark their copies that are filed with postmasters to show the difference in content between reading and advertising content.

51. Regulations were put into effect to change and simplify the manner of handling copies of second-class publications that are undeliverable as addressed. To illustrate: Mrs. Smith in Anytown moves from First Street to Third Street and gives her new address to the post office. Her new copy of her favorite magazine comes by mail, and is sent to Third Street. It will contain a new simple form, on which she may notify her publisher of her change of address. She has 3 months to do this, and, if it is not done by then, the post office will tear off of the copy of her magazine the name and address label and itself send it back to the publisher with the change of address indicated. Formerly, the post office engaged in a complicated correspondence back and forth between publishers to get the change of address made, and often copies of the publication were returned to senders.

52. The handling of publishers mail was speeded by discontinuing bulk weighing of each and every mailing. Now, the total weight of the overall mail shipment is computed from statements of the copies involved and verified by taking sample weighings of mail loads selected at random.

53. A regulation was adopted which permits publishers to deliver copies directly from their plants to railway stations, neighboring towns, or elsewhere, for acceptance and dispatch from those points in the mails. Formerly, publishers were limited to one, or a few, points from which they could mail.

54. Publishers were given authority to deposit Sunday and holiday isues in rural mail boxes on Sundays and holidays without paying postage. This is a particular benefit for smaller papers in largely rural areas. (This is an exception from the rule that mailable matter that is deposited in mail boxes is subject to postage, even though it is carried personally by an individual and does not move through the postal system.)

55. The Department placed in operation, first by regulation and later by authority of new law, a method of paying postage in cash on copies of magazines and newspapers, subject to local per copy postage rates—a convenience and record-saving step in many instances for publishers.

56. A regulation was adopted which permits printed illustrations to be pasted to advertising pages in publications.

57. A regulation was discontinued which required publishers to receive at least 30 percent of the amount of the regular advertised annual subscription price on subscriptions that are obtained through agents or agencies that work on commission.

58. Revised special form that is used by subscribers to inform publishers of changed address, and obtained publishers' cooperation in carrying advertisement asking subscribers to use the form.

59. Greatly simplified the regulations prescribing display of title and name of office of publication in copies of publications.

60. Adopted regulation providing for issuance of special issues.

61. The Post Office Department supported a bill, which became law, and which has greatly simplified the obtaining of second-class mailing privileges for publications of churches and religious organizations.

62. Changed regulation to permit publishers to use white or any other light colored paper for wrapping, instead of being restricted to white or manila paper.

63. Changed regulation to permit use of light colored paper by publishers for address strips, instead of mandatory white or yellow.

64. Discarded requirement that black ink only could be used on address slips by publishers.

CONTROLLED CIRCULATION PUBLICATIONS

65. For controlled circulation publications (certain publications sent free by their publishers; usually publications containing highly specialized content and sent, for example, only to persons engaged in a special kind of work) the Post Office Department adopted procedures for weighing and computing of postage which are uniform with those used for second-class publications.

66. For controlled circulation publications, the Post Office Department adopted procedures that are uniform with those used for second-class publications, for handling copies that are undeliverable as addressed.

PARCEL POST SIZE AND WEIGHT LIMITS

67. The Department authorized mailers located on rural routes serviced from first-class larger post offices to mail their larger and heavier parcels at the post office.

PUBLIC INFORMATION

68. Policies of lending technical assistance to press, particularly trade press in preparation of technical articles on mailing were put into effect in Department. Department technical personnel assisted in writing and preparation of articles upon such subjects as mailing of aerosol insecticides and compressed gases, encyclopedia material, postage rate and mailing information materials.

COMBINATION MAIL

69. The Post Office Department put into effect its new combination mail service, permitting for the first time in history the mailing of a letter or message inside a package or publication, provided the sender pays appropriate postage to cover both items.

FORWARDING MAIL

70. Adopted relation authorizing the free forwarding of mail, formerly chargeable with forwarding postage, for dependents of military and civilian persons whose addresses are changed by official governmental orders.

POSTAL CARDS

71. Regulations governing use of postal cards issued for sale to the public by the Post Office Department (and usually distinguished from "post cards" offered for sale through private newsstands, tourist shops, and not containing the printed stamp) have been revised to authorize use of 50 percent of the space on the address side for writing or message purposes. Formerly only a third of the space could be used for this purpose.

POST CARDS

72. Use of post cards with round corners was authorized. Manufacturers formerly could not sell this type of card because use in mails was not permitted.

REGULATION REFERENCES ON MAIL

73. Requirement that regulation numbers, which change frequently, be shown on certain types of mail was eliminated. Mailers now use descriptive terms such as "Bulk Rate," "Library Book," etc. With each change in regulation numbers, it is no longer necessary for mailers to obtain new printing dies.

Communist Tactics in the Near East and Asia

EXTENSION OF REMARKS
OF

HON. RICHARD B. WIGGLESWORTH

OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 17, 1956

Mr. WIGGLESWORTH. Mr. Speaker, in a recent powerful address President Meany of the newly merged A. F. of L. and CIO made the following statement:

> This conflict between communism and freedom is the problem of our time. It overshadows all other problems. This conflict mirrors our age, its toils, its tensions, its troubles, and its tasks. On the outcome of this conflict depends the future of all mankind. I pray that, on the threshold of the atomic age, we—all of the free world—can muster the moral courage and total strength to preserve the peace and promote the freedom of the men and women of every continent, color, and creed.

We should all share these sentiments.

I returned just before Christmas from an official study mission with 6 other Members of the House which covered more than 30,000 miles by air in just under 10 weeks. The trip made it possible to exchange views with outstanding national figures as well as United States representatives in each of more than 24 countries visited in the Near East and Asia.

During the trip an attempt was constantly made to evaluate the extent of Communist influence, the amount of neutralism and the impact of the United States policy and programs in each of the countries visited.

Nowhere in the area visited was there any evidence whatsoever of any change in the fundamental objectives of strategy of the Communist world.

On the contrary, there was evidence all along the line of persistent Communist activities reflected in infiltration, promises, propaganda, and subversion.

Perhaps we should thank Mr. Bulganin and Mr. Khrushchev for making the facts crystal clear—for giving the world their real interpretation of the spirit of Geneva.

It is impossible to view the picture in Asia as a whole except against the background of the tragic policies of years gone by which made it possible—policies helping the Kremlin to establish its control directly or indirectly over 800 millions of people, one-third of the population of the world—policies making impossible a military victory in Korea when it lay within our grasp, with the resulting enormous loss of prestige.

Once again come to mind the famous words of General MacArthur, when he said:

> Allowing the Communists to grow to power was the greatest political blunder in a

hundred years, and one for which this Nation will pay for a century to come.

The free world has made great progress since that day.

We have seen, among other things, the organization of NATO with its 15 members; of the Baltic Pact with its 3 members; of the Bagdad Pact with its 5 members; of the SEATO Pact with its 8 members, and of pacts with our many friendly nations in the Western Hemisphere.

We have seen also the pact of Paris and the admission of Western Germany into NATO; the independence of Austria; the adjustment of important problems in Egypt, Iran, and Trieste.

We have seen the creation of enormous offensive and defensive military power at home.

Fully adequate—

According to Admiral Radford, Chairman of the Joint Chiefs of Staff—

to perform all essential tasks in the initial stages of a shooting war, global or otherwise, and to permit a rapid and orderly buildup when and if that should become necessary.

America and its allies have met with great success in terms of our military programs. By a policy of collective security based on military strength we have compelled the Communist world to abandon military aggression for the time being.

We are now confronted by a shift in tactics on the part of the Kremlin. The emphasis now is in the nonmilitary field and on tactics referred to by the President in his message on the state of the Union as the tactics of "division, enticement, and duplicity." These tactics were in evidence pretty generally throughout our trip, particularly in Asia.

Wherever there is friction or disagreement within a nation or between nations the Communist policy of division does everything possible to accentuate the trouble.

This policy was apparent, for example, in the differences between Greece and Turkey, arising out of the Cyprus problem; in the differences between the Arab States and Israel, and between the Arab States themselves; in the differences between Afghanistan and India on the one hand and Pakistan on the other; and in the differences in southeast Asia.

In country after country the Communists were making every effort to infiltrate, particularly into schools and labor organizations; to form cells; to promise anything and everything that might contribute to the desired end, and to weaken and subvert with a view to finally taking over and organizing.

It was heartening in the light of these activities in the nonmilitary field to talk with outstanding and courageous free-world leaders such as President Magsaysay, of the Philippine Islands; President Chiang Kai-shek, of Nationalist China; President Syngman Rhee, of South Korea, and others standing stalwartly against the pressures of the Communist world.

The tide of any struggle ebbs and flows. At the moment in this campaign for the minds and hearts of men in the part of the world which we visited, particularly in Asia, the tide is not running in favor of the free world. It is running against us.

The new Communist tactics, which can become as dangerous as those of military aggression, have been gaining ground, and the trend is important, because as in other campaigns there are those who want to ride on the winning bandwagon.

If the trend is to swing our way, if Communist infiltration and subversion are to be halted, the free world must develop as much power, firmness, and effectiveness in its nonmilitary programs as it has developed in its military programs.

A policy based on strength will build confidence among our friends. A policy based on strength will appeal to those nations who are today neutral. A policy based on strength is the only policy which the Communist world understands.

No campaign was ever won on the defensive. The free world must take the initiative. Its policy must be dynamic.

We must, of course, do our utmost to help settle outstanding problems such as those in the Near East, which, however important to those primarily concerned, from the overall point of view, play directly into the hands of the Kremlin.

We must do what we can to eliminate the threat posed by infiltration and subversion in its early stages.

We must work with and stand by our friends.

The Kremlin does not want war. It will respond in the future, as in the past, to a policy based on strength.

Under the outstanding leadership of President Eisenhower and other free world leaders I am confident that we shall meet the new tactics of the Communist world in the nonmilitary field just as we have met their previous tactics in the field of military aggression.

The Cost of World Wars I and II
A Staggering Sum

EXTENSION OF REMARKS
OF
HON. LAWRENCE H. SMITH
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES
Tuesday, January 17, 1956

Mr. SMITH of Wisconsin. Mr. Speaker, under leave to extend my remarks, I am inserting valuable information compiled for me by the Economics Division of the Library of Congress. Mr. Hermann Ficker, analyst in international trade and finance, has prepared the material which I am inserting.

Mr. Speaker, this information covers the cost of World Wars I and II. It is obvious at a glance that war is costly and destructive and it seems that we should be on the road to finding a solution to this problem other than by an armaments race with Russia, which appears in the making at this time.

The above-mentioned follows:

THE COST AND ESTIMATED PROPERTY DAMAGE OF WORLD WAR I

Twice in one generation the shadow of mass warfare has fallen athwart the world. These great wars have caused incalculable human misery due to the loss of millions of men in the prime of life and the death and displacement of civilians in even greater numbers.

While immense sums are consumed in the prosecution of wars, as well as in recovery and rehabilitation of war-ravaged areas, we know that great problems remain and that wars add greatly to the tax burdens of succeeding generations.

METHODS OF COMPUTING THE COST

Estimating the cost of war in olden times must of necessity prove futile since records were not kept as to the cost of armies in the field, tribute, slaves, destruction of property, and other items included today in a general war assessment. Conclusive compilations of the exact cost of World War I have never been made due to the difficulty of separating war-related items from the current budgets of all the governments concerned. Similarly there has been found no conformity in the definitions as to what programs are allocable to war and what other programs during a war period were merely to carry on the ordinary administration of a nation's general economic life.

Statements as to the exact cost of World War I are therefore to be taken merely as approximations based on insufficient statistical evidence. In fact, most countries have not issued detailed official figures on World War I expenditures. Published computations have mostly been made by students far removed from the actual operational procedures incidental to the expenditures of money from the national exchequers.

The waste of treasure that wars have brought to humanity should also include the loss of national wealth comprised in the drain of raw materials and natural resources. When converted into the implements of war they are not replaceable and future generations are forever deprived of them.

Another evaluation of the cost of war should include losses in national income due to the prolonged absence from productive work of millions of men and women engaged in unproductive and destructive war work. The billions of hours devoted to preparedness and to actual fighting if turned into the building of homes, schools, hospitals, bridges, roads, and factories would assuredly have advanced humanity toward greater achievements in all cultural and humanitarian fields.

DIRECT MONEY COST

Many estimates of the cost of World War I are available, all divergent in totals, but basically the differences in cost are due to the period of time over which the cost is spread.

E. L. Bogart, on behalf of the Carnegie Endowment for Peace computed in 1920, that the direct money cost of the war to all countries was as follows:

A. Allies:	
United States	$32,080,266,968
Great Britain	44,029,011,868
Australia	1,437,418,680
Canada	1,665,576,032
India	601,279,000
New Zealand	378,750,000
Union of South Africa	300,000,000
Belgium	1,154,467,000
France	25,812,782,800
Greece	270,000,000
Italy	12,313,998,000
Rumania	1,600,000,000
Russia	22,593,950,000
Serbia	399,400,000
Other allies	500,000,000

B. Central Powers:	
Germany	$40,150,000,000
Austria-Hungary	20,622,960,000
Turkey	1,430,000,000
Bulgaria and Rumania	815,000,000
Total	207,850,860,348

These costs included not only the maintenance of the armies, transportation and the production of war materiel but also the aid etxended to other countries by both sides. The total of this aid is tabulated separately merely to show the amounts that individual countries expended. It amounted to approximately 10 percent of the total direct costs of World War I.

ASSISTANCE TO ALLIES

Included in the overall estimate of the cost of World War I are the advances made to their allies by the belligerents. These were:

United States	$9,455,014,125
Great Britain	8,695,000,000
France	1,547,200,000
Germany	2,375,000,000
Total	22,072,214,125

INDIRECT COSTS OF WAR

Among the indirect costs of World War I should be included an estimate of the value of property destroyed during the period of belligerency. This is physical damage to homes, schools, churches, factories, power installations, transportation facilities and equipment and other property. Again Bogart has made an estimate in rounded figures without trying to give a breakdown by type of property destroyed. The only differentiation made is in property on land and shipping.

Property damage:	
Belgium	$7,000,000,000
France	10,000,000,000
Russia	1,250,000,000
Poland	1,500,000,000
Serbia, Albania, Montenegro	2,000,000,000
East Prussia, Austria, Ukraine	1,000,000,000
Italy	2,710,000,000
Rumania	1,000,000,000
Germany	1,750,000,000
British Empire	1,750,000,000
Total	29,960,000,000

SHIPPING AND CARGO LOSSES

The total losses in shipping to the allies and neutrals from the beginning of hostilities to August 1, 1918, are estimated at 15,000,000 tons. This is approximately one-third of the world's prewar shipping tonnage of 48,500,000. Production cost of that tonnage was $1,050,000,000. Germany and Italy lost almost all of their merchant shipping. In addition to the deadweight tonnage there is also the question of cargo. Altogether, the estimate for shipping and cargo amounts to $6,800,000,000.

COST OF WORLD WAR II AND PROPERTY LOSSES

Statisticians have not yet attempted to assess the total expenditures of participating nations in the prosecution of World War II. Military expenditures as part of national budgets do not portray the full extent to which the energies of any nation were directed toward warmaking purposes in the war emergency.

Guess-estimates have varied from $1 trillion to $4 trillion, depending on the type of direct and indirect cost included in the overall totals. If the figure of $4 trillion is used, the cost of World War II amounts to $1,708 for every man, woman, and child in the earth's estimated population of 2.3 billion people.

In the following tables an attempt has been made to state the direct cost of war insofar as figures are available from published sources with a total of $1,439,250,000,000. Indirect losses are summarized under two headings, namely property damages estimated at $259,557,000,000 and an itemized list of shipping losses for which dollar value figures are not available. Illustrative data for property destruction in various countries are added to show the extent of war damage.

Lastly, a total of aid rendered foreign countries by the various belligerents is given. This list is incomplete. The sums mentioned are included in the direct money cost of the war.

DIRECT MONEY COSTS

Insofar as published estimates are available, the various nations spent the following sums as direct costs in the prosecution of the war:

United States [1]	$317,600,000,000
United Kingdom	120,000,000,000
France [2]	192,000,000,000
Canada	14,000,000,000
Australia	8,000,000,000
South Africa	2,250,000,000
New Zealand	1,650,000,000
Germany	273,000,000,000
Italy	94,000,000,000
Japan [3]	56,000,000,000
Finland [4]	2,000,000,000
Rumania	1,750,000,000
Russia	357,000,000,000
Total	1,439,250,000,000

[1] Commercial and Financial Chronicle. Dec. 13, 1945. P. 2927.

[2] London Times. Aug. 17, 1945. P. 4.

[3] New York Times, Mar. 18, 1947, p. 4 and Aug. 12, 1945, p. E-2.

[4] U. S. News. Sept. 17, 1945.

To these totals should be added the expenditures of India, Egypt, Turkey, Greece, China, and many smaller entities.

PROPERTY DAMAGE

The best estimates of property damage has been compiled by the French National Institute of Statistics and Economic Studies.[1] According to an analysis published in 1947 fixed property destroyed during World War II was valued as follows:

Austria	$534,000,000
Belgium	2,274,000,000
Denmark	159,000,000
France	21,504,000,000
Greece	3,269,000,000
Holland	3,947,000,000
Italy	2,900,000,000
Luxembourg	179,000,000
Norway	1,275,000,000
United Kigdom	6,872,000,000
Germany	48,000,000,000
Albania	512,000,000
Bulgaria	420,000,000
Czechoslovakia	4,202,000,000
Hungary	4,330,000,000
Poland	20,000,000,000
Rumania	683,000,000
Yugoslavia	10,497,000,000
U. S. S. R	128,000,000,000
Total	259,557,000,000

There is wide discrepancy in totals for individual countries. The authoritative London Times stated that France suffered $122 billion in property damage, whereas the French themselves put their losses at just over $20 billions. If mere replacement value were the criterion of worth then the overall totals will assuredly be very much smaller. On the other hand many of the later estimates are expressed in terms of currencies suffering in many instances from inflation.

SHIPPING LOSSES

The following French Institute estimate of merchant ship losses includes only vessels of 100 gross tons or more during the period September 1, 1939 through September 3, 1945.[2]

Merchant-ship losses, Sept. 1, 1939, to Sept. 3, 1945

	Vessels	Tons
United States	736	4,734,768
British Empire	1,910	11,193,964
United Kingdom	1,753	10,484,595
Belgium	57	341,190
Denmark	109	407,715
France	313	1,581,761
Greece	247	1,078,482
Holland	240	1,326,536
Norway	418	2,027,204
Poland	9	45,000
Sweden	120	450,645
Turkey	9	25,994
U. S. S. R	51	207,450
Yugoslavia	46	189,161

WAR DAMAGE IN VARIOUS COUNTRIES

It has been found impossible to make detailed lists of property damages suffered in all countries. Illustrative of the type of damage suffered by individual countries a brief statement will be made concerning those areas for which data were found.

United Kingdom: "In England, by March 1944, 3 million war-damaged houses were 'first-aid' repaired, and 102,700 badly damaged houses were restored to use. The following year more than a million houses were damaged or destroyed by flying bombs." [3]

France: "The total number of buildings damaged and destroyed * * * in World War II was some 1,804,000. Nearly 25 percent of all buildings damaged in World War II were completely destroyed.[4]

"The French ports have been notable casualties in the war. Toulon is blocked by the scuttled French fleet much too effectively for German salvage or French reconstruction. The Atlantic ports are almost useless. * * * The Channel ports were bombed ruthlessly." [5]

Countries such as Finland, Norway, Denmark, the Netherlands, and Belgium, and Czechoslovakia suffered damages to physical installations that amounted to hundreds of thousands of homes destroyed, transportation paralyzed, ports demolished, and extensive dislocations of the national economies. Damage can be assessed in the trillions of dollars.

China: "Property losses have been astronomical. In Shanghai alone $2 billion worth of homes and factories were destroyed. In their campaign of terror the Japanese did not hesitate to level hundreds of towns and villages. Nor will it ever be possible to compute the dollar-and-cent loss suffered by China in the forced flight of 40 million people. Or of the damage done to the soil by the gerat floods which followed the breaching of the Yellow River dikes." [6]

Japan: Apart from all industrial destruction and dislocation of the economy, 2,252,000 buildings were destroyed.[7]

Germany: Few nations have suffered such utter destruction as was heaped upon Germany. Complete estimates have never been computed.

U. S. S. R.: The fantastic destruction in Russia is noted in the following statistics of war damage: [8]

Towns	1,710
Villages	70,000
Houses	6,000,000
Hospitals and medical centers	40,000
Schools and research institutes	84,000
Libraries	43,000
Industrial plants	31,850
Electric motors	239,000
Metal-cutting lathes	175,000
Railway track (missing pieces)	40,625
Railway stations	4,100
Railway bridges	13,000
Locomotive depots	317
Steam and motor locomotives	15,800
Passenger and freight cars	428,000
Passenger and freight vessels	4,280
Ports and docks	479
Post, telegraph, and telephone offices	36,000
Collective farm headquarters	98,000
State farm buildings	1,876
Tractor stations	2,890
Horses	7,000,000
Cattle	17,000,000
Hogs	20,000,000
Sheep and goats	27,000,000
Poultry	110,000,000

Italy: The most detailed list of war damage has been compiled for Italy.[9]

Military operations involved practically the entire peninsula and every aspect of life was in chaos because of material destruction and disorganization of the central network of economics, financial and administrative life. Among the various classes of property which had undergone most damage were:

(a) Housing: 1,900,000 habitable rooms destroyed; 1,100,000 seriously damaged; 3,800,000 to a lesser degree.

(b) Public works: State roads destroyed and damaged 60 percent; secondary roads 20 percent; important bridges destroyed 2,968; secondary bridges 5,269; post buildings 90 percent damaged; port machinery and docks 50 percent destroyed; schoolrooms 40 percent destroyed; hospitals and equipment 20 percent destroyed; churches destroyed and damaged 11,000.

(c) Mercantile marine: Itay's merchant navy consisted of 1,109 units over 100 tons gross. Total of 3,400,00 gross tons was reduced to 429,000 representing a 90 percent loss.

(d) Railways: 40 percent of all railway equipment and facilities was destroyed.

(e) Agriculture: Direct damage was estimated at 550 billion lire. Indirect damage would take years to eradicate due to the lack of fertilizers, damage to water supplies, deteriorating of river defense-works, uncontrolled depreciation and the abandoning of sound methods of cultivation.

(f) Industry: Plant and property destroyed amounted to 450 billion lire. Worst hit were the steel works, electrical works, shipbuilding, chemical works and metal works.

In addition to these serious overt aspects of war damage there are the aftermaths of a continuing deterioration in the entire governmental system, the reduction in agricultural and industrial production, the reduction in the standard of living, the inflationary movement, unemployment and the price spiral which will take years to be overcome.

Free TV or Fee TV

EXTENSION OF REMARKS

OF

HON. THOMAS J. LANE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 17, 1956

Mr. LANE. Mr. Speaker, under leave to extend my remarks, I wish to include the following radio address I delivered over station WMEX, Boston, Mass., on Saturday, August 20, 1955:

Only one letter separates "free TV" from "fee TV," but the opposing viewpoints might just as well be stationed at the North and South Poles, remote from one another and remote from any compromise, or so it might seem.

The Federal Communications Commission has been subject to much lobbying pro and con as to whether it should permit pay-as-you-see television, also known as subscription televison.

At the present time, TV programs are paid for by sponsors, who, in turn, are given the opportunity to advertise their products or services. Of course it is the American consumer who pays eventually and indirectly through his purchases of the goods and services that are advertised.

Under the fee system, advertising would be eliminated; and for a certain small price per program he could choose to see an outstanding movie, a championship sporting event, or any one of many special presentations.

I shall not go into the technical details of the various systems that would make it possible for you in your own home to pay and choose and see the subscription program of your choice.

I am concerned with the larger question as to whether or not free television, as we now know it, should have a commercial rival.

Offhand, it might seem that competition would best serve the public.

But should a Government agency, the Federal Communications Commission, decide this question, or should it be left to the good judgment of the American people?

The large networks are lining up against pay-as-you-look television, while the smaller stations and the general public seem to favor it.

The issue, however, has not been fully debated on a large scale.

I believe, therefore, that the public should become acquainted with the pros and cons of this controversy, so that it shall have a voice in its solution.

First, may I bring you some of the arguments against free TV.

Since the end of World War II the television industry has grown from infancy to an industry in which the American people have invested more than $10 billion in television sets (more than 36 million of them), and in which the annual volume of television advertising, set sales, servicing, and operating runs close to $4 billion per year, under the traditional American broadcasting policy of freedom to listen and freedom to look.

The promoters of pay television would change the American system of free broadcasting to a restricted system of paid narrowcasting. Their standard of interest is: "No fee, no see."

Coexistence between free television broadcasting on the basis of competitive private enterprise, as we know it today, and pay television, as proposed by its promoters, is impractical. Opponents believe that pay television would degrade and ultimately destroy the present system of free TV broadcasting.

The greater the circulation of any medium, the greater becomes its advertising value. As applied to television broadcasting, this has meant that as the size of the television audience has increased the free television broadcaster has had more available to spend on improved programing.

Under the present system, the broadcasters give, at their own expense and as a public service, addresses by the President and national, State, and local government officials. They also carry, as a public service, educational, religious, operatic, and other cultural programs. Many of these programs have limited audience appeal and are not sponsored. The broadcasters bear the very substantial cost of presenting these unsponsored public service programs, including interconnection charges and refunds of revenue to sponsors whose programs have to be cancelled to make room for free public affairs programs.

One of the greatest contributions that the free television system has made to the public interest has been the strengthening of the democratic processes in this country by helping to create an informed public opinion on important national and international issues. Anything that tends to weaken the free television system would automatically tend to reduce its ability to continue to render this costly and invaluable service.

If the pay-television promoters should be successful, the more than 8 million people living in single station areas would be deprived of all free television service whenever pay-television programs were broadcast. These more than 8 million people would be forced to contribute to the cash boxes of the pay-television promoters for their TV programs or have none at all.

Unlike the present free system of television, pay television would come into the homes like gas and light and telephone service for which the consumer pays. The rates and other aspects of such public utility services are now regulated by the Government. If pay-television broadcasting were to be authorized, the public interest may require

that it likewise be treated as a public utility and made subject to similar regulation by the Government. In such an event, the practical difficulties of maintaining part of the American radio and television system free and part regulated would seem almost unsurmountable. Such a situation might ultimately lead to Government regulation, on a common-carrier basis, of all radio and television broadcast services, a result that no one advocates but all must guard against. Only the Congress can set the legal bounds of such regulation.

Our American principle of freedom to listen and freedom to look is chiefly responsible for the growth of the most dynamic industry in the world today. It has made the American people the best informed in the world, and it has done so without discriminating between the poor and the rich.

As EMANUEL CELLER, chairman of the Judiciary Committee of the United States House of Representatives, said, and I quote in part: "As a Federal legislator, expected to consider carefully the overall results of any innovation such as this, I am dismayed at the probable effects of fee TV on our tax structure, employment, those in low-income brackets, transportation, and other industries. Will our movie house, theaters, sports arenas, etc., be thrown into the discard? What happens to the tremendous investments in such real estate? Free broadcasting and free television have been undisputed boons to the industry of this country. I shouldn't think the sponsors would be happy at the prospect of killing the goose that laid their golden eggs, but they are strangely reticent at this time on this subject. In closing may I say I shall continue to oppose all efforts to foist fee TV on the American public."

Now to the other side of the coin.

What are some of the arguments put forth by those who favor pay-as-you-look programs?

A spokesman for Phonevision claims that one of the largest manufacturers of raido and television equipment that also maintains a large network, has always opposed any new electronic development which it does not control, and that its opposition to subscription is another illustration of this policy.

All we ask, he argues, is an opportunity to show that we can bring to the public for a small fee programs which are much better than those they have been getting on an advertising-sponsored basis. We think that the public is entitled to the best—not the worst—that Hollywood and Broadway can create. We propose to supplement with great box-office programs the present continuous stream of 20-year-old horse operas and other hackneyed programs that now fill in most of the short spaces between the long commercials.

The public will turn away from an advertising sponsored program to a subscription program only if the latter is so much better and more interesting that it is worth the price. The networks and the motion picture theater owners are afraid that subscription programs, such as great first-run motion pictures, full length hit plays from Broadway, and grand opera every week in season, will be so popular with the public as to threaten their profits. This is the same kind of argument the buggy whip manufacturers made against automobiles 50 years ago. Why not let the public, which owns the air, decide for itself whether it wants the right to pay a small fee for programs that can never otherwise be brought to television?

Proponents of pay-as-you-see television claim that you take what the big broadcasters and big advertisers send you or nothing at all. You are given no choice. No wonder TV is being criticized for trying to corral the largest market by pitching to the lowest common denominator. First, conventional TV was attacked because it was too sensational. Now, there are many complaints to the effect that it is not growing up. All parents want good programs available for the entertainment and instruction of their children, but they also want a few adult programs for their own enjoyment if they can only manage to get the children to bed at a reasonable hour.

Supporters of pay TV brand as ridiculous the charges that the new system would take over advertising sponsored programs. To spike this propaganda, they are asking the FCC to adopt a rule that no station can use more than 15 percent of its operating time on subscription TV. They are also asking the FCC to keep the existing networks out of the business of supplying subscription television programs. This will guarantee that pay-as-you-see television will fulfill its promise of being a supplemental service, in free and open competition with the present networks. Under this provision, at least, 85 percent of the program fare in any community would be without direct charge.

As the Chicago Daily News observes, and I quote: "But, in any case, it does not seem to us to be the proper function of the FCC to decide whether or not free television should have a commercial rival. The progress of America is due to the leeway given to just such competitive forces. To say that nobody should be allowed to take the risk of offering competitive entertainment, at a price, would seem to us an indefensible substitution of bureaucratic decree for the judgment of the market place."

In this broadcast, I have merely sketched some of the arguments on both sides of this question.

I have been speaking to you over the medium of radio, which has been most generous in alloting me time as a public service.

This broadcast has been coming to you heard but unseen over a local station.

While talking about the "battle of the giants" I have not forgotten the indispensable role played by your radio station in serving the business and cultural needs of the general area in which you live.

Your present receiving set should be a constant reminder that it is people like yourselves who must control mass media of communications to serve all of your various needs and to prevent the development of monopoly in any form.

Address Delivered by Senator Martin of Iowa Before the American Mining Congress

---

EXTENSION OF REMARKS

OF

HON. THOMAS E. MARTIN

OF IOWA

IN THE SENATE OF THE UNITED STATES

Tuesday, January 17, 1956

Mr. MARTIN of Iowa. Mr. President, on the 12th day of October last year I had the honor of addressing the American Mining Congress. I ask unanimous consent that the text of my remarks be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

THE ADMINISTRATION REJECTS EFFORTS TO IMPLEMENT THE HABANA CHARTER WITHIN THE UNITED NATIONS

Mr. Chairman, distinguished guests, ladies, and gentlemen, it is again a great pleasure for me to participate in this important panel discussion of the American Mining Congress on our strategic material and stockpile policies. As I have told you before, Iowa is not a mineral producing area and my concern with the production of minerals arises solely from my interest in our national defense.

Before entering the United States Senate, for 16 years I was a Member of the House of Representatives and my committee assignments in the House were the Armed Services Committee responsible for legislation concerning the strategic stockpile, and the Ways and Means Committee which writes our tariff laws. This experience has given me certain very definite views regarding those policies which will promote our security, and conversely, the basis for opposing schemes which have been promoted over a period of many years which can seriously weaken our economy and our position of world leadership.

Last year when I appeared before you I discussed proposals then pending in the United Nations to implement parts of the rejected Habana Charter for an international trade organization. Let me briefly review this rejected Habana Charter.

The original proposals which led to this draft charter were developed within our own State Department. They included provisions for establishing what in effect were world antitrust laws to deal with so-called restrictive business practices and for the establishment of intergovernmental commodity agreements. Commodity agreements by their very nature impose restrictions on both producers and consumers. Many different kinds of agreements have been proposed, some of which involve buffer stocks. Agreements have also been suggested to establish a just and equitable relationship between the prices of raw materials and manufactured goods. The difficulty immediately arises as to how one shall define the words "just and equitable" in an international agreement. The long term effect of all of these proposals is to allocate materials and fix their prices through an elaborate system of Government controls.

The Habana Charter was submitted to the Congress by President Truman. It was never approved. Late in 1950 President Truman assured us that he would not ask the Congress to again consider this document. But let us see what happened.

The United Nations Economic and Social Council proceeded to consider the charter chapter by chapter. Chapter VI of the Habana Charter, which dealt with international commodity agreements, was the basis for the establishment of the Interim Coordinating Committee for Intergovernmental Commodity Arrangements within the United Nations in 1947 and, more recently, the Commission on International Commodity Trade. Chapter V, which provided for an international agreement to deal with restrictive business practices, in other words, world antitrust laws administered by the United Nations, was turned over to an ad hoc committee of the United Nations Economic and Social Council for study. The resolution establishing the ad hoc committee was sponsored by the United States Government under the Truman administration. Both of these proposals were under active consideration when I appeared before you a year ago.

A great deal has taken place in the intervening 12 months, and I am very proud of the manner in which the administration has extricated itself from the problems which it inherited from the Truman-Acheson regime. While the United Nations Commission on International Commodity Trade, the group concerned with commodity agreements, was established in spite of United States opposition, our Government has refused to participate in the work of this Commission. The United States representative at the meeting of the Economic and Social Council at Geneva this summer re-

quested the Council to elect another government to our place on the Commission as we had definitely made up our minds not to participate in its work. Let me read from the statement of the alternate United States representative to the Council, Nat King:

"Our views with respect to the Commission on International Commodity Trade are well known and were expressed at the 18th session of the Council and also in comment submitted to the Secretary-General. Nothing has occurred since then to cause us to change our point of view.

"As the committee is aware, my Government has not occupied the seat on the Commission to which it was elected. We continue to question seriously whether the Commission can contribute significantly to the solution of international commodity problems. After most careful consideration, we have regretfully reached the conclusion that we will not find it possible to participate in the work of the Commission. Accordingly, my Government would welcome the election of some other government on the Commission in its place."

This disposes of the commodity agreement problem and chapter VI of the charter for the present.

The agenda of the United Nations Economic and Social Council this year also included the question of approving a proposed agreement to implement chapter V of the charter dealing with so-called restrictive business practices. This agreement had been drafted by the so-called ad hoc committee established in accordance with a United States sponsored resolution by the United Nations Economic and Social Council in 1951.

The statement of the United States in rejecting this agreement was forthright. I shall read two paragraphs which completely express the philosophy of this administration.

"The elimination of harmful restraints on international trade and the furthering of the development of free competitive enterprise continue to be basic objectives of this country's economic policy. In the present circumstances, however, the endeavor to effectuate a plan of international cooperation along the lines envisaged by the current proposals might well prejudice rather than promote the attainment of these objectives.

"It is, therefore, the opinion of the United States Government that present emphasis should be given not to international organizational machinery but rather to the more fundamental need of further developing effective national programs to deal with restrictive business practices, and of achieving a greater degree of comparability in the policies and practices of all nations in their approach to the subject."

Let me congratulate the mining industry on your good fortune that Herbert Hoover, Jr., a mining engineer, the son of one of our most distinguished mining engineers, is the Under Secretary of State and has helped to develop these policies in the Department. You are also fortunate in having the real problems of the industry constantly brought before the Cabinet by Secretary Wormser who has also spent his entire life in your industry.

Within the past month the Subcommittee on Antitrust and Monopoly of the Senate Committee on the Judiciary conducted hearings to determine why this administration rejected the proposed agreement on restrictive business practices. The only witness who appeared in favor of the United States adherence to this proposed agreement was Sigmund Timberg, who had served as Secretary of the United Nations Ad Hoc Committee. He expressed his deep concern at the rejection of his handiwork by President Eisenhower and Secretary Dulles. For many years prior to 1951 he was an official of the Antitrust Division of the Department of Justice in the Truman administration. A review of the history of the antitrust cases brought by the Truman administration in the middle 1940's shows that the Department of Justice was trying to secure jurisdiction over enterprises operating in foreign countries and this jurisdiction had been repudiated by courts in Canada and in the United Kingdom. These circumstances account for Mr. Timberg's desire to remake the world so that he could carry out his pet theories of antitrust enforcement.

A distinguished lawyer specializing in antitrust and international law, Mr. William Dwight Whitney of New York, formerly a Special Assistant to the Attorney General in the Antitrust Division, in his appearance before the subcommittee, made the following comment with respect to the philosophy of Mr. Timberg which I regard as most illuminating. He said:

"The point I think is being lost sight of is that you must have in a nation, and we must have in our Nation, two types of jurisdiction: jurisdiction over the person of the defendant, and jurisdiction over the subject matter of the action, over what happened.

"Now, all our recent cases that I am criticizing talk only about jurisdiction over the person, whether you can catch the person or, as one of the judges said, whether you can lay hold of him. The word 'catch' is in one of the opinions, too.

"I noticed yesterday in a very learned and brilliant presentation by Mr. Timberg, who ought to know something about this because he was in the Department of Justice all during the period when, I think, our law went wrong, talked about jurisdiction over the person, and his report discusses it, under the general title of 'jurisdiction,' but he never makes any reference at all to the jurisdiction over the subject matter of the action.

"Now, it is there that we intrude into the territorial sovereignty of foreign nations."

An analysis of the testimony before the subcommittee confirms all of the fears which I have expressed on numerous occasions during the past year regarding this proposed agreement.

The position of the administration in rejecting the proposed agreement was explained at these hearings by Mr. David C. Murchison, who for the past 2½ years served as legal adviser and assistant to the Chairman of the Federal Trade Commission. In addition, he served as an adviser to the United States delegation to the United Nations Economic and Social Council at those sessions devoted to considering the report of this Ad Hoc Committee.

The proposed agreement would have established a tribunal to determine what practices were restrictive and had harmful effects on the expansion of production or trade. Mr. Murchison pointed out that member nations will implement the tribunal's decisions under this proposed agreement "in accordance with their respective laws and procedures." He thus showed that:

"The agreement would therefore apply only to countries having antitrust laws and enforcement programs, principally to enterprises located in the United States, Canada, and possibly, to a lesser degree, in the United Kingdom."

This agreement by its very nature is discriminatory and favors enterprises in countries without antitrust laws as against American enterprises.

The agreement also discriminates in favor of public enterprises as compared with private enterprises. Mr. Murchison said:

"For example, dual standards for investigative activity are proposed. Public enterprises are at the outset given recourse to a 'consultation procedure' in the event complaints are lodged against them. Private concerns, on the other hand, are immediately made subject to the tribunal's investigative procedures and the provisions relating to publicity.

"Furthermore, under the terms of the proposed agreement, complaints against a State-owned or controlled enterprise cannot be filed except by governments. Complaints against private concerns, however, can be filed by individuals or private groups."

I cite these remarks of Mr. Murchison because they summarize so many of the points which I have discussed on other occasions, and which have been the subject of addresses and papers by distinguished lawyers who are experts in this field.

Now let me review Mr. Timberg's statement before the subcommittee and rebut some of the points which he made. Mr. Timberg said:

"The difficulty of establishing personal service explains why so many international cartel cases involve foreign coconspirators who are not joined as defendants. For example, in the General Electric case, all of General Electric's German, English, and other foreign cartel associates, with the exception of a Dutch firm that had established a factory in the United States during World War II, were immune from suit. The selective enforcement of the Sherman Act against foreign businesses that happen to get 'caught within the jurisdiction' pleases neither the United States defendants, nor the hapless foreign defendant, nor the antitrust enforcement authorities.

"* * * Difficulties in obtaining evidence: The second main obstacle is that of getting the evidence which will establish the antitrust violation. It is difficult and often impossible to obtain, by the use of American judicial process, business records located in a foreign country. The location of such records at a distance from the United States increases their unavailability, and facilitates their concealment.

"Moreover, national feelings are aroused in the process. When the Department of Justice some years ago tried to subpena Canadian records in connection with a newsprint investigation, the Province of Ontario enacted a statute making it a criminal offense to send any corporate records out of the jurisdiction in response to the request of any judicial, legislative, or administrative body of another country. This, of course, is an extreme example of the kind of resistance which one might expect abroad to an American court subpena. The more usual type of governmental protest is that which was registered in the Oil Cartel case."

Mr. Timberg has become so obsessed with the problems of establishing personal service and in obtaining evidence in foreign countries that he is quite willing to compromise our own sovereignty and permit an international agency to effectively exercise jurisdiction over United States nationals if such a device would permit him to secure remedies which he thinks justified in specific cases.

I was amazed at the following statement by Mr. Timberg:

"Also, business records and statistics in foreign countries are generally not as comprehensive as in the United States, and may be so different in nature from those in this country as to be unreliable indicators of the business and economic facts relevant to antitrust violation.

"Last, the mere factor of geographic distance and transportation expense impedes the securing of relevant information, which frequently depends on the testimony of witnesses as well as on the existence of business records."

I do not quite see how a United Nations organization could assist in improving business records and statistics in foreign countries unless all semblance of national sovereignty is to be done away with.

Let me emphatically state that I believe in our antitrust laws and support them wholeheartedly. I do so as I am convinced that competition under our American free-enterprise system has provided us with our

standard of living and our position of world leadership.

Our Government's statement to the United Nations on the proposed agreement clearly shows the real difficulty in establishing an agreement on this subject. We can agree on a mechanism to grant jurisdiction, but no mechanism can establish substantive agreements on the contents of world antitrust laws. Our conception of the purpose of antitrust laws is completely different from that of the other countries who would presumably participate under the draft agreement. Therefore, an international agreement could not possibly be operative in a constructive manner but could only lead to confusion until comparability in our legal concepts was achieved.

Mr. Timberg not only is obsessed by the problem of obtaining jurisdiction in antitrust cases but he is also disturbed at the "unavailability of extraterritorial remedies." He said:

"Unavailability of extraterritorial remedies: Finally, assuming an airtight antitrust case, in which all the parties involved are properly served as defendants, there would still remain a final obstacle to success in antitrust enforcement—the securing of satisfactory relief. This is the most important of the points I have mentioned, since failure to achieve adequate relief makes any antitrust equity proceeding, however conclusively it establishes guilt, a waste of the Government's time and money.

"In international cartel cases effective relief may require that the court issue injunctions changing the foreign operations affecting the foreign businesses, or disposing of the foreign properties of the defendants. American judges are reluctant, however, to go as far as they would in domestic cases, because of doubts they have as to the extraterritorial scope of their own jurisdiction and because of legal and practical difficulties that they think the defendants will encounter abroad."

The paragraphs I have quoted clearly show Mr. Timberg believes that the findings of the United Nations body would have great weight and would be enforced, yet he testified to the subcommittee that:

"The U. N. draft agreement is an instrument of international cooperation, not a grant of international sovereignty. The agency which is to administer the agreement is not given any judicial, legislative, or other sovereign powers."

These two statements by Mr. Timberg are in direct conflict.

Mr. Timberg also said:

"The end result of the investigtaion of a particular complaint is the issuance, by the international investigating agency, of a report. This report examines, analyzes, and sets out the information received; determines whether the complained-of practice has had, has, or is about to have harmful effects within the meaning of the draft agreement; and makes recommendations in appropriate cases to the governments involved as to remedial measures (art. 3, pars. 6, 7, and 8; art. 15, pars. 4, 5, and 6; art. 16; art. 17; par. 52 of the ad hoc committee's report). The report by itself has no sanction except the informal one of publicity."

Adverse publicity for an American enterprise through the course of an investigation brought by this United Nations body could have damaging effects not only on the enterprise concerned but also on the international position of our Government. Let us not forget that it would be expecting too much of human nature for such an agency not to be used as a political instrument by many nations.

Mr. Timberg testified further that:

"However, governments adhering to the draft agreement are obligated to supply the information needed by the agency; to take appropriate action to implement the remedial measures recommended to them by the agency; and to keep the agency posted on their compliance.

"As stated earlier, governments adhering to the draft agreement are obligated to adopt investigative measures that will enable them to supply the international agency with the information needed to analyze complaints of restrictive business practices and to make intelligent recommendations. They also bind themselves to make adequate provision in their legal system for putting the agency's remedial recommendations into operation. They undertake to keep the international agency posted on their compliance with the agency's recommendations. Moreover, under the agreement, diverse national conceptions of 'harmful effect' are harmonized in a uniform standard."

Mr. Timberg is, in effect, proposing that this Government bind itself by a treaty to adopt whatever legal provisions are necessary to put the United Nations proposed agency's recommendations into operation.

Mr. Timberg states "* * * diverse national conceptions of 'harmful effect' are harmonized in a uniform standard." My examination of the draft agreement fails to disclose any standards whatsoever. The pargraphs I have quoted from Mr. Timberg's testimony clearly indicate that countries adhering to this agreement would delegate judicial and executive powers to this new international agency. Yet, Mr. Timberg again said:

"The international agency which would administer the draft agreement is an instrumantality of international cooperation, not an organ with sovereign judicial, legislative, or executive powers. This is a necessary concession to national sovereignty."

I am glad he still feels it necessary to make concessions to national sovereignty. This statement is, however, followed with another indication that the recommendations of the United Nations body would be enforced. He said:

"The tangible outcome of the agency's activity is an advisory report (like a Federal Trade Commission report) analyzing the facts and recommending remedial measures. However, there are assurances in the draft agreement that the analysis will be heeded and the recommendations complied with. Those assurances are to be found, first, in the specific obligations of governments to cooperate in the work of the agency, which have just been set forth, and second, in the publicity that the agency's reports will receive."

Let us go back and review the mechanics of how these recommendations to which Mr. Timberg refers would be made. The proposed agreement would establish a United Nations agency to administer the agreement. Its powers would be exercised by a representative body. Article 10 of the draft agreement provides as follows:

"The representative body shall consist of all members of the agency. Each member shall have one representative in the representative body. * * *

"Each member shall have one vote in the representative body."

In other words, if all the countries in the United Nations adhered to this proposed agreement there would be more than 60 members of the representative body embracing every form of economics from Russian communism to American free enterprise.

Article 10 also provides that:

"The representative body shall establish its rules of procedure. * * *

"The powers and duties attributed to the agency by this agreement and the final authority to determine the policies of the agency shall be vested in the representative body."

The authors of the agreement realized that such a group would be too unwieldly, so they provide in article 13 of the agreement for an advisory staff. Now let me quote from article 13:

"The chief advisory officer of the agency shall be the director of the advisory staff. He shall be appointed by the representative body and be subject to its general supervision.

"In accordance with any rules laid down by the representative body, the director shall select the advisory staff and any necessary consultants to it."

In other words, this one individual, the director of the advisory staff, for all intents and purposes, is the agency. This is clearly shown in articles 15 and 16 of the agreement which deal with the functions of the advisory staff.

"Pursuant to policies and rules prescribed by the representative body, the advisory staff shall (a) perform the functions set out in the following paragraphs of this article and (b) advise the representative body, subject to any limitations established by that body.

"After the executive secretary has collected information relating to a complaint in pursuance of the relevant provisions of article 3, and has transmitted it to the director of the advisory staff, the director shall arrange for the analysis of the information and for the preparation of a report by the advisory staff.

"The report of the advisory staff shall set out the facts established by the information aforesaid, together with such analysis of their effects and significance in relations to the objectives of the agreement as may assist the representative body in carrying out the duties laid on it by the agreement.

"When, in accordance with paragraph 3 of article 8, the representative body shall have arranged for the collection of information from members, all such information collected by the executive secretary shall be transmitted to the directory of the advisory staff who shall arrange for its analysis and for the preparation of a report in accordance with paragraph 4 of this article.

"Reports by the advisory staff shall be submitted to the representative body."

Paragraph 1 of article 16 provides that:

"The representative body, in carrying out the duties laid on it by this agreement, shall take full account of reports of the advisory staff."

Actually this agreement would entrust one individual, the director of the advisory staff, who might be a Russian Communist, a European Socialist, or an American capitalist with fantastic powers over the entire economy of the world.

It is quite obvious that Mr. Timberg feels that he is qualified for this assignment and he undoubtedly believes that the members of the Ad Hoc Committee who served with him are similarly qualified. In his testimony before the subcommittee he discussed the membership of the Ad Hoc Committee as follows:

"The chairman of the committee was a leading name Swedish economist and industry advisor and author of an outstanding study on 'Growth and Stagnation in the European Economy,' and is now a member of the Freedom of Commerce Board, an official Swedish antitrust agency established in 1953. The vice-chairman of the committee was Chairman of the Inter-American Economic and Social Council, and is now Uruguay's Minister to Sweden. The acting chairman, who presided over 2 of its 4 long sessions, was in the highest level of the Belgian Government and administered some of Belgium's most important economic policies. Canada was represented by the head of its antitrust department, and this country by the Chief Economist of the Federal

Trade Commission (Corwin Edwards). France's representative is now the United Nations Under-Secretary for Economic and Social Affairs. The other countries were represented by officials who had important responsibilities in connection with foreign trade, such as Commercial Counselor, Consul General or within the Board of Trade or Foreign Offices of their respective countries. All personal representatives operated under specific instructions from their national governments.

"I have gone into the composition of the United Nations Committee in some detail, because the draft articles of agreement relating to the administration of the United Nations proposals was the work of this talented group."

It is significant that none of these people would be the type of individual selected for appointment to high judicial office in the United States or qualified for an appointment to the International Court of Justice. They are political economists—not judges.

Mr. Timberg recognized that the reputation of individual firms and "national prestige" might be hurt by the investigative procedure even though the investigation later proved them blameless. In discussing the membership of the Ad Hoc Committee he said:

"Such a committee, composed preponderantly of representatives from industrial countries, could hardly fail to be aware of the fact that vital trading and economic interests were involved; that commercial interests and national prestige could be needlessly damaged by irresponsible or politically motivated complaints or publicity; and that there were risks in allowing countries with a small share in world trade to control international policies in this delicate area."

Mr. Timberg's only protection against these admitted problems is the integrity of his advisory staff. He said:

"It (the Ad Hoc Committee) therefore sought to safeguard against these contingencies by making various organizational and procedural recommendations, concerning such matters as independence, impartiality and competence on the part of the personnel that would administer the proposed program of international cooperation, the role to be played by countries of chief economic importance in international trade, and fair procedures for investigating the facts and reviewing and publicizing reports."

"The situation under the draft agreement seems to me analogous to that whereby the report of an administrative commission is prepared in this country; a qualified and nonpartisan staff prepares the original draft of the report, which is then reviewed by a politically responsible and responsive commission."

Let us remember that the advisory staff is a creature of the representative body. It is difficult for me to conceive of the so-called representative body, consisting of some 60 nations, as a "politically responsible and responsive commission" to deal fairly with the problems of an American enterprise submitted to its jurisdiction.

The representative body by its very nature is a political organization. Mr. Timberg in discussing the role of the representative body said:

"It is my observation that, on the international as well as national scene, there is a cooperative interaction between the policy makers and the research staff. National representatives as well as politically appointed commissioners, are concerned with major policy matters and accept to a surprising extent the work of their staff. Perceptive staff work helps smooth out the difficulties, and reconcile the differences, of the more politically oriented international representative body or national commission."

A "politically oriented international representative body, or a national commission" should not be entrusted to make decisions affecting the well-being of our entire economy.

Let us assume that an action was started against an American enterprise and the enterprise was found guilty of restrictive business practices by the director of the advisory staff. Let us for the purpose of argument also assume that the United States representative on the representative body did not believe the complaint justified. He would have 1 vote out of some 60 votes, and would be required to adopt the usual United Nations procedure of lobbying for votes among the other representatives in order to reverse the findings of this one man who heads the advisory staff. Such a procedure is not conducive to the success of the United Nations or to American prestige therein. Furthermore, if he is unable to reverse the staff which would probably be the case in view of the composition of the representative body, we would then be bound by treaty to implement the findings of the staff. I can think of no more impossible situation.

Let us examine the terms of references under which these judgments would be made. In his appearance before the subcommittee Mr. Timberg said, and I quote:

"Definition of restrictive business practices: The draft agreement prepared by the U. N. committee deals with restrictive business practices, which are defined as 'business practices affecting international trade which restrain competition, limit access to markets, or foster monopolistic controls' (art. 1, par. 1). Restrictive business practices are not only defined, but are specifically listed as embracing exclusion from markets or dividing markets, price fixing, price discrimination, limitations of production, and specific types of patent, trademark and copyright abuse (art. 1, par. 3). This enumeration seems to me to cover adequately the main areas to which this country's enforcement of the Sherman Act in international trade has in the past been directed."

Upon examination of the draft charter, I find the practices enumerated by Mr. Timberg are listed in article 1, paragraph 3. While Mr. Timberg refers to specific types of patent abuse in his testimony, I find upon reading article 1, paragraph 3 of the agreement, that the practices affecting patents and technology are far broader than Mr. Timberg stated. Article 1, paragraph 3, subparagraph (e) reads as follows:

"Preventing by agreement of coercion the development or application of technology or invention whether patented or unpatented, or withholding the application of such technology with the result of monopolizing an industrial or commercial field."

In other words, the withholding of technology by an American enterprise or perhaps even our own Government could be the basis of a complaint to the United Nations agency that a restrictive business practice was taking place. The entire patent system is placed in jeopardy by this proposal.

Mr. Timberg, however, neglected to mention all of paragraph 3. I am startled by subparagraph 3 (g) which reads as follows:

"(g) Any similar practices which the organization may declare, by a majority of two-thirds of the members present and voting, to be restrictive business practices."

In other words, this agreement proposes that we write the antitrust laws as we go along by a two-thirds vote of the members of the representative body who happen to be present. Mr. Timberg's friends will then determine what they mean. This is hardly in keeping with American concepts of jurisprudence. Mr. Murchison's testimony meets these issues squarely. He said:

"There are many other defects in the concept underlying the agreement. For instance, the draft agreement's lack of provision for the selection of independent, impartial judges to pass upon matters brought before the tribunal is glaringly apparent. Use of the term 'representative body' to describe the tribunal should not obscure the fact that it would perform functions basically judicial in nature, indeed, very similar to those performed by the Federal Trade Commission in this country. It would seem essential, especially in the field of business practices, for voting members of the tribunal to make their decisions impartially and on a record, rather than as representatives of a particular government or interest."

Again let us examine the agreement to see how a respondent in a complaint would be treated. Article 15, paragraph 3 provides:

"3. The director of the advisory staff shall arrange for opportunities to be given in accordance with paragraph 5 of article 3, for any member or any person, enterprise, or organization on whose behalf the complaint has been made, or any commercial enterprise alleged to have engaged in the practice complained of, to be heard by the advisory staff: *Provided, however,* That the representative body in its discretion may afford opportunities for such persons to be heard by it after it has received the report of the advisory staff."

Mr. Murchison in his testimony on this point said:

"There is a perceptible lack of basic procedural safeguards governing the operation of the tribunal. No provision is made concerning the rights of parties appearing before it. These rights, which are commonly accepted in the English-speaking countries, and considered essential in our own, should certainly include the opportunity to be represented by counsel, to examine, cross-examine, and reexamine witnesses, and the like."

I think I have pointed out enough of the contradictions in Mr. Timberg's tetimony and inconsistencies with American concepts of fair play and Anglo-Saxon jurisprudence to fully justify the position of our Government in rejecting the draft agreement. The amazing thing to me is that the ad hoc committee was established in the first place by a resolution introduced in the United Nations by this Government under the Truman administration to implement Mr. Timberg's pet ideas.

I am sure you cannot fully appreiate the difficulties you have been spared by our Government's rejection of this agreement. Mr. Timberg's statement exposed one of the implications of the draft agreement to the mining industry which is rather startling. After stating to the subcommittee that the proposed agreement on world antitrust laws did not give any judicial powers to the United Nations, Mr. Timberg endeavored to explain how the agreement would work with a hypothetical situation. His hypothetical case is one which directly involves everyone in this room and I want to read from his testimony. This is what he said:

"Let us assume that the General Services Administration was involved in an alleged restrictive practice in the importation of some critical material from a foreign country. First, a complaining government would have to bring its complaint in its own behalf, and not merely in behalf of its nationals. Second, the complaining government would have to take the matter up in the first instance on an informal basis with the United States Government, which controls the General Services Administration, so as to exhaust the possibilities of rectifying the situation expeditiously and without fanfare. In

cases involving complaints against private enterprises, governments may (but are not required to) resort to such informal consultations. Once informal consultations fail, a complaint against a public enterprise is handled exactly as is one against a private enterprise."

The Cabinet Committee on Minerals Policy, whose program Secretary Wormser has outlined, recommended that all stockpile objectives be reviewed and new long-term objectives established to reduce and wherever possible eliminate foreseeable wartime shortages. The Cabinet Committee specifically stated with respect to the materials required to meet the new long-term objectives that "in making purchases preference should be given to newly mined metals and minerals of domestic origin." This is the kind of restrictive practice engaged in by the General Services Administration which Mr. Timberg would like to submit to the United Nations.

Mr. Murchison paid a tribute to the State Department under the Eisenhower administration in his appearance which I heartily endorse. He said:

"Fortunately, the United States delegation to the Economic and Social Council in 1955 was well aware of this background. Headed by Preston Hotchkis, and assisted by such able persons as Mr. Joseph C. Hickingbotham, Mr. Nat King, and others in the Department of State, the delegation reversed our Government's earlier stand and opposed the recommendations contained in the report. This turnabout was a difficult diplomatic operation, and Mr. Hotchkis and the entire Department of State should be commended for the admirable way the matter was handled. United States opposition to international machinery of the type recommended was firmly and clearly stated. As a result, the resolution adopted at the close of the May 1955 session of the Council did not approve the report."

Mr. Timberg's testimony clearly shows that he has no understanding of American constitutional government with its division of powers between the executive, judicial, and legislative branches. He suggested to the subcommittee an amendment to the antitrust laws, and again I shall read from his testimony:

"My third suggestion is that the Congress enact legislation whereby antitrust violators, whose practices have excluded competition or raised prices and whose product is protected by a tariff, may, in appropriate circumstances, lose the benefit, in whole or in part, of that tariff."

If we ever start writing our laws by permitting the judicial branch of the Government to invoke changes in the law as a penalty we are in for very serious trouble. The House Ways and Means Committee under our Constitution is responsible for initating all tariff legislation. As a former member, I am qualified to label this proposal as fantastic.

As you know, the development of a sound stockpile policy and tariff legislation have occupied my thoughts for many many years and you can understand why I take a very dim view of Mr. Timberg's proposals.

History reminds us of the famous quotation that "Eternal vigilance is the price of liberty." At present the fires are out on agreements dealing with restrictive business practices and commodity agreements under United Nations auspices. However, the appearance within the past month of Mr. Timberg before this subcommitte shows that the concepts are not dead.

This group representing the leadership of the entire mining industry must support your Government officials who have been carrying on this fight and you must make certain that this policy is never reversed by any future administration which may be less dedicated to free enterprise concepts than President Eisenhower.

Address by Hon. William F. Knowland, California, Before the Economic Club of New York

EXTENSION OF REMARKS

OF

HON. WILLIAM F. KNOWLAND

OF CALIFORNIA

IN THE SENATE OF THE UNITED STATES

Tuesday, January 17, 1956

Mr. KNOWLAND. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD an address I made last evening at the Economic Club of New York.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

Mr. Chairman, members, and guests of the Economic Club, Americans, regardless of their party affiliation, are pleased to have noted the excellent progress toward recovery that President Eisenhower has made and the fact that he is once again able to resume his duties in the Nation's Capital.

The President has already sent the state of the Union, the agriculture, education, and the budget messages to the Congress. All of these documents have recommendations of great importance to our national life.

Now the 84th Congress as the constitutional repository of the legislative power will determine how much of the recommended program will be adopted and in what final form.

Events may take place this year in Europe, Asia, Africa, in the Western Hemisphere, or in the Middle East that could set off a chain reaction of far-reaching significance.

It is important that in this year when political tensions may mount at home and international stresses may take place abroad, that all those in Government should speak with responsibility and with the knowledge that what is said may be distorted to serve the purposes of those who would destroy human freedom throughout the world.

Yet, in a free Republic it is equally important that those in Government speak with frankness. The American electoral result of 1956 may be one of the great decisive events of modern history.

Our international relations have a great impact on our domestic economy as well as upon other nations. Foreign policy is too important to be left to Government alone. It is of concern to 165 million Americans.

The age of colonialism is dead. Our own excellent record in the Philippines and elsewhere has been marred by impressions in Asia and the Middle East that we have allowed ourselves to be compromised by association with the colonial policies of Great Britain and France.

Countries could understand us better with our noncolonial record in the Philippines and Cuba and our own successful fight for independence if we would say frankly that our foreign policy is based on what is best for America.

They know we seek no territory and that we have an intuitive national conviction that our own survival as a free nation will be better served by assuring a free world of free men that by any system which attempts to hold the loyalty of people by force of armed power and against their national will.

In 1858 a young and growing nation faced a great issue of principle over the expansion of slavery beyond its then limits. Abraham Lincoln, at that time a candidate for the United States Senate, said:

"If we could first know where we are, and whither we are tending, we could better judge what to do and how to do it."

Our aim should be to live in peace with all nations, but to pay tribute to none.

Our desire is for a system of international law and order based on peace with honor and justice.

A world in which small or large nations would have to live in fear of imminent violence or to buy a temporary respite by the payment of extortion is not the sort of existence that we or the other free peoples of the world are seeking.

A decade has passed since the conferences of Yalta and Potsdam, the end of World War II, and the founding of the United Nations in San Francisco.

Today as part of a series of discussions I intend to carry on in the Senate and throughout the country, I desire to review certain aspects of the problem that needs to be considered not only by the executive branch of the Government but by the Congress and the country as well.

In 1945 this Nation was the greatest military power in the world and was sole possessor, as the trustee of free men everywhere, of the atomic weapon. In order to help defeat the Axis Powers our resources had been placed at the disposal of our allies in Europe, Asia, and Africa in astronomical amounts which had no parallel in all recorded history.

From December 7, 1941, at Pearl Harbor until V-J Day in 1945 our Armed Forces had made a great contribution to the common effort and we suffered substantial casualties in helping to bring the war to a successful close.

In all of this mighty effort, costly in manpower and resources, we sought no territory and no reparations. The American people had reason to believe that the terms of the Atlantic Charter would be honored by us and we expected it to be respected by others.

America's prestige and power were high throughout the world. It was in that year, 1945, when we had the great opportunity to lay a firm foundation for human freedom and for a system of international law and order; for peace based on honor and justice.

When 1945 opened there were less than 200 million people behind the Communist Iron Curtain.

Now, just 10 years later, we are confronted with the following facts:

1. Over 900 million people are behind the Communist Iron Curtain and their totalitarian rulers are united in the common objective of making a Communist world.

2. Governments representing approximately 500 million people have determined to follow a neutralist course rather than to assume the responsibilities of an effective collective security system. They can afford this luxury because others have undertaken the necessary security burdens.

3. In the free world we have approximately 900 million people associated together in a series of interlocking mutual defense pacts. The United States of America appears to be the keystone to the arch, but the columns seem at times to be on shifting sands.

4. The United Nations on its major test as an effective collective security system during the Communist aggression in Korea (1950–53) had the following record:

A. Only 17 out of the then 60 members supplied any armed forces to resist the aggression.

B. The United States of America alone supplied 90 percent of the military forces furnished by the United Nations members and 95 percent of the resources to carry on the collective security action.

5. In the post-World War II period the United States has furnished over $52 billion in grants and loans to allies and former enemy nations.

6. We have a national debt of $280 billion and a budget of $65 billion. Our taxes, personal and corporate, are high and in some instances confiscatory in character. Many of our citizens have had to borrow funds to meet their income tax bills.

It is not my contention that all the virtues are in one political party or all the faults in the other. Members of both parties can fairly share part of the credit and assume part of the blame.

During the decade, 1945–55, the Democrats controlled the executive branch of the Government for 7 years while the Republicans have been in control for 3 years. The administration in power, of course, has the responsibility for the day-to-day formulation and direction of our foreign policy. In this same period the Democrats have had control of both the House and Senate for 6 years and the Republicans were in control for 4 years.

I refer to the past not for the purpose of opening old wounds or in any narrow partisan spirit, but with a deep conviction that in the 1955–65 decade the survival of our country may be at stake and with it the hope for a free world of free men.

As long as there is a strong America which stands for principles which free people and temporarily enslaved ones can understand and respect there is hope for mankind.

This strength is not primarily based on our material wealth though without it we could not support our own defense nor help others to help themselves.

Our real strength is the spirit and courage which under divine guidance, allowed a small colony of 3 million dedicated people to rise up and strike off the chains of colonialism despite the opposition of the mightiest empire of that day.

Our Revolutionary leaders represented the spirit of the song which states:

"Start me with 10 who are stout-hearted men and I will soon give you 10,000 more."

Whither are we tending? Will the next 10 years show the same progress of Marxian socialism? Is there any real indication that the Communist leopard has changed its spots? I believe not.

On July 28, 1955, in the Senate of the United States I said:

"Neither we nor the free world must lull ourselves into a 'Little Miss Red Riding Hood' belief that because the wolf has put on grandmother's cap and nightgown that his teeth are any less sharp or his intentions any less menacing."

President Eisenhower in a great desire to explore the possibility of a changed Soviet policy agreed to the meeting at the summit.

He also knew that a number of the allied governments as well as Members of Congress (including the distinguished Democratic Senator WALTER GEORGE, chairman of the Senate Foreign Relations Committee) had urged such a meeting.

The President made it clear that the acid test of Soviet intentions would come at the subsequent foreign ministers' meeting.

Results of that meeting clearly showed that the Soviet Union would not:

1. Agree to free elections throughout a free and sovereign Germany or permit a unification of Germany except on terms that would result in Communist domination of the whole country.

2. Support an adequate system of armament inspection of conventional weapons.

3. Consider the carrying out of their obligations under the Atlantic Charter to permit free elections in the captive nations of Poland, Czechoslovakia, Latvia, Hungry, Esthonia, Roumania, Lithuania, Bulgaria and Albania.

4. Agree to effective safeguards in the matter of the control of atomic weapons.

Stripped of Communist double-talk their position was and is that tensions can only be released through the Soviet brand of "peaceful coexistence" which would be based on a permanent enslavement of the satellite states of Eastern Europe, a united but Communist Germany, the breaking up of the North Atlantic Alliance and the system of western defenses.

If there were any so naive, in or out of government at home or abroad, as to have believed that the Communist leopard had changed its spots such thoughts should have been dispelled by the reported statements of Khrushchev made at the dinner given on September 17th to the East German Communist Premier Grotewohl. He said:

"Anybody who takes our smile for withdrawal from the teachings of Karl Marx or Lenin is making a mistake.

"Those who expect this will have to wait until Easter Monday falls on Tuesday."

At a Moscow gathering of the Kremlin heirarchy Soviet First Deputy Premier Kaganovich on November 6, 1955, said:

"If the 19th century was a century of capitalism, the 20th century is a century of the triumph of socialism and communism."

But perhaps the clearest expression of Soviet immorality in dealing with other nations was expressed by the late Joseph Stalin:

"A diplomat's words must have no relation to actions—otherwise what kind of diplomacy is it? Words are one thing, actions another. Good words are a mask for the concealment of bad deeds. Sincere diplomacy is no more possible than dry water or iron wood."

The test of the accuracy of the Stalin diplomatic doctrine is demonstrated by the broken treaties and subjugated nations along the periphery of the Soviet Union: Latvia, Lithuania, Estonia, Poland, Czechoslovakia, Hungary, Rumania, Bulgaria; all had to learn the hard way.

Do vodka toasts change these words and modify these facts? They do not.

When the free nations of the world retreat from principle and embrace a "package deal" on membership that a short time ago they designated as "unadulterated blackmail," is not our moral position greatly weakened?

When the Republic of China, now reduced to the island of Formosa, and the off-shore islands, is told that if they exercise their veto under the United Nations charter they will likely lose their own membership, is not the conscience of free men troubled?

When the international court has ruled that a "package deal" is a violation of the United Nations charter and the ruling is ignored, is this not nullification of judicial processes?

Is the United Nations now to be governed by expediency instead of principle? At San Francisco in 1945 it was agreed that only qualified nations which assumed the obligations under the charter were eligible to membership. At New York in 1955 governments frankly recognized to be without such qualifications were taken in at the adamant insistence of the Soviet Union.

The final test will come later this year, probably after our national elections, as various members connive to bring Communist China into that organization.

Munich should have taught the world that the road to appeasement is not the road to peace. It is only surrender on the installment plan.

Do not these events and contemplated actions bring to a focus the need for a reappraisal?

If it is not done by the executive department and the Congress it will be done on the Main Streets of America.

Can our economic system survive prolonged burdens of building a system of collective security and a system of neutralism at one and the same time?

If the neutralists are to receive the benefits and have none of the responsibilities of those in the collective defense system will not that act as an incentive plan to build up the fence sitters?

Certainly we should not endavor to remake the world in our political or economic image. We should recognize that neither personal nor international friendships can be purchased, they must be earned.

It is not and it should not be our policy to impinge upon the sovereignty of any nation. We do have a right and I believe a duty to point out as clearly as we can the dangers we believe are confronting free men everywhere.

We can and should point out that we and many of our associates have believed that our own survival and that of free men elsewhere depends upon an effective system of collective security. Whether or not any nation desires to join that system is for their government and their people to decide.

We could I believe properly point out that even the resources of this Nation are limited, that our people are bearing heavy burdens of debt and of taxes. We could point out that many worthwhile projects for the improvement of our own Nation have of necessity been held in abeyance because of the importance of helping rehabilitate the great damage and dislocation growing out of World War II.

We can and I believe should point out that in this country our growth and productivity has come because of the liberties guaranteed under our Constitution and our free economic system. American enterprise has supplied the taxes or the wages and dividends from which taxes are collected to carry in part the heavy burdens of the war and post-war period. The balance from deficit financing has added to the vast debt confronting ourselves and our children.

So that our own people and our friends abroad may understand the magnitude of this debt the following should be noted:

1. With principal payments of $1 billion a year (which was the total cost of all activities of the Federal Government in 1913) it would take 280 years to retire the national debt.

2. If we had started January 1, 1956, paying off on the debt at the rate of $1 million a day it would be the year 2725 before the last payment would be made. (A total of 769 years.)

We could and should point out I believe that in the event of disaster or famine our people, in the future as they have in the past, will generously respond to the relief of human distress and that in this aid there will be no political commitments expected or required of the nations and people we would be helping.

We can and we should point out I believe that we are prepared to help furnish, where requested, technical advice in the fields of public health, agriculture, education, or industry to help other free nations of the world in meeting their problems in these and similar fields.

We can also, I believe, point out that if the economic and political climate is made encouraging there is substantial private capital in this and other nations of the world that could help develop the natural resources, the transportation systems, and the industry of such countries as such investments helped to develop ours.

In this atomic and airplane age in which we now live this Nation can no more return to isolation than an adult can return to childhood.

An effective system of collective security will have to be created and maintained as long as the menace of aggressive communism continues.

In helping our associates who have demonstrated a willingness to do their utmost to help themselves, we will have substantial burdens. Within the policy of building an effective collective defense the President

should have some flexibility in the allocation of funds appropriated by Congress.

But is it wise to continue to pour out billions of dollars of additional American aid over a prolonged period of time to nations:

1. That assume no collective security obligations for the preservation of human freedom, but desire to get all the advantages furnished by such a system on a free-ride basis?

2. That have made no reasonable effort to attract private capital to help develop their resources?

3. Whose leaders use their efforts to travel about the world attempting to seduce nations away from collective security into neutralism when such efforts coincide with present Soviet strategy?

As to the latter I recognize a sovereign right of any government or any people to choose the road of Fabian or Marxian socialism if that be their free choice. I question their right to expect or to get long-term government to government grants and loans which keep adding debt and tax burdens to the American free-enterprise camel to the point where its back is broken.

Every responsible man and woman at home and abroad must recognize that if the United States could be destroyed or impoverished by overt aggression from without, by political subversion from within, or by economic collapse, we would likely take the whole free world down with us.

There would then be no oasis of freedom to which those already enslaved might look for hope and there would be no international cornucopia upon which we might call for our own rehabilitation.

On these and other issues confronting us, men in and out of Government may honestly differ. In a free society there is room for such differences and there are certainly no pat solutions for the complex foreign and domestic problems that confront us.

But likewise in a free society it is important that these matters be brought into the open and that they be discussed.

It is my firm belief that if we win the cold war we can prevent a hot war from developing. I believe that this can best be done from a position of strength.

It is not now nor has it ever been my belief that we should have a "get tough policy."

On matters of principle I believe that we should be firm and should not yield principle for expediency. In the working out of the negotiable issues I think we should be reasonable in our attitudes and recognize that conditions change in the world and a policy which was wise 5 years ago or 1 year ago may need modification today.

But I do not believe that we should ever feel it necessary to apologize for either our political system or the economic system which has enabled this Nation to grow from a small colony of 3 million on the Atlantic seaboard to a great nation of 165 million, the most productive the world has ever known.

It is my personal belief that we would command more respect from our allies, from the neutrals, and from our potential enemies if we insisted on a fair quid pro quo for agreements entered into. We should stress the point that an alliance is of little value unless the other party has as much obligation to come to our defense in case of attack as we have to go to theirs.

As a Senator of the United States, as well as an American citizen, I have a deep conviction that if we of this generation will use the same courage and commonsense that motivated the men who sat at Philadelphia and under what I believe was divine inspiration, gave us first our Declaration of Independence and later our Constitution of the United States, there are none of our great domestic problems which we as a free society cannot solve and there is no foreign foe we need ever fear.

Efforts To Obtain Arbitration in Strike of Electrical Workers Against Westinghouse Electric Corp.

EXTENSION OF REMARKS
OF
HON. PAT McNAMARA
OF MICHIGAN
IN THE SENATE OF THE UNITED STATES
Tuesday, January 17, 1956

Mr. McNAMARA. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD a number of documents which detail efforts to secure arbitration in the strike by the International Union of Electrical Workers against the Westinghouse Electric Corp.

I believe Senators will be interested in these documents, which reveal that outside parties, including governors, mayors, Congressmen, and the director of the Federal Mediation and Conciliation Service, have urged arbitration or a fact-finding board as a means of aiding settlement of this dispute which has been underway since October 17, 1955. In each of these instances, the union agreed to the proposal, while the company refused.

The documents, I believe, speak for themselves.

There being no objection, the documents were ordered to be printed in the RECORD, as follows:

TEXT OF TELEGRAMS FROM GOV. GEORGE LEADER, OF PENNSYLVANIA, AND GOV. AVERELL HARRIMAN, OF NEW YORK, TO PRESIDENT JAMES B. CAREY, OF IUE-AFL-CIO, AND CAREY REPLIES

DECEMBER 19, 1955.

A nationwide strike of over 50,000 Westinghouse Electric Corporation employees is now going into its 10th week. As Governor of a State in which these strikers live and in which Westinghouse has its plants, we have been watching this situation with growing concern.

We have been advised that despite many weeks of discussions, representatives of the International Union of Electrical, Radio and Machine Workers, AFL-CIO, and the company have been unable to find a basis for settlement of the dispute.

Furthermore, evidence is accumulating that the strike is getting to the stage of bitterness where serious violence may result.

Under these circumstances, and because of our earnest desire to see industrial peace restored in Pennsylvania, particularly in this season of the year, we urge the union and the company to submit their dispute to final and binding arbitration. While this arbitration is proceeding the employees would be back at work.

We appeal to the leaders on both sides as men of good will to accept our proposal.

GEORGE LEADER,
Governor of Pennsylvania.

DECEMBER 19, 1955.

I am distressed that after all these weeks there has been no settlement in the Westinghouse strike which affects some 4,000 workers in Buffalo. I urge both the company and the union to submit their differences to arbitration and if this is agreed upon that the employees go back to work pending the decision of the arbitrator.

The State government stands ready to aid in bringing about a settlement of this dispute if its services can be helpful.

AVERELL HARRIMAN,
Governor of New York.

PRESIDENT CAREY'S REPLY TO BOTH GOVERNORS

DECEMBER 19, 1955.

We have received your telegram urging Westinghouse Electric Corporation and International Union of Electrical, Radio and Machine Workers, AFL-CIO to arbitrate the issues in the dispute that has kept 55,000 Westinghouse workers on a strike now in its 10th week.

This is to advise you that the union accepts your recommendation without reservation. If the corporation does the same, we are prepared to work out details immediately.

The International Union of Electrical, Radio and Machine Workers, AFL-CIO deeply appreciates the interest you have shown in an effective settlement of this nationwide strike.

JAMES B. CAREY,
President IUE-AFL-CIO.

REJECTION BY WESTINGHOUSE

We fully understand the desire to turn this dispute over to arbitration. It is true that many types of labor disputes can be properly submitted to arbitration. However, in this matter, because of our obligations to stockholders, we cannot delegate to a third party a decision which would affect the competitive standing of our company for at least the next 5 years.

JOINT STATEMENT OF REPRESENTATIVE AUGUSTINE B. KELLEY AND REPRESENTATIVE HERMAN P. EBERHARTER

A strike in 38 plants across the country of more than 50,000 employees of the Westinghouse Corp.—the 12th largest corporation in the Nation—is nearing the end of its 10th week. There are no signs a settlement of the dispute is being reached. A skillful and conscientious veteran official of the Federal Conciliation and Mediation Service, John Murray, has kept the parties to the dispute in discussion over many weeks to no avail.

A few days ago, the Governors of three States in which Westinghouse plants are located—George Leader, of Pennsylvania, Theodore McKeldin, of Maryland, and Averell Harriman, of New York—appealed to President Gwilym Price and his co-officers of Westinghouse and to President James B. Carey and his associate leaders of the International Union of Electrical, Radio, and Machine Workers, AFL-CIO, principal union involved, to submit all issues in dispute to final and binding arbitration.

Mr. Carey and his associates immediately accepted the proposal. Mr. Price and his rejected it. We note that Governor Leader said in his appeal the strike has reached a stage of bitterness threatening to result in violence.

We urge the Westinghouse Corp to reconsider its rejection of the Governors' appeal. We place our faith in collective bargaining, but when that breaks down, as in this case, we turn to arbitration. We are strong believers in voluntary arbitration. We believe it is an important instrument of true democratic principles. We believe its application during the great industrial development of our country has done much to strengthen the democracy of our society. Its methods are the antithesis of those relied on by autocracy. It is based on the rule of reason.

In their rejection of the Governors' appeal, we note that Mr. Price and his Westinghouse fellow officers state that "because of our obligations to stockholders, we cannot delegate to a third party a decision which would affect the competitive standing of our company for at least 5 years." We earnestly suggest to them that, if they still decline to reconsider the Governors' proposal, they submit the simple question of arbitration to their stockholders. We learn from Government records there are approximately 16½ million shares of Westinghouse stock outstanding, widely distributed. We further

learn that Mr. Price and the Westinghouse board of directors hold slightly less than two-tenths of 1 percent of the outstanding shares.

It is hard for us to believe the stockholders would feel arbitration would endanger their company as much as a continuation of the deadlock and the already-long-drawn-out strike with its mounting animosities. The employees would go back to the plants while the processes of arbitration are functioning.

JERSEY CITY, *December 22, 1955.*

JAMES B. CAREY,

President IUE, Washington, D. C.:

As mayor of Jersey City where Westinghouse Electric Corp. elevator division has enjoyed a productive 20 years from both company and municipal viewpoints I send you this Yule message. In the interest of continued productivity for your great company and its many thousands of stockholders and in the interest and welfare of 5,500 employees on strike 1,200 of them from Jersey City I respectfully even prayerfully urge that the spirit of the Prince of Peace be permitted to enter the field of differences which has brought about this 10 weeks of strike so costly to both management and union. I urge that this spirit bring about agreement for arbitration of the grievances as soon as possible so that the somberness attendant with halted production lines be lifted and a happier holiday be celebrated by all concerned.

Mayor BERNARD J. BERRY,
City Hall, Jersey City.

BUFFALO, N. Y., *December 23, 1955.*

JAMES B. CAREY,

IUE, AFL, CIO, Washington, D. C.:

Approximately 20,000 workers and members and their families in the greater Buffalo community are directly affected by the Westinghouse strike. In the public interest we urge that both labor and management agree immediately to submit this dispute to arbitration before an impartial board of arbitrators, the decision of the arbitrators to be final and binding upon both parties. Continuance of this dispute over 10 weeks has brought great suffering to the workers in this area and the members of their families. Their personal hardship is even more difficult at this holiday season. To date the parties to this dispute have themselves been unable to reach settlement. Time has come to invite impartial arbitration, otherwise human suffering will continue in our community. We feel confident that in fairness to the stockholders at Westinghouse, the workers, their families and most important, the public interest, that immediate acceptance of arbitration by both parties is imperative.

We the undersigned, are willing to arrange a special meeting in Buffalo designed to settle this strike through arbitration in cooperation with Mayor Sensenbrenner's Committee of Mayors, if you feel such a meeting will bring immediate arbitration and settlement.

May we have the courtesy of an immediate reply? For your information a second wire of this exact text is being sent to Gwilym Price, president, Westinghouse Electric Corp.

STEVEN PANKOW,
Mayor of the City of Buffalo.
BENEDICT T. HOLTZ,
Supervisor, Town of Cheektowaga.

JANUARY 4, 1956.

A labor management dispute between the Westinghouse Electric Corp. and International Union of Electrical Workers, AFL–CIO resulting in a work stoppage involving approximately 45,000 employees has been in progress since October 17, 1955. It is my conclusion based upon conferences with representatives of the parties and representatives of this Service, that no substantial progress has been made toward a settlement of this dispute during the intervening period of upward of 80 days. The economic effects of this work stoppage have had a serious adverse effect on many thousands of other workers and upon other related industries. Representatives of the Federal Mediation and Conciliation Service have exerted every effort in an attempt to assist the parties voluntarily to work out for themselves a satisfactory settlement, but these efforts have not proven successful.

The public interest demands, in view of this impasse, that every method be resorted to by the parties in an attempt to resolve this collective bargaining stalemate.

In view of these factors, I therefore, recommend to the company and the union, that they agree to submit all of the disputed issues which gave rise to this stoppage to a fact-finding board. This board shall report its findings of facts and recommendations to the parties and to the Federal Mediation and Conciliation Service as the basis it considers affords opportunity for negotiation by the parties to an honorable settlement to this dispute which will be fair and equitable to both parties. The findings of fact and recommendations made by this board shall not be final nor binding upon either party. Such findings of fact and recommendations shall be made in writing and returned to the parties as expeditiously as possible for purposes of further collective bargaining. The board shall be empowered to inquire into and ascertain all of the facts surrounding the dispute through direct contacts, hearings, or any such other manner as a majority of the board may believe necessary or advisable to enable the board to accomplish its purpose.

The board may be dissolved by mutual consent of the parties at any time they feel they can effect a solution of this dispute without the aid of the board.

I further recommend that each party designate a board representative and notify us in writing within 24 hours of such designation; upon receipt of both designations I shall immediately proceed to appoint an impartial public member of the board who will act as its chairman.

I will appreciate being advised by letter or telegram as to whether this suggested procedure for settlement of this long and costly strike is acceptable.

JOSEPH FINNEGAN.

UNION'S REPLY TO DIRECTOR FINNEGAN'S STATEMENT AND RECOMMENDATION

The procedure set forth in your communication of January 4, 1956, is accepted; and if Westinghouse will agree with the IUE to be bound by the findings and not discriminate against any striker then work could be resumed immediately under our present agreements as modified by the findings.

JAMES B. CAREY,
President.
AL HARTNETT,
Secretary-Treasurer, International Union of Electrical, Radio and Machine Workers, AFL-CIO.

TELEGRAM SENT TO GWILYM PRICE BY GOVERNOR FRANK J. LAUSCHE, JANUARY 5, 1956

Mr. GWILYM A. PRICE,
President, Westinghouse Electric Corporation Pittsburgh, Pa.:

Inasmuch as Mr. Joseph F. Finnegan, Director of Federal Mediation and Conciliation has recommended a voluntary fact-finding board be set up to attempt to settle the current dispute in which your company and its workers are involved and inasmuch as it is my belief that the interests of the company, the employees and the general public will best be served through compliance with Mr. Finnegan's recommendation I urge that Westinghouse Electric Corp. grant its consent to comply with the proposal.

FRANK J. LAUSCHE,
Governor of Ohio.

PITTSBURGH, PA.,

JOSEPH F. FINNEGAN,
Director, Federal Mediation and Conciliation Service
United States Department of Labor
Washington, D. C.:

There are circumstances in which a fact-finding board, as suggested by the Federal Mediation and Conciliation Service, can serve a useful purpose in settling management-labor disputes. The issues in the present controversy between Westinghouse and the IUE (AFL-CIO) are not proper subjects for this type of procedure.

The question in point is simple but fundamental: Can the management of a company refer to any agency, not responsible for the job security of the company's employees nor for the interests of its stockholders, the authority to make recommendations which may well have the practical effect of determining whether that company will be at a disadvantage for 5 years with its major competitor. As you know, the IUE has already made a 5-year settlement with our major competitor, similar to the Westinghouse offer which IUE has rejected.

Another very important consideration is the fact that 26 unions, including several also affiliated with the AFL-CIO, representing over 25 percent of all union-represented people in Westinghouse, have without striking already signed 5-year agreements embracing principles and benefits that the IUE refuses to accept, and which would be issues subject to fact-finding and recommendations under your proposal. The contemplated procedure would place both the company and these other unions in an unfavorable position because they engaged in genuine collective bargaining and arrived at agreements without any stoppages of work.

For the foregoing reasons we cannot accept your proposal of January 4.

We believe our employees, whose job security is at stake, understand the issues better than any fact-finder who has no personal stake whatsoever in the resolution of these issues. Therefore, we respectfully request that the Federal mediation and conciliation service consider recommending to the parties that, as an alternate to your proposal, a secret ballot be conducted under your service's auspices on whether the IUE-represented employees wish to accept the company's offer and return to work or continue the strike. We will cooperate in every way to assist you in expediting the holding of such an election.

One of the reasons prompting this alternate proposal is the fact that title II of the Labor Management Relations Act of 1947, section 203, dealing with the functions of the Federal Mediation and Conciliation Service, specifies in paragraph (C): "If the director is not able to bring the parties to agreement by conciliation within a reasonable time, he shall seek to induce the parties voluntarily to seek other means of settling the dispute without resort to strike, lockout, or other coercion, including submission to the employees in the bargaining unit of the employer's last offer of settlement for approval or rejection in a secret ballot. The failure or refusal of either party to agree to any procedure suggested by the director shall not be deemed a violation of any duty or obligation imposed by this act."

We firmly believe that our proposal for a secret ballot is truly a traditional American procedure, as Congress clearly indicated by mentioning it specifically in defining the functions of your service.

ROBERT D. BLASIER,
Vice President, Westinghouse Electric Corp.

REPLY OF UNION TO PROPOSALS MADE TO THE UNION AND COMPANY JANUARY 11 BY A MEETINGS OF MAYORS OF WESTINGHOUSE PLANT CITIES

We are grateful for the participation and interest of the mayors, and the country owes them a debt. We are gratified by their statement today in that it endorses two basic positions already taken by our union. We proposed and proposed again round-the-clock, 7-day-a-week collective bargaining to start immediately and until the strike is settled.

We long ago proposed and riterate a proposal for an interim agreement which we presented today to the mayors. This includes the following points:

1. That we get now assurances in writing that there will not be wage cuts as a result of the company's new time study program and disputed issues will be arbitrated.

2. Negotiations on wages under our current contract will continue for 30 days after the return to work. If no agreement is reached at that time the amount of the wage increase will be submitted to arbitration.

3. Negotiations to start as soon as the wage issue is settled on the question of a longer term agreement.

On the basis of such an interim agreement the strike could be settled immediately.

REJECTED BY PRESIDENT PRICE OF WESTINGHOUSE

It is very evident that the mayors tackled this difficult problem with great earnestness and objectivity. Also the company believes that the mayors' proposal has considerable merit. The problem is that the negotiation of an interim arrangement under which the IUE would agree to its members coming back to work would probably be difficult and time-consuming in view of the qualifications placed by the union. Furthermore the official negotiations under sponsorship of the United States Mediation and Conciliation Service are expected to continue and it might well be that these negotiations would produce a permanent settlement more quickly than the temporary one suggested by the mayors. Furthermore, Mr. Joseph F. Finnegan, Director of the Federal Mediation and Conciliation Service, has requested both the company and the union to desist from public proposals and counterproposals and to rely on the normal processes of closed negotiating sessions. Accordingly, while we do not reject the majors proposal, be wellieve it is a wiser course of action for the time being to pursue the prospects of a settlement in the regular negotiating sessions. The management of Westinghouse is very appreciative of the time and effort devoted to the problem by the mayors and of their willingness to be of service on behalf of the communities they happen to represent.

GWILYM PRICE,
Chairman and President.

Statement by Hon. Abraham J. Multer, of New York, to the Antitrust and Monopoly Subcommittee of the Senate Judiciary Committee

---

EXTENSION OF REMARKS
OF

HON. ABRAHAM J. MULTER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 17, 1956

Mr. MULTER. Mr. Speaker, I wish to call the attention of our colleagues to the following statement which I presented on December 30, 1955, to the Antitrust and Monopoly Subcommittee of the Senate Judiciary Committee:

Mr. Chairman and distinguished members of the committee, permit me first to thank you for the opportunity to present this statement to you.

I know only too well the tremendous task that confronts you in trying to get at the facts concerning the automobile industry and all of its facets.

Manufacturing and assembling, wholesale and retail selling, transporting, financing, servicing, repairing, are all part of the overall problem.

Not the least of the problem is the fact that what we are dealing with in the final analysis is the automobile which is undoubtedly one of man's most modern vehicles of progress. At the same time it can easily be, even in the hands of a good and thoroughly experienced driver, as described by the late Justice Holmes, "a lethal weapon," a veritable juggernaut of destruction.

Many an inexplicable accident is caused by defective vehicles. The blame should rest on the manufacturer. He passes his responsibility on to his dealers. They cannot assume it or begin to fulfill the obligation.

There was a time when every auto leaving the assembly line was thoroughly inspected and tested. That time has long since passed. Today no manufacturer and no assembler of cars does more than spot check them. Sometimes 1 in 10, ofttimes 1 in 20.

All the public ever hears about is the stock car that stood up under all sorts of road tests for thousands of miles. We never are told how few of the total number of cars made or assembled are so tested.

The companies' warranties today are practically worthless. Cars leaving the assembly lines have all sorts of defects. The burden is placed on the dealer to deliver a car in good running order and to service it, if it is not.

With price competition what it is, the dealer gives a minimum of service until the guaranty period runs out, after which he can charge the consumer for his service.

There is a very simple remedy for this. Enact a law that no automobile may be sold, transported, or used interstate unless accompanied by a certificate from the manufacturer or assembler of the car that it has been inspected and found in good working order and further, that it has been road tested and found in good operating order after at least 100 miles at each of the speeds of 15, 30, 45, 60, and 75 miles per hour.

For the sake of brevity I will not repeat the details of much of the testimony already presented to this committee. I know that you appreciate that most dealers dare not come before you and tell the full facts as they exist in this industry.

The pressures exerted upon them are terrific.

They are required to buy and stock accessories they know they will never sell.

They are required to receive and dispose of automobiles they do not want to order and did not order.

Most of these cars, like those they do order, are shipped into the dealers with accessories, which are billed as extras. These extras are built into the car and the dealer has no choice as to whether he or his customer wants them.

For instance, every car comes with a hole in the dashboard for a cigarette lighter, but the lighter is an extra.

Most cars are specified as equipped with a vacuum windshield wiper. The cars, however, are shipped in with electric wipers as as extra.

There are any number of other items affixed and shipped similarly.

The dealers must pay for advertising literature they do not want and would not order. It is sent in to the dealer in such quantities as the manufacturer thinks he should distribute. The dealer is billed and must pay for that literature even though he throws most of it into the waste basket.

The dealers must pay a fixed sum per car to the manufacturers toward the cost of advertising. The dealer's name and address is never part of that advertising, only the product is mentioned.

The dealer must handle only genuine parts and accessories with the manufacturer's name, which is not made by, but is sold by the auto manufacturer to the dealer at top prices. The dealer could buy the same parts much cheaper from the actual manufacturer thereof, but does not dare do so.

The dealer who complains about those things will not be a dealer very long.

The manufacturer and assembler charge the dealer for freight and taxes on the freight in accordance with the fixed tariff of the most expensive carrier and ship the auto at the dealer's risk by the cheapest means of transportation. The manufacturer pockets the difference, including a sum in excess of the tax paid to the United States Government.

That racket can easily be destroyed by prohibiting the phony charge and requiring the tax to be paid on the amount collected for freight regardless of the amount paid by the manufacturer.

Lump sum bills should be prohibited and complete itemization should be required of both manufacturer and dealer and no sum should be collectible by either for extras unless ordered in writing signed by the buyer.

As long as the manufacturers want to have dealers under contract to handle only particular makes of cars, the manufacturers should be required to sell only to such dealers and to prohibit bootlegging. The manufacturers should be required to cancel the franchises of bootleggers.

The exaggerated and fraudulent advertising by dealers is encouraged, and practically demanded by the manufactures. Make all such advertising the responsibility of the manufacturer and it will cease overnight.

The last matter I wish to touch on involves the now well-known adage: What is good for General Motors is good for the country.

You will see in a moment that we can now change that to "What is bad for the insurance companies is not bad for the automobile companies."

On September 8, 1955, I wrote to Secretary of Defense Wilson calling his attention to a scheme by which armed service personnel returning to this country are being duped and mulcted of thousands of dollars in connection with the sale to them of new automobiles.

I indicated that the matter had been called to the attention of the automobile manufacturers but they have failed to do anything to prevent these practices.

I further stated that the Secretary of Defense need not make any determination of whether these practices are fraudulent or merely unethical, but urged him to direct all commanding officers to alert their men to these practices to afford them an opportunity to protect themselves accordingly.

My letter of September 8, 1955, is exhibit A, annexed.

I received an answer dated September 23, 1955, a copy of which is annexed as exhibit B, in which the Department of Defense refused to take any action.

I replied by letter of September 28, 1955, a copy of which is annexed as exhibit C, again indicating the need for departmental action.

No answer has been received to my last letter.

Now let us see what happened when the Department's attention was called to similar

fraudulent practices by insurance salesmen. No General Motors was involved.

An investigation was instituted which confirmed the charges.

A complete set of regulations was promulgated by the Defense Department, including a directive to commanders of all bases, making them responsible for protection of the men against such frauds.

Another reason for different treatment of the phony automobile salesmen is that the fraudulent business is so profitable that the automobile manufacturers have sent their own direct representatives overseas to grab this business.

Thank you, gentlemen, for permitting me to make this statement to you.

EXHIBIT A

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D. C., September 8, 1955.

Hon. CHARLES E. WILSON,
Secretary of Defense,
Department of Defense,
Washington, D. C.

MY DEAR MR. SECRETARY: For some time Members of Congress have been receiving complaints about the tactics being used by various dealers in selling new automobiles to members of the Armed Forces returning from posts outside of the country.

It seems that some of these retailers have sent representatives abroad who through fraud and deceit induce these men who are about to return to the United States to sign contracts, and to pay deposits for the delivery of new automobiles to them at the port of their arrival in this country. As part of this scheme these retailers have made exclusive rental agreements for offices in the hotels in this country at which these men and their families are temporarily lodged upon their arrival here. The deceptive practices are continued at those places until the delivery of a new automobile is made and payment obtained.

No purpose can be served by setting forth in this letter the nature of the fraudulent representations that are made, nor is it necessary for the purpose of this letter to determine whether or not these practices are actually fradulent or merely unethical business practices. The result of all of these practices is that these men are being duped and taken advantage of. They are paying more for these automobiles than if they bought them in their home towns or, for that matter, if they bought them at the port of arrival. They are paying higher finance charges than they would pay if they took the opportunity of financing their automobiles in their home towns or in the city in which they are discharged from the service, and they are being deprived of the inspection and service that ordinarily goes with a new-car purchase when made in their home towns.

The automobile manufacturers, when apprised of these practices, have taken the position that these retailing practices are no concern of theirs.

I believe you will agree with me that in the absence of the manufacturers undertaking to prevent these practices, something must be done to help these men.

My suggestion is that you immediately issue a directive requiring commanding officers in all stations outside of this country to alert the men under their command to this situation, and to advise those men that it is inadvisable for them to make such purchases while abroad, or, for that matter, even at the place of arrival in this country, or the place of discharge from the service in this country, and that their best interests will be served by their making such purchases from dealers in their home communities. The hometown dealers, in almost every instance, can arrange for the delivery of a new automobile to them at their point of arrival or discharge in this country, which would then be available for them for transportation to their home towns.

I hope you will agree with me that such a directive will serve a very useful purpose. As a matter of fact, the directive and the notice from the local commanding officer can be appropriately worded so that neither manufacturers nor retailers need be accused of any wrong doing or impropriety, and yet provide some measure of protection to the members of our armed forces.

With kindest personal regards, I am,

Sincerely yours,

ABRAHAM J. MULTER.

EXHIBIT B

ASSISTANT SECRETARY OF DEFENSE,
MANPOWER AND PERSONNEL,
Washington, D. C., September 23, 1955.

Hon. ABRAHAM J. MULTER,
House of Representatives.

DEAR MR. MULTER: This is in reply to your letter of September 8 concerning certain practices of automobile dealers in selling to members of the Armed Forces returning from overseas posts.

You appreciate, I am sure, that no agency of the Department of Defense sponsors any plan of automobile sales such as you describe, and the Department is therefore without jurisdiction to discontinue it. The selection of an automobile salesman or sales contract is a matter of individual choice.

Overseas representatives of United States automobile dealers are not amenable to military control. So long as they comply with the laws of the locality in which they do business they can offer their merchandise for sale to both civilian and military. Control of this group like their contemporaries at the port would appear to rest with the automobile dealers, their trade associations, and perhaps the manufacturers.

I believe that the directive you suggest would be more restrictive than is appropriate for issuance by this Department and that it might effect the legitimate activities of firms and dealers who render real service to our personnel. I believe that the objective we seek, the use of caution and judgment by servicemen in their purchases from unknown vendors, can best be accomplished by a continuation of the present normal counseling given by commanders to their troops. I am taking the liberty of sending a copy of your letter to the military departments.

Your interest in the welfare of our Armed Forces personnel is appreciated.

Sincerely yours,

CARTER L. BURGESS.

EXHIBIT C

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D. C., September 28, 1955.

CARTER L. BURGESS,
Assistant Secretary of Defense,
Department of Defense,
Washington, D. C.

DEAR MR. BURGESS: Receipt is acknowledged with thanks of yours of September 23.

I fail to understand how the directive as suggested by me is in any manner restrictive. It does not require the Department or any commanding officer to take a position on the matter, nor in any manner to interfere with automobile dealers in this country or abroad. It has always been proper for the Defense Department to alert the members of the Armed Forces against dangers that they may encounter, whether physical, moral, or financial.

Alerting these men to these practices is in direct line with such procedure.

Sincerely yours,

ABRAHAM J. MULTER.

SENATE

WEDNESDAY, JANUARY 18, 1956

(Legislative day of Monday, January 16, 1956)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

The Chaplain, Rev. Frederick Brown Harris, D. D., offered the following prayer:

Almighty God and Father of all mankind, whose paths are mercy and truth, before the white splendor of whose purity every vileness must shrink away, lift us, we pray, above the mists of the immediate and set our perspectives in the wide horizons of abiding verities.

With high resolves and selfless endeavors that take counsel not of our fears, but of our hopes, may we match these epic days with daring deeds that will help clear a highway across all frontiers for Thy conquering truth. And in this age on ages telling, when a sinister system attempts to degrade all mankind as the chattel slaves of a godless state, strengthen our hands to guard freedom's holy light. May we be worthy of the vocation to which Thou hast called us as keepers of the sacred flame. We ask it in the ever-blessed name of that One whose truth makes all men free. Amen.

THE JOURNAL

On request of Mr. JOHNSON of Texas, and by unanimous consent, the reading of the Journal of the proceedings of Tuesday, January 17, 1956, was dispensed with.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States submitting nominations were communicated to the Senate by Mr. Miller, one of his secretaries.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its clerks, announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 1952. An act for the relief of Clarence Christensen;

H. R. 2522. An act for the relief of Isabelle S. Gorrell, Donald E. Gorrell, Mary Owen Gorrell, and Kathryn G. Wright;

H. R. 2712. An act for the relief of Emanuel Mathes;

H. R. 3032. An act for the relief of Mrs. Alberta S. Rozanski;

H. R. 3043. An act for the relief of Edward M. Thompson;

H. R. 3650. An act to provide for the conveyance to Eilef Rue of certain real property situated in Cassia County, Idaho;

H. R. 4466. An act for the relief of Lois O. Jennings;

H. R. 4588. An act for the relief of Antonio Penna;

H. R. 4873. An act for the relief of Lt. Comdr. Mortimer T. Clement, Medical Corps, United States Navy, retired;

H. R. 5055. An act to provide that service of cadets and midshipmen at the service academies during specified periods shall be considered active military or naval wartime service for the purposes of laws administered by the Veterans' Administration;

H. R. 5544. An act for the relief of Mrs. Jennie B. Prescott;

H. R. 5626. An act for the relief of Fred Mazan;

H. R. 6190. An act for the relief of Ens. Charles A. Binswanger;

H. R. 6279. An act for the relief of Mrs. Bertha K. Martensen;

H. R. 6283. An act for the relief of Joseph J. Tierney; and

H. R. 7164. An act for the relief of Lt. Michael Cullen.

ENROLLED BILLS SIGNED

The message also announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the President pro tempore:

H. R. 938. An act for the relief of Mrs. Elena Apostolescu Bustiuc;

H. R. 1015. An act for the relief of Mr. and Mrs. Defery William Wright;

H. R. 1022. An act for the relief of Antonio Andrea Chitato;

H. R. 1145. An act for the relief of Ora L. Powers;

H. R. 1146. An act for the relief of the Pacific Music Supply Co.;

H. R. 1183. An act for the relief of Baldomero R. Garcia, Teresa Garcia y Braganza, Francisco Garcia, Teresita Garcia, and Eduardo Garcia;

H. R. 1219. An act for the relief of the estate of Mrs. Margaret A. Swift;

H. R. 1447. An act for the relief of Aleksandra Borkowski;

H. R. 1752. An act for the relief of Johanna Juresic Grgurich;

H. R. 1768. An act for the relief of the Jefferson and Plaquemines Drainage District and certain persons whose properties abut on the Federal Government's right-of-way for Harvey Canal in Louisiana;

H. R. 1910. An act for the relief of Elanka Goldstein;

H. R. 2273. An act for the relief of Der Chuck Yee and Wu Mei On;

H. R. 2278. An act for the relief of Consuelo Calderson de Villarreal;

H. R. 2296. An act for the relief of Simone Gilliland;

H. R. 2466. An act for the relief of Marino and Giselda Proni;

H. R. 2467. An act for the relief of Ivo and Elia Monari;

H. R. 3027. An act for the relief of Leo E. Verhaeghe;

H. R. 4582. An act to amend the Internal Revenue Code of 1954 with respect to deductions from gross income of amounts contributed to employee trusts;

H. R. 5428. An act to amend the Internal Revenue Code of 1939 with respect to the period of limitation for filing claims by certain transferees and fiduciaries for credit or refund of income taxes;

H. R. 7036. An act to amend section 37 of the Internal Revenue Code of 1954 with respect to the earned income limitation on retirement income;

H. R. 7282. An act relating to the allowance of the credits for dividends received, for dividends paid, and for a Western Hemisphere trade corporation in computing the alternative tax of a corporation with respect to its capital gains; and

H. R. 7364. An act relating to the application of the documentary stamp tax to transfers of certain obligations paid for in installments.

HOUSE BILLS REFERRED

The following bills were severally read twice by their titles and referred as indicated:

H. R. 1952. An act for the relief of Clarence Christensen; to the Committee on Labor and Public Welfare.

H. R. 2522. An act for the relief of Isabelle S. Gorrell, Donald E. Gorrell, Mary Owen Gorrell, and Kathryn G. Wright;

H. R. 2712. An act for the relief of Emanuel Mathes;

H. R. 3043. An act for the relief of Edward M. Thompson;

H. R. 4466. An act for the relief of Lois O. Jennings;

H. R. 4588. An act for the relief of Antonio Penna;

H. R. 4873. An act for the relief of Lt. Comdr. Mortimer T. Clement, Medical Corps, United States Navy, retired;

H. R. 5626. An act for the relief of Fred Mazan;

H. R. 6190. An act for the relief of Ens. Charles A. Binswanger;

H. R. 6279. An act for the relief of Mrs. Bertha K. Martensen;

H. R. 6283. An act for the relief of Joseph J. Tierney; and

H. R. 7164. An act for the relief of Lt. Michael Cullen; to the Committee on the Judiciary.

H. R. 3032. An act for the relief of Mrs. Alberta S. Rozanski;

H. R. 5055. An act to provide that service of cadets and midshipmen at the service Academies during specified periods shall be considered active military or naval wartime service for the purposes of laws administered by the Veterans' Administration; and

H. R. 5544. An act for the relief of Mrs. Jennie B. Prescott; to the Committee on Finance.

H. R. 3650. An act to provide for the conveyance to Eilef Rue of certain real property situated in Cassia County, Idaho; to the Committee on Interior and Insular Affairs.

COMMITTEE MEETINGS DURING SENATE SESSION

On request of Mr. JOHNSON of Texas, and by unanimous consent, the Permanent Subcommittee on Investigations of the Committee on Government Operations, under the chairmanship of Mr. MCCLELLAN, was authorized to meet today during the session of the Senate.

On request of Mr. JOHNSON of Texas, and by unanimous consent, the Committee on Agriculture and Forestry was authorized to meet today, during the session of the Senate.

MEETINGS OF COMMITTEE ON AGRICULTURE AND FORESTRY DURING SENATE SESSIONS

Mr. ELLENDER. Mr. President, yesterday I asked unanimous consent for the Committee on Agriculture and Forestry to sit when the Senate was in session during the remainder of this week and next Monday. Has the Senator from Texas given further consideration to that request?

Mr. JOHNSON of Texas. I have. I am always willing, anxious, and eager to accommodate my friend from Louisiana. However, the Senator from Texas thinks it is a bad practice, although he would indulge the Senator from Louisiana in some leeway. He thinks very much of his colleague from Louisiana and would like to go along with him.

But the distinguished minority leader, when he was the majority leader, asked the Republican chairmen, as he now asks the Democratic leader to ask the Democratic chairmen, not to make blanket requests covering several days; because if it is done for one committee, there is difficulty in refusing such permission to other committees.

The distinguished minority leader has no objection to the committee headed by the Senator from Louisiana meeting each day; so the Senator from Texas plans, following the prayer each morning, and after a quorum call, to ask unanimous consent on a day-to-day basis, and I feel certain that the other Members of the Senate will agree to the request.

The Senator's request has already been made for today and has been agreed to.

Mr. ELLENDER. I thank the distinguished majority leader.

ORDER FOR RECESS UNTIL TOMORROW

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that when the Senate concludes its business today, it stand in recess until 12 o'clock noon tomorrow.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. HICKENLOOPER. Mr. President——

Mr. JOHNSON of Texas. Does the Senator from Iowa desire recognition at this time, or would he prefer to have recognition when the Senate completes its morning hour and after there is a quorum call? I wish to accommodate my friend, and I shall follow his suggestion.

Mr. HICKENLOOPER. I shall follow the suggestion of the majority leader.

Mr. JOHNSON of Texas. I am perfectly willing to follow any suggestion of the Senator from Iowa. It is my plan to ask unanimous consent that there be a limitation of 2 minutes on statements made during the morning hour, then to suggest the absence of a quorum, and then I expect the Senator from Iowa to be recognized.

Mr. HICKENLOOPER. Will the Senator excuse me for just a moment, so that I may confer with our visitors from Panama who are now in the Senate Chamber?

Mr. JOHNSON of Texas. Very well.

Mr. President, the debate on the pending business has proceeded for 2 days this week. It is the plan of the leadership to have the debate continue and to have a session today, tomorrow, and on Friday, if there are any speakers who desire to be heard, although it is not the plan to vote on any amendments, or certainly not on the bill, this week. It is hoped that the Senate can continue the very fair discussion of the bill next week.

Mr. President, I am very happy to state that the bitterness which had been predicted, and the dire prophecies which had been made concerning the conduct of Senators in the debate on this sub-

ject, have not materialized. I do not know of any debate in recent years that has been conducted on a higher plane. I wish to commend Senators on both sides of the question. They have brought out facts which are very important to the Senate in its deliberations on this measure, and I am sure they will continue to do so.

Occasionally we see a news column which presents more propaganda than facts, and there has been an occasional cartoon along the same line; but those of us who have served in the Senate a long time have learned to expect a certain number of attempts at intimidation on subjects such as the one now before us and some newspaper accounts which are not always objective and completely accurate.

However, Mr. President, I may say I hope that after the discussions which will continue this week and into next week, we can get around to a voting stage along toward the end of next week.

As the distinguished President pro tempore, who has served longer in this body than has any other Senator, so well knows, that matter is completely in the hands of the Senate itself. There are on the calendar no measures which require urgent action; and I think that after discussion of the bill for 2 or 3 weeks, most Senators will feel that we can proceed to vote on it.

VISIT TO THE SENATE BY THE HONORABLE DR. DON JOAQUIN JOSÉ VALLARINO, AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY FROM PANAMA, AND A DELEGATION FROM THE PARLIAMENT OF PANAMA

Mr. HICKENLOOPER. Mr. President——

Mr. JOHNSON of Texas. I now yield to the Senator from Iowa.

Mr. HICKENLOOPER. This morning we are honored indeed by a visit by some very distinguished members of the Assembly of our sister Republic of Panama. This delegation is here on an official mission to the United States as a result of a resolution of the Panamanian Assembly. As I have said, they have honored us with their attendance here for a few minutes this morning.

The delegation is accompanied by my friend, and the friend of most of us, the distinguished Panamanian Ambassador, Dr. Don Joaquin José Vallarino. At this time I present Dr. Vallarino to the Senate.

(The Ambassador rose and was greeted with applause.)

Mr. HICKENLOOPER. The other three gentlemen who are present on the floor of the Senate are members, as I said previously, of the Panamanian Assembly. I hope I may be pardoned if my Spanish pronunciation is not exactly accurate, but I shall do the best I can.

First I should like to present Dr. Jorge E. Illueca, a Deputy of the National Assembly, who has had distinguished service in Panama, and in other countries of the world, and who received a part of his college education, especially in law, in the United States.

(Dr. Illueca rose and was greeted with applause.)

Mr. HICKENLOOPER. Next I should like to present Hon. Max Heurtematte, who is also an eminent member of the Panamanian Assembly, and a member of a most distinguished Panamanian family of worldwide reputation. He has been Ambassador to France, and has served in many other public capacities for his Government.

(Mr. Heurtematte rose and was greeted with applause.)

Mr. HICKENLOOPER. Next I should like to present Mr. Inocencio Galindo Vallarino, who is a prominent construction engineer, in addition to being a National Deputy in Panama. He is a construction engineer by profession, he has been Minister of Public Works, has served in other public capacities for his country, and is a graduate of Georgia Tech.

(Mr. Vallarino rose and was greeted with applause.)

Mr. HICKENLOOPER. Mr. President, we are indeed proud and pleased to welcome these gentlemen. As I said a moment ago, they are in this country on an official mission, and they have matters which they are taking up in the United States in connection with the treaty with Panama which was ratified last year.

Mr. JOHNSON of Texas. Mr. President, I should like to join with my delightful friend from Iowa in extending a hearty welcome to the distinguished visitors from Panama who are with us this morning, and in expressing deep appreciation to them for their visit.

We hope their trip will be a pleasant and enjoyable one. We know we shall profit from their acquaintance. I hope that every Member of the Senate may have an opportunity to meet our distinguished guests from Panama before they leave this historic Chamber.

Mr. KNOWLAND. Mr. President——

Mr. JOHNSON of Texas. I yield to the distinguished minority leader, the Senator from California.

Mr. KNOWLAND. Mr. President, I wish to join with the majority leader and the distinguished Senator from Iowa [Mr. HICKENLOOPER] in extending the welcome of the Senate to our distinguished visitors from Panama. We feel that we have very close relations with our friends to the south of us, throughout Central America and South America, with whom we join hands in the maintenance of a friendly policy. We hope that as the years go by, there will be greater opportunities for visiting back and forth, so that we may come to know better the common problems which confront the nations in the Western Hemisphere—problems which it is so important to solve, in the interest of the ultimate preservation of a free world of free men.

Mr. JOHNSON of Texas. Mr. President, I should like to inform my friend, the Senator from Iowa, that as soon as we conclude our brief routine business, I shall suggest the absence of a quorum, so that other Senators may enter the Chamber. I hope the Senator from Iowa and his distinguished guests will remain in the Chamber until the quorum call is concluded.

Mr. CHAVEZ. Mr. President——

Mr. JOHNSON of Texas. Mr. President, I yield to my delightful friend, the Senator from New Mexico.

Mr. CHAVEZ. Mr. President, let me say that I am most happy to be present on the occasion of the visit of our great friends from Panama. I have known the Ambassador from Panama for many years. I think I know and understand the good citizens of Panama. Let them be assured that, in my opinion, there never has been a more friendly feeling in the United States for the people of Latin America than there is at this moment. They are our friends. If they grow, we grow; if they are economically sound, we are economically sound.

Let us carry on, and have more visits such as the one with which we are honored today by our friends from Panama.

I thank the Senator from Texas for yielding to me.

Mr. JOHNSON of Texas. Mr. President, I concur entirely in what the distinguished Senator from New Mexico, the very able chairman of the Public Works Committee, has said. I should like to add that what he has said is true, for there never has been a time when relations between our two countries were more friendly.

I know of no one who has contributed more to that situation of very friendly relations than the distinguished Senator from New Mexico; and I wish to commend him for the time he has spent in such endeavors, and for the success of his efforts.

Mr. LONG. Mr. President, will the Senator from Texas yield to me?

Mr. JOHNSON of Texas. I yield to the Senator from Louisiana.

Mr. LONG. I should like to associate myself with the words which have been said here about our good neighbors from Panama. We in Louisiana have opportunity to trade with Panama from time to time. We find them to be good neighbors and good friends. We are glad to have this visit, and we hope we shall have frequent opportunities to visit with them in the future.

Mr. GEORGE. Mr. Ambassador and Panamanian representatives here: You are welcome to the Senate. We are delighted to have you with us. We hope you will make yourselves comfortable here until the Senate concludes a brief period of routine business, following which the majority of the Senate will be able to speak to you and to greet you.

Mr. HICKENLOOPER. Mr. President, in connection with the visit of the distinguished Panamanian delegation, I wish to say that its members constitute an officially appointed delegation of the Panamanian Assembly, to communicate to the Congress of the United States certain views which they would like to have presented. Therefore, I ask unanimous consent that the views, which I now send to the desk, of the official delegation of the Panamanian Assembly be printed at this point in the RECORD, in connection

with their visit, and the performance of their mission.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

To the Congress of the United States of America:

As members of the National Legislative Assembly of the Republic of Panama, it gives us great pleasure to convey on behalf of the people and the Government of Panama, cordial greetings to the Congress and the people of the United States and to the great leaders of the Republican and Democratic Parties of this Nation. But this pleasure is greater when we realize the fact that our visit to this historical capital may contribute to the closest understanding and effective unity of ideals between our two countries.

There is a long established tradition of cooperation among the legislative bodies of the Americas to preserve the principles of Western Christianity and the most vital interests of their peoples. Let us remember that when the Virginia Legislature convened on May 1769, several resolutions defending the fundamental human rights of the inhabitants of the American colonies were adopted and, with the votes of Washington and Jefferson, another resolution was passed ordering to "send a copy of these resolutions to every legislative body on the continent." This democratic lesson has been learned and will always be remembered.

We feel that the close ties of friendship between our two countries grow stronger day by day. The joint statement of President Franklin D. Roosevelt of the United States and President Harmodio Arias of Panama, issued in the fall of 1933, was an eloquent demonstration of these feelings. Then and there the lines of a policy of cooperation were established and it was recognized that Panama, as a sovereign power, is entitled to the commercial advantages inherent to her strategic geographical position.

These basic principles found expression in the General Treaty of Friendship and Cooperation of 1936, in which the two countries reaffirmed their willingness to cooperate for the purpose of insuring the full and perpetual enjoyment of the benefits of all kinds which the canal should afford the two Nations that made possible its construction. However, there still was much to be done by men of good will in both countries.

Thus, 20 years later President José Antonio Remón, of Panama, met in the fall of 1954 with President Dwight Eisenhower, an outstanding leader of mankind. At the White House the two Presidents considered some aspects of the relations existing between their countries. As a result of the presidential conference, they reiterated, in a joint statement, the basic principles set forth by our Governments in 1933 and 1936. They agreed further that such basic principles should have as a consequence the adoption of measures tending to make them more effective, such as enabling the commerce and industry of Panama to take advantage of the market offered by the Canal Zone and by the ships transiting the canal.

President Eisenhower and the Panama President equally agreed that the principle of equality of opportunity and treatment must have full effect in regard to the citizens of Panama and the United States employed in the Canal Zone. They recognized also the advisability of giving due consideration, in the cases of lands granted in the past for canal purposes which are no longer needed for such purposes in order that arrangements may be agreed upon for the return of those lands to the Republic of Panama.

Upon the basis of the principle of sovereign equality of the States, negotiations to reach a new treaty between the United States and Panama were started in Washington, as a good example to mankind that here in the Americas the United States and her sister republics constitute a brotherhood of nations, large and small, but by no means a satellite system of the sort that has developed elsewhere in the world.

These considerations led the representatives of the United States and the Republic of Panama to sign on January 25, 1955, a Treaty of Mutual Understanding and Cooperation and a Memorandum of Understandings Reached, whose exchange of ratifications took place on August 23, 1955.

In those instruments several important obligations were mutually undertaken. It was agreed, among other provisions, that the United States would request the United States Congress to enact legislation providing, for all United States and Panamanian employees in the Canal Zone, equality of opportunity and treatment, the establishment of a single basic wage scale and the uniform application of the Civil Service Retirement Act; and that the United States would request the United States Congress to authorize the construction of a bridge across the canal at Balboa, and the return to Panama of certain lands not required for canal purposes.

Within the inter-American system Panama has gained a relevant place in history. It was in the Panamanian isthmus of Darien, in the city of Santa María la Antigua, the oldest settlement on this continent, where in 1510 the first municipal legislative body of this hemisphere was elected by popular vote. The Royal Audience of Panama in 1535 extended its jurisdiction from Cape Gracias a Dios to Cape Horn. More than a century ago Panama became the repository of the ideals of the great liberator, Simón Bolívar. He chose the capital of the isthmus as the site of the Congress of 1826, which was the cradle of Pan-Americanism.

Bolívar tried to find a common meeting ground for the Americas at the Isthmus of Panama; and it has been said that the canal which united the waters of two oceans by cleaving the lands of the continent has become a means of fulfilling that hope. Indeed, it is very significant that the first meeting of consultation of American foreign ministers was held in Panama City in 1939, where practical effect was given to the doctrine of the common defense of this hemisphere.

The American continent is united by strong ties of political and ideological solidarity. Within this admirable union Panama and the United States are partners "par excellence," due to the unique nature of their relationship. The effective understanding and cooperation between such special partners is particularly important as it reflects upon the entire framework of continental solidarity.

This ideological association has been loyally maintained in theory and practice. During the last war we contributed with Panamanian vessels to the victory of the United Nations. We have opposed from the outset every attempt to spread to this hemisphere the harmful effects of the Communist doctrine and will cooperate in every way possible to defeat the plans for world domination of the Communist fanatics.

Panama is perhaps one of the few merchant marine powers which in 1951 prohibited her vessels to carry on trade with the aggressor countries of Communist China and North Korea. We have done so because we sincerely believe in the good neighborliness and partnership among the American Republics; because we do believe in the outstanding record of championship of liberty for everybody attained by the United States, and in the principles of international decency, of international law, and of Western Christian civilization, which are the groundwork of the inter-American system.

One of the great leaders of your country has expressed in fine words that "we have been able to achieve in this hemisphere a unity of nations heretofore unknown, by holding fast to the doctrine that the rights of all nations, great and small, must be respected and that the problems of any nation in our group may be laid before the others in the certainty that there will be a friendly hearing and sympathetic help toward a constructive result with justice ever in mind."

We are happy on this occasion to pay personal tribute to the Senate of the United States which ratified the Eisenhower-Remon Treaty. But we are even more happy because of the fact that the legislation to implement said treaty, which is to be submitted to the United States Congress, will merit the consideration of this august body.

In this connection we wish to express our deep confidence and the confidence of the Panamanian people in the high spirit of statesmanship and Americanism of the ladies and gentlemen in both Houses of Congress. The adoption of this legislation not only will be particularly welcomed to the people of Panama and of the Americas, but also will serve as an excellent instrument to strengthen the inter-American system of continental solidarity.

It is a great honor for us to present to you, at this moment, a resolution of the Panama Legislative Assembly, conveying its best wishes for the fullest success of the 1956 session of the 84th Congress of the United States of America.

MAX HEURTEMATTE,
President of the Legislative Assembly of Panama.
INOCENCIO GALINDO VALLARINO,
Assemblyman.
JORGE ILLUECA,
Assemblyman.

WASHINGTON, January 18, 1956.

EXECUTIVE SESSION

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of executive business, for action on nominations on the Executive Calendar beginning with the new reports.

The motion was agreed to; and the Senate proceeded to consider executive business.

EXECUTIVE MESSAGES REFERRED

The PRESIDENT pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

THE CALENDAR

The PRESIDENT pro tempore. If there be no executive reports of committees the clerk will proceed to state the nominations on the calendar, beginning with the new reports.

DIPLOMATIC AND FOREIGN SERVICE

The Chief Clerk read the nomination of Max Waldo Bishop, of Arkansas, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Thailand.

The PRESIDENT pro tempore. Without objection, the nomination is confirmed.

GOVERNOR OF VIRGIN ISLANDS

The Chief Clerk read the nomination of Walter A. Gordon, of California, to be Governor of the Virgin Islands.

The PRESIDENT pro tempore. Without objection, the nomination is confirmed.

POST OFFICE DEPARTMENT

The Chief Clerk read the nomination of Jack Rohe Howard, of New York, to be member of the Advisory Board for the Post Office Department.

The PRESIDENT pro tempore. Without objection, the nomination is confirmed.

DIPLOMATIC AND FOREIGN SERVICE

The Chief Clerk proceeded to read sundry routine appointments in the Diplomatic and Foreign Service.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the routine appointments in the Diplomatic and Foreign Service be considered en bloc.

The PRESIDENT pro tempore. Without objection, the routine appointments will be considered en bloc.

Without objection, these nominations are confirmed.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the President be notified forthwith of all nominations confirmed today.

The PRESIDENT pro tempore. Without objection, the President will be notified forthwith.

NOTICE OF CONSIDERATION OF TREATIES

Mr. JOHNSON of Texas. Mr. President, I should like to announce for the information of the Senate that there are two treaties on the Executive Calendar. I am informed that the distinguished chairman of the Foreign Relations Committee expects no controversy to develop over these treaties, but they will be discussed, and, in accordance with the practice of the leadership, we shall ask that Senators may have an opportunity to be recorded. Therefore, Mr. President, I wish the Senate to be on notice that early next week we expect to call up those treaties and have yea and nay votes on them.

NOTICE OF HEARINGS ON CERTAIN NOMINATIONS BY COMMITTEE ON FOREIGN RELATIONS

The PRESIDENT pro tempore. As a Senator, and chairman of the Committee on Foreign Relations, the Chair desires to announce that the Senate received today the nominations of the following persons to be members of the United States Advisory Commission on Educational Exchange for the terms indicated, and until their successors have been appointed and qualified:

Rufus H. Fitzgerald, of Pennsylvania, for a term of 3 years, expiring January 27, 1959—reappointment.

Arthur A. Hauck, of Maine, for a term of 3 years, expiring January 27, 1959—reappointment.

I give notice that these nominations will be considered by the Committee on Foreign Relations at the expiration of 6 days.

LEGISLATIVE SESSION

Mr. JOHNSON of Texas. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that there now be the usual morning hour, for the presentation of petitions and memorials and the transaction of other routine business, all to be subject to the customary 2-minute limitation on debate.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The transaction of morning business is now in order.

Mr. JOHNSON of Texas. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

CONTINUANCE OF EFFECTIVENESS OF ACT OF JULY 17, 1953

A letter from the Secretary of the Army, transmitting a draft of proposed legislation to continue the effectiveness of the act of July 17, 1953 (67 Stat. 177), as amended (with an accompanying paper); to the Committee on Armed Services.

REPORT ON NUMBER OF AIR FORCE OFFICERS DETAILED AT SEAT OF GOVERNMENT

A letter from the Director Legislation Liaison, Department of the Air Force, reporting, pursuant to law, that for the quarter ended December 31, 1955, there was an aggregate of 2,685 officers of the Air Force assigned or detailed to permanent duty at the seat of Government; to the Committee on Armed Services.

TENURE OF OFFICE AND RETIREMENT RIGHTS OF UNITED STATES DISTRICT JUDGES IN HAWAII AND PUERTO RICO

A letter from the Director, Administrative Office of the United States Courts, Washington, D. C., transmitting a draft of proposed legislation to provide that the United States district judges for the districts of Hawaii and Puerto Rico shall have the same tenure of office and retirement rights as all other United States district judges (with an accompanying paper); to the Committee on the Judiciary.

REPORT ON DISPOSITION OF EXECUTIVE PAPERS

Mr. JOHNSTON of South Carolina, from the Joint Select Committee on the Disposition of Executive Papers, to which was referred for examination and recommendation a list of records transmitted to the Senate by the Archivist of the United States that appeared to have no permanent value or historical interest, submitted a report thereon, pursuant to law.

PETITIONS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the PRESIDENT pro tempore:

A resolution adopted by the mayor and council of the Borough of Roselle, N. J., relating to the designation of December as Universal Bible Reading Month; referred to the Committee on the Judiciary, and ordered to be printed in the RECORD, as follows:

"Resolution adopted by the Borough of Roselle County of Union, State of New Jersey

"Whereas it has been called to the attention of the mayor and council that the month of December has been designated as Universal Bible Reading Month and the President of the United States has urged that our citizens turn to the Holy Bible for guidance and inspiration in the tasks that lie ahead; and

"Whereas all persons elected to public office are required to take the oath of allegiance to the Constitution and ordinarily do so with hand upon the Bible, and it is common knowledge that the law of the Creator, as set forth in the Holy Scriptures, is a guide for conduct superior to manmade law and, given serious consideration, directs the thoughts, feelings, and decisions of man in his relation to his God and his fellowmen, and promotes respect, consideration, and justice: Therefore be it

"*Resolved*, That the mayor and council recommend to all public officials, local, State, and national, the reading of the Holy Bible during the month of December and throughout the coming year as a guide to their conduct in the administration of public affairs.

"Adopted: December 8, 1955.

"Approved: December 8, 1955.

"ARTHUR O. NELSON,
"President, Roselle Borough Council."

A resolution adopted by the Maui Chamber of Commerce, Wailuku, Maui, T. H., favoring the repeal of Public Law 199, to readjust size and weight limitations on fourth-class (parcel post) mail; to the Committee on Post Office and Civil Service.

By Mr. GREEN (for himself and Mr. PASTORE):

A resolution of the General Assembly of the State of Rhode Island; to the Committee on Banking and Currency:

"Resolution memorializing the Congress of the United States to enact legislation providing effective aid to labor surplus areas

"Whereas the Congress of the United States, in 1946, enacted a full employment act, enunciating the principle that full employment is a national responsibility; and

"Whereas any surplus labor area which has a hard core of unemployment is entitled to relief; and

"Whereas Rhode Island is such an area containing a skilled and well-equipped labor force; and

"Whereas it is vital to the economy of the country that implementation be given to the principle of full employment by providing for the use of such a labor force; and

"Whereas the Rhode Island contribution to the income of the Federal Government is disproportionately greater than any Federal benefits which it receives. Now, therefore, be it

"*Resolved*, That the General Assembly of the State of Rhode Island and Providence Plantations hereby urges the Congress of the United States to enact legislation which would give meaning to the full employment act by providing loans for labor surplus areas to finance much needed construction and reconstruction of industrial facilities, guaranteeing a Federal procurement policy assuring labor surplus areas their fair share of Federal purchases, making funds available

for essential public construction, and providing suitable training for the unemployed; and be it further

"*Resolved*, That the Senators and Representatives from Rhode Island in said Congress be, and they are hereby earnestly requested to use their concerted effort to bring about the enactment of such legislation; and be it further

"*Resolved*, That the secretary of state be, and he is hereby authorized and directed to transmit to the Senators and Representatives from Rhode Island in the Congress of the United States duly certified copies of this resolution."

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. STENNIS:

S. 2961. A bill to amend the Bankhead-Jones Farm Tenant Act to further authorize the insurance of farm housing loans; to the Committee on Agriculture and Forestry.

(See the remarks of Mr. STENNIS when he introduced the above bill, which appear under a separate heading.)

By Mr. NEUBERGER (for himself, Mrs. SMITH of Maine, Mr. MORSE, Mr. CLEMENTS, Mr. HUMPHREY, Mr. MAGNUSON, Mr. MANSFIELD, Mr. MCNAMARA, and Mr. PAYNE):

S. 2962. A bill to extend the provisions of the Veterans' Readjustment Assistance Act of 1952 until such time as existing laws authorizing compulsory military service cease to be effective; and to provide for payment of tuition and fees of veterans receiving educational benefits under such Act; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. NEUBERGER when he introduced the above bill, which appear under a separate heading.)

By Mr. PAYNE:

S. 2963. A bill to amend the Fair Labor Standards Act of 1938, as amended, to exempt home workers in rural areas from the minimum wage and maximum hours provisions of that Act in certain cases; to the Committee on Labor and Public Welfare.

By Mr. HRUSKA:

S. 2964. A bill for the relief of Rose Marie Benarroch; to the Committee on the Judiciary.

By Mr. WELKER:

S. 2965. A bill for the relief of Manuel Lugarezaresti-Salzidea and Federico Angulo Ibanez; and

S. 2966. A bill for the relief of Domingo Zubieta Laca; to the Committee on the Judiciary.

By Mr. THYE (for himself and Mr. HUMPHREY):

S. 2967. A bill to amend the act of June 22, 1948 (62 Stat. 568), and for other purposes; to the Committee on Agriculture and Forestry.

By Mr. BYRD:

S. 2968. A bill for the relief of Morton J. Krakow; to the Committee on the Judiciary.

By Mrs. SMITH of Maine:

S. 2969. A bill to provide a preliminary examination and survey of Stave Island, Maine, in the interest of navigation; to the Committee on Public Works.

By Mr. LANGER (for himself and Mr. YOUNG):

S. 2970. A bill directing the Secretary of Agriculture to continue the operation of the dairying and livestock experiment station at Mandan, North Dakota; to the Committee on Agriculture and Forestry.

S. 2971. A bill to provide for the acquisition of a site and the erection thereon of a Federal building in Williston, North Dakota; to the Committee on Public Works.

By Mr. MAGNUSON:

S. 2972. A bill to punish the willful damaging or destroying of aircraft and attempts to damage or destroy aircraft, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. WATKINS:

S. 2973. A bill to provide for the hospitalization and care of the mentally ill of Alaska, and for other purposes; to the Committee on Interior and Insular Affairs.

AMENDMENT OF BANKHEAD-JONES FARM TENANT ACT, RELATING TO INSURANCE OF FARM HOUSING LOANS

Mr. STENNIS. Mr. President, I introduce, for appropriate reference, a bill to amend the Bankhead-Jones Farm Tenant Act to further authorize the insurance of farm-housing loans.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 2961) to amend the Bankhead-Jones Farm Tenant Act to further authorize the insurance of farm-housing loans, introduced by Mr. STENNIS, was received, read twice by its title, and referred to the Committee on Agriculture and Forestry.

Mr. STENNIS. Mr. President, since 1933, the Federal Government has furnished funds or has guaranteed loans for a total of $57.9 billion to build family-housing units. Only $592 million of this amount or only 0.0107 percent thereof, has been used for families living in rural areas. Today, there are no funds available at all for such purposes under Federal housing legislation and only a very limited authority under the Bankhead-Jones Farm Tenant Act.

America is going through a transition. Many of our small farms are being rapidly liquidated. Our smaller farmers are moving away from the farm to the towns in search of a job. Many of them must have additional income beyond their farm production, but they do not need to leave the farm to obtain it. With modern transportation, they can continue living on the farm, can cultivate or have cultivated their land, and take a factory job in town themselves, or have some member of their family do so. The entire family will be far better off; and, in addition, the community life and the community church—in fact, all community projects—will continue to have the support of the farmer and his family. At the same time the children will be reared in the country and will have all the benefits of community life, the best environment a child can have.

In the order of things, a new or a remodeled dwelling house is a necessary part of this new situation. The family earnings can well finance a loan for this purpose. The best investment we could make to better farm living conditions, I think, is to provide such a loan. This is the purpose of my bill. Many of our people can, and should, remain on the land even though one or more of the family work in town.

This applies with special force to the young rural couple starting out in life, either exclusively on the farm, or in instances where one of them fills a job in town.

I visualize this bill as having a threefold purpose:

First. To provide adequate, long-range, sound loans for the construction and remodeling of family-size farm dwellings for families living on the land who make their principal income from the land upon which they live or land near thereto.

Second. To provide the same type loans for dwellings to those historically living on the land, even though their principal income may not be from agricultural pursuits.

Third. To provide the same type loans for dwellings for those of either of the above groups who are building their first home. I would insist that all loans must be for dwellings located in a rural area.

I want to preserve the family farm and our rural community life. It is one of the principal foundation stones of our patriotism, our social order, and our entire economy. At the same time, it is the main spiritual reservoir of the Nation.

I believe that this bill will prove helpful to the farmers of our Nation, and I hope that Congress will give it a full vote of approval at the earliest possible date.

EXTENSION OF VETERANS' READJUSTMENT ASSISTANCE ACT OF 1952

Mr. NEUBERGER. Mr. President, on behalf of myself, the senior Senator from Maine [Mrs. SMITH], my colleague, the senior Senator from Oregon [Mr. MORSE], the Senator from Kentucky [Mr. CLEMENTS], the Senator from Minnesota [Mr. HUMPHREY], the Senator from Washington [Mr. MAGNUSON], the Senator from Montana [Mr. MANSFIELD], the Senator from Michigan [Mr. MCNAMARA], and the junior Senator from Maine [Mr. PAYNE], I introduce, for appropriate reference, a bill to extend the provisions of the Veterans' Readjustment Assistance Act of 1952 until such time as existing laws authorizing compulsory military service cease to be effective; and to provide for payment of tuition and fees of veterans receiving educational benefits under such act. I ask unanimous consent that I may speak on the bill in excess of the 2 minutes allowed under the order which has been entered.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the Senator from Oregon may proceed.

The bill (S. 2962) to extend the provisions of the Veterans' Readjustment Assistance Act of 1952 until such time as existing laws authorizing compulsory military service cease to be effective; and to provide for payment of tuition and fees of veterans receiving educational benefits under such act, introduced by Mr. NEUBERGER (for himself and other Senators), was received, read twice by its title, and referred to the Committee on Labor and Public Welfare.

Mr. NEUBERGER. Mr. President, I have just introduced a bill which will not only be of benefit to our Nation as a whole but particularly to millions of young men and women, both now and in the future, who are members of the Armed Forces.

This bill proposes to reestablish the GI bill of rights, which was the Magna Carta of those who fought in World War II and in the Korean hostilities.

Sadly and inexplicably, the GI bill has been allowed to die. For example, the vital educational benefits of the GI bill expired on January 31, 1955. Despite much oratory about education in general, a program which had done more than any other comparable undertaking in our history to expand the educational opportunities of our young people has been abandoned.

First and foremost of all the aspects of the GI bill of rights, the educational benefits should be restored. The legislation which I am introducing today would accomplish just that. The Members of the Senate will remember that the educational provisions of the GI bill offered an honorably discharged veteran the financial means to spend 1 month at a school or college of his choosing for approximately each month spent on active military service in the Armed Forces of the United States.

PRESENT SERVICEMEN DESERVE EQUAL CONSIDERATION WITH RECENT VETERANS

Let me explain why this program should be restored.

In the first place, it is a matter of simple equity to our present servicemen. We still are drafting men for duty with the military. We still are sending them to such remote and potentially dangerous outposts at Okinawa, the Aleutians, northern Alaska, Greenland, North Africa, our zone of Berlin, and to many other spots which are either unpleasant as localities in which to live or in close juxtaposition to our possible foes.

Why should these boys, dispatched to lonely outposts, be denied the GI bill benefits which went during World War II to many servicemen who never left the shores of the United States? Can such discrimination be defended? I think not.

GI BILL RAISED EDUCATIONAL LEVEL OF PRESENT GENERATION OF AMERICANS

Furthermore, think of the vast benefits which the GI bill brought to the United States as a whole while it was still in effect.

This measure raised the average educational level of millions of World War II veterans by three full grades—from the second year of high school to the freshman year of college. If better education is good for our Nation—and who would dispute that premise—then this program was of incalculable good.

Consider the miraculous way in which the GI bill of rights has helped to produce the skills which America needs. It trained 180,000 doctors and registered nurses, 113,000 physical and research scientists, 450,000 civil engineers, 36,000 clergymen, 83,000 policemen and firemen, and 711,000 skilled mechanics. Can money alone even commence to measure the real wealth which these trained and skilled people have added to the productive resources of this country?

In Denver last year President Dwight D. Eisenhower expressed the opinion that our young people ought to stay in school longer. He was correct, 100 percent correct. Education helps everybody—the individual and the public. The more education, the better.

About 50 percent of the high-school students who graduate in the upper 25 percent of their classes, are not now receiving a college education. To lose the mental ability and alertness of these students is as much a wasted resource as if a forest burns or topsoil is washed away, perhaps more so. Let us send to college as many of our talented young people as possible. Let us begin by sending to school the ex-servicemen who have recently take off their Army, Navy, Air Force, and Marine uniforms. The GI bill of rights, while not a panacea, will by the sheer law of averages add to the Nation's human resources the full capabilities of many of the gifted young men and women who might otherwise be permanently lost to college classrooms.

NATIONAL SECURITY REQUIRES MORE SKILLS AND ADVANCED EDUCATION

Not only our general standard of living but also our national security is intimately involved in our need for more and better education.

I recently have read that Admiral Lewis L. Strauss, chairman of the Atomic Energy Commission, has been lamenting the superiority of Russia over us in the training of physical scientists and engineers. Admiral Strauss knows the vital importance of this to the production and improvement of nuclear weapons, and also in the peacetime uses of atomic energy, such as in medical research and treatment of dreaded diseases like cancer. Only last week the Joint Committee on the Economic Report, in its study of automation and technological change, emphasized that—

> We can certainly not dismiss lightly the generally accepted evidence that professional engineers are currently being graduated at a rate nearly twice as fast in Russia as in this country, and that technicians are currently being turned out at 30 or 40 times our rate.

The committee quoted from the testimony of such experts as Dr. Vannevar Bush, famous chief of our wartime scientific research and weapons development programs, and Dr. A. V. Astin, Director of the National Bureau of Standards, expressing concern over the problem of our increasing national shortage of skilled personnel. The warnings expressed by these men could be multiplied by statements from many other leaders in the sciences, education, and industry, and I am sure they have already come to the attention of Members of the Senate. But the conclusions of the Joint Committee on the Economic Report are so directly relevant to my subject today that I would like to quote them to the Senate:

> The fact is that much of the knowledge and personnel upon which we are drawing so heavily today comes as a byproduct of the military background of the past decade. Under the necessity of war and defense expenditures, the Federal Government has contributed immeasurably to the building up of a comfortable present supply of trained personnel.
>
> * * * * *
>
> It is a question of finding and accepting a peace-time program to take the place of in-service training of technicians, and war-accelerated and militarily sponsored college programs, and the later support and encouragement of education afforded by the so-called GI bill of rights.
>
> Some twenty million persons now in civil life have been in the Armed Forces and a large part of these were given specific forced-draft training of some kind.
>
> * * * * *
>
> This great pool of knowledge cannot be regarded as inexhaustible or self-replenishing. The dangers of its depletion deserve the fullest attention of all in making sure that high-school and college training are made possible for young people with demonstrated ability and aptitude so that the Nation and the economy as a whole can continue to profit by the fruits of knowledge.

What better way, then to overhaul the Soviet Union in the preparation of scientists, and to assure us of the other skills our civilization must have, than to revive the program which once increased enormously the technical and cultural training of millions of young American men and women?

But educational reasons, compelling though they may be, are not the sole justification for restoring the GI bill of rights.

NATION CAN WELL AFFORD BENEFITS OF GI BILL OF RIGHTS

There is the whole great question of equality of sacrifice. This question must confront every democracy which drafts its youths for military service, while others stay safely at home and even enjoy greater personal prosperity because of the economic impact of war and preparations for war.

When I was in my teens, I heard a great deal from leaders of various veterans' organizations about how we would have no more blood millionaires and how we would draft capital as well as men in the next war. These sentiments stemmed from a revulsion over the exposés of munitions fortunes made out of the death and suffering of World War I.

Despite these noble sentiments, we are as far today from equality of sacrifice as ever before. Ceilings have been lifted from armaments profits, and yet we have abandoned the one real program by which we tried to compensate our soldiers and sailors for the loss of a certain number of years out of their lives. The excess-profits tax is dead, and so, ironically, is the GI bill of rights. We have squashed the tax which retarded the war millionaires, and we have killed the program which provided educational and other readjustment opportunities for our GI's. Is that fair and just? Can a democratic government justify inequality of treatment?

During World War II we sought by taxation to recapture some of the excess profits pumped into the economy through war orders. The excess-profits tax is now off the books. At the same time, profits of the great suppliers of defense materials—and accordingly the value of the shares held by their investors—have skyrocketed.

For instance, perhaps 95 percent of all outstanding aircraft orders represent military purchases. In 1945, at the end of World War II, the average value of the 8 leading aircraft companies—most of

which are now among the largest defense contractors—had risen about 30 percent over their prewar level. The excess-profits tax expired on December 31, 1953. The average value of these 8 stocks for 1954 was 371.8 percent of prewar—1935–39 average—and for the first 11 months of 1955 was 552.5 percent of prewar. Last February, when the danger of war in the Pacific seemed high, they reached 617.8 percent and again in November 1955, reached a point of 614 percent of the 1935–39 level.

Currently the largest defense contractor is the General Motors Corp. The price of its common stock—adjusted for stock splits—ranged from $31 to $39 per share in 1945, reached a level of $99 in December 1954 and of $139.50 on December 30, 1955. The range for 1955 was from a low of $102.75 to a high of $162.

Also among the largest defense contractors is the General Electric Co., whose stock ranged from $37 to $50 in 1945, rose—adjusted for stock splits—to $140 in December 1954, and closed on December 30, 1955, at $173.25, and the leading petroleum companies, Standard Oil of California and Standard Oil of New Jersey, for instance, have had the value of their common stock quintupled since 1945.

REVIVAL OF GI BILL WOULD ASSUME EQUALITY OF SACRIFICE

I am not criticizing these great companies, but we cannot close our eyes to the fact that unprecedented increases in corporate stock values have been based to considerable extent on the renewed heavy defense expenditures of recent years, unchecked by tax or other controls over profits. And these profits stand in startling contrast to what has happened to other sectors of the economy. Corporate profits after taxes for 1955 are estimated at over $21 billion compared to $17 billion in 1953—an increase of more than 25 percent since the end of excess-profits taxation. During the same period, workers' pay has gone up 5 percent, and the income of American farmers has deplorably dropped 12.2 percent.

Today we spend on armaments each year almost as much as we averaged annually during the Korean war, and we must anticipate a continuation of such exenditures for the indefinite future. Last year we imposed on our servicemen—unwisely, I think—new compulsory Reserve obligations extending for years the period during which they are compelled to interrupt their normal civilian way of life. In the light of all of these facts, shall we say we cannot afford to provide for these men and women the opportunities which were the unchallenged right of all those who entered the service as late as January 31, 1955? In the light of the need for a more skilled, better educated new generation, Mr. President, can we afford not to give them this opportunity?

The bill which my cosponsors and I have introduced would contribute greatly to the wealth and strength of our Nation, while redressing a wrong we are doing to the young men and women now in the service. Recognition of the familiar GI benefits as a feature of our veterans' legislation as long as we have compulsory military service may perhaps impose some new responsibilities on the military and on the Veterans' Administration. The latter will need to maintain careful qualifications and standards that will assure that the program will actually obtain the educational results which justify its adoption. And the services should institute comparable benefits for men who are willing to sign up for longer tours of duty, so that they do not make a disproportionate sacrifice by their readiness to serve the Nation.

But questions such as these are secondary to the principle of extending to our present servicemen opportunities which many millions of present veterans have enjoyed as a matter of course. And that principle, I am confident, will have the support of the American people.

AMENDMENT OF NATURAL GAS ACT AS AMENDED—AMENDMENT

Mr. WATKINS. Mr. President, I submit an amendment, intended to be proposed by me, to the bill (S. 1853) to amend the Natural Gas Act, as amended. I ask unanimous consent that it lie on the table, be printed, and be printed in the RECORD, together with an explanation, prepared by me.

The PRESIDENT pro tempore. The amendment will be received, printed, and will lie on the table; and, without objection, the statement will be printed in the RECORD.

The amendment is as follows:

On page 10, after line 14, to insert the following:

"SEC. 5. Section 3 of the Natural Gas Act is amended by inserting between the second and third sentences thereof a new sentence as follows: 'It shall not be deemed to be consistent with the public interest to authorize the exportation or importation of natural gas in any case where the Commission finds that such exportation or importation will result in unemployment, or injury to competing fuel industries of the United States.'"

The statement presented by Mr. WATKINS is as follows:

The Senate is currently considering amendments to the Natural Gas Act which are designed to free the producers of natural gas from Federal controls. The measures which propose such change are the Fulbright and Harris bills. A great deal has been said on the floor of the Senate about the need for amending the Natural Gas Act in order to protect the public interest and the debate on the merits of this issue has been vigorous. However, I feel that the issue before the Senate is broader than the concern over the status of the producers of natural gas—there is the greater consideration of insuring the self-sufficiency of the Nation in its overall fuel economy. Because of this consideration, I am today introducing an amendment which I intend to propose to the Fulbright bill which would amend the Natural Gas Act by giving the Federal Power Commission additional authority to deal with the important problem of the importation and exportation of natural gas.

My proposal would amend section 3 of the Natural Gas Act by vesting the Federal Power Commission with the right to determine whether or not proposed importations or exportations of natural gas would result in unemployment or would cause injury to competing American fuel industries. This proposal merely seeks to afford protection not now included in the act for the best interests of our Nation in peace and war. It seems unwise to me, in view of the many applications now pending before the Federal Power Commission for authority to import and export great volumes of natural gas, that the Commission should be without sufficient power to deal adequately with this problem.

The Federal Power Commission itself has repeatedly called upon the Congress to give it additional authority in view of the rising importance of this question. In the annual reports of the Commission to the Congress in 1951, 1952, 1953, and 1954, the request was made to broaden the authority in this connection.

In the report of the Federal Power Commission to the House Interstate and Foreign Commerce Committee on May 2, 1955, in connection with the consideration of the Harris bill, there was a further recommendation for expanded authority to deal with imports and exports of natural gas. My proposal would give the Federal Power Commission the right and duty to determine whether proposed imports or exports would cause unwarranted unemployment or substantial injury to competing American fuel industries. It does not seem reasonable to give Government sanction to the importation of natural gas, taxfree, into the areas now being adequately served with American coal, oil, and natural gas. It is my understanding that the principal purpose of the promoters of the prospective trans-Canada natural-gas pipeline is to tap American fuel markets as a sort of quasi-subsidization of the Canadian project. The fact is that Canadian law provides that no Canadian gas shall be made available to American markets until the needs of Canada are first fulfilled. Further, as I understand it, Canadian law provides that all gas coming into the United States is subject to being cut off without notice if the Canadian Government so desires. A consequence of these factors is that this Nation can be placed in the precarious position of building up dependency upon the will of a foreign nation for sources of fuel that cannot be said to be firm in view of the law in question.

Insofar as the State of Utah is concerned, we have important coal, oil, and natural-gas resources and it appears to me to be an anomaly, to say the least, for promoters to be advancing the idea that we must bring in foreign fuel to serve the fuel requirements of my State. I want to be absolutely certain before any such project is approved that it has received careful scrutiny by the agency charged with the duty to examine such a proposition. The Federal Power Commission is not now vested with sufficient legislative direction from the Congress to make the type of inquiry absolutely necessary to guarantee adequate protection to the constituents of my State—as well as the people of the United States.

Heretofore, this problem has not been of sufficient importance to command the immediate attention of the Congress because relatively small amounts of natural gas are being imported or exported under the present law. However, in view of the many promotional projects now under consideration and in prospect, it is time to take a second look at the Natural Gas Act. It must be remembered this measure was enacted into law in 1938, at a time when natural gas in any quantity had not been discovered in Canada. Furthermore, I am now advised that plans are in the making for bringing natural gas in from Mexico. In view of all of these considerations, I feel that careful consideration should be given to this amendment to the Natural Gas Act at the same time you are considering action with respect to the Fulbright and Harris bills to free the producers of natural gas from Federal control.

I have studied carefully the arguments on both sides that have been advanced on the floor of the Senate in connection with the Fulbright and Harris bills. I am persuaded that the proponents of the Fulbright and Harris bills are moved by the same considerations that prompt me to introduce my amendment today. It has been said again and again that removal of Federal control over the producers of natural gas would encourage the exploration and development of our own natural-gas resources. It has been said, and I believe it is probably true, that this would add to the Nation's security and would contribute generally to the achievement of the Nation's fuel self-sufficiency. By the same token, it is my firm belief that the necessary exploration and development of natural-gas resources would be seriously retarded if we are to permit the present policy of importation of foreign natural gas without sufficient standards to protect American interests. It is necessary that all segments of our national fuel industries be protected from any practice which would adversely affect the continued development of our own coal, oil, and natural-gas resources.

PROPOSED EXPERIMENTAL NATIONAL FLOOD INDEMNITY AND REINSURANCE PROGRAM—AMENDMENT

Mr. BUSH. Mr. President, I submit an amendment, in the nature of a substitute, intended to be proposed by me to the bill (S. 2862) to provide for an experimental national flood indemnity and reinsurance program, and for other purposes. I request that the amendment be referred to the Committee on Banking and Currency.

The proposed amendment makes no major substantive changes, but corrects certain technical defects in draftsmanship. It is being introduced at the present time in order that the Committee on Banking and Currency may have a clean draft before it when hearings are held.

The PRESIDENT pro tempore. The amendment will be received, printed, and referred to the Committee on Banking and Currency, as requested by the Senator from Connecticut.

AMENDMENT OF SOCIAL SECURITY ACT—AMENDMENTS

Mr. JOHNSTON of South Carolina submitted amendments, intended to be proposed by him, to the bill (H. R. 7225) to amend title II of the Social Security Act to provide disability insurance benefits for certain disabled individuals who have attained age 50, to reduce to age 62 the age on the basis of which benefits are payable to certain women, to provide for continuation of child's insurance benefits for children who are disabled before attaining age 18, to extend coverage, and for other purposes, which were referred to the Committee on Finance and ordered to be printed.

DISPERSAL OF INDUSTRIAL FACILITIES—ADDITIONAL COSPONSOR OF BILL

Mr. BENNETT. Mr. President, I ask unanimous consent that the name of the Senator from Kansas [Mr. CARLSON] be added as a cosponsor to the bill (S. 2879) to promote the dispersal of industrial facilities in the interest of national defense, which was introduced by me on January 9, 1956.

The PRESIDENT pro tempore. Without objection, it is so ordered.

SCHOOL CONSTRUCTION — ADDITIONAL COSPONSORS OF BILL

Pursuant to the order of the Senate of January 12, 1956, the names of the Senator from Vermont [Mr. FLANDERS], the Senator from Colorado [Mr. ALLOTT], the Senator from Maryland [Mr. BEALL], the Senator from Maine [Mrs. SMITH], the Senator from Ohio [Mr. BENDER], the Senator from Connecticut [Mr. BUSH], the Senator from Illinois [Mr. DIRKSEN], and the Senator from North Dakota [Mr. YOUNG] were added as additional cosponsors of the bill (S. 2905) to authorize a 5-year program of Federal assistance to States and communities to enable them to increase public elementary and secondary school construction, introduced on January 12, 1956, by Mr. SMITH of New Jersey (for himself and other Senators).

PROPOSED JOINT COMMITTEE ON UNITED STATES INTERNATIONAL EXCHANGE OF PERSONS PROGRAMS—ADDITIONAL COSPONSOR OF JOINT RESOLUTION

Mr. FULBRIGHT. Mr. President, I ask unanimous consent that the junior Senator from Minnesota [Mr. HUMPHREY] be included as a cosponsor of the joint resolution (S. J. Res. 120) to establish a joint congressional committee to be known as the Joint Committee on United States International Exchange of Persons Programs, which was introduced by me on Monday, January 16, 1956.

The PRESIDENT pro tempore. Without objection, it is so ordered.

PRINTING OF ADDITIONAL COPIES OF SENATE DOCUMENT NO. 51

Mr. CHAVEZ. Mr. President, some time ago the Senate authorized the printing of certain documents under the title of "Senate Document No. 51, 84th Congress." Under that authority, a certain number of copies were printed.

It now appears that the Senate document room and the House document room need additional copies. I send to the desk a resolution providing for the printing of 800 additional copies of Senate Document No. 51, at an estimated cost of $900, which is within the customary limit.

The PRESIDENT pro tempore. The resolution will be received.

The resolution (S. Res. 187), submitted by Mr. CHAVEZ, is as follows:

Resolved, That there be printed for the use of the Committee on Public Works 800 additional copies of Senate Document No. 51, 84th Congress, 1st session, entitled "Middle Snake River, Snake River and tributaries, Wyoming, Idaho, Oregon, and Washington."

The PRESIDENT pro tempore. Does the Senator ask for immediate consideration of the resolution?

Mr. CHAVEZ. I should like to have it considered at this time, because it is important that additional copies of this document be printed.

Mr. KNOWLAND. Mr. President, may I correctly understand the unanimous-consent request of the distinguished Senator from New Mexico?

Mr. CHAVEZ. I am asking unanimous consent for the immediate consideration of the resolution I have submitted, authorizing the printing of additional copies of Senate Document 51. It contains information with regard to the Snake River in the States of Idaho, Washington, Oregon, and Wyoming.

Mr. KNOWLAND. Mr. President, I assure the Senator from New Mexico that I shall probably have no objection to the adoption of the resolution. However, I should like to have an opportunity to look into it. Therefore, I would appreciate it if the Senator from New Mexico would permit consideration of the resolution to be postponed until later in the day.

Mr. CHAVEZ. Very well.

The PRESIDENT pro tempore. The resolution will lie over temporarily.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD.

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. PAYNE:

Address by the Vice President of the United States before the golden anniversary dinner of the Poor Richard Club in Philadelphia, Pa., on the 250th anniversary of the birth of Benjamin Franklin.

By Mr. WILEY:

Address delivered by him at Marshall College, Huntington, W. Va., on January 22, 1956.

By Mr. MARTIN of Pennsylvania:

Remarks made by him in presenting to Mr. Mike Benedum a plaque, and the words of acceptance of the plaque by Mr. Benedum.

AMENDMENT OF THE NATURAL GAS ACT, AS AMENDED

Mr. WILEY. Mr. President, yesterday I placed in the CONGRESSIONAL RECORD a series of grassroots messages from the State of Wisconsin, rightly opposing the Harris-Fulbright bill.

I did so in order to make unmistakably clear the position of the State of Wisconsin on this issue.

But, more important, is the position of the 47 other States of the Union which count on it.

I am pleased now to offer evidence as regards the position of many of the 47 other States.

Recently, the mayor of Wisconsin's largest city, Milwaukee, Hon. Frank P. Zeidler, acting on his own initiative, in the public interest, communicated to a large number of mayors all over the country. He invited their reactions on the Harris-Fulbright bill, and asked their judgment on ways and means of presenting the facts before the American public and the Congress.

Mayor Zeidler has forwarded to me the responses as they have poured in.

I am pleased to present pertinent excerpts now. These excerpts reflect the genuine judgment of the mayors and other officials of some of America's foremost municipalities.

By way of contrast, I should like to make a matter of public record the text of an open letter which I have written today to Mr. Alex M. Clark, who purportedly represents a group of mayors and so-called small gas producers on the other side of this issue.

As I have stated very frankly to Mr. Clark in this letter, I believe that his organization is just so much eyewash. And it is not very clear eyewash at that, because it is designed to befog the eyes of the American people, instead of opening their eyes to the real facts.

The real facts are that the Harris-Fulbright bill is now and has always been a menace to the American economy.

It is an inflationary menace. It is an anticonsumer menace. As such, it must be amended in the public interest, so as to provide not sham protection, as it does now, but genuine protection for 30 million consumers.

I ask unanimous consent that the text of the valid excerpts from the mayors and the text of my open letter to Mr. Clark and his invalid, unrepresentative organization be printed at this point in the body of the CONGRESSIONAL RECORD.

There being no objection, the excerpts and letter were ordered to be printed in the RECORD, as follows:

JANUARY 18, 1956.

Mr. ALEX M. CLARK,
Chairman, Joint Committee of Consumers and Small Producers of Natural Gas, Washington, D. C.

DEAR MR. CLARK: I have at hand your letter of January 16, in which you refer to an organization purportedly representing "350 mayors and over 400 small gas producers of some 30 States," as allegedly being in favor of the Harris-Fulbright bill.

I am glad that you have written to me, because I had noted the formation of your somewhat curious organization, according to wire service reports and had been meaning to write to you.

I am taking the liberty of doing so now in the form of this open letter.

I think that the American people will be most interested to see the names of the mayors whom you assert are members of your organization and the cities which they purportedly represent. We will be interested in noting in what States these cities predominate.

Moreover, the American people would be interested in learning the source which initiated your group and its precise financing of your organization—whether the initial financing has come from the mayors (which is certainly to be doubted), or from the small gas producers, or who knows, perhaps directly or indirectly from the large gas producers who stand to profit from the present bill—over a period of years to the tune of literally billions of dollars.

Let me say in all candor that from what has been seen of it, competent observers regard your organization as a phony.

They feel the organization's name is a phony and its purpose is a phony.

You cannot possibly genuinely represent the consumers of so much as one city of the United States, because the consumers' interest, even in a great producing State like Texas, is unequivocally on the side of fair Federal regulation of natural-gas rates.

Competent observers believe that your organization was established strictly as a smoke screen. It was designed to befog the issue. It was designed to fool any gullible Americans who might be naive enough to think that consumer ranks were allegedly split on this issue.

As for the small gas producers, the fact of the matter is that, although there are a goodly number of small producers their total production is completely insignificant in relation to the massive volume of the few large producers.

I wonder what would be your position and that of the small producers which you purportedly represent, on an amendment which may be offered to clear the air. It would exempt small producers from the type of genuine Federal Power Commission control which should certainly, at the very minimum, be imposed on large producers.

I assure you, sir, I make all the above comments not in any personal way as a reflection against you or any individual mayor of ex-mayor who happens to see things differently from myself and from my associates in our fight to protect the Nation's interest.

You have a right to present your viewpoint and to organize accordingly.

But I think that the American public should be made aware, as I am trying to make them aware by means of this open letter, that your organization is the type of transparent device which any intelligent American can see through a mile or 2,000 miles away. The smell of oil is all over your group.

At any rate, you are not going to be successful in splitting the ranks of American consumers, because 30 million consumers should and will know that they will be gouged mercilessly if the phony controls in the Harris-Fulbright bill are enacted.

I have written to you in frankness because folks in the State of Indiana or folks in the State of Texas ordinarily appreciate frankness.

Lastly, I point out that I am placing in the CONGRESSIONAL RECORD today messages from mayors received from all over our country which, unlike your own group, genuinely reflect consumer interest, and which rightly oppose the Harris-Fulbright bill.

Sincerely,

ALEXANDER WILEY.

WATERLOO, IOWA, *January 3, 1956.*

* * * * *

Our city council has already taken action in this matter. * * * the enclosed resolution was adopted on December 27. * * *

As you will see in reading the resolution, our Waterloo City Council officials are unalterably opposed to the passage of the Fulbright bill and should there be any united effort on the part of the mayors of our country to help defeat this bill, I know that our city will join in such an effort.

With kindest personal regards, I remain,

Yours very truly,

L. A. TOUCHAE,
Mayor.

---

* * * * *

Resolution No. 12312

Resolution stating that it is the sense of the City Council of the City of Waterloo, Iowa, that the Fulbright bill now pending in the United States Senate should be defeated and directing that certified copies be forwarded to the Honorable BOURKE HICKENLOOPER and the Honorable THOMAS MARTIN, Senators from Iowa

Whereas there is presently pending in the Senate of the United States, proposed legislation known and designated as the Fulbright bill, the House of Representatives counterpart of which known there as the Harris bill having already been adopted; and

Whereas the stated purpose of these two bills is to remove from the Federal Power Commission authority and jurisdiction to regulate producers who sell natural gas to interstate pipelines for resale in interstate commerce; and

Whereas reasonable regulation is the lifeblood of constitutional government and a foundation stone of our democratic processes; and

Whereas informed, impartial persons are almost completely of the opinion that removal of such regulatory powers will result in unprecedented, unjustified and excessive rate increases in the charges collected for the sale of natural gas by these producers; to the extreme detriment of him who ultimately pays the bill, the consumer; and

Whereas it would appear to be in the public interests that such measure be decisively defeated by United States Senate action: Now, therefore, be it

Resolved, That it is the sense of the city council of the city of Waterloo that in the interest of this city, its administration, and of its 75,000 inhabitants from all walks of life, that the Fulbright bill, now pending in the United States Senate should be overwhelmingly defeated by that honorable body and that the interests of the consuming public should continue to be protected through proper regulation by the Federal Power Commission; be it further

Resolved, That certified copies of this resolution be forwarded to the Honorable BOURKE HICKENLOOPER and to the Honorable THOMAS MARTIN, Senators from Iowa.

Passed and adopted this 27th day of December A. D. 1955.

LAWRENCE A. TOUCHAE,
Mayor.

DEARBORN, MICH., *January 4, 1956.*

* * * * *

The city of Dearborn will do everything in its power to continue to oppose the adopting of this legislation in Congress. We have already contacted both of our United States Senators from Michigan and both have indicated their opposition to the Fulbright bill. * * *

Yours cordially,

DALE H. FILLMORE,
Corporation Counsel.

JANUARY 3, 1956.

Beg to advise am definitely interested in concerted opposition to passage of such bill and will be glad to participate in any concerted effort which may be arranged to fight passage of bill. * * *

HUGH S. PATTERSON,
Mayor, City of Gadsen.

SPRINGFIELD, MO., *January 10, 1956.*

* * * * *

Last night at an informal study meeting of the council it was agreed that the Springfield City Council would pass a strongly worded resolution condemning the Fulbright bill and requesting our Missouri Senators to oppose it. Copies of this resolution will be sent to both Senator HENNINGS and Senator SYMINGTON and to the Senate committee. In addition, various members of the council will personally contact our Senators. We are acutely conscious of the dangers of this bill, since we are now engaged in fighting a substantial increase in gas rates requested by our supplier.

The council further authorized me to attend a meeting of mayors to consider this proposal * * *.

Yours very truly,

WARREN M. TURNER,
Mayor.

SCHENECTADY, N. Y., *January 9, 1956.*

* * * * *

I am opposed to the passage of the Fulbright bill exempting independent producers

of natural gas from regulation by the Federal Power Commission. I would be glad to join with * * * other mayors to urge the Senate to defeat the bill.

* * * * *

Sincerely yours,

SAMUEL S. STRATTON,
Mayor.

BALTIMORE, MD., *January 4, 1956.*

* * * * *

I testified before the House committee at the recent hearing on the Harris bill.

I am unequivocally opposed to any Federal legislation which would exempt from regulation by the Federal Power Commission independent producers of natural gas-making sales in interstate commerce for resale.

I have a continuing interest in this problem on behalf of the consumers of Baltimore city and will do all in my power to assist you in this fight.

Very truly yours,

THOMAS D'ALESANDRO, Jr.,
Mayor.

PHILADELPHIA, PA., *January 10, 1956.*

* * * * *

I feel just as strongly as our former mayor, Joe Clark, did about the natural gas question.

* * * * *

Sincerely,

RICHARDSON DILWORTH,
Mayor.

PROVIDENCE, R. I., *January 11, 1956.*

* * * * *

New England, in general, including the State of Rhode Island, is very much concerned with the subject of this bill and its possible effect upon the economy of this area. I believe, * * * that our Senators and Congressmen in Rhode Island are solidly committed to opposing this bill.

* * * * *

Very truly yours,

WALTER H. REYNOLDS,
Mayor.

NEWARK, N. J., *January 6, 1956.*

* * * * *

I have followed the course of the Fulbright bill from its inception, and I have at all times cooperated with the other officials interested in protecting the rights of the consumer. * * *

I shall do all within my power to help the cause.

Yours very truly.

LEO P. CARLIN,
Mayor.

BUFFALO, N. Y., *January 4, 1956.*

* * * * *

The city of Buffalo has been one of the leading advocates for the defeat of both the Fulbright and Harris bills. Please be further informed that we shall continue our interest in this matter in the hope that the bills will ultimately be decisively defeated.

The mayor * * * is very much interested in banding together with other mayors to propose ways and means to defeat these measures.

Yours very truly,

JOHN J. NAPLES,
Corporation Counsel.

STAMFORD, CONN., *January 9, 1956.*

* * * * *

During the early part of December, I happened to be in Washington and was in personal contact with Senator WILLIAM PURTELL (from Connecticut) who expressed his desire to defeat this bill. * * *

Be assured of my continued interest to defeat (it) * * *.

With kindest regards, I am

Sincerely,

THOMAS F. J. QUIGLEY,
Mayor.

DETROIT, MICH., *January 4, 1956.*

* * * * *

Our mayor, Albert E. Cobo, has instructed me to represent him in these matters, as I did at the hearing before the committee of the House of Representatives.

Of course, I shall do all in my power to carry out his wishes and help toward the defeat of this proposed legislation.

* * * * *

Sincerely yours,

JAMES H. LEE,
Special Assistant Corporation Counsel, Public Utilities.

TOLEDO, OHIO, *January 10, 1956.*

* * * * *

We have kept in close touch with the progress of the Harris-Fulbright bills and some of the many matters related to those bills.

* * * * *

We are even more disturbed about the impact of these bills than we were at the time of the passage of the House bill. The reasonable standard which would be permitted in the form of the going rate has been seriously affected by the court review of the Commission's decision in the Panhandle Eastern Pipe Line Co. case. The Court of Appeals for the District of Columbia on December 15, 1955, in the dockets Nos. 12351 and 12359 reversed the finding of the FPC in the Panhandle case, in which the Commission had prescribed "just and reasonable rates for Panhandle's own production." It would appear to us that the Panhandle decision of the Commission is a facet of the entire price structure that is very closely related to the language of the amendments to the Harris bill.

The "economic incongruity" to which the Commission referred in discussing field prices in the Panhandle case, would be more than renewed under present circumstances if the Harris-Fulbright bill is adopted. The only reason for making reference to the Pan handle decision is that it undoubtedly will be pressed as an argument on behalf of the proponents of the bill. It appears to us that it can equally well be used as an argument against the bill.

* * * * *

Yours very truly,

J. H. NATHANSON,
Special Gas Counsel,
City of Toledo.

INDEPENDENCE, MO., *January 2, 1956.*

* * * * *

We are in a great battle now before FPC costing in the thousands of dollars.

Our Senators and Congressmen are committed to defeat of Fulbright and Harris bills. I am with the cities all the way. * * *

Best regards,

R. P. WEATHERFORD, Jr.,
Mayor.

"BRINK OF WAR" AND NATIONAL SECURITY

Mr. SYMINGTON. Mr. President, according to Secretary of State Dulles, this country has been on the brink of war three times in the past 3 years.

Despite that assertion, the net savings made in the cost of Government since this administration took office 3 years ago have been at the expense of our national security.

Whereas between $7 and $8 billion have been cut from our national defense in the past 3 years, the cost of Government for items other than those for national defense has actually gone up about $4 billion.

How many Americans know that?

Except for farm income, nearly everything else has gone up, especially production and profits of our great corporations.

The Secretary of State must know something about the condition of the world; and therefore all Americans now know they were much closer to war than they were told—not only once but three times.

Now let us see how this administration has reacted to these worsening conditions.

Compared with the fiscal year 1953, expenditures for major national security purposes during the current fiscal year have been reduced about $11 billion.

Although Mr. Dulles says we faced possible war, the money spent in 1954 for major national security was nearly $6 billion less than the amount spent during the previous year; and it is now estimated to be cut even further in 1956.

That is why, today, many of our latest jet planes are grounded because of lack of mechanics—a deference to the importance of money which can only delight the Communist conspiracy.

When, in 1953, this administration attempted to justify the tremendous cuts in personnel—those were the days of all the derisive talk about "paper wings"—the late great General Vandenberg pointed out that if these cuts were put into effect, regardless of how many planes America produced, there would not be enough people on hand to operate and maintain them. This prophecy has turned out to be only too true.

In recent days the American people have learned that whereas 3 times the Secretary of State had us at the brink of war during the past 3 years, the Secretary of Defense was unaware of that fact, and continued to bull through his program of consistent, heavy defense cuts.

Apparently there is as much need for more unification in the Cabinet as there is in the Pentagon.

In any case, the people are becoming more and more confused, and this situation should be cleared up.

THE BRINK OF WAR

Mr. WILLIAMS. Mr. President, I invite the attention of the Senate to a quotation from Mr. Fletcher Knebel's column, published in the Washington Evening Star of January 17, 1956. It reads as follows:

Democrats lambasted Secretary of State Dulles for his "brink of war" strategy. Democrats don't dare go near the brink of war any more—our last three Democratic Presidents fell off.

COMMENDATION BY SENATOR WILEY OF SECRETARY DULLES' TUESDAY CONFERENCE

Mr. WILEY. Mr. President, I ask unanimous consent to have printed in

the body of the RECORD a statement I have prepared in commendation of the statement by Secretary Dulles in his conference on Tuesday.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

SENATOR WILEY COMMENDS SECRETARY DULLES' TUESDAY CONFERENCE

(Statement by Senator WILEY)

I should like to say just a few words with regard to the controversy over the views attributed to Secretary of State Dulles in the current Life magazine article.

I shall speak only briefly on the subject, and shall present my points in outline form, as follows:

1. In my judgment, the Secretary did a masterful job yesterday at his press conference in setting forth anew for all who genuinely want to see, with clear and unprejudiced eyes, the true dynamic nature of American foreign policy.

The Secretary wisely pointed out that military deterrents are of course but one aspect of our foreign policy, along with patience, a conciliatory attitude, and the continual objective to make a peace a vital force for justice and human welfare.

DON'T REHASH HISTORY

2. I believe that it is unproductive to attempt to rehash the historical incidents referred to in the Life article.

History has written the record. The Secretary of State has merely commented on history, as it occurred.

SECRETARY'S PHILOSOPHY CLEARLY DRAWN

3. Contrary to various assertions, the philosophy of the Secretary as indicated in the Life article is not something brand new. The wise pattern of his philosophy has been drawn throughout not simply the Secretary's successful years in his present high office, but throughout a lifetime of constructive words and deed.

Individuals who will take the time to study the record will see how the Secretary, in speech after speech, has consistently set forth the basic philosophy that America cannot hope completely to avoid danger, if she intends to survive and to have the free world survive.

This is a dangerous world. It is not a world as we would want it to be, but it is a world which we must face in a firm realistic fashion.

The Secretary has repeatedly well pointed out that the surest way to avoid war is to put a potential aggressor on notice that when the vital interests of the United States are affected, we are prepared to defend them "if need be, by life itself."

Here, again, the record of history will speak for itself in full justification of the Secretary's position.

The Secretary's factual theme that World Wars I and II came about because potential aggressors thought that they could get away with aggression—that theme, it seems to me, is indisputable.

RESULTS COUNT

4. Basically, it is the results in history which count.

The results of the wise policies of the President of the United States and of the Secretary of State have been that we have avoided war.

We have, moreover, extricated ourselves from one war—and we did so on as honorable a basis as was possible at the time of the Korean peace talks.

The American people, appraising the results, know they are at peace.

They know that the chances for continuing at peace have been immeasurably strengthened by virtue of the President's and the Secretary's wise policies.

The American people will not be misled by partisan charges. They will heed constructive results, and they are thankful for constructive results.

DEMOCRATIC SUPPORT

5. Let me next point out that every single one of the major legislative-executive steps in American foreign policy since the Eisenhower Administration took office, have been taken with the support of our colleagues in the Democratic Party.

The constructive roles which have been played, in particular, by the distinguished chairman of the Senate Foreign Relations and House Foreign Affairs Committee represent such sterling patriotism and leadership that all Americans are indebted to these distinguished Legislators.

We hope, and have every reason to believe, that this record of nonpartisan cooperation will continue.

The policy of necessarily taking calculated risks is not, therefore a Republican conception. It is a nonpartisan conception—and it has been carried on with nonpartisan support.

The worldwide system of alliances, of security treaties and agreements—bilateral and multilateral—which we have wisely constructed in self-defense, have been the product of the best thinking and the fullest support by both parties.

I ask, in all frankness: Does the Democratic Party propose specifically to abandon any single one of these treaties or agreements? Does it actually now propose any specific alternatives, to the policies which we have already carried on with the Democrats' own support?

DISTORTION OF A PHRASE

6. It is a fact that the "brink of war" quotation was ambiguously phrased. It is a fact that the phrase does lend itself unfortunately to misrepresentation and distortion.

But the Secretary of State can hardly be expected to account for every last syllable and every last word in every last sentence, as written by reporters, however competent, in appraising complex American foreign policy.

Surely we can debate issues on the level of their true significance, rather than debating issues on the level of some particular phrase which is less preferable and precise than better defined terminology.

In any event, it is not John Foster Dulles who is responsible for America's having been close to conflict; it is the aggressive, imperialistic U. S. S. R.

Secretary Dulles responded to the danger; he did not create it.

FALSE PICTURE OF UNITED STATES

7. Basically, I believe that some of the attacks against the Secretary are completely beyond the bounds of fairness.

Some of these attacks unwittingly build up the same type of utterly fallacious picture of the United States which is occasionally drawn abroad and to which all thinking Americans rightly object.

I refer to the type of picture of America as an allegedly "war-mongering power," "eagerly rushing toward the edge of nuclear conflict."

Any such picture of the United States is utterly false, utterly misleading, and utterly unjustified.

Any attempt to distort the career of John Foster Dulles, a man who has devoted his lifetime, not only to peace, but to the spiritual foundations of peace—any such attempt is unworthy of a thinking American.

UNFAIR REMARKS BY STEVENSON

8. I read with regret, and almost with disbelief, the remarks made by Presidential candidate Stevenson, in St. Paul.

Surely, millions of Democratic voters might expect higher type remarks than Mr. Stevenson made about Secretary of State Dulles.

Surely, Mr. Stevenson, with his intellectual talent, realized that there is absolutely nothing in what the Secretary of State said, or, more important, in what he has done, which really offers the slightest possible justification for so extreme remarks as the Democratic Presidential candidate made.

CONTROVERSY WILL BLOW OVER

I conclude by saying:

This current controversy will blow over, and it will blow over soon. It will blow over soon, because it is not a debate of substance; it is largely a politically inspired attack, based on distorted phrases and misunderstanding.

The free world knows and respects the wise philosophy of John Foster Dulles. It is a philosophy which has been approved and encouraged by the President of the United States, by the Congress of the United States and the people of the United States.

It is a philosophy which has helped us avoid war. It is a philosophy which is constantly strengthening the peace.

It is a philosophy to which no one here, has offered a reasonable, specific alternative.

Beyond dispute, this is a dangerous world, and unhappily, we must continue to live in some danger.

But the fact that we are willing to do so is, in itself, a great help in reducing the danger of war.

COMING ANGLO-UNITED STATES TALKS

Soon we will welcome to our shores Prime Minister Eden. We trust that the coming talks in this country will effectively contribute to ever closer Anglo-American understanding and action. We know that the talks will get down to substantial issues, and away from any dispute over a reporter's phraseology.

Let us, then, turn to the big job before us.

Some partisan talk may of course, continue to rage.

But I respectfully submit that my own remarks are intended, not in partisan defense nor in partisan attack, but to set the issue in proper perspective.

In the mutual security bill, soon to be evaluated by the Senate and House Committees, we are confronted by problems of great enormity and complexity.

Let us turn our fullest energies, our best talents, to the task. And the people of all the world will thereby be more indebted to us than if we were to choose to continue a sterile and largely partisan debate on a reporter's phrases.

EISENHOWER AND THE FUTURE

Mr. BUTLER. Mr. President, included in a series of articles appraising the Eisenhower administration, published by the Baltimore Sun in November of last year, were two outstanding articles by C. P. Ives, which I ask unanimous consent to have printed in the body of the RECORD. Mr. Ives, one of my favorite writers, develops a theory of internal logic concerning Government and economics which I am certain my distinguished colleagues will find most interesting.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Baltimore (Md.) Sun of November 7, 1955]

EISENHOWER AND THE FUTURE—I

(By C. P. Ives)

GOVERNMENT AND ECONOMICS

Mr. Eisenhower's illness has altered the whole future prospect of the United States.

The all-but-certainty that he would run again and win again and thus continue present programs until at least 1961 abruptly shifts into an all-but-certainty that the presidency will pass into other hands in 1957. What effect would the passing have on the country? To take first things first, what effect would it have on the American economy?

One way to start guessing would obviously be to see what effect Mr. Eisenhower's policies have had on the economy to date. As even his Democratic critics are aware, the effect to date has been good. How good is probably best seen by citing some percentages of improvement in key areas of the economy. As it happens, the United States News and World Report has put just such a table of percentages together.

The figures show that total output of goods and services rose 6 percent between the time the President was inaugurated and the time he was taken ill. Factory and mine production was up 4 percent. The margin of increase in all construction was a full 11 percent. Housing starts—with their special social and population significance—gained by 18 percent.

The Eisenhower years brought a 4 percent boost in business investment in plant and equipment. Employment gained 2 percent, personal income after taxes 8 percent. Dividends rose 18 percent, corporate profits after taxes (which with dividends are the source of new job-giving investment), 15 percent; private credit, 15 percent. Not unnaturally, the stock market, that thermometer of business growth and investor confidence, showed the biggest gain of all, 68 percent.

On the other hand, and let it be said at once: The farm statistics are less favorable. The index for prices received for all farm products reached its Korea war-boom peak in February 1951 when the figure was 313. The index had dropped to 263 by February of 1953, just after the inauguration of Mr. Eisenhower. That is a loss of 50 points. In August of this year, the index was down to 233. This is a loss of 30 points during the Eisenhower term up to that date.

But, note that the farm-price drop started in the previous administration; and that the index fell 50 points to the end of that administration as against 30 points up to now under Eisenhower. Statistics do not ease the burden on farmers having price troubles. They do prove that the farm-price decline began before Eisenhower and has been shorter in the Eisenhower years than before. And the most recent statistics at least suggest that the long decline may have halted and that, under the Eisenhower farm policies, a stabilization of prices may be about to set in.

But for policies that over all work so well it is necessary to have some rather detailed explanation. What are Mr. Eisenhower's economic views? What kind of thinking has led to this veritable kaleidoscope of pleasant economic signs and symptoms (outside of farming)?

Put it this way: Mr. Eisenhower is unlike the adolescent who believed in education, but hated to go to school. He does not resemble the playboy who defended the theory of policing, but had no patience with cops. The President differs from his immediate predecessors in government: They daily proclaimed their love of private enterprise and their distaste for private enterprisers.

The great new things that Mr. Eisenhower brought into Government was a wholehearted acceptance not merely of the theory of private business but of all its implications, philosophical and practical, including its personnel. More broadly, Mr. Eisenhower knew that the American economic system is merely one phase of our general practice of liberty. He knew that liberty has an organic natural law, what Professor Polanyi calls an internal logic. He knew that if you accept the premises of this logic, you have to follow through to the conclusions. In economics, Mr. Eisenhower knew, the main conclusion was that there is no room for Government coercion.

So, under Mr. Eisenhower, the Government has intervened very little in the actual inward operations of the production system. Instead, it has left the private managers and the labor peope free to operate production. Government has confined its own efforts to sitting at the edge of the economy and doing what can be done to maintain the economic climate most compatible with freedom.

Not, of course, that Mr. Eisenhower reverted to the naked let-alone doctrines of more primitive times. He was perfectly aware that the new intricacies of our economy required more intricate climate controlling machinery. That explains his continuance of much of that part of the New Deal reform which was climate regulating (as against production bossing) in its nature and purpose.

To illustrate in general: Mr. Eisenhower maintained and even extended the social-security system with its guarantee of minimum income to large numbers of consumers even in times of adversity. But not once has he seized a private industry to force a prounion wage contract down its managers' throats.

And this labor-management business is as good a place as any to begin listing the specific tools which Mr. Eisenhower and his people have applied at the edge of the economy to regulate its climate in a way to stimulate the production exertions of free men. Basic to the Eisenhower labor policy has been a simple return to Government impartiality as between workingmen and managers. The Government no longer pushes into the middle of every large labor dispute.

When Mr. Eisenhower came to Washington, managers were assured, not that the balance of Government favoritism would now swing away from workers and toward managers, but that Government favoritism would disappear. Freemen were left to operate in freedom, restrained only by a rule of equal law applied from the edge by the Government's climate-regulators.

The theme of impartiality sounded again in the great tax revision which drew 40 years of miscellaneous and often contradictory enactments into a coherent code. Central in this code was recognition of Lord Keynes's theme—that consumer purchasing power must be maintained in massive volume at the base of the income pyramid. But newly stressed were the needs of enterprise and of capital formation: The expansion of plant, the proliferation of equipment, the deeper probing of mineral veins, the wider prospecting of oil areas—in brief, the multiplication of jobs, the growth of the common wealth.

But a tax policy adjusted to the internal logic of liberty must be supplemented by a pro-liberty credit policy. Taxes take money away from enterprisers; the credit policy must make money available but on terms which incite to prudent risk and against unsagacious gamble. Here the Eisenhower Treasury and the Federal Reserve Board have continued a partnership that was already working when the Republicans came into office. Between them they manage the $278 billion public debt in a way to keep interest rates to the general public low enough to promote production and high enough to block inflation. And this is another way of saying that the dollar's purchasing power is stable—a thing vital to investors and consumers alike.

Nor is the exercise at the periphery of balance and flexibility limited to the money market. The Eisenhower innovation in farm policy has again been one of flexibility. The Democrats cling in peacetime to the high-level price supports of war long after the need of wartime bumper crops is over. The Republicans aimed to relate support policies more sensitively to the normal demands of peace. Just as supports at the war levels brought out surpluses unusable in peacetime, so supports that flexed with peacetime demands would guarantee supply up to the point of use—and none beyond.

The surpluses generated under the error of the old plan have, to be sure, slowed the effectiveness of the new. But the very burden of the old surplus warns against the policies which caused it and which, if continued, would add new surplus. Moreover, the attack on surplus through flexible supports administered from the edge of the farm economy is the one alternative to that straight-arm Government policing of farms and farmers which the logic of liberty rejects.

And just as farmers, though measurably protected, are brought back into contact with the freedom of the market, so manufacturers are offered tariff protections which promote rather than stifle the competition of foreign producers. Mr. Eisenhower has secured a full 3-year extension of the Reciprocal Trade Agreements Act. He is pushing the technical-aid programs which emphasize abroad as do the tariff theories at home that producers are free and that the best help is self-help.

So far, though, the tools listed are those which operate primarily upon producers, and promote supply. There are comparable tools which promote the steady consumers' buying power without which no production program can flourish. The social-security system, already mentioned, has, in the Eisenhower years, been expanded over the sound Democratic beginnings. The great tax code, as stated, is aimed, among other things, to assure strong consumer purchasing power at the massive base of the income pyramid. The farm program assures a steady demand on the countryside for the things city working men and managers have to sell.

Well, then, if these are typical of the tools with which the Eisenhower climate-makers have worked in a period when the logic of economic liberty has showered abundance on the population, what will happen if Eisenhower leaves the Washington scene?

This really is the question: How real a statesman is Mr. Eisenhower? Somebody has said that the essential quality of statesmanship is the aptness to be right. Mr. Eisenhower has certainly been right in his economic policies—that, the statistics of growth and development show. But another quality of statesmanship is the ability to root the statesman's policies so that they flourish after he has passed from office. Has Mr. Eisenhower been able to do that?

Frankly, we do not know. It is too early to tell. We have had the faintest hint that he does possess this other ability of the statesman in the steady way his staff, his subordinates, have continued on during the weeks of his illness. But the candid man must concede that this does not prove too much about the longer projection of Eisenhower policies into that indefinite future which extends beyond his departure from the White House.

This, however, may be said: Mr. Eisenhower has attuned his administration to the inward logic of liberty, the inherent rhythm of a free economy. Those adjustments which its most fruitful functioning required, he has made. Like a sailor who turns every gust of wind to his advantage by the skill of his tacking, Mr. Eisenhower has worked steadily with nature, the economic nature of private capitalism, not against it. He has set up a model so clear, so true, so incontestably effective, that his successors will be blind, indeed, to ignore it.

[From the Baltimore (Md.) Sun of November 8, 1951]

EISENHOWER AND THE FUTURE—II

(By C. P. Ives)

WHAT COULD HAPPEN

Yesterday's article showed that the Eisenhower domestic policies were keyed to the

inherent logic of a free economy. It was pointed out that what Mr. Eisenhower wanted the Government to do was to sit at the edge of the national economy and regulate the climate in which free men operated enterprise. What Mr. Eisenhower did not want the Government to do was to push into the internals of the economy and itself try to boss production. The Eisenhower model, it has been said here, was clear, true, and incontestably effective.

But the question remains: Will his successors and his would-be successors follow the Eisenhower model? Or will they ignore it? How will the public be able to tell?

The place to look for evidence one way or the other is obviously at those points in the economy where the logic of liberty is most vulnerable to the pressure of politics. Those sectors are farm policy and labor policy. Successors or would-be successors to Mr. Eisenhower who propose to abandon the Eisenhower economic policies will first show their hand in what they do on farm and labor policy.

As of now (though perhaps not as of the time of next year's election campaign) the Eisenhower policy of flexibility in farm-price supports is most vulnerable to political pressure. As stated already in this look at the Eisenhower policies, farm prices have been going down. Shortsighted and vote-greedy politicians in Government and in the farm-pressure groups will obviously push for rigid price supports in politically sensitive farm crops, and let the consequences be what they may.

Yet, as has already been pointed out, the greater part of the farm-price decline up to date occurred before Eisenhower—when just such high-level rigid supports were in effect. The Eisenhower plan of flexibility has not yet had time really to take hold in all crops. (In dairy products, where it was applied first, it has so far lived up to expectations.) And remember that the Eisenhower policy of flexible supports is keyed to the logic of economic liberty: It aims to adjust farm production to the demand for farm products by adjusting supply more sensitively to the free forces of the open market.

But if the free way of adjusting farm supply to demand is abandoned, freedom for farmers will be in danger. That is to say, the one way to avoid more of the very same kind of farm surplus which the high-level rigid supports have already produced would be to clamp down an iron Government control of how much land a farmer tilled and how much—and what kind of—crop he produced on that land.

The natural pressures for this kind of control would be still further enhanced by what would be an almost certain companion measure to a new high-level, crop-support plan. The companion measure would be some version of the unlamented Brannan plan of food-price subsidy. The high-level supports would tend to keep food prices high. But city voters banded in great labor organizations would demand low food prices. This whipsaw pressure on the cost of food would bring the Brannan plan anew out of the cobwebby cupboard of quack economic medicines.

Under some new Brannan plan, the Government would support high, the farmers would sell cheap, and to close the gap direct subsidies would be piped to the farmers out of the Treasury. In this way the revenues extracted from all of us would be mortgaged to help pay for the food which favored urban consumers took from the favored countryside. But to retain any kind of control at all on the size of these new farm subsidies, the Government would have to push harder than ever to keep farm surpluses down. Farm surpluses would reduce sales prices on food and as sales prices fell, the Treasury subsidies would grow and grow. Even men of budgetary recklessness would reach a point where iron control of farmers appeared the necessary alternative to complete fiscal chaos.

Equally perilous to the logic of liberty would be a return by the successors or would-be successors of Mr. Eisenhower to the pre-Eisenhower labor policies. These policies are well remembered. They consisted in a steady alinement of the Federal Government on the labor side of every argument. They led to a rash of plant seizures, of nationwide paralysis strikes, of wage settlements whacked out by tripartite boards controlled by reliably prolabor public members.

The pro-labor policy of a post-Eisenhower administration would, however, produce even more devastating results than those known in the past. Remember that the two great national labor outfits are now being merged into one federation. It is easy to exaggerate the power of the resultant combine. It is especially easy to exaggerate the power of such a combine to swing the votes of its members. But, while avoiding the dangers of exaggeration on one side, wise men will not underestimate the extent to which such a monolith of organized union power could impose its will on a cowed and complaisant Federal administration.

And yet even a cowed and complacent administration will turn and fight when cornered. Beguiled by the unions away from its mere climate-regulating place at the edge of the economy and into the bossing of production, such an administration could use its interior place to put labor down. The result could be what it was in 1946, when an American President proposed to draft striking railwaymen and drive them back to work at bayonet point, if necessary. The result as in 1947 could be million-dollar fines on union treasuries for flouting laws past the point where government tolerance of such flouting stops.

On the management side of the production process, the result could be timidity and doubt, the retraction of credit, the withholding of investment, the curtailment of enterprise, the ebbing away of jobs and payrolls.

There is, in brief, a logic of unliberty just as forceful and pushing as the logic of liberty. The economic meaning of Eisenhower has been that liberty produces abundance through the efforts of freemen uncoerced by government but working in a climate regulated from the edges by government. The meaning of unliberty in any American version will be what the now universal experience of other nations has been with government intervention in the economy—an always widening area in which men are forced to do what the government says and an always narrowing production of the goods by which men live.

We may be sure that none of the sucessors or the would-be successors to Mr. Eisenhower will openly confess any desire to follow the logic of unliberty. But we must watch what they do more than what they say. We must everlastingly beware of political adolescents who believe in education, but don't like school. We must beware of political playboys who serve the logic of liberty with their lips and the hard rules of unliberty and nonabundance in their actual conduct of affairs.

THE NATIONAL SCIENCE FOUNDATION

Mr. SMITH of New Jersey. Mr. President, in 1950 the Congress established the National Science Foundation. The chief purpose of the foundation is to promote and encourage basic research in the sciences.

This very important work has always encountered difficulty in the Congress when annual funds for the foundation have been requested.

Many of us have found it necessary to make annual pleas to the appropriate committees of the Senate to reinstate funds cut by the House for the National Science Foundation.

It is a difficult task for a layman to convince other laymen of the importance of giving the National Science Foundation adequate support.

In the New York Times magazine section of January 15, there appeared a very excellent article by Esther Everett Lape, entitled "The Basic Reason for Basic Research."

In order that my colleagues may better understand why the National Science Foundation deserves their wholehearted support, I ask unanimous consent to have this article printed in the RECORD as a part of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE BASIC REASON FOR BASIC RESEARCH

(By Esther Everett Lape)

The President's current recommendation of significantly increased funds for medical research raises the question of how this research money can be most effectively spent. Will there be a greater return in projects aimed at some specific disease and its cure? Or in the fundamental research basic to solution of all medical problems? The former approach is standard: A leading ophthalmologist observed the other day, "Congress seems quite willing to earmark funds for trachoma, which is no longer a problem in this country, but balks at specific requests concerned with basic physiology of the eye." Yet comprehensive knowledge of the physiology of the eye would undoubtedly throw light on a host of eye diseases.

Research showing results that are obviously practical (and not too long delayed) such as a new miracle drug or a new vaccine always commands support. Adequate support has not always been available, however, for research which may ultimately have a far greater practical value for medicine but which has not yet reached the stage when it can be directly applied by physicians and surgeons. Realization that, quite aside aside from phenomenal discoveries, research in laboratories of biology, chemistry, physics, and atomic energy is steadily remaking medicine certainly needs to be heightened in the public mind.

There have been many evidences of the practical value of work that may have appeared for years to be remote from medicine. In the Second World War, heavy mortality from shock among men suffering the intensified wounds and burns of modern warfare could be combated only by blood transfusions, but supplies of whole blood for this purpose were desperately inadequate. In the Harvard laboratories of physical chemistry, intensive work had been going on for many years on fractionation of blood. This work had been described only a decade before the war by the foundation that was supporting it as "abstruse and likely only slowly to come to widespread recognition for its essential importance." Yet, this abstruse work was able, in the emergency, to produce the essential fractions that could substitute for whole blood. Deaths from shock were sharply decreased.

The Salk poliomyelitis vaccine was possible only because of a preceding half-century of fundamental work, some of it quite outside the virus field. The intervening phases were many, involving many workers. Of the earlier steps, one of the most important was development of a simple method of tissue culture by Harrison, of Yale. Of the later steps, an essential one was cultivation of the poliomyelitis virus in other than nerve tissue

by Harvard workers, Enders, Robbins, and Weller. Virus cultivated in nerve tissue had been found to involve danger of paralysis, and therefore to be unsuitable for vaccines.

When a new drug for treating tuberculosis was found and justly acclaimed, perhaps a few stopped to think back to the research in optics that went into the microscopes that made it possible to see the germ—a visualization essential to understanding the disease. Fewer still perhaps thought of the chemical research on the glass that made possible the optics; or of the development of the stains that aided in visualization of the organism through the glass; or of the methods of culture or the fundamental studies in microbial nutrition that made possible the culture media. Yet these and literally thousands of other details constituted the basic research essential to the ultimate "discovery" of the drug.

Experience showed the entirely practical value of fundamental research to many of the national lay organizations established with the hope of swiftly finding the cause and cure of such diseases as cancer, heart disease, poliomyelitis, rheumatism and arthritis, multiple sclerosis, muscular dystrophy and other conditions that bring death or ruin life. Under the chastening influence of their developing work, these organizations inevitably learned that basic research has to be applied all down the line in order to get the facts that must be applied to the final achievement.

The American Cancer Society has put millions of dollars into fundamental studies of growth, essential to understanding cancer, which is abnormal cellular growth. The National Foundation for Infantile Paralysis has spent millions in basic research on the nature of viruses. Better understanding of any one virus, among the approximately half-hundred viruses that cause human disease (ranging from fever blisters, warts, the common cold to influenza, "shingles," encephalitis, poliomyelitis, smallpox) might shed a degree of light on all viruses.

We haven't reached the millennium. It may be a long time before all physicians and all the public fully realize that dealing with the end results of disease is an unsatisfactory business and may be a longer way around than dealing with fundamental problems of the cell and protoplasm—which is the essential substance of the cell.

All diseases are, in the last analysis problems of protoplasm. Most of our present knowledge of biology and medicine is attributable to a century of work on the individual cell, its chemical composition and structure, its organization, the principles or substances that regulate or influence its activity. Since disease and the process of aging are merely alterations of the normal behavior of cells and tissues, understanding of the normal cell is the first line of approach to understanding disease.

It would be hard to forecast from just which type of laboratory will come the beam that will illumine some intractable medical problem. The cell physiologist, working on division and growth in normal cells of sea urchins, is making no prophecies as to how far, and when, his work will be applicable to the abnormal division and growth of human cancer cells. Yet it is from such work as this that promising vistas are being opened in cancer research.

The neurophysiologist, concentrating on the single axon of the squid, is not promising that his work will solve the problem of mental illness. He simply knows that all work on the structure and function of the nervous system is in some way related to mind and behavior. Sometimes, when no clue seems to exist in any particular direction, the only course open to the investigator is relentlessly to pursue basic research for its own sake.

Basic research is the safest and the most direct road to solution of the outstanding problems of medicine, from cancer to schizophrenia. The basic research involved is wide and varied. It includes, for instance, the whole field of biology.

Detlev Bronk once raised the question as to whether we are rigidly to continue calling the man who studies the mechanism of the heartbeat in the lobster a zoologist and the man who studies exactly the same thing in human beings a physiologist. "If it had not been for studies on peas and insects," the National Research Council's committee on problems of sex pointed out, "we should probably know little of the principles of determination and heredity of sex in man." Any fundamental discovery in biology, whether related to sea urchins, fruit flies, frog's eggs, squids, has repercussions throughout the entire realm of the biological sciences, "especially in the complex science that we call medicine."

The basic sciences of chemistry, physics and mathematics (electronic brains) are continually making contributions to biology and medicine. So also is atomic energy research. From it the greatest benefit to medicine is probably the radioactive isotopes produced by the uranium chain-reacting pile. Isotopes have stimulated hope of understanding the nature of the cancerous cell and why and how it is able to spread to other parts of the body.

Thus—constantly drawing upon research in biology, chemistry, physics, atomic energy—medicine is a free-wheeling eclectic. Some findings significant for medicine may come to pass in almost any laboratory. To survey, in easily comprehended terms, all the lines of basic research that may ultimately turn out to be important for medicine would be an ambitious project. Yet somehow the story needs to be made clear if the basic research needed for medical progress is to be understood and adequately supported. At present, would the man who digs deep into his pocket for a contribution to the cancer campaign support a "drive" for more intensive work on a subject so far-away sounding as, for instance, the structure of proteins?

To such a question, we can all furnish the answer. Yet, protein structure, a problem that has been called "equivalent to life itself," is actually an urgent medical problem. Almost all components of every tissue are either proteins or in a state of dynamic interaction with proteins. Proteins are important in the maintenance of tissues, in the healing of wounds, in the integration of joints, in all vital processes. They are significant in the growth and division of the cancer cell, of the egg cell determining fertility.

The protein of the heart muscle, involved in every heartbeat, is significant in all heart conditions. Modified proteins ("antibodies") are significant in infection and immunity; "abnormal" proteins (viruses) are important in all virus diseases. And because the nature of proteins lies at the very root of health and disease, investigators (as Linus Pauling, Nobel lauerate in chemistry) have said of the only partly solved problem of protein structure: "It must be solved; the future of medicine depends upon it."

Some of the connections between fundamental research of this kind and nine of medicine's present unsolved problems are illustrated in the current report of the American Foundation, Medical Research: A Mid-century Survey." While the 9 diseases were selected merely to illustrate the need of basic research in each (and in all disease), all 9 are also leading causes of mortality and morbidity. Three of them—arteriosclerosis, hypertension, rheumatism—are related to heart disease, the major killer in this country. Cancer ranks second among causes of death throughout the Nation. Tuberculosis, virus diseases, infertility, chronic alcoholism, schizophrenia are all among the gravest medical problems.

For some of these a degree of control has been achieved. For others, the responsible microorganism is known. But real understanding and rational instead of empirical treatment of them all is dependent upon further basic research.

Some of the conditions require research converging from several directions But often they are not yet really converging: This is true, for instance, of schizophrenia, the number one riddle in mental illness. One group (including the psychiatrists and psychoanalysts) hold that both the cause and cure are psychic. The other group (neurophysiologists, electrophysiologists, biochemists) holds that schizophrenia is as truly physiological as any other disease but simply too subtle for solution by research at its present stage. They, nevertheless, emphasize the physiological as against the psychiatric approach on the theory that there can be no twisted thought without a twisted molecule. Yet in both camps perceptive leaders admit the need of combined attack.

"Let the biologists go as far as they can," said one psychiatrist, "and let us go as far as we can. Some day the two will meet." But the meeting will not take place until much more fundamental work has been done on both sides.

Every new discovery or achievement is a summons to further research. Salk was the first to say of his vaccine: "This is only a beginning." The current vaccine presents pressing questions which only further research can answer: can safer strains be found or developed; for how long can immunity be achieved; is live or killed vaccine the best hope; what principles can be established for developing effective vaccines for other virus diseases—measles, influenza, encephalitis, mumps, the common cold?

Only further research can place the powerful remedies, ACTH, cortisone, hydrocortisone, on a rational instead of the present empirical basis. In spite of their often dramatic effects, they do not change the disease processes themselves. Yet they are reported to be used in a hundred diseases and as the remedy of choice in 45. They dampen but do not extinguish the fire. They provide "an asbestos suit behind which the patient, like some biblical Shadrach, Meshach or Abednego, protects his tissues from the fire. If this protection is removed prematurely, before the fire has spent itself, the patient and his tissues will react again to the burning. But if the protection is not discarded until the natural duration of the fire is over, the patient remains largely free of symptoms and apparently 'well'."

One investigator said of these remedies a few years ago: "We are putting coins in the music box and out comes the music, but we have no idea of what we are doing." Further fundamental work must be done before physicians can rely on anything but inspired guesses to tell them with whom and for what to use these hormones.

Streptomycin research in tuberculosis has been described as having raised more problems than it has answered. These new problems (how the drug really acts, why resistance to it develops) can be solved only by further laboratory research.

Not only streptomycin but all the "mycins" now highlight the danger of application that is not oriented by continuous research. While accomplishing their miracles, the antibiotics have also raised fundamental biological questions. The present tendency to use them in all infections, minor as well as major, and to use them seriatim, "one on top of the other," is not, as pointed out by Finland of Harvard, based on any clear relation between the condition treated and the efficacy of the particular antibiotic.

Perhaps the greatest challenge the antibiotics present to basic research is the emergence of resistant strains of organisms in infections that had at first responded to one or several combinations of antibiotics. "As each antibiotic is introduced," observed Dowling in 1953, "we hear first of miraculous cures, secondly of deleterious reactions, and then of the appearance of resistant strains. There are no combinations of antibiotics, so far as I know, which will prevent the emergence of resistant strains; they merely delay their appearance or diminish their number."

The Salk vaccine, the antibiotics, ACTH are all epochal achievements in modern medicine. But "there is something curiously ephemeral," as Esmond Long once put it, "about a method of treatment or prevention. The one thing that lasts is the growth of knowledge and there is no end to that."

By way of endorsing basic research in principle, we as a Nation took a long step forward in 1950 when Congress established the National Science Foundation. Its functions include encouragement of a national policy for promotion of basic research in the sciences, including biological and medical science.

Public interest in the foundation's functioning—as translated into congressional action—was not, however, sufficient to provide the foundation with funds commensurate wits its research mandate. The President's budgetary request for $14 million for the year 1951–52 was scaled down by Congress to $3,500,000. By June 1955 the foundation (since 1951) had made over 1,500 awards totaling $15,560,000 for the support of basic research and related matters. Approximately half of this not very large sum for a 4-year period was directed to awards in biology and medicine.

Certainly there is need for enlarging the Nation's basic research, whether governmental or extragovernmental, bearing on biology and medicine. Those who want the fruits of research (antibiotics, vaccines) must appreciate, as Paul Weiss of the National Research Council once observed, the need of starting with the seed, the proper soil, and the need of tending the orchard. It is from scientific capital, from the backlog of research in the purest realms of science, that new products and new processes result.

COMMEMORATIVE STAMP HONORING ANDREW W. MELLON

Mr. MARTIN of Pennsylvania. Mr. President, I desire at this time to call to the attention of my colleagues in the Senate the issuance of a commemorative stamp by Postmaster General Arthur E. Summerfield in honor of the late great Andrew W. Mellon on the occasion of the 100th anniversary of his birth.

This stamp is of the greatest significance to all Americans. Our Republic has always bestowed its highest praise upon men and women of outstanding achievement.

Andrew W. Mellon was a great Pennsylvanian and a great American.

His genius helped our country to become great and strong.

His dedicated Americanism, as Secretary of the Treasury, helped to bring about reduced taxes, and a reduction in Government spending and of the public debt.

His love of country inspired him to leave to all of his fellow citizens the great National Gallery of Art with its priceless collections.

During his period of public service he expressed a plain and simple philosophy which rings out and which must sound upon our ears as we commence the important work of this session of Congress. He said:

The people generally must become more interested in saving the Government's money than in spending it.

The words—this message—cannot be repeated too often, nor can the application of this basic philosophy be ignored.

The ceremonies inaugurating the issuance of the stamp—the first day of issue—were impressive and inspiring. They were held on Tuesday, December 20, 1955, in the National Gallery of Art, in Washington, D. C.

Because of the significance and historic importance of this occasion, I ask unanimous consent to have printed in the body of the RECORD, immediately following the conclusion of my remarks, the text of the program which was held in honor of Mr. Mellon.

There being no objection, the program was ordered to be printed in the RECORD, as follows:

INVOCATION, THE REVEREND EDWARD L. R. ELSON, THE NATIONAL PRESBYTERIAN CHURCH, WASHINGTON, D. C.

Eternal God we thank Thee for this good land which Thou hast given us for our heritage. We thank Thee for all the resources of nature and human personality by which our fathers led us from strength to strength. We thank Thee for the patriot's devotion and the hero's valor; for the toil of brain and toil of hand; for the creative skills and directing genius by which our Nation has become great and strong. We render unto Thee heartfelt gratitude for him whom we honor this hour—for his talents in commerce, his gifts in statecraft and his stewardship of treasure and public office by which he has glorified Thee and served his fellow man.

As we honor those who have been the lights of the world in their generation, so we beseech Thee to forge us into one united people, "Strong in the Lord and in the power of His might," that we may be great enough and good enough and strong enough to be the instruments of Thy righteousness upon the earth in our age.

Regard with Thy favor the President of these United States that he may serve this people and Thy kingdom in wisdom and strength.

Uphold all who are set in authority over us. As we sing again the glad anthems of this season, we pray Thee to lift all consultations for the peace of the world into the higher order of Thy kingdom and as once more we bow before the manger of Bethlehem, wilt Thou cradle in our hearts and express in our lives the holy virtues of charity and good will.

Through Jesus Christ our Lord. Amen.

INTRODUCTORY REMARKS BY DAVID E. FINLEY, DIRECTOR, NATIONAL GALLERY OF ART

We have met here today to take part in a very special ceremony. The Government of the United States, through its Post Office Department, is issuing a memorial stamp, commemorating the centennial of the birth of Andrew W. Mellon, who numbered among his many achievements the founding of the National Gallery of Art.

It is a great and deserved honor that his Government is paying him; and it is particularly appropriate that this ceremony should take place in this building which has come to all of us as a gift from Mr. Mellon. Speaking for the trustees and staff of the National Gallery, I should like to say to the Postmaster General that we are most grateful to him for giving us an opportunity to take part in this ceremony and for holding it in this building.

There are many friends of Mr. Mellon's here today and also members of his family, including his son and daughter-in-law, Mr. and Mrs. Paul Mellon. On the platform are the two Senators from Pennsylvania, Senator MARTIN and Senator DUFF, and Congressman JAMES FULTON from Pittsburgh, while in the audience are many old friends of Mr. Mellon's Washington days, all of whom rejoice at this honor that is being paid to his memory.

Mr. Mellon will be remembered for many reasons. He was, first of all, a builder—a creator of banks, of great business enterprises and industries. Thus he gave to thousands of men and women the opportunity to lead useful and productive lives by supplying goods and services which the world needs. He also served his country well as Secretary of the Treasury, and later as Ambassador to Great Britain. But, in addition to all these things, Mr. Mellon recognized the obligation to contribute not only to the progress and the physical well-being of the American people, but also to their cultural and spiritual needs. I shall mention only one of the many instances in which he succeeded in doing this and that is in the founding of the National Gallery of Art.

When Mr. Mellon came to Washington in 1921 as Secretary of the Treasury, he found here no Government-owned museum with a comprehensive collection of paintings and sculpture by the greatest masters, such as could be found in other world capitals of comparable importance. He determined to provide a building and to give to the American people his famous collection of works of art to form the nucleus of what he hoped would some day become a great national collection.

In making his gift, Mr. Mellon expressed the hope that this newly established National Gallery would attract gifts from other colectors throughout the country, and this has proved to be the case. Great works of art have come to the National Gallery from Mr. Samuel Kress and his brother, Mr. Rush Kress, from Mr. Chester Dale, from the Widener family, from Mr. Lessing Rosenwald, and many others. Today, in the scope and quality of its collections, the National Gallery ranks with the great art museums of the world. More than 24,000,000 people have visited the National Gallery since it was opened in 1941, and all have carried away some knowledge or some happy impression that they did not have before. That is a great deal for any group of men to have done for others, and that is why Mr. Mellon and other benefactors of the National Gallery will always be remembered by a grateful country.

That is also the reason why Mr. Mellon, although he was a truly modest man and tried to efface himself in connection with his gift of this building and his collection, will always be held in grateful remembrance by this and future generations as the founder of the National Gallery of Art.

REMARKS OF HON. EDWARD MARTIN, OF PENNSYLVANIA

The great Republic of the United States of America has always bestowed its highest praise upon men and women of outstanding achievement.

We have always recognized those who have contributed to the greatness of our country in statesmanship, national defense, agriculture, commerce, industry, labor, science, invention, and in cultural and spiritual leadership.

We are met today in one of the most beautiful edifices in the world—dedicated to the enrichment of our cultural life. It is a most appropriate place to honor the memory of Andrew William Mellon because this mag-

nificent structure and its priceless collection of cultural treasures represent the fulfillment of Mr. Mellon's great dream.

Several years before he announced his decision to build a magnificent center of art as a gift to the American people, Mr. Mellon told me of his plan. I congratulated Mr. Mellon and remarked that the Mellon Museum of Art would be an everlasting monument to his memory. I suggested that it might be located in the city of Pittsburgh as a source of cultural inspiration for generations far into the future.

But Mr. Mellon shook his head. He said he would not permit his name to be applied to the project he had in mind. He would prefer—in fact, he would make it a condition of his gift—that it be designated as the National Gallery of Art, in order that others might contribute their art treasures to make the gallery truly national in character.

He said that, while he loved Pittsburgh, he felt it would be a greater honor to his native city to have the gallery in the Capital City of the Nation.

This modest and unselfish desire on the part of Mr. Mellon has been fulfilled in the priceless collections that have been added, including those of Samuel H. Kress, Joseph H. Widener, Chester Dale, the Lessing J. Rosenwald collection of prints, and gifts of painting and sculpture from many other donors.

Mr. Mellon's interest in beauty extended to the city of Washington and he pushed forward with his characteristic calm and quiet vigor a plan to make it one of the most impressive and most beautiful capitals of the world.

His plan contemplated the erection of monumental buildings and broad avenues lined with beautiful trees, with parks, and commemorative monuments to make Washington a center of pride and patriotism. It was Andrew Mellon's urging that prompted President Coolidge to include in his last annual message to Congress a plea for a more beautiful Capital City. In that message President Coolidge said, and I quote:

"If our country wishes to compete with others, let it not be in the support of armaments, but in the making of a beautiful Capital City. Let it express the soul of America. Whenever an American is at the seat of his Government, however traveled or cultured he may be, he ought to find a city of stately proportions, symmetrically laid out and adorned with the best there is in architecture which would arouse his imagination and stir his patriotic pride."

Congress authorized the program and appropriated the necessary funds, placing the responsibility for its execution in the hands of Mr. Mellon as Secretary of the Treasury. The Nation owes a debt of gratitude to Andrew Mellon for the dignity and beauty that is now the pride of every American who visits the Nation's Capital.

In one of the many confidential interviews I had with Mr. Mellon I expressed concern over the great expense involved in the new Government buildings. In reply he made the significant statement that Washington, in the years ahead, would become the center of the world. That prophecy has been fulfilled.

Mr. Mellon was a modest man to whom personal publicity was distasteful. He was a builder who worked constantly and courageously to create a better, happier, and more prosperous America. His father, Thomas Mellon, was a poor Scotch-Irish immigrant. He had no social or economic background when he came to America, but he had other assets of great value. He brought courage, honesty, integrity, strength of character, and the will to work.

He cherished the principles of America, individual freedom, and opportunity. The same fine characteristics descended to his four sons.

From his early youth Andrew Mellon prepared for a life of usefulness. He regarded the fortune committed to his care as a tool with which to expand industrial enterprise, to create new products for the benefit of mankind, to broaden employment opportunities for our working men and women, and to make a richer, fuller life for the community and the Nation.

He was a courageous pioneer of the industrial frontier. He had the vision to appreciate the tremendous opportunities and the rich rewards that were possible under the American system of free enterprise.

His genius contributed to the growth and development of many basic industries, such as oil, steel, chemicals, coal, and aluminum—all of them adding to the material strength of our Nation and the prosperity of our people.

Closely associated with Andrew Mellon in the rise of the family industrial and banking interests was his younger brother, Richard B. Mellon, who also found time in his busy life for particiaption in public affairs, in educational activities, and in the church.

Today the honorable traditions and the responsibilities of the Mellon family are being carried forward brilliantly by Paul Mellon and Gen. Richard K. Mellon, both able and public-spirited men.

Andrew Mellon presided over a widespread industrial empire, but I would express deeper and more grateful appreciation of his vast contribution to the spiritual and cultural progress of the United States. Both A. W. and R. B. Mellon never forgot the church.

With the exception of Albert Gallatin, whose fame is also associated with the Commonwealth of Pennsylvania, Mr. Mellon served longer than any other American as Secretary of the Treasury. He served under three Presidents from March 4, 1921, until February 12, 1932.

His career in public service was brought to a climax by his appointment by President Hoover as Ambassador to Great Britain, a post in which he served with honor and distinction.

It is interesting to note that when Mr. Mellon entered upon his duties as Secretary of the Treasury in 1921 the cost of operating the Federal Government was about $5 billion a year. This brought a warning from Secretary Mellon.

"The Nation cannot continue to spend at this shocking rate," he declared.

"The Nation's finances are sound and its credit is the best in the world," he continued, "But it cannot afford reckless or wasteful expenditures."

Andrew Mellon applied to public finance the same sound principles which had been so successful in his private business. By prudent management the Federal budget was balanced and high wartime taxes were reduced. Year after year during Secretary Mellon's tenure in office saw a reduction in the national debt.

These splendid achievements were the result of sound governmental policy. They were founded on a plain, simple principle, expressed by Secretary Mellon soon after he took office when he said:

"The people generally must become more interested in saving the Government's money than in spending it."

Every American should be guided by that philosophy. We should all try to emulate that wonderful example of practical patriotism.

America has been so greatly benefited by the work instituted by Andrew Mellon and other members of his family for the advancement of religion, education, public health and scientific research having a direct relationship to human welfare.

Andrew Mellon passed away on August 27, 1937, in his 82d year. His memory should be honored by all Americans in recognition of his brilliant record of achievement, his unselfish devotion to the public good, his unfailing adherence to sound principles of Government and his outstanding place as a benefactor of mankind.

In conclusion let me say to the Honorable Arthur Summerfield as Postmaster General that we are deeply grateful for this fine recognition of Andrew William Mellon and his brilliant record of achievement and we greatly appreciate the issuance of this stamp commemorating the one hundredth anniversary of his birth.

TALK BY POSTMASTER GENERAL ARTHUR E. SUMMERFIELD

Today, in the centennial year of his birth, we are gathered here to honor a truly great American, Andrew W. Mellon.

Philanthropist, banker, public servant, and patron of the arts and sciences, Mr. Mellon made notable contributions to the public welfare throughout his distinguished career.

It is fitting and proper, therefore, that the United States Post Office Department pay homage to this great citizen by issuing the 3-cent Andrew W. Mellon postage stamp—for postage stamps are mighty messengers of the peace and international good will to which Mr. Mellon dedicated himself.

It also is appropriate that the ceremonies for issuing this stamp be held here in this great center of art and culture, the National Gallery of Art in our Nation's Capital.

Mr. Mellon felt strongly that great works of art do not belong to any person or any nation. He believed that such treasures belong to all mankind and are held in trust for humanity by whoever may have physical possession of them.

He himself stipulated that this treasure house which he founded should not bear his name, but should be a national gallery for all people, of all races, creeds, and colors.

Mr. Mellon hoped that as a national gallery this institution would receive artistic gifts from many American collectors and become one of the great art centers of the world. This wish, so symbolic of the innate modesty of this great American, has been fulfilled.

The gifts of Mr. Mellon and many other generous people have made this gallery world famous for the treasures it holds. Here all people are free to view, study, and appreciate some of the greatest art ever produced by man.

The stamp we issue today, bearing the likeness of Andrew W. Mellon, produced from a print of the portrait by Oswald Birely, has unusual significance.

It has been said that stamps are ambassadors or interpreters of the history, the customs, the basic beliefs of the issuing country. A stamp assumes its "ambassadorial" role when it leads to study of the history and the times of the subject it portrays. And imagine, if you will, the fascinating story any person may find in a study of Mr. Mellon's career.

Aside from his fame as a patron of the arts, Andrew Mellon led a life of service dedicated to the best interests of his country and to the citizens to whom he gave so much. He was Secretary of the Treasury longer than any other American with the one exception of Albert Gallatin.

Besides his outstanding record as a public servant, Mr. Mellon was instrumental in the formation of some of the leading industries of this country; industries, incidentally, which today are playing a large part in maintaining the great strength of this Nation's economy.

In addition to his role as an industrialist, Mr. Mellon was one of the foremost bankers of his time.

By bringing the life and times of great Americans to public attention, stamps issued in their honor advance the knowledge and understanding of our country and its citizens.

And through this understanding and appreciation of people and customs, we hope the cause of peace and justice may be advanced throughout the world.

But let me, if I may, remind you that the freedom of movement of our mail, which so many Americans take for granted, is truly one of the distinguishing characteristics of free men today.

In the very earliest days of this Republic, George Washington recognized that the uncensored delivery of mail must be a vital part of the American freedom. Ever since, the Post Office Department has seen to it that each of our citizen's rights in this respect is vigorously upheld.

This sanctity of the mails is just one of the many blessings that we Americans have and for which we must be always thankful.

And so, in issuing this stamp today, we dedicate it to this basic freedom of ours by honoring the memory of Andrew W. Mellon—an outstanding American citizen—who epitomized so much that is good in America, and to the heritage which he left so that this country and this world might move toward international peace and good will.

Now I have the great pleasure of presenting the souvenir albums, containing Andrew W. Mellon stamps to Dwight D. Eisenhower, President of the United States; Arthur E. Summerfield, Postmaster General; Edward Martin, United States Senator; James H. Duff, United States Senator; James G. Fulton, Representative, United States Congress; Albert J. Robertson, Assistant Postmaster General; David E. Finley, Director, National Gallery of Art; Ailsa Mellon Bruce; Audrey Bruce; Arthur V. Davis; Frank R. Denton; J. Frank Drake; Col. LeRoy V. Greene; Roy A. Hunt; Eliza Lloyd; Stacy Lloyd, III; Catherine Mellon; Paul Mellon; Richard K. Mellon; Timothy Mellon; A. W. Robertson; Sarah Mellon Scaife; Donald D. Shepard.

REMARKS BY PAUL MELLON, SON OF ANDREW W. MELLON

We of my father's family, and I am sure I speak for the entire Mellon family in Pittsburgh and elsewhere, wish to voice our appreciation of the honor bestowed on my father's memory by yourself and by the Post Office Department in the issuance of this memorial stamp. And it has been most kind of you to make these souvenir albums available to all of us.

We also wish to record our appreciation of the kindness of Senator MARTIN, a lifelong friend of my father, who, with our other distinguished Senator from Pennsylvania, Senator DUFF, and Congressman FULTON, initiated the legislation for the stamp.

The Mellon family, certainly, is humbly proud of my father's record of public service to his country, and of his foresight and generosity in the gift and establishment of this National Gallery.

And, were he to revisit us and be at this ceremony today, and to see his likeness on the stamp (and a very good likeness it is), I am sure he would be equally and humbly proud of himself.

But he would be the first one to admit and to point out the ephemeral quality of individual fame which, like every likeness on a stamp, is in the end dated, postmarked, and canceled out. And he would say that it is not the name or likeness which eventually counts but the good that has been done, and the services rendered to mankind and to one's country, that endure; endure, as it says in the very apt quotation from Thucydides engraved in the entrance to the Gallery—"Without visible symbol, woven into the stuff of other men's lives."

I thank you very much.

BENEDICTION, THE REVEREND DR. FREDERICK BROWN HARRIS, THE CHAPLAIN, UNITED STATES SENATE

And now as we turn from this glorious palace of art enriched by the treasured masterpieces of the ages where form and color defy the years and the masters live on forever, we would gratefully praise famous men and our fathers that begot us, leaders of the people by their counsels, honored in their generation and the glory of their time: those that have left a name behind them that their praise might be recorded—those whose bodies are buried in peace but their names liveth forevermore—with the spirits of these men who served the Republic and are a part of our heritage a cloud of witnesses about us as we serve the present day—send us forth in this day of destiny to be true to all truth the world dims, not tonguetied by its gilded lies, not always right in all men's eyes, but faithful to the light within. Amen.

The PRESIDENT pro tempore. Morning business is closed. The Chair lays before the Senate the unfinished business.

AMENDMENT OF THE NATURAL GAS ACT, AS AMENDED

The Senate resumed the consideration of the bill (S. 1853) to amend the Natural Gas Act, as amended.

Mr. JOHNSON of Texas. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. NEUBERGER in the chair). Without objection, is is so ordered.

Mr. FULBRIGHT. Mr. President, will the Senator from Texas yield?

Mr. JOHNSON of Texas. I yield.

Mr. FULBRIGHT. I ask unanimous consent to have printed in the body of the RECORD a transcript of a discussion which the senior Senator from Michigan [Mr. POTTER] and I had on a broadcast over the Columbia Broadcasting System radio network on January 15, 1956, with regard to the natural gas bill. The program which carried the broadcast was The Leading Question produced by Miss Nancy Hanschman. Mr. Stuart Novins served as moderator.

There being no objection, the transcript was ordered to be printed in the RECORD, as follows:

THE LEADING QUESTION: "IS THE NATURAL GAS BILL IN THE BEST INTERESTS OF THE CONSUMER?"

Mr. NOVINS. Tomorrow debate is expected to open in the United States Senate on the controversial natural-gas bill. It is important for several reasons. First, it is a bill which could affect about 30 millions of consumers. It is a bill on which the parties are split, with one group of Democrats and Republicans for it, an other group of Democrats and Republicans against it.

Today we want to find out what the bill is about, what is in it, what it will do, and how it will affect us, the general public. Senator J. WILLIAM FULBRIGHT, Democrat, of Arkansas, is the man who has introduced the natural-gas bill in the Senate. Senator CHARLES E. POTTER, Republican, of Michigan, is a man who is expected to be most active in opposition to the bill tomorrow. Both are here to help us answer the leading question: Is the natural-gas bill in the best interests of the consumer?

Gentlemen, I suppose a logical approach to this question is to ask what is the present situation regarding natural gas distribution. Senator POTTER, without this new proposed legislation, what do we have now?

Senator POTTER. Mr. Novins, first let me say that I am delighted to be on this program.

At the present time the natural gas is regulated at the distributing end by your State regulatory agencies. They regulate your distributing companies.

Mr. NOVINS. When you say regulate, you mean prices?

Senator POTTER. Prices, that's right. Your pipeline companies are bringing the natural gas into the State. That is also regulated by your Federal Power Commission. As the result of the Phillips' decision in 1953, the——

Senator FULBRIGHT. 1954.

Senator POTTER. 1954, I believe—the Court determined that natural gas at the wellhead, when dedicated to interstate commerce, that that should be regulated as to price. Now, the bill before us would——

Mr. NOVINS. I want to ask Senator FULBRIGHT what his bill would do.

Senator POTTER. That is the situation at the present time.

Mr. NOVINS. Let me see if I understand that now. The gas coming out of the ground at the well-head then is not now regulated as to price, is that correct?

Senator POTTER. If it is dedicated to interstate commerce.

Mr. NOVINS. Interstate commerce. All right sir. Now, Senator FULBRIGHT, how would your bill change that?

Senator FULBRIGHT. Of course, I don't quite agree with what has been said with regard to the Supreme Court decision in 1954. What that decision did is to hold that a producer of natural gas is a natural gas company under the meaning of the act.

Then the act itself says that these natural gas companies which at the time it was passed was intended to mean the transmission companies, the long lines, that they shall be regulated as to price in accordance with the strict utility cost plus formula, which is a recognized way of arriving at a price.

Now, what my bill does is concerned only with the method of regulating the price of the gas to the producer. It is not a decontrol bill in any sense of the word.

We believe that it is in the interests of the consumer, because we provide in this bill a method of regulation, which we think is a practical one and an efficient one, and one that will come closer to insuring the continued supply of gas at a reasonable price than the arbitrary utility type of regulation as provided under the bill, as interpreted by the Supreme Court.

So it isn't in issue whether it is control or decontrol. We say the price of the gas to the producer should be in accordance with the reasonable market price.

Mr. NOVINS. That is the actual language in the bill?

Senator FULBRIGHT. That's right. The Court decision said that it should be in accordance with the utility formula which is in effect the cost of the installation plus 6 percent. That is the usual formula.

Mr. NOVINS. Let me ask you a direct question, Senator, there, if I may. So far as the consumer is concerned, the man who uses this gas to cook with or heat his home, what is your bill going to do to him, if anything?

Senator FULBRIGHT. We believe that the bill will provide an adequate supply of gas at a reasonable price for the foreseeable future, whereas I am firmly convinced that if we do not pass this bill, you will have arbitrary prices, attempted by the Commission, which will cause the supply of gas to

dry up. It has already appreciably decreased since this decision in 1954, the supply of gas dedicated to interstate commerce. All cheap gas will move into intrastate commerce to be used within the States of production, and your high-cost gas will be offered in interstate commerce.

Senator POTTER. Senator FULBRIGHT, your new language "of reasonable market price," in the bill you have in these words "among other things" as a determination of what the gas price rate should be. Now, "among other things," as you well know, can include practically anything. In other words, it is about all the traffic will bear.

Now, at the present time, under your so-called utility price rate structure, it has been well established by our courts what that price shall be. Now, you can't tell me that by the passage of your bill that the cost of gas to the consumer won't go up. Now, we have 29 million gas consumers in the country, and the consumers are the ones that are greatly concerned about this bill.

Senator FULBRIGHT. I could not tell you that it would not go up, just as you can't tell me that it won't go up under the present conditions. As a matter of fact, there have been a number of increases under the existing condition without the bill, because everything is going up. Of course, I would not say it can't go up.

We have a gradual increase in prices throughout our country just as automobiles from Detroit have gone up enormously in the last ten years. I do say this: that historically between 1938 and the decision of the Court in 1954, the price of gas without any regulation went up less than the index of prices, that is, the standard of living, the cost of living in this country, purely on competitive grounds, without any regulations at all.

You see, the whole country, the industry and everyone else, including the Commission, the Federal Power Commission, believe that the gas bill did not give authority to regulate the producer, and that was only changed in 1954.

Senator POTTER. Yes; but the Supreme Court of the United States——

Senator FULBRIGHT. By five members of the Supreme Court, three dissenting.

Senator POTTER. But one dissent was not a dissent in favor of the producers. Was Justice Douglas' dissent in favor of the producers?

Senator FULBRIGHT. He said the Court was going far beyond its proper function in making this interpretation, and that decision should be left to Congress.

Senator POTTER. To the Congress.

Senator FULBRIGHT. And he was quite right.

Mr. NOVINS. Did that Supreme Court case raise the issue of whether that was a utility in the sense of——

Senator FULBRIGHT. In effect, it said it is a utility. Let me draw your attention to the fact never in our history has the producer of a commodity been called a utility. This is a completely novel idea. Never in peacetime in our history has our Government ever attempted to regulate the price of a commodity. It is only the monopolistic utility, the utility which renders a service, not one which produces a commodity, that has even been regulated under monopolistic——

Senator POTTER. Of course, Senator FULBRIGHT, your natural gas is a natural resource. Now, it is no different than waterpower. With a hydroelectric plant you go in and you assess rates even for the price of the water. It is no different commodity than gas, so it is a comparable situation.

Senator FULBRIGHT. It isn't comparable at all. How do you distinguish between oil and coal and gas? They are much more analogous.

The rate that you regulate in a utility, that is, an electric utility, is not the commodity, it is merely the service that is rendered by the transmission company or the generating company. You don't regulate the price of the coal——

Senator POTTER. Of course not.

Senator FULBRIGHT (continuing). That goes in to make the electricity. Well, that is the comparable situation.

Senator POTTER. No; it is not comparable at all.

Senator FULBRIGHT. The thing that is competitive here to gas is oil and coal.

Senator POTTER. Coal—a purchaser can buy coal from whomever he desires.

Senator FULBRIGHT. Certainly.

Senator POTTER. But a consumer who has gas, has a service for gas, buying gas from a distributing company, in turn buys that gas from a pipeline, that person is helpless to go out and purchase any other type of gas.

Mr. NOVINS. What you are saying, Senator POTTER, is that that consumer is a captive.

Senator POTTER. He is a captive consumer.

Senator FULBRIGHT. You have completely shifted now from the distributor—from the producer. The producer—he is no captive of the producer. The producer is down here, many of them. There are 8,000 producers in this country, far more than there are automobile manufacturers. If you are going to follow your theory, then we are all captives of General Motors and Ford and Chrysler, and they can do as they please, as they have. The province of General Motors is tremendous. You don't want to fix their prices, do you?

Senator POTTER. I am not talking about the automobile industry, but you do have competition in the automobile industry.

Senator FULBRIGHT. You have got more on gas than you have there.

Senator POTTER. But once a gas well has been tapped for interstate commerce, there is no competition as far as the distributing company or the consumer. They have to buy their gas from that producer.

Senator FULBRIGHT. There are thousands of gas wells.

Senator POTTER. The contracts that were entered into with your favored nation clauses and your escalation clauses which allowed the producers to automatically raise their price everytime somebody in that area——

Senator FULBRIGHT. Senator POTTER, you are, you know——

Senator POTTER. Just 1 moment.

Senator FULBRIGHT. Those are outlawed. Why do you want to discuss something that isn't in the bill, I would like to know—merely to make propaganda?

Senator POTTER. The escalation clause is not all out.

Senator FULBRIGHT. Yes; they are. Your favored nation clauses are no longer in effect, in this sense: that the Federal Power Commission will allow no increases which they do not consider to be reasonable market price.

Mr. NOVINS. Let me interject for just a moment, if I may. Can we have a definition of the favored-nation clause and the escalator clause?

Senator FULBRIGHT. They are rather technical, complex things. It is such a clause that says if in the immediate vicinity, it is usually within 50 miles, there is an increased price given for a similar quality of gas, and all other conditions being the same, then that old one who made the contract, usually for 20 years, you see, may increase it.

Now, what this bill says is that these escalation clauses of that character, favored-nation clauses, are not affected per se, and that no increase can be passed on to the consumer that the Federal Power Commission doesn't consider to be reasonable.

Now, let me say one other word about reasonable. You seem to imply that that is not a good standard. Let me call your attention to the fact that every rate the ICC puts into effect in railroads and airplanes is based upon the same criterion, the reasonable price. It is not a cost-plus price.

Mr. NOVINS. Senator POTTER, you have a couple of things there that you, I think, would probably want to comment on. One is in relation to the escalator clauses and whether they are outlawed, and the other is reasonable market price.

Senator POTTER. The escalation clause is not outlawed in the Fulbright bill. And as far as the reasonable market price, we have the words "among other things" as a criteria in establishing the reasonable market price.

Well, you know "among other things" is just as broad as a barn door, and it could include anything. I am not too certain that an interpretation of that couldn't include the favored-nation clauses and contracts.

Senator FULBRIGHT. But the only method, the criterion for action of this kind, is reasonable market price. Take condemnation of private citizens' property by the Government for governmental use. It is an old, ancient practice. The basis upon which you compensate the private citizen is the reasonable market price. It is not the cost-plus.

Mr. NOVINS. Who determines that reasonable market price?

Senator FULBRIGHT. The court does, in that case.

Mr. NOVINS. I mean now.

Senator FULBRIGHT. In this case the Federal Power Commission. And when he says that the escalation clause, known as the favorite-nation clause are not outlawed, I think he is leaving a wrong and an erroneous impression. It isn't outlawed in the sense it says they are all canceled. It says this: That no increase under that clause, any of these clauses, may be passed on to the consumer unless it is approved by the Federal Power Commission, in other words, and unless the Commission holds that it is a reasonable increase.

Mr. NOVINS. Doesn't that give broad discretionary powers?

Senator FULBRIGHT. Of course it does. It is the same kind of discretion that is given to any regulatory body. The ICC has exactly the same. It will dry up and destroy the industry if you try to apply to the production of a commodity a concept that has grown up under a monopolistic utility. They are simply different things and will destroy the industry, and who is going to suffer? It will be the consumer. There will be no gas for them at any price in many cases.

Senator POTTER. Senator FULBRIGHT, with the millions of dollars that the oil producers are spending to lobby for your bill, you know very well that they expect that your bill will bring them a greater price for their natural gas. Now, who is going to pay for that increase? It is going to be the 29 million consumers of this country.

Senator FULBRIGHT. Let me say I am confident you have no evidence of any millions of dollars. That is purely a prejudicial statement. I know of no such expenditures. I can guarantee you I received not 1 penny——

Senator POTTER. Certainly I am not saying that.

Senator FULBRIGHT. That is an unworthy assertion which I am sure you cannot prove.

Senator POTTER. I can assure the Senator this: I have been in Congress for 8 years, and I have never in my entire 8 years seen the pressure of all kinds put on Members of Congress as they have in favor of your bill.

Senator FULBRIGHT. This is an important matter. Now, I think the assumption that you make, that it cannot be equally for the benefit of the producer and consumer, is an erroneous one. The idea that every trade is hurting one person and benefiting another is absolutely untrue.

We believe that a sound and sensible regulation will be beneficial both to the producer

and the consumer. That is why we are interested in it.

The only real objection to this bill has arisen from a few utility companies, some 60 utility distributing companies, on the peripheral part of this country at such places as Brooklyn, Baltimore, places along there take the lead. The inland places like Cleveland, Kansas City, Cincinnati are not complaining, or Chicago, are not complaining very much. There are a few over there, but the principal opposition is coming from these port cities where foreign, very cheap fuel oil is competitive with gas in industrial use.

Now, we are perfectly willing to grant that under those circumstances there is no guaranty at all, nor is there even any idea, that we can continue over the years to make gas, which is the finest fuel of all for domestic use, for residential use, that we can continue to make that competitive with foreign oil. There is the place where there is real trouble.

Mr. NOVINS. Senator POTTER, you have been remarkably patient. I think you should have an equal opportunity here.

Senator POTTER. The crux of the question which is before the Senate now, you have a commodity such as natural gas. The public interest certainly is involved. Your distributing companies are regulated by your State agencies, your pipelines are regulated by the Federal Power Commission.

Senator FULBRIGHT. Sure.

Senator POTTER. Now, the regulatory agencies of the State and the Federal Power Commission mean nothing unless that is regulated at the wellhead. It means absolutely nothing.

Senator FULBRIGHT. That isn't so. It is regulated at the wellhead.

Senator POTTER. Every time you increase the gas at the wellhead that finds its way up through the pipeline company, the Federal Power Commission is helpless to do anything other but to allow them to increase the price of their gas. The same way with the State regulatory bodies as far as the distributing companies, and consequently the consumer is the one that pays the bill, which has been estimated to run as high as $30 to $50 a year.

Senator FULBRIGHT. Let me ask Senator POTTER, is it not so that this bill provides that any increase of any kind from any source that the producer requests of the transmission line must be approved as a reasonable increase by the Federal Power Commission?

Senator POTTER. It has the pipeline acting as their agent.

Senator FULBRIGHT. That's right. There is a very good reason for that. There are 8,000 producers. There are 100 pipelines, really about 20 important ones. It is physically, as Chairman Kuykendall demonstrated very clearly, it is almost physically impossible to go out and determine the costs of 8,000 producers, and that is purely a method of convience and efficiency.

Senator POTTER. But the crux of the dispute is the fact over the new words of "reasonable market price" rather than utility rate.

Mr. NOVINS. You feel that is too broad, Senator POTTER?

Senator POTTER. Certainly it is too broad.

Mr. NOVINS. How would you handle it?

Senator POTTER. I would keep your utility language as used.

Mr. NOVINS. Cost plus?

Senator POTTER. Cost plus.

Mr. NOVINS. I wonder, Senator POTTER, what you opinion is on the argument advanced by Senator FULBRIGHT, that the supply of natural gas would necessarily diminish.

Senator POTTER. Yes, I have heard that argument many times. Of course, you realize that the vast majority of your natural gas wells are found incidental to the drilling for oil.

Mr. NOVINS. People don't go out looking for gas.

Senator POTTER. No, they go out drilling for oil, and they find gas, and that has been incidental to the drilling for oil.

Now, you can't tell me that with the great depreciation allowance that they receive at the present time, that we are going to dry up the exploration for oil. And in your drilling for oil you are going to find gas.

Senator FULBRIGHT. What you are going to do is to divert all of the cheap gas to intrastate use. Today 53 percent of all the gas that is produced in this country is consumed within the States where it is produced, seven Souhwestern States.

Senator POTTER. If that were the case——

Senator FULBRIGHT. I say it would dry up your interstate gas. Let me say one other thing——

Senator POTTER. If that were the case, then why is it that the Congressmen from the States that are producing States, Texas and Louisiana and so forth, why wouldn't they want to keep that cheap gas within their own State, if that is the case? That would be a good representation for their State.

Senator FULBRIGHT. We have more than— we have a product to sell.

Senator POTTER. That's right, and you are going to sell it.

Senator FULBRIGHT. We think you are threatening an arbitrary and an unreasonable obstacle to its free sale. As I said before, we believe that there is enough gas for our use and for the country's and we would like to sell it at a reasonable price, and that is all we wish to sell it for, and we leave what is reasonable up to the Federal Power Commission.

Senator POTTER. And you claim at the present time it is not a reasonable price?

Senator FULBRIGHT. If you fix the cost-plus onto this, I certainly claim it is an unreasonable and a wholly impractical price that cannot be efficiently or sensibly applied, just as Justice Jackson said in the Hope case——

Senator POTTER. You believe that 6 percent profit is not enough?

Senator FULBRIGHT. It is an impractical thing to apply. Let me give you one illustration.

Senator POTTER. Would 10 percent be enough?

Senator FULBRIGHT. Can I give you an illustration? If you go out and drill a gas well and you get a well, the first well, you will have a very low-cost gas. I go out, I drill 10 wells. The average, actually, on wildcatting is 1 out of 9. I drill 10.

My gas will be 10 times as expensive as your gas. We are both in Texas. If you sold yours in interstate commerce, you would get only one-tenth of what I get, and yet it is the same gas in every respect.

So what happens? You would sell yours in intrastate. I would go out with my high-cost gas, seeking to find a market in interstate, and that is what I meant by drying up all of the low-priced gas.

Senator POTTER. Of course, you realize that before the committee, we offered the proponents of this bill, if the 6 percent profit wasn't enough, to tell us what they wanted, what would be a fair price.

Senator FULBRIGHT. We said a reasonable price; that is exactly what we said.

Senator POTTER. Yes; just as wide open as it can be.

Senator FULBRIGHT. Listen, Senator POTTER, if that is wide open, it is wide open everywhere. Take the electric power rates here in Washington, or any place else, they are regulated, the service is regulated that is rendered, by the generating company, but the price of the ingredients that come into that, the coal, for example, if coal is used, or the oil, they are regulated on the reasonable price basis.

If the Pepco company here bought coal from someone that they were close to, an affiliate or a friend, and they paid twice as much as the reasonable market price, do you think they would allow it? Of course they wouldn't.

That criterion is applied in every utility company in the United States. It is applied by the ICC in fixing rates on railroads or airplanes, it is applied by everyone.

Mr. NOVINS. Senator FULBRIGHT, are you saying that the gas producers now are not earning reasonable profit on their investments?

Senator FULBRIGHT. Well, they are now, under the direction of the courts, you see, and some kind of an effort is being made to apply the cost-plus to it.

Mr. NOVINS. But are they making a reasonable profit now?

Senator FULBRIGHT. It is quite irrelevant, that matter.

Mr. NOVINS. I am wondering as to the predictions——

Senator FULBRIGHT. I say that is a quite irrelevant matter in this whole affair, and I am sure the Senator from Michigan doesn't want to undertake for the Government to allow businesses just whatever they think is a reasonable profit.

Senator POTTER. I do, when he has a captive customer.

Senator FULBRIGHT. You don't have a captive——

Senator POTTER. You certainly do have a captive customer.

Senator FULBRIGHT. The distributor has it. He is regulated.

Senator POTTER. Your distributor has a captive supplier, or he is a captive supplier——

Senator FULBRIGHT. I don't know what you call captive. Anybody can change to oil or coal, if they wish.

Senator POTTER. Yes; he could change to kerosene lamps and candles, but you wouldn't recommend doing away with the regulatory powers to set the rates for our power plants, electric power companies.

Senator FULBRIGHT. But, you see, ultimately the coal people who supply coal to make electricity, they are subject to the reasonable market price regulation, just as analogous to the situation of these producers of gas.

Senator POTTER. But you can buy your coal from many, many suppliers.

Senator FULBRIGHT. You can buy gas from 8,000 producers.

Senator POTTER. But once that gasline is dedicated to interstate commerce——

Senator FULBRIGHT. But it is only dedicated under long-term contracts and under provisions that have been determined to be reasonable by the Federal Power Commission.

Senator POTTER. And those long-term contracts can have your escalation clauses in them to step up the rates. At the present time, am I correct, at the present time about the average rate is 10 cents per thousand cubic feet?

Senator FULBRIGHT. That's correct; yes.

Senator POTTER. There is testimony before the committee that it will probably go up to about 25 cents per thousand cubic feet.

Senator FULBRIGHT. Who made such testimony?

Senator POTTER. Some of the——

Senator FULBRIGHT. I don't believe there is any such testimony.

Senator POTTER. Witnesses before our committee.

Senator FULBRIGHT. They were speculating if it went what it would cost.

Senator POTTER. How far would it go?

Senator FULBRIGHT. I don't know. What will be the price of a Cadillac 20 years from now, can you tell me?

Senator POTTER. I can tell you that——

Senator FULBRIGHT. Nobody knows.

Senator POTTER. There will be competition in that area.

Senator FULBRIGHT. But we have inflation and all kinds of influences that change the price of everything. I am not saying that gas will be held at any particular price when everything else goes out of balance.

Senator POTTER. Yes; but it seems strange to me, with all the many problems that we have in the country today, that we are going out and picking up the cudgels for the poor, distressed oil-producing companies in the United States. I haven't heard of any distress in the oil industry. As a matter of fact, before our committee not one natural-gas producer appeared.

Senator FULBRIGHT. It isn't for that purpose. You completely misunderstand the bill. The bill is to bring order into this industry, and it is primarily for the long-term protection of the consumer. That is the purpose of the bill, and we believe it will achieve that, and not simply in the interest of the distributing utility.

Senator POTTER. You believe the consumer will be protected by removing the historic determination of what is the utility price rate, and substitute in lieu thereof a reasonable market price, which includes in wordage "among other things," which is as wide open as can be.

Mr. NOVINS. I wonder, gentlemen, in the last 20 seconds that we have, if you would venture a prediction as to the fate of this bill. Do you have enough votes to stop it, Senator POTTER?

Senator POTTER. It is very close.

Mr. NOVINS. What do you think, Senator FULBRIGHT?

Senator FULBRIGHT. I think that the bill will pass.

Mr. NOVINS. Do you find yourself in a rather unusual position, Senator, in view of the fact that a great many people at least think that you, as a Democrat, are now trying to get controls removed, and——

Senator FULBRIGHT. You completely misunderstand what I said. We do not remove controls. We are seeking to impose the only workable control that we can think of. This is a control bill, it is not a decontrol bill. I said in the beginning it is merely which is the better method of controlling the price. We seek to impose a reasonable market price criterion upon the price.

Mr. NOVINS. Senator POTTER, what about you? You are in pretty much the same position that an antagonist of your Party, Senator Truman, was in a few years ago.

Senator POTTER. Well, it happens to be that with this issue I agree with former President Truman. I have some very distinguished company in my position, and I agree that Senator FULBRIGHT has distinguished company in his.

My position is that this is detrimental, this bill is detrimental to the consumer, and should not pass.

Mr. NOVINS. Well, gentlemen, we will be very much interested to see what happens in the Senate, beginning tomorrow. Thank you both very much for helping us to answer our leading question.

REFERRAL OF CERTAIN RESOLUTIONS TO THE COMMITTEE ON RULES AND ADMINISTRATION

Mr. JOHNSON of Texas. Mr. President, I wish to make an announcement for the information of the Senate. I had intended, after conferring with the distinguished minority leader, to ask unanimous consent today to refer to the Committee on Rules and Administration five committee resolutions which are now on the calendar. I had hoped to have an opportunity to confer with the senior Senator from Arizona [Mr. HAYDEN] before making that request. However, the Senator from Arizona is detained from the Chamber. Although I have sent for him, he is not present now, and I shall be away from the floor later. Therefore, I wish to announce that I plan to make the unanimous-consent request on Monday next.

Mr. President, I also wish to say, in connection with that request, that I hope every legislative committee will realize that we are living in a day when the taxpayers are becoming increasingly conscious of the use of public funds. I know that a great deal of good comes from the various investigations which are made. I have supported many of them. But I think legislative committees and their distinguished chairman should stop, look, and listen before acting on investigatory resolutions, and should make a very prudent evaluation of the amounts of funds which are requested of the Committee on Rules and Administration and of the Senate.

For several years I have been honored to serve as the chairman of a subcommittee to maintain surveillance of the far-reaching activities of the Department of Defense. I realize the necessity for adequate staffs. The amounts sought for such investigations are as a drop in the bucket when compared with the amount of funds handled by the Department of Defense. However, I think the time has come when every chairman should take a good, long look at every request for money which is made.

I sincerely hope that the Committee on Rules and Administration and the other legislative committees, as well, will carefully study the need for the investigations, the results to be obtained, and especially the amounts of funds requested.

I do not intend to lecture the Senate. Certainly I do not intend to impose my judgment upon the judgment of any committee of this body. But looking at the overall picture, and having some responsibility in connection with the general management of the procedures of this body, I think it would be better for the committees to make thorough studies than to have the Senate spend considerable time on such resolutions on the floor, in attempts either to reduce costs or to defeat them entirely. I fear that if the committees do not do their job, the Senate will take it upon itself to do the job in this Chamber.

Mr. ELLENDER. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield. I did not know the Senator from Louisiana was on the floor. I was not making the statement especially for his benefit.

Mr. ELLENDER. I am glad that I am having a little company in my efforts to reduce expenditures.

Mr. JOHNSON of Texas. The Senator from Louisiana has been very diligent and very effective. I think the Senator was far too modest in his statement the other day when he said he felt that his efforts had been feeble.

Mr. ELLENDER. May I ask the Senator about the motion he is making?

Mr. JOHNSON of Texas. The Senator from Texas has not made any motion and has not made any request. The Senator from Texas had intended to ask that certain resolutions on the calendar be referred to the Committee on Rules and Administration in accordance with the usual procedure, for consideration by that committee. But in view of the fact that the distinguished senior Senator from Arizona [Mr. HAYDEN] is not present, the Senator from Texas will postpone his request until Monday.

Nevertheless, I want to keep the calendar up to date, as it has been kept all along, so I shall ask on Monday that the five resolutions be referred to the Committee on Rules and Administration. Then I hope the Rules Committee will carefully study them, hear testimony, and reach conclusions.

Mr. ELLENDER. Do I understand correctly that it is not the intention of the Senator from Texas to call up any of the resolutions in the Senate between now and Monday?

Mr. JOHNSON of Texas. The Senator is correct. I do not plan even to ask that they be referred to the Committee on Rules and Administration before Monday. The Senator from Texas, further, will say this: Whether he favors the resolutions or opposes them, he is informed of the interest of the Senator from Louisiana in the matter, and he now makes the request that every member of the staff give the Senator from Louisiana notice before the resolutions are called up.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The legislative clerk proceeded to call the roll.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CRITICISM OF THE SECRETARY OF STATE—AMERICAN FOREIGN POLICY

Mr. HUMPHREY. Mr. President——

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that I may yield briefly to the Senator from Minnesota, notwithstanding the unanimous consent agreement which has already been entered into.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUMPHREY. Mr. President, in the past few days I have spoken from this floor concerning certain matters relating to American foreign policy, especially as those items of foreign policy have been discussed in the press of our country, with particular reference to an article in Life magazine.

Today, newsstand diplomacy continues. I invite the attention of the Senate to the full page advertisement in this morning's Washington Post and Times Herald. The editors of Life, without any appropriate chagrin or embarrassment for the disservice Mr. Dulles' Brink of War article has done to American foreign policy abroad, seem to want to capitalize on increasing their sales.

I appreciate that is a normal desire in the economic and business world, but I believe that in light of the controversial nature of the article, it bears some further examination.

The editors claim that their "provocative piece is based on four interviews" with Secretary of State Dulles—a claim which disputes Mr. Dulles' painful explanation yesterday that this was just an "informal chat."

The editors assert that Mr. Dulles' article has been "alternately applauded and criticized by the international press and ranking diplomats." This is simply not true. I challenge the editors of Life to point out a single instance where either the international press or a ranking diplomat has applauded the Dulles article as reported in Life magazine.

The editors claim that their magazine, which they say is "noted for its unique photo-journalism, demonstrates its flexibility by publishing responsible writing on a vital subject." No one else has said that Mr. Dulles has engaged in responsible writing.

The editors reprint a column by David Lawrence, the editor of their competing journal, the U. S. News & World Report. This in itself is most unusual. But it was their only recourse, because Mr. Lawrence has been just about Mr. Dulles' only defender. Let us see how he defends him. Mr. President, I hold in my hand the reprint of the article by David Lawrence. It is entitled "Today in National Affairs: Dulles' Brink of War View Called Warning to Russia"; and in the third paragraph Mr. Lawrence says:

> The facts contained in the Life article are correct and the magazine is to be commended for its enterprise in bringing the subject matter to the attention of the world at this time. For, while there is in the article one brief quotation which might better have been revised for clarity reasons, the essential points are historically true and realistic.

Mr. Lawrence, however, has convicted himself out of his own mouth. I direct his attention and the attention of the Senate to the article on pages 21 to 23 of his own magazine on August 6, 1954, when the Indochina crisis had just subsided. At that time Mr. Lawrence's magazine, the U. S. News & World Report, had something quite different to say—quite different from what its editor says today, and quite different from what the Life magazine article reports.

I now quote from the article to which I refer; and inasmuch as we wish to identify the exhibits, let me state that I hold in my hand the volume of the U. S. News & World Report for the months of July through September 1954. The article in the issue for August 6, 1954, begins on page 21 and runs through page 23. I now quote from the article:

> Idea that the United States was on the verge of a shooting war is not supported by the record. United States Joint Chiefs did not recommend intervention. Nor did Britain keep United States from starting a war.

Those quotations are from the article of August 6, 1954.

I wish to read a little more from that authoritative article—at least, Mr. President, the U. S. News & World Report said it was authoritative:

> Everything from the truce in Indochina to a world war nobody wants is being blamed on the United States. The record, however, shows it's just not so.
>
> Idea that the United States was on the verge of a shooting war is not supported by the record.

Mr. President, I digress to note that on August 6, 1954, immediately after the truce in Indochina, when all the facts were fresh in everyone's mind, the United States was not on any verge, not even close to a verge. The word "verge" was not in the official vocabulary. We became sort of "vergy" when we got to the Life magazine article published about 1 week ago.

I continue to read from the August 6, 1954, issue of the U. S. News & World Report:

> Idea that the United States was on the verge of a shooting war is not supported by the record. United States Joint Chiefs did not recommend intervention. Nor did Britain keep United States from starting a war.
>
> What actually happened is told in the following answers.
>
> Questions are being asked about the responsibility of the United States for the truce in Indochina.
>
> It is reported, both in the United States and abroad, that the United States was on the verge of entering the shooting war in Indochina, that the United States let its allies down, that the United States first promised to intervene in the war and then backed out.
>
> The questions being raised, and the authoritative answers, are these:
>
> Did the United States Government ever propose that this country should send its Armed Forces into a shooting war in Indochina?
>
> No. No such proposal was made by the United States Government.
>
> Didn't the French formally ask the United States to get into the war?
>
> No, not formally. One government makes a formal request of another on a matter of this kind only when an affirmative reply is expected.
>
> * * * * *
>
> Hasn't it been printed that the United States was on the verge of war, that President Eisenhower was considering an air strike on Indochina for April 28? Didn't the French Premier confirm that? Didn't Prime Minister Jawaharlal Nehru, of India, confirm it, too?
>
> Well, it was printed, yes, but not confirmed. On the contrary, everyone who knew what had happened denied the printed report to anyone who asked.
>
> As for the French Premier, Pierre Mendès-France, he talked about it in the French Parliament when he was still just a member of the opposition, with no official information at all.

Mr. President, from the article of August 6, 1954, issue of the U. S. News & World Report, published by David Lawrence, I now read, on page 22, the bottom paragraph:

> You keep hearing, too, that the United States Joint Chiefs of Staff recommended to the President that we get into the shooting war: What about that?
>
> That is wrong, too. In the first place, the Joint Chiefs don't work that way. It is not and was not up to them to decide if the United States should intervene. That had to be a White House decision, subject to the approval of the United States Congress.

Now we come to another one:

> Is it true that we had carriers in Indochinese waters?
>
> Not in Indochinese waters, no, but in the South China Sea off Indochina. Vice Adm. William K. Phillips, who commands the First Fleet, was there with Task Force No. 70.2 (a unit of Task Force 70). The two carriers of 70.2, the *Philippine Sea* and the *Hornet*, went into those waters on April 11 and June 27, respectively.
>
> The movement of this force was part of normal Navy precautions in an emergency that could affect United States interests.

A little later we have another question, as follows:

> So the idea that the United States was close to war might have been used by others in an effort to get better truce terms out of the Communists?
>
> It could be. But it was not so used by Americans, officially or unofficially.

Finally we find this, Mr. President:

> Can the United States be held responsible for the truce?
>
> The facts are otherwise. The United States stated its interest in united defense of Southeast Asia, in collective action with its allies and with the Asian non-Communist countries. But the United States deliberately stood aloof from negotiating a truce in a war that was fought by the French and that the French wanted to end. The French made no commitments to the United States to keep fighting, nor did the United States ask them to do so.

Mr. President, those are quotations from the article in the U. S. News & World Report. I say most respectfully that those quotations and the article to which I have referred do not support the conclusion in the Life magazine advertisement in the Washington Post of January 18, nor does the article of August 6, 1954, support the assertion made by Mr. Lawrence in his reprinted article of January 15 in the advertisement of January 18. Moreover, the article of August 6, 1954, does not support the conclusions or observations in the Dulles article in Life magazine, January 16, 1956.

It is one thing to sell magazines, and it is another thing to have magazines assert American foreign policy with official blessing.

Interestingly enough, Mr. Lawrence says in his article that the Life magazine article gives us a new foreign policy. Listen to this:

> A warning to the world, and specifically to Soviet Russia, has just been proclaimed by the Secretary of State, John Foster Dulles. It is a warning that the United States, in order to defend itself and its allies, can and will in case of an aggression resist—even using atomic weapons if necessary—and that peace at any price is not the policy of the Eisenhower administration.
>
> This is the true significance of the much-talked-about article in Life magazine giving the views of Mr. Dulles about the "brink of war." Instead of being a matter of "inept timing," as some foreign critics refer to it or the "rewriting of history" as the petty partisians here suggest—

I cannot imagine to whom he could be referring—

> the revelations constitute a timely and constructive contribution to the worldwide discussion of the best way to achieve and maintain peace.

Mr. President, there is only one evaluation to be placed upon that particular bit of journalism, namely, that the Life magazine article is stating a new aspect of American foreign policy, from the lips and words of the Secretary of State. I

am delighted to hear about new developments in our foreign policy, but I prefer to hear them in official messages. I prefer to hear them before committees, or in the presence of the appropriate committees. I prefer to hear those pronouncements directly from the President and the Secretary of State, and not in a magazine article. As I have said on other occasions, if we must get our foreign policy through periodicals, I want an opportunity to select the periodical to which I shall subscribe. I did not know that we had an official press in America.

It seems to me that this is of high enough significance so that it should be brought to the attention of the press and magazines in a much broader manner, rather than being confined to one periodical.

Finally, the U. S. News & World Report article of August 6 denies specifically that this Government ever proposed that we send our Armed Forces into the shooting war in Indochina. The article specifically denies that the United States was responsible for the truce.

Is it not interesting, therefore, that a paid advertisement now can say that the Life magazine article is factual, that it reveals a new concept of American foreign policy, and quotes a so-called competitive editor?

When we go into the competitive editor's own magazine of August 6, 1954, his own magazine article concludes:

> So the official records show that the United States never was on the verge of a shooting war with Communist China over Indochina? Yes; that is the record.

Mr. President, what can be said of such inconsistent reporting a year and a half after the event? It seems to me that this situation is one in which confusion is becoming worse and compounded. Furthermore, when Defense Secretary Charles Wilson was questioned upon the subject of the "brink of war" concept of American foreign policy, Mr. Wilson told a news conference that he does not agree with Secretary Dulles that the United States has been on the brink of war three times since 1953. Mr. Wilson said he never thought we were that close to war in Korea, Indochina, or Formosa.

Mr. Wilson is the Secretary of Defense. If we are going to be on the brink of war 3 times in less than 3 years, surely we ought to tell the secret to the Secretary of Defense. I do not expect to hear about it as a United States Senator, but it might not be a bad idea to tell the Secretary of Defense, particularly if, as the Secretary of State states, the "brink of war" diplomacy is a necessary art in promoting the foreign policy of this country.

This adds up to further comment. General Ridgway's article was devastating and damaging. I think it necessitates the appearance of General Ridgway before appropriate committees of the Congress, so that we can get all the facts. General Ridgway said in his article:

> The security of the Nation is being thrown into the market place to be traded for political advantage.

That is one of the quotations from General Ridgway's extensive and provocative article. If the Secretary of Defense does not know we are on the brink of war, I think that fact further supports what General Ridgway indicates—namely, we talk tough, but we do not have the hardware and the goods to back up the bluff.

Many Members of Congress have been deeply concerned over that very fact. Many Members of the Senate have expressed concern on the floor of the Senate over what they consider to be the lack of adequate defense capabilities on the part of our Armed Forces, as related to the strength of the Soviets and the satellite states.

This is not a partisan argument, nor has it ever been. This is a discussion of the fundamentals of American foreign policy. This is a discussion of the security of this Republic. The Dulles press interview of yesterday was totally unsatisfactory.

The press interview of yesterday did not answer the questions which the American people have the right to have answered. We need to know, from somewhere in this administration, whether or not we were on the verge of war three times; and if we were, why did not Secretary of Defense, Mr. Wilson, know it?

We need to know whether or not we won a great victory in Indochina; and if so, who said so? Where is the official record which so reveals?

We need to know whether or not we have threatened the use of atomic weapons as a part of our foreign policy and security policy. Or was Mr. Eisenhower right when he said we would not use those weapons first? I cannot get over the fact that Mr. Eisenhower, the President, had to reassure the world this year of our peaceful intentions.

This morning I sat with the Senate Committee on Agriculture and Forestry. We were discussing surpluses. One of the witnesses said he was a little confused on the subject of surpluses, because if we had been on the brink of war three times, perhaps we needed some surpluses. I gather that Mr. Dulles did not tell Mr. Benson. I am not complaining about Mr. Benson. Apparently he did not hear about being on the brink of war. Mr. Wilson did not hear about it.

Furthermore, did Val Peterson, the Director of Civil Defense, hear about the brink of war? Did Val Peterson hear how close we were to war? If not, this administration stands accused of failing in its responsibility to provide for the protection of the citizens of this country through adequate civil defense. The needs of civil defense in America are obvious. They have never been met, even in part.

Mr. President, I asked unanimous consent to address the Senate at this time. There are some other matters which I desire to bring to the attention of the Senate.

Yesterday I placed in the RECORD a number of documents from the free-world press. If my colleagues will bear with me for about 2 minutes, I shall be through. Is that satisfactory to the majority leader?

Mr. JOHNSON of Texas. I am delighted to bear with the Senator from Minnesota. He asked for 10 minutes. He has consumed 22 minutes. I am having difficulty bearing with both the Senator from Minnesota and the junior Senator from Texas [Mr. DANIEL]. Yesterday I asked the junior Senator from Texas to postpone until today the beginning of his address. The Senate met at 12 o'clock noon. The junior Senator from Texas has been bearing with Senators for 30 or 40 minutes.

I should like to accommodate the Senator from Minnesota, but in accommodating him I do not wish to find myself in difficulty with the very able junior Senator from Texas. The Senator understands that I must return to Texas this summer. I am sure he understands my situation. [Laughter.]

Mr. President, I ask unanimous consent that I may yield 2 additional minutes to the Senator from Minnesota.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the Senator from Minnesota may proceed.

Mr. HUMPHREY. Mr. President, I wish to say again that I appreciate the concern of my friend from Texas, and I wish to cooperate. However, I must say frankly that I do not believe there is any more important subject confronting us today than the subject of our foreign policy. Gas bills are important, and so are agricultural bills. However, nothing is more important than foreign policy.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. JOHNSON of Texas. I will say to the Senator from Minnesota that I agree with him. The Senate convened at 12 o'clock, and for an hour and a half since then we have had general discussion along the line now being pursued by the Senator from Minnesota. It will be remembered that the Senate on yesterday entered into a unanimous-consent agreement, with which the Senator from Minnesota, I am sure, is familiar. All of us are delighted to hear the Senator's remarks, but the fact remains that we have entered into a unanimous-consent agreement, and we have already yielded time to the Senator. All of us realize the importance of the subject being discussed by our good friend from Minnesota.

Mr. HUMPHREY. I know the Senator appreciates it. I thank him very much.

The evidence is still coming in that Mr. Dulles—given the most charitable interpretation—has committed a catastrophic mistake. I believe that the sense and effect of the Dulles interview is to spell out an attitude of mind on the part of the Secretary of State which I submit weakens and limits his effectiveness in directing our Nation's foreign policy. I do not intend to see the image of the United States in the world's eyes distorted out of recognition. I do not intend to allow Mr. Dulles's views on foreign policy to stand as the unanimous view of the United States. It is clear that Mr. Dulles does not reflect responsible public opinion in the United States.

Yet I wish this distinguished body to see what has already been done by Mr. Dulles and his public-relations team in

their gross miscalculation of the benefits to the Republican Party of an article like that in this week's Life magazine.

Mr. Dulles has delivered us into the hands of the Soviet propaganda-machine. In one dismal stroke he has undone the concerted efforts of the whole Voice of America campaign. All the millions we have poured into radio programs and films and speeches and records to persuade the peoples of the uncommitted countries—and yes, even, to reason with the Communist peoples, as well—are undercut by these rash statements.

Just let me tell you the kind of thing that the official Soviet news agencies are broadcasting into India and Indonesia, Burma, Indochina, the Near East, into Italy, and France, and Germany.

Listen to what the Soviets are saying through their East Berlin mouthpieces, in this case the Berlin Deutschelandsender. This is what is going out from Moscow to everyone who understands the German language.

Listen to this—broadcast, January 14:

Dulles insolvent cynicism has also had a good effect: it demonstrated the real nature of United States policy. Dulles himself confirmed what the statesmen of the peace camp have always said: in the United States Government are warmongers who do not hesitate for a moment to set the world aflame if this corresponds to their interests. Dulles himself has now demonstrated how right the peace camp was with its continued warnings against the war policy of the United States and her allies.

So states the Communist propaganda.

Further on in the German Communist broadcast, the narrator read:

No, an atomic war, as it was planned by Dulles, is a global affair, and when the atomic bombs drop on Asia, they will also drop on Europe, and on Germany the more so since the West German Federal Republic has today become a member of NATO and must go to war on NATO's and Gruenther's orders. The Dulles interview shows with unimaginable frankness and clarity by whom NATO is ruled and directed.

Mr. President, I ask unanimous consent to enter in the RECORD, the full text of this German Communist broadcast of January 14, 1956. It illustrates quite clearly the way in which the Communists have gleefully seized on Mr. Dulles' monumental blunder.

There being no objection, the text of the broadcast was ordered to be printed in the RECORD, as follows:

A finance minister under the Weimar Republic who once said that financial policy consisted in always walking along the edge of a deficit was a mere novice compared with United States Secretary of State Dulles. "Dulles recently revealed to us in an interview that, for him, the highest level of statesmanship consists in balancing on the edge of the abyss of war. The above-mentioned finance minister only risked the taxpayers' money, while Dulles risks the lives of hundreds of millions of people.

"No wonder that, when the interview became known, the people did not show much understanding for the artistic beauty, so highly praised by Dulles, of this 'haute ecole' of capitalist diplomacy. On the contrary, there was a big outcry in the world against such a feat of balancing on the razor's edge between war and peace."

(There follows 1-minute resume of Dulles' remarks.)

The fact that a world war was avoided after all was not because of the United States, but because of the growing power of the Soviet Union and the strength of the great peace camp, as well as the desire for peace on the part of the peoples of the Western World. "Even a paper—certainly not a progressive one—like the London Daily Mail reflects the horror of the British when it remarks on the Dulles interview: 'It is the most terrifying art we ever encountered. One false step and the artist is over the edge, taking his H-bombs with him and destroying entire continents in the process.'"

Dulles' insolent cynicism has also had a good effect: It demonstrated the real nature of United States policy. Dulles himself confirmed what the statesmen of the peace camp have always said: In the United States Government are warmongers who do not hesitate for a moment to set the world aflame if this corresponds to their interests. Dulles himself has now demonstrated how right the peace camp was with its continued warnings against the war policy of the United States and her allies.

Again, the movement for the outlawing of the atom bomb and the destruction of all atomic weapons is not a mere academic matter, but an extremely concrete action for saving some hundreds of millions of human lives. Dulles' remarks also showed that the Soviet Union's disarmament proposals are not just a matter for the diplomats and military experts, "but concern each one of us," since their acceptance or rejection may one day decide the personal fate of every one of us.

"What would have happened if the Federal Republic had already been a member of NATO at the time when matters in Korea, Indochina, and Formosa were on the razor's edge and when the men behind Dulles waited avidly for their third world war? Bonn would have had to join in. The militarists, after all, would have liked nothing better—that is, West German youths would have died for the greater glory of the foreign-political tightrope walker Dulles and atomic weapons would have laid waste to German land.

"Conditions today are no longer such that we in Germany can sit calmly by our fireside and peacefully smoke our pipes while peoples are warring with each other in some far-off land. No, an atomic war, as it was planned by Dulles, is a global affair, and when the atomic bombs drop on Asia, they will also drop on Europe, and on Germany the more so since the West German Federal Republic has today become a member of NATO and must go to war on NATO's and Gruenther's orders. The Dulles interview shows with unimaginable frankness and clarity by whom NATO is ruled and directed.

"After this interview, it is no longer possible to call the new West German Wehrmacht by the pretty name of 'citizens in uniform,' as people have hitherto tried to do. OST-WEST-KURIER states this fact quite clearly when it writes that the new spirit of our armed forces will be far more determined by the H-bombs threatening them from above than by the duties of citizens wearing a 'peace-time uniform.' Today, no one can say that NATO is merely a harmless defense alliance, for it is one of the main instruments of Mr. Dulles in his attempts to unleash the third world war.

"What does the SPD leadership, above all others, intend to do? Will it continue to cooperate in the executory regulations of NATO, because these have, by formal democratic process in parliament, become law? These new executory laws, after all, concern not a new (word indistinct—Ed.) or a new road traffic regulation, but they concern a law about war, the third world war. Is it possible to cooperate with those who are nothing but the delegates of the warmongers in Washington? The peoples of the world, especially the German people, must, after this interview, be still more vigilant and still more opposed to NATO. With their fight for peace and with their will to live, they will thwart all the arts of those tightrope walkers of war and of death."

Mr. HUMPHREY. Mr. President, here's another Communist broadcast, quoting from an Indian newspaper, the National Herald:

DELHI.—Commenting on Dulles' statements to a Life correspondent, the National Herald says in its editorial:

"At a time when wide strata of the population demand that hydrogen-bomb tests be banned and when serious anxiety exists in connection with the refusal on the part of [the United States and Britain?] to carry out this demand, Dulles states that the United States had twice in the course of recent years threatened to use the atom bomb."

Refuting Dulles' assertion to the effect that the threat of atomic war had allegedly prevented the breakdown of negotiations on the armistice in Korea, the newspaper points out: "Those who understand China's policy find it difficult to believe that she resumed negotiations under the pressure of this threat because, despite whatever atomic atrocities the United States could carry out, it is impossible to conquer China, and the entire world would have turned away from the United States in horror."

If Mr. Dulles thinks that he has a closed case in Quemoy and Matsu, and that the Chinese have been persuaded to give up their pretentions for conquest of Formosa, let him listen to the Chinese Communist broadcast from Peking, January 15, 1956, a part of which I quote:

As for Dulles' so-called victory in obstructing the Chinese people's liberation of Taiwan, the People's Daily says "Dulles' art cannot work on the Chinese people. We will liberate Taiwan, and as long as Dulles lives on, he will see it himself."

A Chinese Communist broadcast quotes the Indian press reaction to the Dulles article:

NEW DELHI, January 14.—The Indian press does not welcome the announcement by the United States Secretary of State, John Foster Dulles, that he was planning to visit India.

The Times of India wrote that the American commitments under the SEATO Treaty, the inability of Washington to revise its relations with Syngman Rhee in Korea, and Chiang Kai-shek on Taiwan, the abnormal stand taken by the Eisenhower administration on the question of Indochina, not to mention Dulles' incredible tactlessness with regard to Goa, sharply limited the chances of finding a common position for India and the United States.

The conference of SEATO member countries in Karachi coincided with the contemplated visit of Dulles to India, the paper continued. Coming straight from a conference, the main subject of which would evidently be negotiations from "positions of strength," Dulles would hardly be able to derive the benefit from the standpoint of greater understanding when conducting talks with the Prime Minister of India.

The paper Blitz asked the people of India to tell Dulles in plain language: "Go by all means to Pakistan or your Portuguese Province of Goa. Or to your stooges of SEATO, but spare us—and yourself—the embarrassment.

In every language—from German to English to Hindustani—in every language through which the Russian propaganda machine operates, powerful radio broadcasts are dinning into the minds of the uncommitted peoples of the world

the false picture of American intentions which Mr. Dulles has created.

We must have an immediate, and a vigorous, correction of the conception of American foreign policy expressed by Mr. Dulles.

AMENDMENT OF THE NATURAL GAS ACT, AS AMENDED

The Senate resumed the consideration of the bill (S. 1853) to amend the Natural Gas Act, as amended.

Mr. DANIEL obtained the floor.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield?

Mr. DANIEL. I yield.

Mr. JOHNSON of Texas. Mr. President, I should like to ask the Senator whether he would agree to yield to me for the purpose of suggesting the absence of a quorum. Several Senators requested that they be informed when the junior Senator from Texas spoke. Therefore, I believe we should have a quorum call, and if it is agreeable to the Senator, I shall suggest the absence of a quorum, with the understanding that the Senator from Texas will retain the floor.

Mr. DANIEL. I yield for that purpose.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the junior Senator from Texas may yield to me for the purpose of suggesting the absence of a quorum, with the understanding that he will retain the floor at the conclusion of the quorum call.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the Secretary will call the roll.

The legislative clerk proceeded to call the roll.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DANIEL. Mr. President, I have some remarks to make concerning the Harris-Fulbright bill, which will take about 30 minutes. Then I intend to explain, if time permits, the various sections of the bill. If it is satisfactory to my colleagues, I would appreciate being permitted, for the sake of continuity, to complete my preliminary remarks without interruption. Then I shall yield for any questions Members of the Senate may desire to ask.

Thus far in the debate, emphasis has been placed on points of disagreement between the proponents and opponents of the Fulbright-Harris bill.

It might be helpful if my remarks should begin with emphasis on areas of agreement—a few points on which few reasonable men will differ:

First. The great accomplishments of the natural-gas industry prior to the Supreme Court's decision in the Phillips case on June 7, 1954, including increased production and reasonable sale of natural gas by the producers, were without any price-fixing regulation of independent producers by the Federal Government.

Second. The Supreme Court's decision in the Phillips case has created such uncertainty that Congress must take affirmative action of some nature to relieve the chaos and confusion.

Third. An ample supply of natural gas is the most important consideration for the consuming public, because ample supply will keep consumer prices lower.

Fourth. Utility-type regulation and price-fixing on independent producers will decrease the future supply of natural gas in interstate commerce, and thereby result in higher consumer prices.

Perhaps a brief discussion of these preliminary points will show their importance in arriving at the policy to be written by Congress on this important subject.

HISTORY AND ACCOMPLISHMENTS BEFORE THE PHILLIPS DECISION

During the 16 years between enactment of the Natural Gas Act in 1938 and the Supreme Court's decision in the Phillips case in 1954, there was no Federal regulation of the independent producers of natural gas or the prices which they charged. During this time the producing industry expanded to such an extent that one-half of its production was made available to interstate pipelines which carried this clean and cheap fuel into most of the nonproducing States of the Nation.

Under free and open competition the supply increased from year to year, but producers' prices did not increase as much as the value of the dollar decreased.

The average producer's price in 1938 was 4.9 cents per 1,000 cubic feet, and at the end of 1953 it was only 9.2 cents. It now average 10 cents and is less than one-tenth of what the ultimate household consumer pays for his gas. Considering the value of the dollar in 1938, the producer was actually receiving more then than he is today. The experience of these 16 years without regulation shows that the producer's price of gas increased far less than that of any other fuel, and retail costs have remained generally below 1938 price levels.

Mr. President, I ask unanimous consent that exhibit 1, The Bargain of Natural Gas, with figures from the Bureau of Labor Statistics, be printed in the RECORD at the end of my remarks.

The PRESIDING OFFICER (Mr. MCNAMARA in the chair). Without objection, it is so ordered.

(See exhibit 1.)

Mr. DANIEL. Mr. President, no one complained before our committee of exorbitant or excessive prices charged by producers before they were threatened with price-fixing regulations and overnight classification as public utilities.

Until then the interstate market was attractive. Producers increased their wells for gas development, added to the supply, and thereby, through the normal process of competition, kept their prices reasonable and lower than other fuels.

Mr. PURTELL. Mr. President, will the Senator from Texas yield for a question?

Mr. DANIEL. As I said before beginning my remarks, I should prefer to complete them, and then I shall be happy to yield.

Most of these producers entered into 20-year contracts committing approximately one-half of their gas reserves to nonproducing States. They had every right to believe that they were free to make such contracts and that the contracts would not be changed or abrogated by the Federal Government, because the Natural Gas Act of 1938 clearly exempted them from regulation by the Federal Power Commission. Section 1 (b) stating that the act shall not apply to the production or gathering of natural gas.

The Natural Gas Act—title 15, United States Code, sections 717–717w—passed in 1938, was intended to regulate as natural-gas companies only those persons or organizations engaged primarily in interstate transportation or primarily in sales in interstate commerce. Until recent years, few were so bold as to contend that the act included the thousands of independent oil operators who produced gas along with their oil or to the independent gas producers who were engaged primarily in production and whose only relation to interstate commerce or transportation was arm's-length sales to natural-gas companies.

Ever since the law was enacted in 1938, the Federal Power Commission interpreted it as not applying to independent producers of oil and gas who merely sell the gas to other concerns which move it into interstate commerce.

The Commission said, in effect, "You are no more applicable to the law than if it were a law to regulate farm produce. You are no more applicable to the law because you happen to sell something that moves in interstate commerce than would be the person who sells only in intrastate commerce."

Throughout the 16-year period the Commission continued this as the interpretation of the law, which some of them helped to write.

The Federal Power Commission said in its brief in the Phillips case:

> The Commission has uniformly interpreted the act to exclude transportation and sales, such as those here involved.

Not only did the Supreme Court overrule the long-established interpretation and numerous decisions of the Federal Power Commission, but it also ignored the clear congressional intent that these independent producers are exempt from the act. Justice Tom Clark said in a sharp dissent that the majority action of the Court was "contrary to the intention of Congress, the understanding of the States, and that of the FPC itself." Justices Douglas and Burton also dissented.

Let us look for a moment at the history of the legislation. As early as 1935 the Federal Trade Commission, at the request of the United States Senate, conducted an investigation of interstate electric and gas companies and reported to the Senate on December 31, 1935, that the gas industry is divided into 3 segments: First, the producing segment; second, the interstate pipeline segment; and, third, the local distributing company segment. It said that competition exists in the first and third segments and added:

> But this middle segment, this interstate pipeline, is not subject to regulation, and there does not exist the competition that there exists at each end of the interstate pipeline.

The Federal Trade Commission recommended to the Senate that the interstate pipeline company should be regulated by the Federal Government, and all of the subsequent hearings in the House and Senate on the first bill introduced on March 6, 1936, and subsequent changes which ultimately became the Natural Gas Act of 1938, indicated that it was only the interstate pipeline which was being regulated, and that the law would not apply to the producers in the field.

The Federal Power Commission's general solicitor, Mr. DeVane, explained the bill to the House Interstate and Foreign Commerce Committee and made it perfectly clear that it was not intended to regulate or fix prices of the producer or gatherer who sells to the interstate pipelines. This is shown by the following testimony:

Congressman COLE. Does this bill give anywhere the Commission power over the source of natural gas in the different fields in a manner which we might call comparable to that which your Commission now has over hydroelectric generating plants?

Mr. DEVANE. It does not. No. It does not attempt to regulate the gathering rates, or the gathering business.

Then Mr. DeVane said:

The real question we are dealing with here is this: There is a complete hiatus in the regulation of rates charged by these pipeline companies to the local distributors of gas throughout the United States, and we are trying to augment State regulation by conferring authority upon a Federal agency to fix those rates.

Congressman LEA. Mr. DeVane, I would like to go back just a moment. Of course, it is a question of regulation. Suppose that the A company owns a gas supply and the B company transmits it to another State, distributes it to a local company for distribution. Now, suppose the question arises as to whether or not the charges which the A company makes against the B company for the gas is reasonable. What, if any authority, would the Commission have on that question under this bill?

Do you get my question?

Mr. DEVANE. Yes, if I understand your question, concerning the price paid to the A company, there is no control of the gathering rate. The Commission would not have jurisdiction. That price is fixed by competitive conditions that exist in the field.

To make this amply clear and beyond all question, the Congress, as said above, wrote into section (b) the provision that the Natural Gas Act "shall not apply to the production or gathering of natural gas."

The first decision from the Federal Power Commission on this point came in the Columbian Fuel Corporation case in 1940, only 2 years after the Natural Gas Act was passed. This 4-to-1 decision was made by a majority of the Commission which was in office at the time the bill was passed, and one of them helped write the bill. They held that a producer or gatherer selling gas to an interstate pipeline company does not come within the scope of the jurisdiction of the Federal Power Commission and is not subject to the Natural Gas Act.

I observe on the floor the distinguished senior Senator from Kansas [Mr. SCHOEPPEL]. In 1944 the Federal Power Commission wrote a letter to the Senator, who was then Governor of Kansas, in which it was said:

We wish to assure the representatives of all the gas-producing States that the Federal Power Commission has no desire to extend its jurisdiction to cover the production of natural gas, or otherwise invade what are properly regarded as the functions of the conservation authorities of the several States.

Mr. LONG. Mr. President, will the Senator yield?

Mr. DANIEL. I have already asked that I be permitted to complete my statement; then I shall be glad to yield if the Senator will hold his question.

Again in 1947, by formal order issued by the Federal Power Commission, it was stated:

The Commission gives it assurance to independent producers and gatherers of natural gas that they can sell at arm's length and deliver such gas to interstate pipeline companies, and can enter into contracts for such sales without apprehension that in so doing they need become subject to the assertions of jurisdiction by the Commission under the Natural Gas Act.

For 16 years—until reversed by the Supreme Court on June 7, 1954—the Federal Power Commission so interpreted the law and rendered at least a dozen decisions in line with the interpretations quoted above.

It was with these assurances and with this understanding of the law that independent natural gas producers entered into contracts for sale of their gas to interstate pipeline companies, and most of these contracts were for 20-year periods. They relied upon the decisions of the Federal Power Commission and upon the plain wording of the statute. They have borrowed great sums of money to drill the new wells required by their contracts, and under this understanding of the law a supply of gas at reasonable prices has been made available to most of the States in the Union.

Of course, the important part about all this history is not that the producers had every right to rely on the law and on those interpretations for more than a 16-year period. The important point today is what happened to the producers' prices in that period. We find that those who bought natural gas—and it was the consumers who bought it ultimately—did so because it was the cheapest fuel available. We find that the producers during that time were getting only about one-tenth of the consumer's gas dollar.

What standard should we use in order to judge the policy for the future? I say that the 16 years of experience in the past is the best standard we have, because during that period of nonregulation we found that the independent gas producers were in the same position as the producers of other fuels, other minerals, and other commodities insofar as their sales and incentives for greater supplies were concerned.

I again call the attention of the Senate to the fact that during that period, and even today, the producers in most places received and are receiving less than one-tenth of the consumer's dollar. I refer to Richmond, Va., on which there is a chart in the back of the Senate Chamber showing the average price to the residential consumer. Washington, D. C., is on the right; and on the left is shown the price at Richmond, Va. The average household consumer at Richmond, Va., is paying $1.53 per thousand cubic feet, for natural gas.

At the bottom of the chart will be seen the amount the producer received—12.5 cents per thousand cubic feet. That is the average price paid the producer. I might say that the producers in the Southwest receive much less than 12.5 cents but it is an average between the high price received in the Appalachian field and the lower price paid for southwestern gas. But, even so, it is less than one-tenth of the consumer's dollar.

Fifty-three cents is the total cost delivered at the city gate. The local distributing company gets $1.53 from the consumer.

What I am trying to stress is that during the 16-year period without regulation, the producers of natural gas have received for their product, under competition—and there was a plentiful supply when there was competition—a smaller percentage of the consumer's dollar than the seller, owner, or producer of any other commodity.

Let us use the figure $1.53. If a waiter in the Senate restaurant served a meal for $1.53, he would be tipped more than 12½ cents. Twelve and one-half cents is what the producers are getting of the $1.53 per thousand cubic feet paid by the consumers in Richmond, Va., for the gas they use within their homes.

It is absurd for the distributors to try to sell the State public service or utility commissions the idea that the producers need to be regulated as a public utility. The producers were not regulated as a public utility for 16 years, and they were able to supply their product to the distributors at a price less than the amount of the average tip which would be given to a taxi driver or a waiter for serving a meal.

NEED FOR SOME TYPE OF LEGISLATION

The second point on which there should be no dispute on either side of the issue—certainly this was so in our committee—is that some type of legislation on this subject is needed. We cannot walk off and leave the Supreme Court's "legislation" in effect, because the Court made no appropriation to the Federal Power Commission to carry it out, and the Court has given no directions as to how the Federal Power Commission is to do the job.

With the Supreme Court decision in the Phillips case on June 7, 1954, we entered a new period in the history of the natural gas industry. Overnight approximately 8,000 independent producers became classified as public utilities and subject to the price-fixing regulations of the Federal Power Commission with complete control of both past and future contracts in the hands of a Federal bureau.

Chaos and confusion have resulted, just as chaos and confusion would result in the home States of other Senators if cotton and wheat farmers were to be put in a public utility status, or if coal miners or producers of any other

commodity should be put in a public utility status. When the producer of a particular commodity is placed under public utility rate-fixing regulations, he is told, "We will allow you 6 percent on your total costs for the operation, but we will not allow you anything for the commodity. We will allow you nothing for the value of the commodity." That is why a public utility basis will not work when you have a commodity involved.

If it be said that statement is exaggerated, I invite a look at some of the cases in which local producers were also interstate pipeline operators. Thereafter, as producers, when they operated interstate pipelines, they were subjected to regulation by the Commission. In some of those cases they were not allowed anything for their investment or for the value of the commodity which was sold on a utility ratemaking basis.

As I have said, chaos and confusion was the result, not only among the producers and within the office of the Federal Power Commission, but among the pipeline companies, distributors and consumers. This is due to the fact that the Congress, not having intended the law to be as it was interpreted by the Supreme Court, has passed no laws advising the Federal Power Commission how to conduct its new-found regulatory powers over producers, and Congress has not appropriated to the Commission any funds for this purpose.

Overnight, the Commission found itself with about 8,000 new natural gas utility companies, and with no directions or funds from Congress with which to regulate them. Even if this bill should fail to become law, the confusion and the problem would still exist, and Congress would still have to face it.

The Phillips decision removed the recognized limits on Federal Power Commission jurisdiction over production and gathering. The Supreme Court could not—and did not—reestablish those limits at some other point. Also, the Court could not—and did not—set forth a policy to guide the Commission in exercising the jurisdiction which the Court itself conferred.

The regulatory agency is unable to determine from the law where it has jurisdiction and where it does not or how to regulate whatever may come within its purview.

One result is conflict with State conservation laws. I hope there is no Member of the Senate who will deny that the State conservation laws have been so administered that we have had enough gas and oil to win two world wars, and that today we stand in the best position of any nation with respect to the production of natural resources. The Phillips decision is in complete conflict with States laws and produces an unworkable situation so far as the State conservation laws are concerned.

This is what the Federal Power Commission said to the Interstate and Foreign Commerce Committee of the Senate with reference to conflicts with State law:

> The fact remains that the fixing of rates of producers for gas sold in interstate commerce for resale will inevitably conflict with the recognized power of the States to regulate producers for purposes of conservation.

Our committee heard much evidence indicating that those conflicts already exist. The producer, the transporter, the distributor, and the consumer have no way to know what the law will be tomorrow. This is an untenable situation, and no public interest can be served by allowing it to continue. That is why Congress must act in one direction or another.

Defeat of the Fulbright-Harris bill would not, in itself, establish a policy or discharge the responsibility of the Congress in this important conflict. No court, no commission, and no lapse of time can do for us what is our duty alone to do. We have two alternatives. Either we must pass legislation and provide appropriations for implementing the law of Federal control over producers as written by the Supreme Court, or we should restore the law as it was understood to be before the Phillips decision, adding proper safeguards for protection of consumers as proposed in the Fulbright-Harris bill.

In considering the policy Congress should establish, the third and fourth areas of agreement mentioned above are most important.

AMPLE SUPPLY IS THE MOST IMPORTANT CONSIDERATION

Every agency of the Government which has studied this problem has concluded that an adequate supply of natural gas is the most important element in keeping producer prices and ultimate consumer prices at reasonable levels. That should be the main object of the Congress, not only for the sake of the consuming public, but for the sake of our economy and national defense.

Some of us come from gas-producing States and some come from gas-consuming States, and I am sure there are some who think we are looking at the matter through glasses colored by geography. I do not ask my colleagues to take my word for what I am saying. I ask them to look at the words of every impartial Federal agency that has ever given an objective study to the matter.

On February 26, 1955, the Cabinet Committee of President Eisenhower issued the White House Report on Energy, Supplies, and Resources Policy. That Committee—composed of the Director of Defense Mobilization, Secretary of State, Secretary of Treasury, Secretary of Defense, the Attorney General, Secretary of the Interior, Secretary of Commerce, and Secretary of Labor, said this:

> We believe the problem of natural-gas regulation should be approached from the viewpoint of assuring adequate supplies and the discovery and development of additional reserves to support such supplies, in the interests of national defense, an expanding domestic economy, and reasonable prices to consumers.

Significantly, the Cabinet Committee concluded:

> In the interest of a sound fuels policy and the protection of the national defense and consumer interests by assuring such a continued exploration for and development of adequate reserves as to provide an adequate supply of natural gas, we believe the Federal Government should not control the production, gathering, processing or sale of natural gas prior to its entry into an interstate transmission line.

Mr. President, I ask unanimous consent that the White House Report prepared by this Cabinet Committee, insofar as it relates to natural gas, be printed in the record at the conclusion of my remarks as exhibit 2.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

Mr. DANIEL. The Federal Power Commission, in a letter from the Chairman of the Commission dated March 30, 1955, reported to the Senate Committee on Interstate and Foreign Commerce, with only one dissent, that it favored the Fulbright-Harris bill, and said:

> We believe that the passage of the proposed bill would release large amounts of gas to consumer markets in interstate commerce and at the same time, as has been indicated, provide sufficient restraint upon the price of such gas as to eliminate the danger of exorbitant rates. In fact the release of such gas would itself, we believe, act in great measure as such a restraint.

Mr. President, I ask unanimous consent that this letter from the Federal Power Commission be inserted at the end of my remarks as exhibit 3.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

(See exhibit 3.)

Mr. DANIEL. Mr. President, I sincerely urge my colleagues to read what this agency, which has been so close to the problem all these years, considers the impelling reasons for the enactment of the pending legislation.

Both the Senate and House committees, after extended hearings, have concluded that an adequate supply of gas both now and in the future is the most important consideration for the consumer and the national defense, and that such supply will keep producer prices reasonable in accordance with the terms of the Fulbright-Harris bill.

Mr. President, only those who fear the great American system of free enterprise and competition among producers of natural resources have need to fear that this bill will not work to the benefit of the consuming public. And they should not fear when we have had a history of 16 years of unregulated producers in which the producers brought the gas to interstate lines for shipment to nearly every State of the Union at reasonable prices—at prices less than the percentage of your average tip to a waiter or a taxi driver.

UTILITY-TYPE REGULATION AND PRICE-FIXING WILL REDUCE SUPPLIES

If the law is left as it is today, confusion will continue. If the law as it is today is implemented along the lines written by the Supreme Court, there will be a reduction in the supply of gas flowing into interstate commerce.

From what has been said above, it is apparent that the surest way of causing increased prices to the consuming public is for Congress to approve a policy which would reduce the supply of natural gas.

Again, on this point, every Federal agency which has given study to this problem has concluded that there will be a decrease in gas supplies committed to interstate commerce if the mere sale of gas for such purpose automatically classifies the producer as a public utility subject to price-fixing on a utility rate-making basis.

On this point the Federal Power Commission reported to our committee:

On the other hand, we have serious doubts whether facing the prospect of continuous regulation of their rates, possibly on a cost basis, many producers not presently selling their gas in interstate commerce, and having available other large intrastate markets, would be willing to enter into such long-term contracts.

We are aware, also, that the availability of large quantities of gas which have been withheld by the producers from interstate markets because of the threat of that type of limitation on prices has resulted, and will, we believe, continue to result in the establishment in the areas where natural gas is produced, in preference to other areas, of petro-chemical and other plants using large volumes of natural gas, as well as the movement of industries from points outside of and remote from them into areas in which such intrastate gas is available. It is certainly not beyond the bounds of reason that, without some legislation such as that here proposed, remote domestic and other natural-gas consumers may find themselves facing not only a diminishing supply of such gas but the fact that some of the industries upon which the economy of their communities depend may have removed from their midst.

Mr. President, the independent gas producer has none of the characteristics of a public utility. It is only when we find that some business has a monopoly, some business which of necessity has the right of eminent domain and exclusive control over an area and over a certain type of business or transportation, that we throw out competition, and say, "There can be no more competition, and we are going to regulate you as a utility and fix the price you may charge."

The independent gas producer is engaged in one of the Nation's most hazardous and competitive businesses. He has no monopoly, no right of eminent domain, and no guarantee of a return on his investment. His wells may be dusters. Eight out of nine exploratory wells are dry. When he does hit and sell gas, he is not selling a public service—he is selling a part of his irreplaceable assets, a part of his property just as when a farmer sells a part of his land or a part of the sand on his land or part of the coal under his land. When he does that, he is selling property. Mr. President, that is the reason for use of the term "fair market price" in our bill in its indirect regulation of prices. There seems to be some question about the use of that term, as contrasted with the use of the term "just and reasonable price." The term "just and reasonable price" has been used by the courts of the country in utility cases for so long that it is synonymous with the term "cost plus," when used in connection with rate-making. However, the words and the regulation are used in connection with services rendered, not in connection with commodities sold.

Those terms are never used in relation to commodities actually placed into the channels of commerce. There we use the term that is used and understood by the courts, namely, "fair market price" or "reasonable market price," when the object being regulated either directly or indirectly is a commodity, when some property which cannot be replaced is being sold.

That is the distinction in this case. These gas producers are not selling a service. Mr. President, can you blame them for hesitating to enter the interstate market after the decision of the Supreme Court, when they are faced with the threat, "You can get 6 percent or 6½ percent on the cost of your lease and on your cost of producing the property, but you cannot get anything for the property itself." Certainly not, Mr. President.

Mr. DOUGLAS. Mr. President, will the Senator from Texas yield for a question?

The PRESIDING OFFICER (Mr. McNAMARA in the chair). Does the Senator from Texas yield to the Senator from Illinois?

Mr. DANIEL. Mr. President, as stated, at the conclusion of these remarks, I shall yield.

As Mr. Justice Jackson said in the Hope Natural Gas Co. case:

A thousand feet of gas captured and severed from real estate for delivery to consumers is recognized under our law as property of much the same nature as a ton of coal, a barrel of oil, or a yard of sand.

Mr. President, who in this country would ever think of saying to the producer of oil or to the producer of coal or to the producer of sand, "We are going to allow you 6½ percent or some reasonable return for your services in producing or in digging out the oil or the coal or the sand, but we will not allow you anything at all for the oil itself, or for the coal or the sand, or for whatever other property is being produced."

The Federal Power Commission, in its letter to our committee, said:

The production of crude oil and its products, which include natural gas, is essentially a mining operation. When the crude oil reaches the surface of the earth and is thus reduced to possession it is treated as a commodity in all respects similar to coal, iron, copper, and other products of the mine. No reason can be seen why natural gas should be so classified and thus regulated while leaving coal or oil completely free of regulation. If one of those fuels is to be subjected to regulation, they all should be.

As surely as the Congress permits a Federal agency to fix the price for which an independent producer of gas may sell his product, so will it set the precedent for some future Congress to fix the price which may be paid for other fuels, minerals, and even farm products which are sold into interstate commerce.

Mr. President, I am glad to see, today, for the first time, the editorial entitled "If Gas Producers Can Be Regulated, So Can the Corner Grocer" in the Saturday Evening Post of January 21.

Mr. DOUGLAS. Mr. President, will the Senator from Texas yield at this point for a correction?

Mr. DANIEL. No, Mr. President. As I said at the beginning, I wish to finish these preliminary remarks, which will require about 30 minutes. Then I shall yield for any and all questions.

Mr. President, the editorial has already been placed in the RECORD by the distinguished Senator from Arkansas [Mr. FULBRIGHT]. I do not think it was written by a gas producer, and I do not believe there is a prejudiced viewpoint in the editorial. It certainly makes the same prediction I had made and had written into this speech before I had seen the editorial.

If we permit the law written by the Supreme Court to remain the law with respect to gas producers, we shall be permitting the writing into American Government and American economics of a strange new concept—that is, that the supplier of a utility becomes, by that act, a utility himself. This could ensnarl the whole economy. Utilities, of all kinds are, in the normal course of business—supplied some goods or some commodity from the whole range of private enterprise. If every price charged to a utility must be determined to be a "just and reasonable" price on utility standards and then we have an economic system alien to any we have known.

Mr. President, I wish to commend to Senators who did not hear it or did not read it, the speech made on that point yesterday by the distinguished senior Senator from New Hampshire [Mr. BRIDGES].

"Just and reasonable rates" are very fair sounding words. That is what the present Natural Gas Act would call for, and is what I understand some Senators would like to see substituted for the term "reasonable market price," as used in this bill.

Mr. President, to one who has not studied public utility cases, the term "just and reasonable," when used in connection with prices, sounds so fair, but to one who studies public-utility cases, the words are synonymous with the conventional rate-base method of allowing 6.5 percent on prudent investment. That means cost-plus. Mr. President, it seems to me that the United States has had ample experience with cost-plus contracts. As we know, some of the most expensive operations in the history of our country have been conducted under cost-plus contracts.

At least, Mr. President, that is the point of departure and comparison under which "just and reasonable" rates are to be determined under the Natural Gas Act, according to a very recent opinion of the United States Court of Appeals for the District of Columbia Circuit, December 19, 1955, in the Panhandle Eastern cases, wherein it set aside the Federal Power Commission's allowance of "a fair field price" to a producer of natural gas who was under regulation by reason of also having an interstate pipeline.

The producer's opposition to utility regulation is not purely a matter of price. It means that he must obtain certificates of public convenience to sell his gas in interstate commerce. It may mean the

obtaining of certificates before drilling wells and endless other expensive hearings and red tape before the Federal Power Commission. In one instance a Texas producer advised me that it cost him $10,000 for a copy of the hearings relating to his application and proposed contract of sale, to say nothing of the cost of Washington lawyers, or lawyers sent to Washington to attend the hearings, in an effort to comply with the regulations.

As a result of these factors, in addition to the uncertainty about prices, the producer hesitates to commit himself to a course of action which will cause him—without rhyme or reason—to become something he is, in fact not—a public utility. This is no more frightening to independent gas producers than it would be to producers of coal, oil, other minerals, or farm products.

Yesterday the Senator from New Mexico [Mr. ANDERSON] placed in the RECORD a telegram from the American Farm Bureau Federation in support of the Harris-Fulbright bill. One of the representatives of this farm organization, and representatives of other organizations, appeared before our committee and supported the Fulbright-Harris bill. They said, "For goodness sake, pass some legislation which will do away with this precedent, which some other Congress, some day, might be foolish enough to apply to the producers of farm products, because we, too, sell in interstate commerce."

Facing such designation and regulation as a public utility by the mere sale of the product to one who moves it into interstate commerce, it is only natural that these producers will find more attractive markets within their own States, if they can possibly do it. That is not a threat. I am merely making a statement. The history of operations under the Supreme Court decision will bear me out when I say that since the interstate market is not so attractive as it was, the producers of natural gas are either dealing in the production of oil or are certainly not committing new gas to interstate commerce, as they did previously. Actually, their gas well completions have decreased 10 percent during 1955, and there has been a two-thirds decrease in the rate at which natural gas was committed to interstate transportation in 1954 as compared with 1953. That is an important figure. Since 1953 there has been a decrease of two-thirds in the rate at which natural gas was committed to interstate transportation.

There is another factor in connection with this situation. The law, as written by the Supreme Court, is a discrimination against American producers, because Canadian producers are now selling gas in the United States and Mexican producers are selling gas across the Rio Grande. They are not subject to this kind of regulation. We could never fix their producer prices.

While American producers are receiving a little more than 10 cents a thousand cubic feet, on the average, Canadian producers are receiving 22 cents a thousand cubic feet for gas produced in Canada and brought into this country. Mexican producers are receiving 15 cents a thousand cubic feet for gas brought in from Mexico. Mexican and Canadian gas producers are in a better position to sell to American consumers than are American producers.

An American producer would do better by producing gas in Mexico or Canada for sale to American consumers than he would under the regulation in effect by reason of the Supreme Court decision, and which the opponents of the bill would cause to remain in effect, if they should be successful in defeating the bill.

Today the very factor which influenced the producers to rush to supply the interstate market has been taken away, that is, the certainty of it. By the simple act of selling into that market, the producer removes all certainty from his business. Overnight he becomes a public utility. If this were the only market, he would have no choice. But it is not the only market. Now the intrastate market has become the only certain market. At the present time we are using half of our gas within the producing States.

In effect, only by selling into the intrastate market can the producer know for sure what he is doing to himself. Certainly he may not have a ready market for half of his gas. He may have to wait, but he has waited before. He has the advantage, in this instance, of being able to spend his own capital to help develop or build or secure a market for his gas. He need not wait for a pipeline or look for a distributor; he can sell direct to a plant which he may capitalize himself.

This is an infinitely more attractive prospect now than the chaos and confusion of the interstate market.

With this choice presented, can there be much genuine doubt as to the course the producer will follow or the route his gas will travel?

Unless Congress intervenes, as recommended by every Federal agency which has studied this subject, the supply of gas committed to the interstate market will go down and down and down, as it has already done since this decision, because the appeal and value of the interstate market will be gone. As surely as they stand here, the opponents of this legislation are day by day creating new markets for natural gas, new markets in intrastate commerce, and they are talking, literally talking, gas away from the consumers they mean to protect.

Both committees have concluded that safeguards should be written into the legislation to prevent unfair and exorbitant price increases to satisfy those who allege that the producers might do in the future differently from what they have done in the past. A brief survey of the bill will show that only two sections relate to the matter of independent producer sales being outside the scope of direct regulation by the Federal Power Commission. All of the remainder of the bill is devoted to the safeguards which make it practically impossible, even if the producer should desire to do so, for him to receive more than the reasonable market price for his gas.

EXHIBIT 1

THE BARGAIN OF NATURAL GAS

Natural gas represents the best bargain in the fuel market, especially for residential consumers. While competitive fuels have increased astronomically in retail costs, natural gas has remained generally below 1938 price levels only recently rising slightly above the prewar index.

Here is a comparison of the behavior of the index prices for competitive fuels (1935–1939=100):

Year	Gas	Anthracite	Bituminous coal	No. 2 fuel oil
1938	94.3	99.3	101.8	105.6
1941	91.5	108.5	108.2	103.4
1945	88.4	130.7	125.7	123.3
1948	89.2	176.6	186.2	188.6
1950	90.7	195.9	200.2	180.7
1952	94.6	218.3	208.6	195.4
1953	99.6	233.4	212.9	205.5

Source: Bureau of Labor Statistics.

THE PRICE OF NATURAL GAS HAS NOT BEEN REGULATED

Throughout the period shown above, the field price of natural gas has been entirely free of Federal regulation. During the wartime interval when other prices were under OPA control, natural gas rates actually dropped although there was no OPA regulation in the fields. The behavior of the gas price index strongly suggests that the price was not under monopolistic control, for in a competitive market the price of gas did not follow the trend of competitive fuels but moved independently.

The bargain offered by natural gas to the consumer is obvious and impressive. If the fuel bills of the Nation's consumers are to be matters of Federal concern, the facts suggest that control over other fuels would be of greater value and urgency than control over natural gas.

THE STABILITY OF GAS COSTS IN THE FAMILY BUDGETS

A further significant factor in this situation is that during a lengthy period of inflation, natural gas costs have remained as a comparatively stable item in family budgets.

The cost of living has reached its highest peaks in the years since 1938, but the trend in natural gas costs has been downward. It is significant that the cost of manufactured gas has, during the same interval, increased sharply—but there have been no suggestions that the Federal Government should fix the price of coal from which much manufactured gas is made.

Here is a comparison of the cost of living, based on the Consumers Price Index, with the cost of natural gas and manufactured gas for typical residential cooking use (1935–1939=100):

Year	Cost of living	Natural gas	Manufactured gas
1938	100.8	98.8	100.2
1941	105.2	99.7	101.0
1945	128.6	93.0	101.6
1948	171.9	86.4	116.1
1950	171.9	84.6	124.8
1952	189.8	83.5	125.7
1953	191.3	85.9	126.4

Source: Bureau of Labor Statistics.

HOW THE BARGAIN IN GAS COSTS HAS STIMULATED CONSUMPTION

The phenomenal price advantage which natural gas offers to the consuming public has had the result of causing natural gas consumption to increase rapidly, particularly during the postwar years.

In 1954, natural gas was consumed in 43 States and the District of Columbia, Nevada receiving it for the first time. Since 1946, markets have been connected in Connecticut, Delaware, Massachusetts, New Hampshire, New Jersey, North Carolina, South Carolina, Wisconsin, and Rhode Island for the first time.

EXHIBIT 2

THE WHITE HOUSE REPORT ON ENERGY, SUPPLIES, AND RESOURCES POLICY

INTRODUCTION

The importance of energy to a strong and growing economy is clear. As conditions of supplies and reserves of coal, oil, and natural gas change and as both defense and peacetime requirements come more clearly into focus, the bearing of Government policies upon energy needs reexamination.

What degree and kind of public regulation is appropriate to the present situation and future outlook? What trade policies for energy supplies will most effectively express the overlaping national needs for adequate protectable supplies in case of war and for encouragement of economic growth of this country and friendly countries elsewhere in the world? What steps may be taken to improve the economic position of the coal industry, now seriously depressed, without penalizing competing industries, as a means of enhancing the ability of that industry to contribute to the national defense? More particularly, should specific changes be made in tax, freight rate, research, Government purchasing, or other policies in the energy field?

These and other policy questions press for careful review and decision.

On July 30, 1954, the President established an Advisory Committee on Energy Supplies and Resources Policy. The Director of the Office of Defense Mobilization was designated as Chairman and the heads of the following agencies served as members: Department of State, Treasury, Defense, Justice, the Interior, Commerce, and Labor.

The White House directive respecting the Committee's assignment included the following specific statements:

"At the direction of the President, the Committee will undertake a study to evaluate all factors pertaining to the continued development of energy supplies and resources fuels in the United States, with the aim of strengthening the national defense, providing orderly industrial growth, and assuring supplies for our expanding national economy, and for any future emergency.

"The Committee will review factors affecting the requirements and supplies of the major sources of energy, including coal (anthracite, bituminous, and lignite, as well as coke, coke tars, and synthetic liquid fuels), petroleum, and natural gas."

The Committee has been aided greatly by an able and representative task force appointed pursuant to the President's instructions. The Committee's recommendations are set forth below.

RECOMMENDATIONS

1. Natural-gas regulation

We believe the problem of natural-gas regulation should be approached from the viewpoint of assuring adequate supplies and the discovery and development of additional reserves to support such supplies, in the interests of national defense, and expanding domestic economy, and reasonable prices to consumers.

To secure these objectives, it is essential to give due consideration to (1) the operations known as the production of natural gas, (2) the transportation of gas in interstate transmission lines, and (3) the distribution of gas in municipalities. Individual companies may engage in more than one of these activities. Each operation of such companies should be treated by like criteria according to its appropriate industry function.

In the production of natural gas it is important that sound conservation practices be continued. This area of conservation management is under the jurisdiction of State conservation commissions. In the interest of a sound fuels policy and the protection of the national defense and consumer interests by assuring such a continued exploration for and development of adequate reserves as to provide an adequate supply of natural gas, we believe the Federal Government should not control the production, gathering, processing, or sale of natural gas prior to its entry into an interstate transmission line.

The interstate transmission of natural gas by the interstate transmission lines and the subsequent sale of such gas for resale is a public-utility function and should be under the regulation of the Federal Power Commission. In considering the certification of new lines and applications for increased rates based on new or renegotiated purchase contracts, the Commission should consider, in order to provide protection for the consumer, not only the assurance of supply but also whether the contract prices of the natural gas which the applicant has contracted to buy are competitively arrived at and represent the reasonable market field price, giving due consideration, in the interest of competition, to the reasonableness and appropriateness of contract provisions as they relate to existing or future market field prices.

The several States or their political subdivisions should continue to provide the public-utility regulation of distributing companies in accordance with usual utility practices.

Thus the complete cycle of natural-gas production, transmission, and utilization will be appropriately regulated: The production and conservation of natural gas by the State conservation commissions; the interstate transmission of natural gas by the Federal Power Commission; and the distribution by the local public utility commissions.

2. Sales below cost by interstate pipeline companies

The basic principle regarding the regulation of natural gas and the use of alternative energy sources should be as far as possible that of free choice by the consumer and free and fair competition among suppliers. This, it is confidently thought, will provide most effectively for the assurance and flexibility of energy supply, both for economic growth and strong security readiness. But sales either for resale or direct consumption below actual cost plus a fair proportion of fixed charges which drive out competing fuels constitute unfair competition and are inimical to a sound fuels economy.

The committee recommends, therefore, that appropriate action be taken that will prohibit sales by interstate pipelines either for resale or for direct consumption, which drive out competing fuels because the charges are below actual cost plus a fair proportion of fixed charges.

3. Eminent domain for natural gas storage

The power of eminent domain for the acquisition of surface and mineral rights for the development of underground storage reservoirs should be granted subject to appropriate safeguards to protect the public safety, including the mining industry.

EXHIBIT 3

OFFICIAL VIEWS OF THE FEDERAL POWER COMMISSION FAVORING THE FULBRIGHT-HARRIS BILLS EXEMPTING PRODUCERS

FEDERAL POWER COMMISSION,
Washington, March 30, 1955.

Re S. 1498, 84th Congress.

Hon. WARREN G. MAGNUSON,
Chairman, Committee on Interstate and Foreign Commerce, United States Senate, Washington, D. C.

DEAR CHAIRMAN MAGNUSON: Receipt is acknowledged of your request for the views of the Federal Power Commission on the bill S. 1498 to amend the Natural Gas Act. The views of the Commission generally support the approach contained in the bill (H. R. 4560) introduced in the House by Mr. HARRIS and the companion bill (H. R. 4675) introduced by Mr. HINSHAW. No similar bill having been introduced in the Senate, we will direct our comment to these House bills.

The members of the Federal Power Commission consider that, as an arm of the legislative branch of the Federal Government, its first responsibility has been, and is, to construe, administer, and applying the several acts under which the Commission functions in strict accordance with the congressional intent.

Because of its close association with the legislative considerations and events preceding the enactment of the Natural Gas Act and its singular interest in and relationship to the act thereafter, this Commission has felt itself peculiarly able to interpret the intent of Congress with respect thereto. Thus, when in about 2 years after the passage of the act, there was presented to it for decision the first case involving the issue, namely, Columbian Fuel Corp. (docket No. G–143, June 29, 1940, 2 F. P. C. 200), the Commission, with one member dissenting, had no difficulty in choosing between an interpretation of its authority based upon its so recent knowledge and experience and a purely legalistic rationalization of a much broader jurisdiction. It was then, and it continued to be, the Commission's conviction that it was not the intention of the Congress to subject to regulation under the Natural Gas Act all persons whose only sales of natural gas in interstate commerce are made during, or as an incident, to and immediately upon completion of, such person's production and gathering of said natural gas and who are not otherwise subject to the jurisdiction of the Commission.

It was then, and it continued to be, the opinion of the Commission that in the act Congress had carefully and deliberately restricted the powers of the Commission so as to prohibit the exercise of authority over the production and gathering of natural gas including sales of gas made as an incident to such production and gathering. Even then we recognized that, because of the interrelationship between the natural gas and oil industries, to make regulation of producers and gatherers of natural gas effective would require statutory authority of much wider scope than that afforded by the Natural Gas Act. The course of the Commission thereafter has been completely consistent with that view.

However, because of apparent doubts in the minds of many as to the position of the courts on the question, in 1947, following the Supreme Court's decision in the *Interstate Natural Gas Co., Inc.*, (331 U. S. 682), the Commission unanimously, Commissioners Draper, Olds, Smith, and Wimberly, urged the enactment of legislation H. R. 4099, the so-called Priest bill, in the 80th Congress to reaffirm what to it was the clear congressional intent. Soon, thereafter, the Commission reiterated its position in its Order No. 139. Although that order was subsequently revoked, no decision of the Commission inconsistent with its position in the Columbian Fuel case, supra, has ever been issued. Thus, when the question was again presented to us in the matter of *Phillips Petroleum Co.* (10 F. P. C. 246, 1951), having found that Phillips was an independent producer of natural gas, that the sales involved were sales in interstate commerce of natural gas for resale for ultimate public consumption, and that such sales were made after the completion of production and that gathering but that they were incidental to production and gathering, the Commission found and concluded that such sales were excluded from the operation of the Natural Gas Act.

But, as you are aware, upon review the United States Supreme Court refused to concur in the Commission's conclusion. That Court's decision in the Phillips case, supra, rendered on June 7, 1954, held that the Federal Power Commission must exercise

jurisdiction over companies, even though not otherwise natural-gas companies, who are engaged in the sale in interstate commerce of natural gas for resale made after the completion of production and gathering, whether or not incidental thereto. In the light of that decision, it has become the duty of the Federal Power Commission to include such independent producers within the scope of its regulation.

Consequently, when we received the mandate from the Court in the Phillips case, we issued an order prescribing regulations governing the filing of rate schedules and applications for certificates of public convenience and necessity by producers and gatherers of natural gas which sell gas in interstate commerce for resale and since those rules have become effective we have undertaken to bring under our regulation the thousands of companies which are so engaged. As of February 28, 1955, 5,673 certificate applications and 10,042 rate filings had been submitted to the Commission by so-called independent producers.

Our experience with the application of the provisions of the Natural Gas Act to such producers and gatherers has demonstrated the difficulties which are involved. Many suits have been filed to test the validity of such rules, and it is clear that the Commission may expect to be involved for many years in legal proceedings on those and numerous other questions which have arisen and which will arise. However, we have not yet reached the point of really coming to grips with all the detailed problems which are involved.

The question remains, however, whether the Supreme Court's decision in the Phillips case, supra, reflects the true public interest, or whether legislation amendatory to the Natural Gas Act is needed for that purpose. It is the considered opinion of the majority of this commission that legislation should be enacted which will exempt from the operations of the Natural Gas Act independent producers and gatherers of natural gas who sell gas at wholesale to pipeline companies engaged in the transportation and sale in interstate commerce of natural gas for resale, but who do not themselves engage in interstate transportation or subsequent sale of such gas.

It is our understanding that H. R. 4560 and H. R. 4675 are intended to accomplish that purpose, and upon that basis we recommend passage of such legislation. We support this proposed legislation because we firmly believe that such legislation will in the long run result in the greatest good to the largest number of people of this country.

We shall endeavor to state the reason for our belief as briefly as possible.

The production of crude oil and its products, which include natural gas, is essentially a mining operation. When the crude oil reaches the surface of the earth and is thus reduced to possession it is treated as a commodity in all respects similar to coal, iron, copper, and other products of the mine. No reason can be seen why natural gas should be so classified and thus regulated while leaving coal or oil completely free of regulation. If one of those fuels is to be subjected to regulation, they all should be.

It is obvious that, if the use of an original cost rate base method of pricing natural gas results in fixing the price of natural gas at a price lower than the equivalent price of other fuels, then natural gas will, if it remains available for interstate commerce, inevitably drive competing fuels from the markets, and thus hasten the exhaustion of this irreplaceable natural resource.

We are firmly convinced from every aspect of public interest and particularly that of national defense, that Congress should not single out natural gas as the only one among those fuels over which an artificial ceiling should be placed.

If it be true that the business of producing natural gas is a service which is not competitive, and is a monopoly, or at least has many monopolistic characteristics, as does the electric industry, the telephone industry, and the gas transmission and distribution industries, then we would readily agree that the gas-production industry should be regulated. Even then, however, we believe that the effect of such regulation on the oil and coal industries would be a matter of grave concern and something that would have to be taken into consideration in fixing gas producers' prices.

We have heard no demand that the oil production industry should be regulated as a public utility, and do not understand why natural gas production should be so regulated, and oil production should remain unregulated.

Public-utility regulation controls monopolies, but at the same time, it must necessarily protect them, and it supersedes to a great extent, if not completely, the factor of competition. Such regulation has never been able to supply the incentive for economy which adequate competition provides in unregulated industries.

Before all the advantages of competition are discarded, it should be definitely ascertained that competition in the natural-gas industry is inadequate, and cannot be made adequate by any legal means. We are of the opinion that the gas-producing industry does not have the characteristics of public utilities which must and should be monopolies, and is the type of industry in which competition may flourish, and that any lack of competition or any unfair competition, if any, should and can be dealt with by proper application of our antitrust laws.

In recent years there has been a tremendous increase in demand by domestic customers for the relatively cheap and yet clean and highly efficient fuel, natural gas. At the same time, the evolution of industrial techniques has also created constantly increasing markets for this fuel. Natural gas is now served or authorized to be served in every State of the Union except Vermont. In 1953 some 55½ billion therms of natural and mixed gas were sold to nearly 24 million customers of gas utilities in the United States. There has resulted from the conjuncture of those economic factors some increase in the price of natural gas from the producer to the pipeline company—in 1953 the average price paid by natural-gas companies for gas purchased from others was 9.1 cents per thousand cubic feet—and this, despite the fact that proven reserves of natural gas have continued to increase at a more rapid rate than annual production. Proved recoverable natural-gas reserves have risen from 147.8 billion cubic feet at the end of 1945 to 211.7 billion cubic feet at the end of 1954. In 1954, however, the increase in reserves was vastly smaller than during any previous year for which reliable estimates are available.

There is good reason to believe, however, that even prior to the Phillips decision, large amounts of natural gas chiefly produced by oil companies in conjunction with their production of oil, their primary interest, had been withheld from the market served by interstate pipeline companies because of the uncertainty of the law and, to them, the risk of regulation. We believe that the passage of the proposed bill would release large amounts of gas to consumer markets in interstate commerce and at the same time, as has been indicated, provide sufficient restraint upon the price of such gas as to eliminate the danger of exorbitant rates. In fact the release of such gas would itself, we believe, act in great measure as such a restraint.

It would permit also, it is believed, the execution of contracts between producer and pipeline company which would assure to the producer reasonable adjustments in the price of his product over a period of time sufficient to justify the expenditure of the large sums of money required for pipeline projects. Without such long-term contracts such projects could not be financed on favorable terms, nor would the Commission feel justified in authorizing their construction and operation. On the other hand, we have serious doubts whether facing the prospect of continuous regulation of their rates, possibly on a cost basis, many producers not presently selling their gas in interstate commerce, and having available other large intrastate markets, would be willing to enter into such long-term contracts.

We are aware, also, that the availability of large quantities of gas which have been withheld by the producers from interstate markets because of the threat of that type of limitation on prices has resulted, and will, we believe, continue to result in the establishment in the areas where natural gas is produced, in preference to other areas, of petro-chemical and other plants using large volumes of natural gas, as well as the movement of industries from points outside of and remote from them into areas in which such intrastate gas is available. It is certainly not beyond the bounds of reason that, without some legislation such as that here proposed, remote domestic and other natural-gas consumers may find themselves facing not only a diminishing supply of such gas but the fact that some of the industries upon which the economy of their communities depend may have removed from their midst.

In the process of ratemaking the Commission, prior to its decision in the matter of Panhandle Eastern Pipe Line Co., opinion No. 269, issued April 15, 1954, had treated the producing facilities of the pipeline company in the same manner as all of its other facilities; namely as a part of the net investment rate base to which was applied a reasonable return. That treatment resulted in indefensible discrimination between the pipeline company and the independent producer from which the pipeline company had purchased part of its required supply. In its opinion in the Panhandle case, supra, the Commission pointed to the decline of Panhandle's own production from 52.4 percent of its sales in 1942 to 22.6 percent in 1952, and explained why it is in the public interest for pipeline systems to have production of their own, rather than being wholly dependent upon purchases from nonaffiliated producers (opinion No. 269, mimeo. ed., pp. 31–35). Similarly, in 1940, 8 major pipelines produced more than 47 percent of the natural gas they transported and sold, whereas in 1952 only 18½ percent of their total requirements were produced by 15 major systems then operating in interstate commerce. It had resulted, as was inevitable, in the disposal by some pipeline companies of such properties and the avoidance by others of the ownership and operation of gas-producing properties and facilities. Furthermore, the treatment had given scant attention to the economic aspect of the problem involved in the gas supply or the long-run economic consequences of the application of that treatment. We believe that the proposed legislation would clearly sanction the course which we there took, would result in equal treatment of producers of gas, whether pipeline companies or independent producers, would encourage the ownership and operation and would definitely and conclusively contribute to the soundness and the security of the sources of gas supply, and the maintenance of adequate service. Those results would inevitably, redound to the benefit of the domestic as well as other customers, and, it is our belief, would achieve in the long run, lower rates for natural gas. While we are interested in reasonable rates, we must be equally concerned with the financial stability of the utilities under our

jurisdiction, the safety of the investments which have been made in them, and, of equal or greater importance, the continued maintenance of adequate gas service to all of the ultimate customers who have invested many millions of dollars in gas furnaces and other gas-using equipment. Residential, commercial, and industrial consumers throughout the United States have come to rely increasingly upon this premium fuel, which in 1920 provided less than 4 percent of our total energy requirements, as compared with over 23 percent in 1953.

Only time can tell just what effect Federal regulation of rates charged by producers and gatherers, for gas which they sell in interstate commerce, will have upon the exploration and discovery of natural gas. It has been generally recognized that regulation to effectuate the conservation of gas and oil as natural resources is a function which should be performed by the several States involved.

In the Interstate case to which reference has been made, the Supreme Court stated that the jurisdiction of the Commission under the Natural Gas Act does not attach where rate regulation by the Commission would be inconsistent or a substantial interference with the exercise by the State of its regulatory function. In our decision in the Phillips case, supra, we found that our regulation of sales made in the process of production and gathering would, by its very nature, be inconsistent or constitute a substantial interference with such regulation of producers and gatherers by the States. But the answer of the Court to that finding was "that the jurisdiction of the Federal Power Commission was not intended to vary from State to State, depending upon the degree of State regulation and State opposition to Federal control."

The fact remains that the fixing of rates of producers for gas sold in interstate commerce for resale will inevitably conflict with the recognized power of the States to regulate producers for purposes of conservation. While the latter process must, under such circumstances, yield to the authority of the Federal Government, the effect upon the exploration and development of natural-gas resources must be, it is believed, far reaching.

We believe that a sound fuel policy is essential to a robust and expanding internal economy and to the successful development of the national defense. We believe that no sound fuel policy can be erected upon such discrimination as presently exists against natural gas and in favor of other competitive fuels. We believe further that such a policy requires the exploration and development of our oil and natural-gas resources against a background of free competitive enterprise, restricted only by appropriate State conservation regulation. Consequently, we believe that the Federal Government should not undertake the control or the regulation of rates of those engaged in the production, gathering, processing, or the selling of natural gas prior to its entry into an interstate transmission pipeline; and that the Natural Gas Act should be amended accordingly.

Commissioner Draper does not concur in this report.

Respectfully submitted.

FEDERAL POWER COMMISSION,
By JEROME K. KUYKENDALL, *Chairman*.

Mr. DOUGLAS rose.

Mr. JOHNSON of Texas. Mr. President, if the Senator from Illinois will indulge me, I wish to go to lunch previous to leaving the city. I should like to ask a few questions of my colleague. Then I know he will be delighted to yield to the Senator from Illinois for questions.

Mr. DOUGLAS. Certainly.

Mr. JOHNSON of Texas. First, Mr. President, I do not think I can say what I desire to say in the form of a question. Therefore, I hope no Senator will invoke the rule against me.

I wish to commend my very able colleague for his masterly address. I think he has thoroughly covered the subject, in a very fair and reasonable way.

Mr. DANIEL. I thank my colleague.

Mr. JOHNSON of Texas. Does the junior Senator from Texas say that this body is now confronted with a decision with respect to which type of regulation is to be imposed?

Mr. DANIEL. That is correct.

Mr. JOHNSON of Texas. The bill proposes a type of regulation based on the reasonable market price of gas. As I understand, if the bill is passed, the Federal Power Commission will be granted authority to say to every transporter of gas, "We will allow you to pay only the reasonable market price." Is that correct?

Mr. DANIEL. The Senator is correct.

Mr. JOHNSON of Texas. That is alternative A. As I understand, the other alternative, alternative B, is the so-called utility rate type of regulation, whereby a producer would be allowed 6 percent on his depreciated cost. Is that the Senator's understanding?

Mr. DANIEL. That is my understanding.

Mr. JOHNSON of Texas. So what we are asking the Senate to do, in effect, is to decide whether we shall go down road A or road B. Is that correct?

Mr. DANIEL. The Senator is correct.

Mr. JOHNSON of Texas. For several years we have been "making a lot of gas about gas" in the Congress. The subject of gas has been discussed in committees in both Houses, in session after session.

Is the Senator aware of any committee that ever heard expert testimony on this subject and recommended, either to the House or to the Senate, the utility type of regulation, although it was actively advocated by Mr. Leland Olds, a former chairman of the Federal Power Commission?

Mr. DANIEL. No such recommendation was ever made.

Mr. JOHNSON of Texas. Is the Senator aware of any committee which has ever recommended to its parent body this type of regulation of gas producers?

Mr. DANIEL. I know of none.

Mr. JOHNSON of Texas. Is the Senator familiar with the fact that when the bill was first being considered in 1938 producers appeared en masse before the committee and asked the chairman of the committee if they could be heard, and if they were to be regulated; and that the chairman of the committee asked the attorney who drafted the bill the same questions, and the attorney stated that the producers were not covered by the proposed legislation?

Mr. DANIEL. The Senator is correct.

Mr. JOHNSON of Texas. As I understand, the bill before the Senate, the Harris-Fulbright bill, is substantially the same bill that was considered by the House committee, and the House committee recommended that it pass. Is that correct?

Mr. DANIEL. The Senator is correct.

Mr. JOHNSON of Texas. It was considered by the House, and the House passed the bill. Is that correct?

Mr. DANIEL. That is true.

Mr. JOHNSON of Texas. The bill was considered by the Committee on Interstate and Foreign Commerce of the Senate, and by a vote of 11 to 4 the committee recommended the passage of the bill now before the Senate. Is that correct?

Mr. DANIEL. That was the vote. The Senator is correct.

Mr. JOHNSON of Texas. A majority of the members of that committee, members of both political parties, voted to report that bill to the Senate. Is that correct?

Mr. DANIEL. That is correct.

Mr. JOHNSON of Texas. Where does the present chairman of the Federal Power Commission come from? He is a resident of what State?

Mr. DANIEL. He does not come from a gas-producing State.

Mr. JOHNSON of Texas. What State does he come from? I understand he comes from the State of Washington.

Mr. DANIEL. That is right.

Mr. JOHNSON of Texas. He has had long experience in the field of utility regulation. Is that correct?

Mr. DANIEL. That is correct.

Mr. JOHNSON of Texas. He is a former member of a State regulatory body. Is that correct?

Mr. DANIEL. That is correct.

Mr. JOHNSON of Texas. After the Chairman of the Commission and the majority members of the Commission, appointed by the present President of the United States, thoroughly studied the question, what did that Commission recommend?

Mr. DANIEL. It recommended the passage of the legislation then known as the Harris bill.

Mr. JOHNSON of Texas. As I understand, the Commander in Chief, the President of the United States, set up what is called the Cabinet Committee on Energy Resources. Will the Senator from Texas reveal again the names of the distinguished members of the Cabinet who served on that body, including the Director of the Office of Defense Mobilization, Secretary of Treasury, the Secretary of State, the Attorney General, the Secretary of Labor, and the Secretary of the Interior? As I understand, there was not one Texan on it. [Laughter.]

So far as I know, not one of the members of that Commission is a resident of an oil-producing State.

The committee was composed of Mr. Flemming, Mr. Mitchell, Mr. Brownell, Mr. Humphrey, and Mr. Dulles. Did I omit anyone?

Mr. DANIEL. The Secretary of Commerce.

Mr. JOHNSON of Texas. Mr. Weeks. After that committee heard testimony for many months—the Senate has considered it for 3 days now—and after the committee's staff had made studies, what was the committee's recommendation?

Mr. DANIEL. The committee's recommendation was in line with the provisions of the Harris-Fulbright bill. As a matter of fact, the Harris-Fulbright bill followed the committee's recommenda-

tions, and went just a little further in protecting the consumers.

Mr. JOHNSON of Texas. I can understand the viewpoint of Senators who oppose the position taken by the junior Senator from Texas and other Senators who see the issue as he does. What a rosy world it would be if we could indulge in price fixing on everything that everyone else produces, and if we could have complete freedom on everything that we produce.

I wish to observe that a dangerous precedent may be established by the Senate. If the Senate sits supinely by and lets the Supreme Court write the laws of the Nation, I warn Senators that if the Supreme Court can do it with respect to gas, it can do it also with respect to other commodities. If the Senate, by inaction, or by defeating the pending bill, lets the Supreme Court, after 16 years, say to the Texas farmer or to the Louisiana farmer or to the Texas Oil Co. or to the Louisiana Oil Co., "this is going to be a heyday for price fixers," and that the control contingent has come back to the Capital of the Nation, I warn every Senator that what applies to gas may well apply to oil—they come out of the same hole—and that what applies to oil can apply to coal. If it applies to coal, it can apply to butter and to automobiles, and to everything else that is produced.

Mr. President, I do not believe the Senate has come to the point where it is willing to join the price fixers and to let prices be fixed on a commodity so long as it is not made or produced in the State from which a given Senator comes.

I believe the Senate is made up of men of principle. I believe the Senate is perfectly capable of considering the two alternatives before it, and that it will permit the commission to regulate on the basis of a reasonable market price. There are some people who do not want the "reasonable," and there are some people who do not want the "market." I was told the other day of a man who had drilled a well 20-odd thousand feet deep—over 4 miles down—and at that depth had struck gas. The best calculations of the best geologists were that he would be entitled, under the utility type of regulation—on the $2 million investment he had made, and on the basis of the amount of gas he had discovered—not to 10 cents or 12 cents, which is paid to the producer by people of the State represented by the Senator from Virginia [Mr. BYRD], but to a return if it should be adjusted on the cost-plus basis, of 40 cents.

Of course he would have no objection to following the theorists and price fixers and would probably say, "I will put that gas in interstate commerce. However, the gas which may have cost me 8 or 10 cents, on which I feel I am entitled to a reasonable market price, I will keep for an industry in New England. I will move that gas to the industry, if the industry does not wish to move to the gas." [Laughter.]

Mr. President, I have no doubt about the outcome of the bill. The longer we discuss it—and I am not advocating spending any substantial part of the winter on the debate—but the longer we discuss it the better the people will be informed. I believe a man's judgment is no better than his information, and the more information the people of the country have, the better their judgment will be.

Mr. President, I have never known of anyone with even one day's experience in producing oil and gas, who would advocate making a public utility of it. I have never known of any committee of either House of Congress—made up of liberals, progressives, conservatives, reactionaries, and what not—which has listened to testimony on the subject, that did not recommend a bill substantially along the lines of the bill which is now before the Senate. I do not believe that a Texan has ever been a member of the Federal Power Commission. The Chairman comes from the State of Washington, that great Democratic State, which does not produce much oil or gas.

Who does recommend the bill? It is recommended by good, honest, sincere men, who believe they are protecting the interests of the people. They thought they were protecting them in 1950, when we passed a bill in the Senate, and when the House passed the bill, and when the bill was sent to the White House. It was a type of bill we thought would meet with the approval of the Chief Executive, and the then majority leader had so informed us. On the floor of the Senate, the Senator from New Mexico [Mr. ANDERSON] yesterday put into the RECORD a prediction that was made in 1950 as to the future if the bill of 1950 were not signed into law. Incidentally, very few people who are talking about high prices now were talking about high prices then. The Senator from New Mexico [Mr. ANDERSON] read from the 1950 debate:

> If threatened regulation has brought some scarcity and some increase in prices, I ask Senators, what will actual regulation bring? The answer must be still greater scarcity and, thus, still higher prices.

That was in 1950.

We have had the threat, and we have had a little bit of regulation in connection with the filing of applications. What has happened? Instead of more gas at a cheaper price, we have had less gas at a higher price.

The Senate has this choice. It can go down the road of regulation that says, "We will allow citizens of the United States and property owners a reasonable market price for their products, as determined by a group of men making up the Federal Power Commission." I think that is what the Senate will do. Or it can follow the exponents of theory B and say, "No, we are not for a reasonable market price. We do not want to be reasonable in the case of this commodity. What we want to do is to make every man who produces a thousand cubic feet of gas, whether in Texas, North Dakota, or Montana a public utility." Such a law would not apply to Canada or to Mexico. If the gas could not be obtained in Texas, it could be obtained in Mexico and brought in without any regulation and the consumers would pay whatever they were asked to pay, for there would not be much competition. Senators can say, "We are going to make gas producers public utilities. File a statement and tell us how much your land cost; tell us how much gas the geologists say you have under the ground; tell us how much you have sold, and how much of your investment you have recovered; and we will allow you a 6-percent return."

Some producers have already recovered more than the land was worth.

Mr. President, I thank the junior Senator from Texas for yielding so long to me. I have spoken longer than I had intended, but I have a little motto on my watch, the Golden Rule—"Do unto others as you would have them do unto you."

Mr. DOUGLAS. Mr. President, will the Senator from Texas yield?

Mr. JOHNSON of Texas. Mr. President, the Senator from Illinois has had plenty of time in which to speak. I am not attempting to convince the Senator, and he will not convince me. We both realize that. But I wish to point out to Members who are not already convinced—and I am looking at one now who I know is not convinced—that I have no illusions that anything I may say will convince anyone, but I wish to have the satisfaction of knowing I did my duty, and I tried. [Laughter.]

Mr. President, it is a good thing to follow the Golden Rule—"Do unto others as you would have them do unto you." It is very easy for a man of great character, patriotism, and statesmanship, to look far yonder to the prairies and hills and canyons of the Southwest and say, "I will press down upon you utility regulation on every farm." But the same hand that presses down regulation on the farmer who may have 2 wells, or the oil company which may have 200 wells—press it down on other commodities in other States.

Basically, Mr. President, it seems to me that if we wish to folow our democratic free enterprise system, we can say, "We, the Senate, can entrust to reasonable men the duty of setting reasonable prices." Or, if we wish to follow the socialistic theory, we can say, "Natural gas ought to be publicly owned, anyway, and we will give you 6 percent of your invested capital."

I have no doubt what answer the Senate will give.

I thank the junior Senator from Texas.

Mr. DANIEL. Mr. President, I yield to the Senator from Illinois [Mr. DOUGLAS] for a question.

Mr. DOUGLAS. Mr. President, may I have unanimous consent to address a question to the senior Senator from Texas?

Mr. JOHNSON of Texas. I would have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOUGLAS. The senior Senator from Texas having delivered a eulogy on the Secretary of the Interior, the Chairman of the Federal Power Commission, the Secretary of Agriculture, the Secretary of the Treasury——

Mr. JOHNSON of Texas. Mr. President, if the Senator from Illinois will permit me, I wish to make it clear to every Member of this body, as I believe it is clear, except to the Senator from

Illinois, that I paid no tribute to and delivered no eulogy on any of the members of the President's Cabinet or the Federal Power Commission Chairman or any of its members, or any members of the committee. I merely stated the results of their deliberations. I would not say they are not entitled to a eulogy occasionally, here and there, but I did not reserve the time this afternoon for that purpose. The greatest eulogy I could have paid to any of them would have been to say they came from Texas, but, unfortunately, they did not. [Laughter.]

Mr. DOUGLAS. The question I should like to address to the Senator from Texas is this——

Mr. DANIEL. Mr. President, what is the unanimous-consent request?

Mr. DOUGLAS. That I may address a question to the Senator from Texas.

Mr. DANIEL. To the senior Senator from Texas?

Mr. DOUGLAS. Yes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOUGLAS. I should like to ask the senior Senator from Texas if he has the same confidence in the judgment of all these gentlemen on other matters that he seems to have on the question of the sale of natural gas.

Mr. JOHNSON of Texas. Mr. President, until the day the Democratic Convention opens we shall have opportunity to express our opinions not only of the actions of members of the President's Cabinet, but of the actions of the other body and this body. I hope I may be permitted to express my judgment tomorrow night on the fine service of the junior Senator from Florida [Mr. SMATHERS], because at 2:30 p. m. I am due to fly to Florida and give my opinion of him. I only intended to address myself to a subject which I think is of particular national interest at the moment, and always of very great interest to my constituents in Texas. I do not wish to try to cover everything and touch nothing.

If the Senator from Illinois will indulge me throughout this session, I am sure that both he and I will discuss many subjects not related to the regulation of natural gas. That is the only subject which I care to discuss today in any detail.

I am willing to answer any question the Senator wishes to ask me.

Mr. DOUGLAS. Mr. President, may I address a question to the distinguished junior Senator from Texas?

Mr. DANIEL. Certainly.

Mr. DOUGLAS. The Senator emphasized the disparity between the price of gas at the well and the average price to residential consumers. Am I correct?

Mr. DANIEL. I stressed it to some extent. The main thing I was trying to show by means of the chart as it relates to Richmond, Va., was that over a 16-year period the producer's price of natural gas has not gone up unconscionably but that there and all over the country it is less than 10 percent of the consumers' bills. As I said when I first put up the chart, the Senator from Virginia [Mr. BYRD] would give one of the waiters in the Senate Restaurant who served him a meal costing $1.53, more than a 10 percent tip. The producers receive less than the average tip given to a waiter in the Senate Restaurant or anywhere else. I was trying to stress that point. If the people of the country will consider those facts and realize that after 16 years of unregulated operation we are still able to sell gas at a price of less than 10 percent of the consumer's dollar, they will understand that it is not the producer who is causing their high gas bills.

Mr. DOUGLAS. Is the Senator from Texas aware of the fact that the major portion of the gas sold by the local utilities is not for residential use, but is instead for industrial use and, to some degree, for commercial use?

Mr. DANIEL. That varies greatly among the utilities. Much of it is for commercial use.

Mr. DOUGLAS. Is the Senator from Texas aware of the fact that the average sales price for gas sold to residential consumers throughout the country as a whole is approximately a little more than 8 cents a therm, or about 80 cents a thousand cubic feet? Is he aware that this is the average residential price and not the $1.53 or other high rates he has been talking about.

Mr. DANIEL. I hope that the average price is much less than the prices which are being charged by most of the utility companies that are fighting the proposed legislation. I am glad the Senator from Illinois has brought out that point, because to me it is one of the most significant things about the whole fight.

The Senator says that the average price which the utilities are getting from the household customers throughout the Nation is about 80 cents a thousand cubic feet. It will not be found that many of the distributing utilities that are getting low prices like that from customers are fighting the bill. We find opposed to the bill the big utilities which have the larger spreads. It appears to me to be significant that, for some reason, the ones with biggest profits and the biggest spreads, over and above what it costs them to get the gas at the city gate, are the ones who are fighting the bill so hard.

Mr. DOUGLAS. I was simply trying to address a series of questions to the Senator from Texas.

Mr. DANIEL. I will yield for another question.

Mr. DOUGLAS. I am afraid there will be many more questions.

Eighty-one cents a thousand cubic feet is the average rate on residential sales. But, as the Senator from Texas is well aware, the local utilities sell firm industrial gas and interruptible industrial gas; and if we take the average prices of those types of gas, we will get a rate of a little less than only 24 cents a thousand cubic feet.

So, taking a combined average of residential, commercial, and industrial rates, instead of the $1.53 rate which the Senator from Texas has been blazoning on the walls, we get an average rate of approximately 44 cents a thousand cubic feet. That is a very different picture from that which is attempted to be painted on the floor of the Senate.

Mr. DANIEL. Mr. President, did the Senator from Illinois ask me to yield for a question? That is the only purpose for which I yielded.

Mr. DOUGLAS. Is not what I have stated correct?

Mr. DANIEL. It is more than a question. This is the first time in the debate I have heard the Senator leave the consumers and go over to the industrial and commercial purchasers to worry about their price, lump their price into the total, and then try to say that by lumping their purchases the average charge of the distributor is brought down.

I would not have been surprised to hear a distributor make that argument, but I am surprised to hear a Senator, who ostensibly is looking only after the interests of the consumers, make that kind of argument. It simply shows that the distributors who are fighting the bill—and I am not trying to criticize them or retaliate against them for doing so; that is their business, and I favor their coming forward to express themselves, because I think they are helping our bill—but the distributors who are fighting the bill are selling to industrial and commercial purchasers at so much less a thousand cubic feet than they sell to the household users that the situation is simply shocking. I wonder why they are taking it out on the household consumers to such a degree. The distributors are the ones who are doing it, not the producers, because the price received by the producers is the same for all purposes. The producers are receiving the same price when they sell the gas to the interstate line, regardless of those to whom the interstate line might convey it.

Mr. DOUGLAS. That is correct. I wonder if the Senator from Texas would like to develop the facts on that point. Is it not true that the average price for all types of gas sold locally is approximately 44 cents a thousand cubic feet?

Mr. DANIEL. Sold by whom?

Mr. DOUGLAS. Sold by the utilities locally.

Mr. DANIEL. I have never checked those figures.

Mr. DOUGLAS. Those figures, I assure the Senator from Texas, are correct.

Mr. DANIEL. I have never checked those figures, but if they are correct I appreciate the Senator from Illinois placing them in the RECORD, because it shows that someone is sticking the household users, and it is not the producers, because they are selling their gas at the same price regardless of to whom the pipeline company might be taking it, and regardless of the final end use.

Mr. DOUGLAS. Is it not true that in 1954 the average price received by the producers for the gas which was sold in the cities and towns for 44 cents was approximately 10.1 cents?

Mr. DANIEL. I think that is approximately correct.

Mr. DOUGLAS. So instead of a contrast between 10 cents and $1.53 or 12.5 and $1.53, the real contrast is between

10 cents and 44 cents, and the producer's average price, therefore, was 23 percent of the average consumer's price, and not 6 or 7 percent, as some speakers have represented.

Mr. DANIEL. No; I doubt that those figures are correct. However, the Senator from Illinois, in his own time, might try to support them. I certainly am not going to say the first time I have heard his figures and his averages that they are correct. I should be very much surprised if they were correct, because certainly the big distributors who are fighting the bill are not treating the consumers as badly as the figures of the Senator from Illinois would indicate.

Mr. DOUGLAS. Mr. President, will the Senator yield for another question?

Mr. DANIEL. I yield.

Mr. DOUGLAS. Would the Senator be interested to know how we obtained those figures?

Mr. DANIEL. No; not during my time. I shall be glad to listen to the Senator from Illinois when he makes his speech and to hear him say how he obtained his figures; but not on my time.

Mr. DOUGLAS. I have one more question.

Mr. DANIEL. I yield for another question.

Mr. DOUGLAS. Is it not also a fact that the average price of gas as it is turned over by the pipelines to the local distributors at the city gates is approximately 25 cents a thousand cubic feet, leaving a head markup of only 19 cents a thousand cubic feet, or only about 44 percent of the final price, for local transmission, inspecting, billing, collecting, and connecting the local residences with the gas mains, and also a return on investment, which is regulated by the local commissions? Is not that correct?

Mr. DANIEL. I have not had an opportunity to check the figures which the Senator from Illinois offers in defense of the prices charged by the local distributing companies. To me, it seems that the prices are much higher than I had ever expected the distributors would have charged. The difference between what the distributors charge their household consumers and their industrial consumers as stated by the Senator is certainly greater than I would have assumed. But I am not in a position to say whether I agree or disagree with the figures.

Does the Senator from Illinois wish me to yield for another question?

Mr. DOUGLAS. There will be other questions later, but I think perhaps I should allow other Senators to ask questions.

Mr. LONG. Mr. President, will the Senator yield?

Mr. DANIEL. I yield.

Mr. LONG. Is it not true that it is relatively easy to break down the so-called average price for gas if one makes a comparison with the cost to a large industry, as, for example, an aluminum company? The distributor has no distribution costs, because the distributor simply lays its pipe directly to a single industry, just as gas is delivered directly to a city gate. That reduces the average cost because there is no distribution cost.

Mr. DANIEL. Yes.

Mr. LONG. Is it not true that the law as now written sets only one standard; and if gas producers are placed under the bill, they must operate by the same standard as is spelled out for a regulated public utility? In other words, the law refers to only one standard.

Mr. DANIEL. It refers to just and reasonable rates which have been interpreted to be a fair return, a 6-percent return on a prudent investment.

Mr. LONG. That is the standard way of regulating a monopolistic utility which has a certificate of convenience and necessity to operate in a guaranteed market with a more or less assured investment, and therefore being regulated at a fair return on the investment.

Mr. DANIEL. On the investment and cost. Of course, the law was written with the idea of regulating one who was selling services, not a commodity. If it is sought to apply that type of regulation to one who sells the commodity, it will make the producer give the commodity away free, allowing in his rate base only the reasonable cost of getting it out of the ground.

Mr. LONG. Is it not correct that there is not a single businessman in America who could afford to go into the business of producing gas if he had to do so with a 6-percent return on his investment?

Mr. DANIEL. He would not do so if he had any sense at all. We would not have the great oil and gas producing industry we have today if there had been any restrictions like that.

Mr. LONG. For example, is not the accepted ratio of success today about 9 to 1? Out of all wells which are dug for gas or oil, are not the odds 9 to 1 that an operation will be unsuccessful and that the investor will lose his investment?

Mr. DANIEL. As to exploratory wells, that is correct.

Mr. LONG. Therefore, a person cannot go into the drilling of wells for gas in the same manner in which he can go into the railroad business.

Mr. DANIEL. That is correct, and I have not heard many Senators arguing that it can be done. But what are they going to do? If they do not vote for the pending bill, they have not suggested any other means that will work. I do not know of any Senator on the committee taking the position that there will be an adequate supply of gas under a utility type of regulation.

Mr. LONG. Is it not true that the people in the gas-producing States are unanimous in believing that no benefits will be derived from any effort to nationalize or impose Federal price controls on the production of gas?

Mr. DANIEL. I think so, and officials in many consuming States seem to think so. This matter is just as important to gas-consuming States as it is to gas-producing States, because many officials in gas-consuming States know it is necessary that there be an enlarged supply of natural gas in order to keep the price of gas in line, or reduce it in the future. Persons who have studied the question know that if there is a utility type of regulation of the producers, such increased production cannot be had. This bill is to the interest of gas-consuming States as much as it is to the interest of gas-producing States.

Mr. LONG. Is it not also true that by means of proration and conservation laws, it is possible in those States where producers are not being given proper consideration for producers more or less to keep their reserves out of interstate commerce?

Mr. DANIEL. It might be possible, but I do not know of any producers who are threatening to do so. It seems that the officials and producers in gas-producing States are largely supporting the proposed legislation, which will enable them to continue to sell in interstate commerce. Of course, if the bill shall not be enacted, those who defeat it will be the ones who will force the producers in the producing States to keep the gas there. They will force those in the gas-producing States to try to get manufacturers from the New England area and the east coast to set up factories and industries in gas-producing States which will use the gas as a raw material or as fuel.

Frankly, I may say there were some persons in my State who objected to transporting natural gas out of the State. They said, "Let the industries move to Texas and use the gas here"; but they did not prevail. There was an excess of gas in Texas. The producers were certain that, under the law, they could make long-term contracts. They were glad to have the interstate market, so long as the market was certain and they were sure about the status of their business. They can continue doing business with the interstate market. It is those who would defeat the bill who would keep the gas within producing States. Half of the gas is being used in producing States now.

Mr. LONG. Is it not fair to anticipate that, unless the pending bill or a similar bill is passed, Federal legislation will accomplish the same results it always has—scarcities, shortages, and poor service for those who need the commodity?

Mr. DANIEL. Yes, and at higher prices.

Mr. PASTORE. Mr. President, will the Senator from Texas yield to me?

Mr. DANIEL. I yield to the Senator from Rhode Island.

Mr. PASTORE. I think the Senator has made the observation that the opponents of the bill have not proposed any reasonable solution of the problem. In the face of that statement, would the Senator from Texas, who is one of the proponents and one of the guiding lights of the bill, accept an amendment to the effect that where the term "reasonable market price" is used, there be substituted therefor the words "just and reasonable"? Then on page 6 of the bill, in line 22, we could set forth what formula and what breadth and what liberality the Federal Power Commission should give to "just and reasonable," by adopting language which would read, as follows:

In determining the just and reasonable price of natural gas under the provisions of this section 5, the Commission shall con-

sider, among other things, whether such price has been competitively arrived at, the effect of the contract upon the assurance of supply, and the reasonableness of the provisions of the contract as they relate to existing or future prices.

Why is not that a suggestion which would be more than just and reasonable to the producers under the provisions of the Natural Gas Act?

Mr. DANIEL. In answer to the question of the Senator from Rhode Island, who conducted the hearings in the Interstate and Foreign Commerce Committee, I should like to say that he knows the Senator from Texas and a majority of the committee would not accept that amendment. I am glad he has given me this opportunity to again state why we would not accept the substitution of the words "just and reasonable" for "reasonable market price."

In the utility regulation cases, in the great mass of law which has been written by the courts, the term "just and reasonable" has been applied to utility rate-making cases. Only a few days ago, when the Circuit Court of Appeals for the District of Columbia had before it an order of the Federal Power Commission applying the average field price instead of a just and reasonable rate based on a utility rate-making regulation, the circuit court of appeals reversed the Federal Power Commission, or at least sent the case back, and stated that, at least under the statute, the proper point of departure from the requirement of just and reasonable rates should be to find out how the rate the Commission was trying to fix compared with the cost-plus rate.

There is a whole body of law written on utility type rate making cases where the term "just and reasonable" is applied. It has never been applied to the sale or purchase of a property or commodity. The body of law to which I have referred, with reference to the term "just and reasonable," deals with rate-making where services are performed, and therefore the terms "cost plus" is easy to apply. But in the case of a producer's sale of natural gas there is involved, not only service performed in getting the gas to a certain place, but there is the actual sale of a commodity or property.

I read a moment ago what Mr. Justice Jackson said in the Hope natural gas case. It is particularly appropriate to read it again at this point.

Mr. PASTORE. Did Mr. Justice Jackson speak for the minority or for the majority?

Mr. DANIEL. I do not remember whether he spoke for the minority or majority, but he was certainly a distinguished member of the Supreme Court.

Mr. Justice Jackson said:

A thousand feet of gas captured and severed from real estate for delivery to consumers is recognized under our law as property of much the same nature as a ton of coal, a barrel of oil, or a yard of sand.

The matter of sales of commodities has been before the Congress and State legislatures in the past. In cases involving sales of commodities, where there is any regulation at all, there has invariably been used the term "market price" or "reasonable market price."

I wish to cite to the Senator from Rhode Island the instances in which that was done, because I believe he was a Member of Congress in 1943.

Mr. PASTORE. No; I am sorry to say I was not then a Member of Congress.

Mr. DANIEL. At any rate, in 1943, in connection with the War Contracts Renegotiation Act and the renegotiation of contracts, Congress, in considering what it would allow the contractors who produced their own oil or gas or coal or iron, decided that in the renegotiation of the contracts, they would be credited with the fair market price—not a cost-plus arrangement in connection with the commodity they were producing under contract. Instead, Congress allowed them the fair market price. That is where Congress established that yardstick.

In the case of prices in a milk shed area, under the Milk Control Acts, the prices are determined on the basis of the reasonable market price, because the milk producers are selling a commodity, not a service alone.

There is another case in which our own Federal Government has applied that yardstick, namely, in connection with the condemnation of property, where property is being taken by the Federal Government. In such cases the fair and reasonable market value of the condemned property is paid.

To refer to another body of precedents and cases, we find that State utilities, when they regulate different prices, first apply the standard of "reasonable market price" to the capital assets of the utility, to determine the permissible earning rates on the capital.

There is another precedent for the use of the term "fair market price" in dealing with a commodity, namely, when a utility purchases coal from a captive mine, one under the control of the utility. In that case the coal is included in the rate base of the utility as a cost item at the reasonable and fair market price of the coal.

So, Mr. President, in answer to the question propounded by the Senator from Rhode Island, let me state that we have every reason to wish to stay with the term "reasonable market value," as written into the bill, as approved by the House of Representatives, and as approved by a vote of 11 to 4 by the committee at the meetings so ably presided over by the Senator from Rhode Island. We wish that term to remain in the bill, because it applies to the sale of commodities, and has been applied to the sale of commodities every time the Congress or the States have in any way tried to regulate such matters.

On the other hand the term "just and reasonable," which the Senator from Rhode Island would propose, is applied to service-regulation cases. It cannot be applied successfully in the case of natural gas producers who sell their commodity.

Mr. President, I understood the Senator from Rhode Island to agree to that, at least at one time during our hearings. In that connection, I read now from page 1218 of the hearings:

Senator PASTORE. Well, you know what my personal feeling is. I feel all small independent producers up to 2 million feet a year, ought to be exempt, I believe that, and secondly, I believe there ought to be some kind of supervision, and these people get a fair return on their money, not just and reasonable.

I am reading from the hearings, and I have read the words of the Senator from Rhode Island. I thought that after sitting through all those hearings, during all those weeks, he came to the same conclusion on this particular point that we came to, because at that point in the hearings he said—and I am very glad that I remembered that particular occasion:

I believe there ought to be some kind of supervision, and these people get a fair return on their money, not just and reasonable.

Mr. PASTORE. Mr. President, will the Senator from Texas yield at this point?

Mr. DANIEL. I yield for a question.

Mr. PASTORE. If the Senator from Texas will read the entire hearings, he will discover that my position right along was that the very strict rule of "just and reasonable" could not be applied to those producers in the way that we have known it to be applied in the case of distribution companies. I said so, not once, but perhaps a thousand times.

I did say that we could use the term "just and reasonable" and could give it the explanation and clarification and broadening and liberality it needed in this particular case in order to take into account the risks involved in this business and the unique kind of business and the character of the business, and still leave it under the control of the Federal Power Commission, so the strict formula of 6 percent would not be applied on a clear base-rate basis. I have taken that position consistently. I submit that the Senator from Texas has not responsively answered my question, for the simple reason that the term "reasonable market price" is even redefined in his bill. He is not satisfied with the general interpretation of the term "reasonable market price"; and on page 6 of the bill, he goes on to explain to the producer and to the Federal Power Commission precisely what he means by "reasonable market price." There he provides:

In determining the reasonable market price of natural gas under the provisions of this section 5, the Commission shall consider, among other things—

And that is a brand new provision and a new explanation of what is meant by the term—

whether such price has been competitively arrived at—

And that is brand new—

The effect of the contract upon the assurance of supply—

And that is brand new—

and the reasonableness of the provisions of the contract as they relate to existing or future prices.

All I am trying to say to the distinguished Senator from Texas is that if we use the term "just and reasonable," we should explain that in this case other elements should be taken into consideration in order to justify the initiative we are talking about; but at the same time, for the sake of the public interest, it should be left under the supervision of the Federal Power Commission.

I dare say to the Senator from Texas that the whole motive, the whole purpose, the whole design, the whole effort of the proponents of the bill in the Senate committee was to see to it that not a single item in House bill would be changed. But now the Senator from Texas has taken occasion to say——

Mr. DANIEL. Mr. President, I did not yield to the Senator from Rhode Island to have him judge my motives in the committee.

Mr. PASTORE. No; but the Senator from Texas took occasion to read what I said in the committee; and in view of that, I believe I have a right to explain my position.

Mr. DANIEL. I think the Senator from Rhode Island does have a right to explain his position.

Mr. PASTORE. That is precisely what I am doing.

Mr. DANIEL. But now the Senator from Rhode Island is judging my motives, not asking a question.

Mr. PASTORE. If the Senator from Texas does not want me to do so, I shall take my seat, and shall wait for my own turn.

However, he commented on what I said in the hearings, and I am answering that.

Mr. DANIEL. The Senator from Rhode Island knows that I read from the hearings, in connection with his question as to whether I would be willing to substitute the term "just and reasonable" for the term "fair market price." In answering his question, I read from the hearings. I do not believe he will find recorded in the hearings any statement about my motives. But just now I understood the Senator from Rhode Island to attempt to state what were the motives of the Senator from Texas and other members of the committee. I did not yield for any purpose other than a question.

I never sat at the feet of a fairer presiding officer, in any committee, than the Senator from Rhode Island. I did not know he thought our motives were anything except of the highest order, and I did not know that he questioned whether we were proceeding on the basis of anything other than what we believe would be for the good of our country, including both producers and consumers alike.

Mr. WILEY. Mr. President, will the Senator from Texas yield for a brief question?

Mr. DANIEL. I shall yield for other questions, Mr. President. I simply wished to remind the Senator from Rhode Island that I did not mean to be yielding for anything except a question.

Now I yield to the Senator from Wisconsin.

Mr. WILEY. My questions will be brief. I seek information which I do not have.

What is the rule that is applied by the utility commission in Texas, in regulating intrastate rates?

Mr. DANIEL. In Texas, the cities regulate the rates for which gas and electricity is sold within the cities by the distributors.

Mr. WILEY. I do not understand the Senator from Texas.

Mr. DANIEL. The cities regulate the rates—as is done by the cities in Wisconsin—for which gas can be sold within the cities by the distributors.

Mr. WILEY. Something was said in argument to the effect that gas was being imported from Mexico and Canada. When the gas enters the pipeline, is it regulated under the law, and under the decision of the Supreme Court, by the Federal Power Commission?

Mr. DANIEL. Yes. After it comes into our country it is regulated. That part within our own country is regulated. But, of course, the Federal Power Commission cannot go back and regulate the price which the producer in Canada or Mexico receives.

Mr. WILEY. I understand that. The point I am getting at is this: In the Senator's State, when the gas in the pipeline crosses into our country, it is regulated.

Mr. KERR. Mr. President, will the Senator yield?

Mr. DANIEL. I yield.

Mr. KERR. Is it not a fact that the only regulation with reference to gas is by the appropriate body, either the Federal Power Commission, with reference to what the transporter can make on his operation, or by the local body, with respect to the distributor within the city, where the regulation is either by the city or by the State, and relates to what the distributor can make? But neither regulatory body can touch in any way what the producer receives, or change what the transporter pays the producer for the gas.

Mr. DANIEL. That is correct.

Mr. WILEY. The Senator made that clear.

Mr. DANIEL. As I stated earlier in my remarks, that is one way in which we are discriminating against American producers.

Mr. WILEY. The Senator has made that very clear. Of course the Federal Power Commission would have no authority to say what the producer of gas in Canada or Mexico might receive. I ask the Senator if he knows at what price per thousand cubic feet that gas is sold to the pipeline.

Mr. DANIEL. All I know is what I have read. I cannot swear to the figures, but I understand that one of the Canadian sales is for 22 cents a thousand cubic feet, and that the sale of gas from Mexico is at 15 cents, laid down by the producer at the Rio Grande River.

Mr. WILEY. Does the Senator know how far that gas is transported before it reaches the consumer?

Mr. DANIEL. No; I do not.

Mr. WILEY. In the Senator's State is there not a utilities commission or an equivalent commission, to which an appeal can be taken, so that the commission does literally establish the rates which the consumer pays?

Mr. DANIEL. Only within our cities; and such regulation applies only to the distributor's rate within the particular city.

Mr. WILEY. Can the Senator tell me how much that rate is?

Mr. DANIEL. It varies from city to city. I shall try to obtain the figures for the Senator. If he wishes an average for the State, I shall be glad to try to obtain the figures.

Mr. WILEY. I thought perhaps the Senator might have some general knowledge on the subject.

Mr. DANIEL. There are quite a few cities in Texas. I do not have in mind the price which is being permitted the distributors in the various cities.

Mr. KERR. Mr. President, will the Senator yield?

Mr. DANIEL. I yield.

Mr. KERR. Would the Senator be surprised to know that in Fort Worth and Dallas, where the gas distributor is regulated by the proper authority with respect to what he can make, and where the transporter is regulated by the proper authority with respect to what he can make, and where both are based upon the figure agreed to by the purchaser and seller, insofar as the price paid to the producer is concerned, the average price paid by consumers for all three services is a little more than half of what is paid in Milwaukee to the distributor alone for his service?

Mr. DANIEL. I would not be at all surprised.

Mr. KERR. Would the Senator be surprised to know that the producer, the transporter, and the distributor in the larger cities in the Southwest receive as a total, on the average, less than half of what the distributors in Rhode Island, Connecticut, Virginia, and Wisconsin receive for distribution alone?

Mr. DANIEL. That would not surprise me, because I know that in some of those States the final price paid by the consumer is extremely high.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. DANIEL. I yield.

Mr. PASTORE. I do not know how surprised I would be, but I would be somewhat refreshed if someone would tell me what the rate of return is, or what the gross profits are of the producers to whom reference is made, as compared with the rate of return and the profits of a gas company which has only a 4-percent return on its invested capital. To me, that is the test. Who is making the money?

Mr. DANIEL. Does the Senator from Wisconsin have another question to ask the Senator from Texas?

Mr. WILEY. Yes.

Mr. DANIEL. Mr. President, I ask unanimous consent that I may yield to the Senator from Oklahoma [Mr. KERR] to answer the question propounded by the Senator from Rhode Island [Mr. PASTORE].

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the Senator from Oklahoma may proceed.

Mr. KERR. Mr. President, I must say to the distinguished Senator from Rhode Island that every producer of gas files a return; and, if he is a producer with stockholders, those stockholders must file returns. Many of the producers make large profits. Many of them sustain great losses. If the Senator will examine into the subject he will find that many producers who tried to find gas lost all they had in the effort; and they became just as dead by reason of such failure to find gas as the Senator's distributors are by reason of their antiquated methods of operation and charges. I think it would be enlightening if the Senator from Rhode Island were to tell the Senate why it is that a distributor in his city must have twice as much money to distribute the gas as is paid to the distributor, the transporter, and the producer combined in most cities in the country, when the distributor in his city has access to the same producers, at the same prices, and has access to the transporters on a reasonably comparable basis. Yet the distributor in his city is unable to distribute the product to consumers without charging them twice as much as is received by all three operators in most cities of the Southwest.

Mr. MONRONEY. Mr. President, will the Senator yield in order that I may supply the facts for which the distinguished Senator has asked?

Mr. PASTORE. Mr. President, I should like to reply to the distinguished Senator from Oklahoma [Mr. KERR].

Mr. DANIEL. Mr. President, I am yielding only for questions.

Mr. MONRONEY. Mr. President, the question was asked by the distinguished ranking member of the Committee on Interstate and Foreign Commerce with reference to the relative profits realized by various sections of the gas industry.

Mr. PASTORE. I was speaking of the situation in Rhode Island.

Mr. MONRONEY. I thought perhaps the Senator wanted the information for the United States as a whole. Rhode Island is a small State. I did not know that the Senator wanted only the figures with respect to Rhode Island.

Mr. PASTORE. Rhode Island may be a small State, but its Representatives can make plenty of noise.

Mr. MONRONEY. After all, we are legislating for 48 States. I think the answers to the distinguished Senator's questions deserve to be placed in the RECORD.

I point out that in the year 1941 the operating and distributing utility companies, as reported in their own publication, Gas Facts, had net profits of $82,600,000. In 1946 the utility companies had a net profit of $132 million; and in the year 1954, after many of the artificial gas companies had converted to natural gas, the windfall profit which they received by reason of all the advantages involved in being able to supply twice the number of heating units in a thousand cubic feet of gas, as compared with what they were previously able to supply, totaled $356 million. Those are the facts, from Gas Facts, 1954.

The Bureau of Mines, which is a United States factual and statistical agency, reported that the total marketed production of natural gas for the year 1954 was 8,742,546,000 thousand cubic feet.

The Bureau also reported that the average United States price to the producer was 10.1 cents. A simple multiplication indicates that the producers' total receipts from natural gas were $882,997,146.

The only source we could find—or the only source that my very able assistant, Mr. Finney, could find—is from the last available year of the report called "Statistics of Income for 1952," issued by the United States Treasury Department, Internal Revenue Service, at page 18. There it is stated that the total gross revenues of crude oil and gas producers for that year were $4,317,614,000, and that their net profit was $260,918,000, or a realized net profit on gross income of 6 percent.

Those are the most factual figures we could find. The same 6 percent on total sales, applied to the total gas sales of 1954—6 percent of $883 million—gives an estimated net profit for producers of natural gas of $53 million.

That is as close as we can come to factual statistics. We have searched for these facts for weeks, because the distinguished ranking minority member of the Committee on Interstate and Foreign Commerce asked that question in the hearings. We anticipated it, and we made some research on that point. Therefore the operating and distributing utility companies, such as those operating in Providence, in Hartford, and in New Haven, are making a net profit of $356 million, largely out of the gas for which the producer is making a profit of $53 million.

I should like to be able to break it down for oil and gas if I could. However, like the Siamese twins, they cannot be separated. That is where the bill falls flat on its face——

Mr. DANIEL. The Senator means the present act falls flat on its face?

Mr. MONRONEY. The present act.

Mr. PASTORE. I object to the correction. [Laughter.]

Mr. MONRONEY. The present act—that is, the Supreme Court's act—falls flat on its face because no one can determine what the ratio is on unsuccessful wildcat wells, or what the allocation of costs is on a well that produces both oil and gas. One-third of the gas comes from such joint wells.

Mr. PASTORE, Mr. DOUGLAS, and Mr. DANIEL addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from Texas.

Mr. DANIEL. Mr. President, I wish to yield the floor, because I understand the Senator from Rhode Island [Mr. PASTORE] will be recognized next.

Before I yield, I shall be glad to answer any questions Senators may wish to address to me. If there are no further questions, I yield the floor.

Mr. PURTELL. Mr. President, will the Senator yield?

Mr. DANIEL. I yield.

Mr. PURTELL. Much time has been spent in pursuit of the question whether the distributing companies are making large profits. Is the argument being presented by the proponents of the bill, assuming the consumers are being gouged by the distributing companies—and I do not make such a concession—that the producers should be permitted to gouge the consumers a little? Is that the reasoning?

Mr. DANIEL. The Senator knows that is not the reason the large profits of the distributing companies are being discussed. The Senator from Connecticut apparently has forgotten how the whole discussion of that point began. The distributing companies were welcomed with open arms by some of the opponents of the bill when they alleged that the producers were gouging their customers.

The distributing companies, before they came into the open, had gone around the country getting mayors and consumers to do the legwork for them in trying to prove that the producers were sticking the public with the pitiful 10 cents. They put out all that propaganda. This year the distributing companies came into the open, and they have been alleging that there must be utility-type regulation of the producers, because otherwise the producers will get too much of the consumer's dollar.

It is only in answer to the fallacious argument made by the distributing companies against the producers that we are trying to show the public what a small percentage of the consumer's dollar the producer actually receives.

We have not said too much about the big spread, except to say that we believe it is there and that there is room for a reduction in favor of the consumer, instead of in the producer's price, because the producer gets only an average of 10 cents per thousand cubic feet.

That is the only way that argument came into the debate. I hope the consuming and reading public, through this discussion—first, with respect to the attack of the distributors on the producers, and now the answer of the producers—will get the matter perfectly clear in their minds and will realize that the producers are not getting any more of the consumer's dollar than what the average consumer would pay by way of a tip to a waiter in a restaurant. It is even less than 10 percent of the price. I hope the public will get that information. That is the only reason for the discussion along that line.

Mr. PURTELL. I may say that when the distinguished and most able Senator from Texas was delivering his very well prepared address—as well prepared as it could be to make out his case—and very well delivered by him, I asked him a question. He saw fit at that time not to yield to me. That was his privilege. However, I shall try to answer some of those questions in a speech I intend to make next week.

The Senator from Texas dwelt a great deal in the early part of his speech on the price of 10 cents. Is it not correct to say that in the report of the hearings before the committee there is testimony from many proponents of the measure, from the oil fields and the gas fields, who stated that 20 or 30 cents should be the reasonable market price?

Mr. DANIEL. I do not remember any testimony to that effect.

Mr. PURTELL. I should like to call the Senator's attention to the fact that there was such testimony.

Mr. DANIEL. The Senator from Connecticut never heard that from the Senator from Texas.

Mr. PURTELL. And some testimony to that effect was given before the Federal Power Commission.

Mr. MONRONEY. Mr. President, will the Senator yield for a question?

Mr. DANIEL. I yield to the Senator from Oklahoma.

Mr. MONRONEY. I have discussed this point with the able Senator from Connecticut. It was a citizen from Oklahoma City, of whom I have never heard. I do not believe anyone else in the oil and gas business has ever heard of him either. He did make such a statement in the hearings. He represented no organization of consumers or gas producers, or anyone else. If someone could get more information than I have been able to get—and I was born in Oklahoma City—I should like more clearly to identify the testimony on which the distinguished Senator from Connecticut is relying for the one place in the record where that figment of the imagination was put forth.

Mr. PURTELL. Mr. President, will the Senator yield?

Mr. DANIEL. The Senator from Texas did not even remember the citizen from Oklahoma City who had made such a statement. What some people might have said along that line is that if the full fuel value of natural gas, compared with the British thermal units of other fuels were to be charged, the price would be higher.

Mr. PURTELL. The Senator from Connecticut does not make any such concession. However, he will be glad to listen to the Senator from Texas.

Mr. DANIEL. Certainly American natural gas can be delivered, and the producers can sell it, at a reasonable price and at a profit below what the Canadian producer today can sell it for to our own consumers. We are faced with discrimination today, when the Canadian producers can sell their gas for 20 cents or more a thousand cubic feet, and when the Mexican producers can sell their gas for 15 cents or more.

Mr. DOUGLAS. Mr. President, would the Senator from Texas be willing to answer some questions?

Mr. DANIEL. I thought I had answered all questions of the Senator from Illinois. I have agreed to yield the floor. I wish to say to the Senator from Illinois, however, that I shall be at his disposal for further questions during this debate.

The PRESIDING OFFICER. The Chair recognizes the Senator from Rhode Island.

Mr. PASTORE. Mr. President, I am unalterably opposed to S. 1853, as presently drawn, and unless it is substantially amended adequately to protect the consumer, I must vote against it.

As acting chairman of the Senate Committee on Interstate and Foreign Commerce, it was my privilege to preside over the hearings on the bill which lies before us today. It took our committee 17 days to do its job, and during that time I had the opportunity to hear practically all, if not all, the witnesses who appeared at the hearings on the proposed legislation. Because of this, and after careful study of the bill, I remain firmly convinced, a position shared by my distinguished colleagues who signed the minority report, that the bill is not in the public interest.

My reason for saying this is because this bill falls short of properly and adequately protecting the 26 million Americans who are consumers of natural gas today. Last Monday, on the floor of the Senate, the spokesman for the proponents of the bill, my friend the distinguished junior Senator from Oklahoma, took occasion to use a quotation from Caesar's Gallic Wars in order to describe the manner in which the natural-gas industry operates. My distinguished colleague noted that, just as all Gaul was divided into 3 parts, so also is the natural-gas industry divided into 3 parts: the producers, the pipeline transmission companies, and the local distributing companies. Left out of this description is the forgotten man of the natural-gas amendments, the fourth part of Gaul—the consumer.

It was never disputed at the hearings, and certainly I have heard no dispute during this debate, that the producers of natural gas are well organized in a very effective group which has been blanketing the country with advertisements in the newspapers in recent days—a procedure which they have a perfect right to follow. The pipeline companies are equally well organized and they, too, have been distributing countless documents throughout the country—a procedure they have a perfect right to pursue. The distributing companies are also well organized, and they, too, have been spending a great deal of effort and time in distributing documents and information to lay their cause before the Senate and the people of America—a procedure which they have a perfect right to follow.

Now, to use the analogy of the distinguished junior Senator from Oklahoma—there we have the three parts of Gaul; but where is the consumer in this descriptive picture? Who is fighting the consumer's battle? The only unorganized group in this entire picture are the consumers of America. The consumer has no one to fight his battle, in spite of the fact that the total investment of consumers in gas appliances and equipment exceeds the total investment made in gas equipment by any of the three parts of Gaul.

In this country today there are 26 million consumers, who have a total investment in gas appliances and equipment of over $14 billion.

Having made such a tremendous investment, these 26 million consumers will find themselves at the mercy of the suppliers of their gas, whoever they may be, unless we, their representatives, see to it that a proper supervision is provided to protect their interest. It is the responsibility of this Congress to carry out the spirit of the Natural Gas Act and to enact the kind of legislation which will adequately protect the gas consumer.

In order to understand adequately the character of this entire problem—from producer to consumer—it is necessary and important for us to go somewhat into the historic background of the natural-gas industry.

The natural-gas industry today is the sixth largest industry in the United States. It has, as I have already indicated, 26 million consumers with a tremendous investment in gas appliances and equipment. When we consider the 26 million consumers in proper perspective it is safe to say that this bill affects the well-being of 90 million Americans. The distributing companies which service these customers have a total investment in their plant, property, and equipment of over $8 billion, and the pipeline companies which transmit the gas from the fields to the city gates have an investment in their equipment of over $4 billion, and then, of course, there is a total investment of the producers in equipment, which amount they have not given to us but which is undoubtedly substantial, although well under the investment of any other segment of the industry. Therefore, apart from the producers' assets, there is invested in the United States today an amount which approaches $27 billion in the equipment of the consumers, the distributing companies, and the pipeline transmission companies.

In 1954, the natural gas industry marketed a total production of close to 9 million million—or 9 trillion—cubic feet of natural gas. The natural-gas industry serves practically every State in the United States, and with only two exceptions, in these States where service is not already underway, plans have been made and authorization given to establish such service.

Not only are there 26 million consumers of natural gas in the United States today, but the service given to each such consumer affects all the members of his household. As I have already indicated, we can estimate that approximately 90 million people throughout the United States have a stake in the outcome of this bill before this distinguished body. This number is growing each year, as fast as the companies can supply the equipment and as fast as the industry can supply the natural gas.

Twenty-five years ago, natural gas was practically a local business. Its regulation was the concern of local governments. During the 1930's, however, the industry began to expand at an unprecedented rate. Great improvements were made in the transportation of natural gas long distances through pipelines. Natural gas reserves became important enough and large enough to warrant substantial investment in interstate transmission lines, which soon stretched out from the producing fields into all directions across the country.

Natural gas, which once was merely a byproduct of oil and often regarded as a waste product in the production of oil, developed into one of the most important

sources of power and energy in this country. Today natural gas accounts for one-fourth of the total energy production in the United States.

Back in 1938, when the Natural Gas Act was passed, the natural gas industry was an important factor in the economic life of the country, but nowhere near as important as it is today, 18 years later. In 1938, only 28 percent of the marketed production of natural gas moved in interstate commerce, whereas in 1953, approximately 50 percent of such production flowed in interstate commerce. Since 1938, the number of consumers of natural gas has tripled and the production of natural gas has quadrupled.

Yet, as far back as in 1938, the Congress reached the conclusion "that the business of transporting and selling natural gas for ultimate distribution to the public is affected with a public interest, and that Federal regulation in matters relating to the transportation of natural gas and the sale thereof in interstate and foreign commerce is necessary in the public interest."

The proponents of the bill take the position that the gatherer and producer were exempted under the Natural Gas Act. The dispute concerning this interpretation came to a head in the case of *Phillips Petroleum Company* v. *Wisconsin* (347 U. S. 672). The question involved in the Phillips case was one of whether the jurisdiction of the Federal Power Commission extended over the rates charged by a natural gas producer and gatherer when it sold its natural gas in interstate commerce. The Phillips Co. argued that it was not subject to the Natural Gas Act of 1938 because it was an independent producer which did not own its own transmission lines. According to the Phillips argument, Congress did not intend to regulate the so-called independent natural gass producer. The United States Supreme Court did not agree with the Phillips position and reached the following conclusion:

> Regulation of the sales in interstate commerce for resale made by a so-called natural gas producer is not essentially different from such sales when made by an affiliate of an interstate pipeline company. In both cases, the rates charged may have a direct and substantial effect upon the price paid by the ultimate consumer. Protection of the consumer against exploitation at the hands of natural gas companies was the primary aim of the Natural Gas Act.

That was what the Supreme Court said in the Phillips case.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. PASTORE. I yield.

Mr. DOUGLAS. Is it not also true that the Circuit Court of Appeals had previously rendered the same opinion?

Mr. PASTORE. That is correct.

Mr. DOUGLAS. Is it not true also that two of the justices of the Supreme Court, namely, Mr. Justice Minton, who wrote the opinion, and Mr. Justice Black, who concurred, were members of the Senate at the time the bill was originally introduced, and that former Senator Minton, who was, I believe, a member of the Senate Committee on Interstate and Foreign Commerce took an active part in the debate?

Mr. PASTORE. Of my own recollection, I regret that I cannot certainly say that the Senator from Illinois is correct in his assertion. But I have so much confidence in the excellent memory of my colleague from Illinois and his ability to retain statistics that I would assume that that was so.

Mr. DOUGLAS. And that, therefore, those Justices spoke from personal experience as former Members of the legislative body?

Mr. PASTORE. That is correct.

Thus, in indisputable terms, the Supreme Court has said that the Congress of the United States did in fact intend that the gatherers and producers of natural gas should be included under the supervision and regulation of the Federal Power Commission insofar as concerns the rates they charge for pipeline gas. It is the decision of this case that brings us to the moment of this bill.

Mr. President, I call the attention of my colleagues to what now follows, because I think it states my position quite clearly.

A great deal of time was consumed at the hearings before the committee, in an attempt by the proponents of the bill to show how and where the Supreme Court of the United States erred in reaching its result in the Phillips case. I am inclined to agree with the position taken on Tuesday by the distinguished Senator from Arkansas [Mr. FULBRIGHT] that, whether we agree or disagree with the Supreme Court decision, the real question before us is, What is best to do in the public interest, and what must we do now to protect the consumers of this country and carry out the spirit of Congress when it enacted the Natural Gas Act of 1938?

It is really not necessary for us to argue here the pros and cons of the Phillips opinion. Surely Congress was not precluded from legislating to change the effect of a decision of the Supreme Court if it thought that that decision was not in the public interest, and the Congress should not be precluded now. By the same token, if the opinion of the Supreme Court in the Phillips case did in fact protect the public interest, but was nevertheless in error, should we now take the position that in order to correct the judgment of the Court we should in fact defeat the public interest?

To put this in very simple language, let us assume that the Supreme Court of the United States in the Phillips decision made an error of law, but stated a public policy, stated a public interest. Must we today defeat the public interest in order to correct an error by the court? The question before the Senate is what is best for us to do now to carry out the spirit of the Natural Gas Act and to protect the consumers of the United States, in whose behalf I hope and believe the Natural Gas Act was passed.

Consequently, I for one take the position that while discussion during this debate concerning the intent of Congress in 1938, and the interpretation of that intent by the Supreme Court in 1954, might make delightful discussion pro and con, the single question remains: Does the bill before us protect the consumer? The reason why I single out the consumer is that if he were not the real party in interest in the Natural Gas Act, there never would have been a necessity for passing the Natural Gas Act in the first instance.

In order to understand fully the public interest which is at stake in the bill, it is necessary that we consider carefully the manner in which the consumer buys his gas from his supplier. It is also necessary that we review as briefly as posable the conditions which prevail in the natural gas industry.

As we all know, the consumer buys his gas from the distribution company, which is a company operating as a public utility under the jurisdiction of local regulatory agencies. These distributors purchase their natural gas from the interstate pipeline transmission companies, which are subject to the supervision and regulation of the Federal Power Commission under the Natural Gas Act. The pipeline companies, in turn, either produce their own natural gas from reserves owned by them, or buy their natural gas from the so-called independent producer.

The proponents of the bill argue that the production of natural gas and the sale of natural gas at the field is a highly competitive enterprise because, they argue, there are some 8,000 persons and corporations engaged in the business of gas production. Without taking the time to argue about this figure of 8,000 producers, it is indisputable that 43 of the producers control over 70 percent of the gas sold to pipeline companies in 1954. Of the natural gas reserves reported, over one-third of the total of such reserves in our country are owned by the four leading natural-gas producers.

I do not place too much emphasis on the fact that much of the production of natural gas is controlled by a handful of companies. The important point I make is that the testimony before our committee was to the effect that pipeline companies have been vying among themselves to secure reserves of natural gas. This has created a situation in the natural gas production industry whereby the market is not a buyer's market. It is completely a seller's market.

Mr. DOUGLAS. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. BIBLE in the chair). Does the Senator from Rhode Island yield to the Senator from Illinois?

Mr. PASTORE. I yield.

Mr. DOUGLAS. The Senator from Rhode Island is making a very able and conclusive argument. I take it the Senator also remembers the testimony of the chief witness for the bill, Dr. Boatwright, who, as appears on page 184 of the hearings, pointed out the additional concentration of suppliers in terms of a given pipeline. That study showed, for instance, did it not, in the case of United Gas Pipeline Co., the first 4 vendors sold 40.6 percent of all the gas; in the case of Northern Natural Gas Co., the first 4 sold 67.2 percent; in the case of the Texas Eastern Transmission Corp., the first 4 sold 35.2 percent; in the case of the

Tennessee Gas Transmission Co., the first 4 sold 40.4 percent; in the case of the Cities Service Gas Co., the first 4 sold 61.4 percent; in the case of the Panhandle Eastern Pipeline Co. and Trunk Line Gas Co., the first 4 sold 58.7 percent; in the case of the Colorado Interstate Gas Co., the first 4 sold 53.4 percent and in the case of the Michigan-Wisconsin Pipeline Co., there was only one supplier, namely, the Phillips Co.? Then there was a whole series of other figures indicating that when one considers the pipelines, there was great concentration in the supply and reserves held by a relatively small number of producers of gatherers. Was that not the testimony of the chief witness for the bill?

Mr. MONRONEY. Mr. President, will the Senator from Rhode Island yield to me?

Mr. PASTORE. I wish to make an observation, and then I shall yield to the Senator from Oklahoma, if he will be patient for a moment.

I have said previously that the fact that there exist a few large companies does not disturb me. I do not know whether Dr. Boatwright was hired or was on loan to the producers. I suppose he was loaned to the producers to work out all these figures. I suppose Dr. Boatwright knew he was going to be confronted with the argument, because this was not a new question. We had that question in connection with the Moore-Rizley bill. We had it in connection with the Kerr bill. This was nothing brand new. I think anyone who was a Senator in 1952 knew the question was going to come up again. Anyway, Dr. Boatwright went to great lengths to point out that, after all, aluminum is controlled by a few companies, and steel is controlled by a few companies.

Mr. President, I am not opposed to bigness as such. I do not want to go to extremes and say that merely because a few large companies control the production of a certain commodity, that in itself is evil. The point I make, and which I think is very important, is that the character of the gas business is such that when we consider reasonable market price, which has been discussed, and which I shall cover in my statement later on, when we consider at what point that would be determined and where the reasonable market price shoud be applied, when we take into account the fact that a large group of pipelines are falling over one another trying to get their hands on added reserves—I say when we take all those matters into consideration, in order to straighten out and clarify our focus and perspective, we have to comment on the fact that the industry is in fact controlled by a few large companies. When the proponents of the bill begin to shed their crocodile tears about the 8,000 producers—tears so copious that one almost has to wear rubbers in order to get around in the Senate—I wish to point out that they are really concerned with the handful of big companies, not the 3,000 little fellows. But the mere fact that 4 or 5, or 10 or 15, or even 50 or 43 large companies control 70 percent of the supply of gas is not what really disturbs me; what disturbs me is what they are trying to do in the bill.

Mr. MONRONEY. Mr. President, will the Senator from Rhode Island yield?

Mr. PASTORE. I yield.

Mr. MONRONEY. The Senator from Rhode Island is always so factual that I am sure he will want to correct what seems to be an error in the assumption of the Senator from Illinois [Mr. DOUGLAS], in that Milwaukee gas is supplied by only one producer, namely, the Phillips Co.

The record of the committee hearings clearly shows, and I am sure the distinguished acting chairman of the committee remembers it, that before the Milwaukee pipeline would build its line, it required an adequate supply from a single seller. It did not wish to go into the field and deal with 100 or 200 or 300 individual producers. The Phillips Co. did not have the quantity of gas which the Milwaukee pipeline company required in order to get a certificate. So it was the pipeline company's refusal to deal with more than one supplier which compelled Phillips to seek to get more gas than it had available at that time. Only at the request of the Milwaukee pipeline, and not at the volition of the Phillips Co., the Phillips Co. got the supply in one piece.

The concentration of which the Senator from Rhode Island speaks certainly exists, but the great eastern cities require huge quantities of gas, and the average pipeline no longer has any substantial quantity of gas of its own. The pipelines do not wish to connect with every well that is flaring gas. So someone has to put in one package a contract to purchase the gas and supply it to interstate lines. That is where the natural gas enters the interstate line. There is nothing unusual in the fact that gathering lines finally bring the gas into the long line. There are economic reasons for that, which reasons have been created by the large demands which the eastern cities have placed upon the limited gas supplies in the oil and gas territories.

Mr. PASTORE. That may be so, and again I say I do not dispute that, but the fact remains that for the last 3 days the proponents of the bill have been putting horns on every distributing company, and now they are putting haloes over the heads of the big fellows who have to be big because the demand is large.

Mr. President, I continue with my prepared statement. A pertinent example illustrating that the market is a seller's market is shown on page 21 of the minority views. Here is seen the total lack of competition which is demonstrated by the experience of the Iroquois Gas Corp. in negotiating for additional supplies in the Sheridan field in Texas in November 1954. I should like to call this example to the attention of my distinguished friend from Oklahoma.

As shown by the record in Docket No. G–1969 before the Federal Power Commission, the producers refused to quote prices—mind you, Mr. President, it is this free market we are talking about—and demanded that Iroquois, together with other potential customers, submit blind bids. In order to get the gas, Iroquois bid 16.5 cents per thousand cubic feet—a price then substantially above the market.

Furthermore, it was quite apparent at the hearings that whatever competition exists is not among the producers and the gatherers of natural gas, but in fact, among the pipeline companies who have allowed themselves to enter into all sorts of ridiculous contracts in order to secure natural-gas reserves to themselves.

Mr. MONRONEY. Mr. President, will the Senator from Rhode Island yield for a clarification?

Mr. PASTORE. I yield.

Mr. MONRONEY. Did I correctly understand the Senator? The Iroquois utility—which I seem to recall was a distributing utility, not a pipeline—in an effort to obtain more gas, attempted on a common-carrier basis, we might say, through the pipeline to go into the field itself and seek to obtain an additional supply of gas at the expense of the other cities being served by the same long line. Am I correct in saying that Iroquois was a distributing company?

Mr. PASTORE. Yes; but it was interested in the sale of the gas.

Mr. MONRONEY. Except that it was interested in using the line as a common carrier, instead of in having the gas available to the pipeline prorated to all the other cities on the line. It was seeking to capture the gas, and that purchase was a one-shot affair, and was not at all reflective of the reasonable market price thereon.

Mr. PASTORE. Does the Senator from Oklahoma take the position that we have a salutory situation and an atmosphere of free, competitive enterprise when a producer tells a gas company that wishes to obtain gas to sell to consumers who wish to use gas in cooking eggs and so forth, in preparing meals, "We will not quote you a price. You fellows bid for it, and we will take the highest bid." Is that indicative of a free market?

Mr. MONRONEY. Does the Senator from Rhode Island expect to get gas to the thousands of consumers in Providence, R. I., who are waiting for gas, or to the 200,000 consumers in the Chicago, Ill., area who are waiting for gas, by having the distributing company jump into the field and try—by extraordinarily high payments, not only for the gas but for the transmission—to take advantage of every other city on the line? Would not the Senator from Rhode Island think it would be necessary for the long line to buy the gas, and thus get all the gas it could at a reasonable price, and then distribute it ratably to its long list of customers who have been so long with the line?

If all the distribution companies are to be brought to the gas field, and if all of them are there to bid against each other, instead of the orderly marketing of some 33 interstate lines, there will be created a situation which will compound even the condition now existing under the Supreme Court's gas law.

Mr. PASTORE. But the Senator from Oklahoma has missed the point I have made. The question was not whether Iroquois offered to bid. The question was whether, when it offered to purchase, it was told, "If you want this gas,

you must bid against everyone else." As a result, it had to buy at a high price. I am referring to that situation to show that the market is not as free as some persons have been telling us.

Mr. MONRONEY. Does the Senator from Rhode Island mean to say that it is a question of having someone brought into a room and brainwashed, in an effort to obtain a high price?

Mr. PASTORE. Oh, no.

Mr. MONRONEY. Does the Senator say this bill will prevent them from getting the gas into interstate commerce?

Mr. PASTORE. If we take cognizance of the fact that someone was trying to take advantage of someone else, I will go along with the Senator. That is precisely why I cited that case, namely, to show that advantage was being taken of them, in saying, "There is no sales price on this gas. You boys bid against each other for it, and I will take the highest bid."

That is the kind of thing that triggers off the price in other fields. I shall cover that point; this is the terrible point about this entire situation.

This brings me to a discussion of the vicious escalation clauses which the proponents of the bill have recognized to exist, and yet in the bill have done nothing to cure.

During the course of the hearings, even the proponents of the bill displayed great surprise and shock at some of the escalation provisions which were contained in many of the contracts between pipeline companies and producers. To be sure, in the majority report, there are enumerated some escalation clauses with which I will not take the time to quarrel today.

My objection and my fire today are directed toward the so-called third-party favored-nation clause, which is completely contrary to the American tradition of free enterprise. It is the truly ingenious evil which has plagued this industry, and which this Congress must, in the public interest, correct. It is a practice which should be outlawed, especially in an industry which is affected with the public interest.

It is very easy to understand the "trigger" nature of a third-party favored-nation clause. Any new contract by a third party can "trigger" off higher prices in an existing contract which has absolutely no relationship to this contract. This kind of "trigger" action can lead, and has led, to a vicious cycle and chain reaction of unwarranted higher prices.

Mr. DOUGLAS. Mr. President, will the Senator from Rhode Island yield?

Mr. PASTORE. I yield.

Mr. DOUGLAS. I wonder whether the Senator from Rhode Island in his very able exposition will develop this point at a little greater length. Am I correct in my assumption that under the third-party favored-nation clause, if A, a pipeline, makes a contract with X, a producer, under which the producer furnishes and sells to the pipeline, gas at 10 cents a thousand cubic feet; and if in that area, region, or field another pipeline—let us call it "C"—pays to a single producer "D," a rate of 20 cents a thousand cubic feet, then automatically the price which A pays to producer X will go up from 10 cents to 20 cents a thousand cubic feet?

Mr. PASTORE. That is correct. Let me submit a somewhat more graphic example than the one cited by the distinguished Senator from Illinois. If a pipeline company serving a distributing company in Boston, makes a contract with a producer in a field in Texas, to purchase a certain amount of gas at 10 cents a thousand cubic feet, and if that contract contains such a third-party, favored-nation provision, then if a pipeline company serving Oakland, Calif., agrees to pay 20 cents a thousand cubic feet for gas from the same field—and, Mr. President, mind you, one is on one side of the Nation, and the other is on the other side of the Nation—automatically the price for the gas for the pipeline company serving the city of Boston will go up to 20 cents a thousand cubic feet. If that is fair competition, then I think all of us should go back to our books.

Mr. MONRONEY. Mr. President, will the Senator from Rhode Island yield?

Mr. PASTORE. I yield.

Mr. MONRONEY. A moment ago the Senator from Rhode Island said he approved of some few escalation clauses. I approve of only one type as not being subject to review and regulation by the Federal Power Commission.

Will the Senator from Rhode Island explain under which types of contracts the "vicious cycle of unwarranted price increases" took place? Will he explain that for the RECORD? A while ago he said that a "vicious cycle of unwarranted price increases" had taken place. I think it will help clarify the RECORD—and I am asking this question for the information of the Senate, and I shall follow with interest the Senator's reply—to have the Senator from Rhode Island detail the types of contracts producing or other reasons for the occurrence of this "vicious cycle of unwarranted increases" to producers.

Mr. PASTORE. I shall cover that later in my remarks.

Mr. MONRONEY. Very well.

Mr. PASTORE. However, in order that the Senator from Oklahoma will not get the impression that I am trying to avoid his question, let me say now that there are many charts showing that in 1938 the price was 4 cents a thousand cubic feet. These hearings before me are filled with examples showing that in 1954 the price was 10 cents a thousand cubic feet. The proponents of the bill can argue until the cows come home. That is not the real picture. There are many cases today before the Federal Power Commission—and I shall show that fact later in my remarks—in which the application is for 20 cents, or for more than 20 cents a thousand cubic feet. The Senator from Oklahoma is familiar with the number of cases involving the terrible third-party favored-nations clauses. This book, which is the record of hearings, is loaded with them. It would take me a day and a half to pick them out. Does the Senator take the position that there is no such thing as third-party favored-nations clauses, and that they have not triggered price increases?

Mr. MONRONEY. I am merely asking the Senator to state in detail the types of clauses of which he approves, and those to which he objects. The Senator sat through all the hearings and presided most ably over them. I am merely asking the Senator to specify the types of escalation clauses which trigger the alleged "vicious cycle of unwarranted price increases." The Senator from Rhode Island knows the various types of escalation clauses. He says he approves of some. I am asking him for specific details as to——

Mr. PASTORE. As to those of which I approve?

Mr. MONRONEY. As to those of which the Senator approves, and those which he says are responsible for unwarranted price increases. I think the Senate would be most interested, because of the Senator's vast fund of information on this subject. He presided most ably over the hearings. I wish he would detail the clauses of which he approves, and those to which he objects.

Mr. MAGNUSON. Mr. President, will the Senator yield to me for a moment?

Mr. PASTORE. I yield.

Mr. MAGNUSON. I must leave the Chamber shortly, and I cannot be present tomorrow.

I think there is one thing upon which we can all agree—both the proponents and the opponents of the bill. I would be somewhat derelict in my duty as chairman of the committee if I did not compliment the distinguished Senator from Rhode Island for the manner in which he conducted the lengthy hearings. It was a tremendous task, one which had to be done by the committee, but one to which the chairman himself could not give attention because of a great deal of other committee business. I have heard from all sides, both from the proponents and the opponents of the bill, how fairly and ably the Senator from Rhode Island handled the long weeks of hearings. As chairman of the committee I wish to express my thanks to him at this time.

Mr. PASTORE. I thank the Senator from Washington.

Mr. MONRONEY. Mr. President, will the Senator from Rhode Island yield?

Mr. PASTORE. I yield.

Mr. MONRONEY. As one of the principal proponents of the bill, representing an opposite viewpoint from that of the acting chairman, let me say that no one could have asked for a more fair, courteous, or considerate treatment of all witnesses, no matter what their views. The Senator from Rhode Island conducted hearings far into the night, at times, in order to accommodate witnesses from great distances.

The Senator from Rhode Island deserves this tribute for the careful and considerate way in which he conducted the hearings, in order that all sides might have the opportunity, in the great American tradition, of speaking their pieces, no matter which shade of opinion they represented.

Mr. PASTORE. I thank the two distinguished Senators. I am indeed overwhelmed. However, whether this statement be considered as facetious or not,

my position with respect to the bill has not changed.

Mr. MONRONEY. Neither has mine.

Mr. PASTORE. Mr. President, rather than take the time to pick out from the report, the various types of clauses, let me make a general statement in that connection. I can complete the record later if it becomes necessary. It is a question of relative evil to decide which escalation clauses are worse than others.

Relatively speaking, I quarrel very little with the escalation type of clause providing for predetermined increases in price at fixed times.

Relatively speaking, I quarrel very little with the escalation clause which has to do with readjustment, because of specific anticipated increases in taxes.

Relatively speaking, I shall not today quarrel or say much about the two-party favored-nations clause.

What really disturbs me is the vicious, evil, three-party favored-nations clause, which is still permitted under the terms of the bill. I think if we were properly doing our duty we would outlaw the third-party favored-nation clause by legislation.

I realize that if this bill does not pass, the Federal Power Commission, under the Phillips case, can do precisely that. However, until that time comes, in order that the hands of the Commission may be fortified, in the hope that such clauses will be outlawed more quickly, I think it would not be a bad idea if we outlawed such clauses by legislation.

The impact of this kind of "triggering" is felt by the consumer who must pay the higher price resulting from the third-party favored-nation clause. It was such a clause which the Transcontinental Gas Pipeline used as one of the reasons for justifying the large increase in rates which it sought and obtained in 1954. Another example of the impact of the third-party favored-nation clause is contained in the recent decision of the Federal Power Commission on October 24, 1955, in the matter of the Sun Oil Co.—Sun Oil Co., E. J. Hudson et al., Maracaibo Oil Exploration Corp., and Sohio Petroleum Co., Docket No. G-8288—wherein the Commission stated that the charges made by Sun Oil and Sohio Petroleum Co. were "triggered" by the purchase of gas by Transcontinental from the Hassie Hunt Trust at the price of 17 cents per thousand cubic feet. The net effect of the favored-nation clause, according to the Federal Power Commission, was to increase the price of gas to Transcontinental from scarcely less than 9.8 cents to 17 cents. The applications to the Federal Power Commission accordingly sought approval of the same 17-cent rate.

The increase in rates because of escalation clauses has followed the pattern of an epidemic. The figures used before the Senate Interstate and Foreign Commerce Committee hearings are already outdated. Today many of the applications for rate increases before the Federal Power Commission are based upon rate of more than 20 cents per thousand cubic feet.

It is clear that the object of the various escalation clauses is to increase the price of gas in the field. This has been accomplished at the expense of the consumer. This result has had such far-reaching consequences that even the natural-gas producers and pipeline companies themselves have, in some instances intervened to oppose increases in rates in certain areas. For example, in the Signal Oil & Gas Co. case, decided by the Federal Power Commission on November 28, 1955, the Signal Oil & Gas Co. proposed to sell gas in Oklahoma to Cities Service at 12 cents per thousand cubic feet. The record before the Federal Power Commission stated without contradiction that the maximum price in the area was 10 cents per thousand cubic feet. Oklahoma Natural Gas Co. and Lone Star Gas Co. intervened to oppose the sale by Signal at the rate indicated.

The majority opinion of the Federal Power Commission stated as follows:

> The contention of Oklahoma Natural and Lone Star that a 12-cent sales price by Signal will drive the maximum price in the area from 10 to 12 cents is not contradicted by Signal, and a witness for Cities Service admitted that this would be the effect of the sale as proposed. Although the favored-nations clauses in the existing contracts of Oklahoma National and Lone Star would not be triggered, the record clearly shows that the price proposed by Signal would inevitably cause a general area price increase for all major sales to 12 cents per thousand cubic feet as the result of future purchases of new supplies of gas.

Mr. MONRONEY. Mr. President, will the Senator yield?

Mr. PASTORE. I yield.

Mr. MONRONEY. I believe it would be helpful for the RECORD to indicate at this point that Oklahoma Natural Gas and Lone Star are strictly intrastate operations, and do not deal in interstate gas. They cannot be bound by anything in either the Supreme Court decision or this bill.

Mr. PASTORE. That is what I said. They would not be affected. However, the Commission stated that the effect would be the triggering of unwarranted price increases in that area. That is precisely the point I make.

As we can see here, the price structure of the entire natural-gas industry is built upon the foundation of the escalation clauses, which allow them to gravitate automatically to the highest price bid in a given area. The unfortunate consumer has no say in the operation of these escalation clauses, in spite of the fact that the consumers have spent over $14 billion on their gas appliances and equipment.

These escalation clauses are the source of the most severe problems in the natural-gas industry. It is, therefore, the duty and responsibility of the Congress to correct the abuses resulting from these escalation clauses. However good or bad the case of the proponents may be for the need in the industry of exemptions on producers—and however good or bad their arguments may be for the need of increased prices to encourage exploration—none of the suggestions or provisions of the bill before this Senate corrects the unquestionable abuses of the third-party escalation clauses. Not only does the bill fail to correct the third-party favored-nation clauses, but it gives implied assent and approval to them with the encouragement to continue and expand them in scope.

It may be interesting to the members of the Senate to know what, in fact, these increases in prices mean to the consumer in terms of dollars and cents. As indicated on page 27 of the committee report, exhibit 5, as of 1953, the total consumption of natural gas in the United States was more than 5 billion thousand cubic feet. An increase of 5 cents per thousand cubic feet would result in an increase of more than $268 million a year. An increase of 10 cents per thousand cubic feet would amount to an increase of more than $537 million a year, and an increase of 15 cents per thousand cubic feet would result in an increase of more than $806 million a year.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. PASTORE. I yield.

Mr. DOUGLAS. Am I correct in understanding that the figures quoted by the Senator from Rhode Island refer to the year 1953?

Mr PASTORE. Yes; the year is 1953.

Mr. DOUGLAS. I take it that the Senator from Rhode Island is also aware of the fact that in the January 2, 1956, issue of Gas Age, that authoritative journal stated that the total sales by utilities of gas amounted, for the year 1955, to 6 billion thousand cubic feet.

Mr. PASTORE. That is correct.

Mr. DOUGLAS. So that, applying the figures of 5, 10, and 15-cent increases, respectively, there would be increases in the price to the consumers of $300 million, $600 million, and $900 million, respectively. Is that correct?

Mr. PASTORE. That is correct.

Mr. MONRONEY. Mr. President, will the Senator yield?

Mr. PASTORE. I yield.

Mr. MONRONEY. Merely to keep the record straight—and I know my distinguished colleague, the senior Senator from Illinois, would not wish it to be otherwise—I should like to state that, in referring to the consumer, I am sure the Senator from Illinois does not wish to have it implied that it is the household users who would thus suffer. He includes the industrial users who use large quantities of the gas. Therefore, I would appreciate it, for the purpose of the RECORD, if now or later, in the interest of accuracy—since it has been stated that it is the consumers who have been buying all these appliances—that the percentage, which is rather well established, be placed in the RECORD at this point.

Mr. PASTORE. The chart I cited is not something I have compiled. I am reading from a chart which appears at page 27 of the report of the committee. The distinguished Senator from Oklahoma is a member of the committee. It is marked "Exhibit 5," and it is entitled "Effect of Increased Field Prices by States Based on 1953 Utility Sales of Natural Gas."

Mr. MONRONEY. That is correct, but those figures include industrial and commercial users.

Mr. PASTORE. The source of the information is the Federal Power Commission.

Mr. MONRONEY. That is correct.

Mr. PASTORE. I do not believe that the Federal Power Commission would lean too much toward those of us who oppose the bill, because their whole disposition in this matter has been more on the other side of the fence.

Mr. MONRONEY. I made my suggestion only in the interest of accuracy. We do not question the figures as to the total amount of gas moving in interstate commerce. We merely feel, inasmuch as the record has been made as to the number of appliances that have been bought by the consumers, that it is necessary to separate the vast amount of wholesale sales at a cost of 2 cents for city delivery for industrial use, and the quantities sold at 75 cents or a dollar for city delivery to the household consumer. We should make it clear what we are speaking about. If we use one set of facts for household users, in terms of appliances they have bought, we should break down the total according to its use. Of course a great deal of gas is used for commercial and industrial purposes. As a matter of fact, speaking as a representative of a gas-producing State, I would welcome coal producers recovering some of that business, because it is a prodigal waste of gas to use this precious, exhaustible fuel in large amounts under boilers that could be just as well fired with coal or oil.

Mr. PASTORE. I have no objection to bringing that out. The point I make is that I am quoting from a chart. I am not quibbling over a few million thousand cubic feet. All I am saying is that there would be substantial increases in the market, especially to the consumer. I am merely citing the figures of the Federal Power Commission.

Mr. MONRONEY. Assuming the figures to be correct as to total consumption, they would at least reflect a large amount of gas that is used in industry.

Mr. DOUGLAS. Mr. President, will the Senator from Rhode Island yield to me?

Mr. PASTORE. I yield.

Mr. DOUGLAS. Since the Senator from Oklahoma has attached a qualification to the figures presented by the Senator from Rhode Island, I may say that I am delighted that the Senator from Oklahoma now recognizes that, in addition to the residential use for gas, there is an industrial use for gas. Up until this time all the price charts presented by the Senator from Oklahoma, by the Senator from Texas, and by the Senator from Arkansas, have been with respect to the residential use of gas. It is highly commendable for the Senator to admit, as the Senator from Illinois insisted earlier in his colloquy with the Senator from Texas, that there are industrial and commercial uses for gas.

If the increased cost were passed on to the industrial firms, does not the Senator believe that the consumers of the products of those industrial firms would ultimately have to pay the cost? Therefore the consumers bear the burden, either directly as users of gas or indirectly as purchasers of products in which gas was used in the process of manufacturing.

However, as the Senator from Oklahoma has hinted, in practice, if the distributive utilities try to load the extra 10 cents or 15 cents per thousand cubic feet onto the industrial rate, which is now only a little over 20 cents per thousand cubic feet, the industries will then turn to coal and oil.

In that event the utilities will undoubtedly load upon the householder not merely the 10 or 15 cents per thousand cubic feet, but perhaps double that amount. This is the crucial point, and I am indebted to my good friend from Oklahoma for helping us to bring it out. They will be forced to bear the actual costs which cannot be unloaded on the industrial consumers.

Mr. MONRONEY. Mr. President, will the Senator from Rhode Island yield for a further clarification of the RECORD?

Mr. PASTORE. I am delighted to yield.

Mr. MONRONEY. The junior Senator from Oklahoma, in his opening statement, which I believe the Senator from Illinois heard, called attention to the industrial use of gas. Perhaps I made a mistake in not saying that for the same service for which the householder pays $1.05, the industrial consumer is charged 2 cents. It would seem to me that the consumer is getting a little bit of a heavy charge while the industrial user is free loading on the backs of thousands of consumers.

There are many unemployed coal miners in the State of the distinguished Senator from Illinois, and I, coming from a gas-producing State, would like to see more coal used for industrial purposes. After all, there is a 10,000-year supply of coal, against a 22-year supply of gas. The Senator from Oklahoma would like to see some of the coal miners put to work, and see some of the coal put under the boilers for power and for electricity.

However, so long as the distributing companies will sell gas at 2 cents for city delivery, while at the same time they charge $1.05 to the household consumer, industries will free load, and in that way help exhaust the supply of gas. Today a part of the scarcity of gas in the field is due to the demand from cities like Chicago. Chicago is one of the largest industrial users of gas. That kind of use is forcing up the demand for gas in the field, for which new discoveries have not compensated. Therefore I say we should try to be realistic, and preserve this precious 22-year supply of gas as a household fuel, with which no other fuel is comparable. It is not a luxury fuel; it is a special fuel. We from the gas-producing States do not like to have it replacing coal under heavy boilers.

Mr. DOUGLAS. I should like to point out that this discussion as to the relative charges made for residential gas as compared with industrial gas is a matter which really should come before the various local and State regulatory bodies. We of the Congress can do absolutely nothing in this respect, absolutely nothing. To brandish the residential rate as the proponents of the bill have done, is in a sense bringing up a red herring. In justice, however, to the distributing companies, I may say we should consider the fact that because of the demand for fuel for heating, since there is almost no residential demand during the summertime, as is indicated by the chart, in order to take care of the flow of gas the producers have to sell it at about any price they can get from the industries. That is why they make a low rate. There are also costs in connection with residential service which are not connected with the industrial service, namely, the cost of connecting large numbers of houses to the gas main, and there are also the costs of individual inspecting, billing, and collecting.

I do not mean to argue that case now; that is a matter for the State bodies. As a citizen of Illinois, I have contended that there should be a readjustment of rates, and that the residential rate should come down to a level closer to the industrial rate. But that is not anything with which the Senate can deal. What we can deal with however is whether we will try to protect the consumer, directly or indirectly, by preventing an unjust and unfair price for gas at the entrance of the gas into the pipeline.

Mr. MONRONEY. Mr. President, will the Senator from Rhode Island yield for a clarification of the record?

Mr. PASTORE. I yield.

Mr. MONRONEY. The record shows that probably 60 percent of the gas is used on a year-round basis. Only 40 percent of the gas used is on an interruptible basis in the summer. In cities where the rates are the lowest, in the eastern sections, where progressive gas companies have been able to find underground storage, we do not find the giveaway policy through the summer months as the price is loaded onto the residential consumer. There are some very fine companies distributing gas, and the record will so show. They have been able to find facilities for underground storage, and are able materially to reduce the residential rate for city delivery. It is the companies which have not provided for summer storage and have sold gas for boiler fuel which have the highest gas rates for consumers while they permit industry to enjoy the low rate.

Mr. DOUGLAS. I am one of the sponsors of the bill under which national authority would be given to create underground storage facilities, particularly in abandoned and worked-out coal mines.

Mr. MONRONEY. And the junior Senator from Oklahoma has attempted to help a number of times, because we both recognize the technological progress that could be made.

Mr. DOUGLAS. I wish to point out that in the absence of such storage the distributing companies do have gas on hand during the summer which they have to sell at almost any figure. I am not entering a brief for the local distributing companies, but in a sense of fairness I do object to the big producers trying to single the distributors out as the whipping boys to divert attention from the issues which the Senator from Rhode Island is presenting.

Mr. MONRONEY. They are so used to it that their backs are pretty tough.

It has been going on for approximately 8 years.

But when both sides of the case are presented, which is what Senators are attempting to do in the traditional fashion, I think the public will be able to look at the record and at the figures and decide whose fingerprints are on the hold-up gun.

Mr. DOUGLAS. I do not intend to prolong the discussion and to interfere with the very able presentation of the Senator from Rhode Island. I would merely remark that a comparison should be made, not as between the producers' price and the residential price, whatever it may be, but between the producer's price and the average retail sales price, which is approximately 43 or 44 cents. Instead of the producer's price being 10 percent of the final price, it is in fact about 23 percent. If we take the average city-gate price we will find it is 25 cents, so that the retail mark-up is only about 19 cents per thousand cubic feet, or approximately 44 percent of the final rate. And again I want to insist that the vital point in this comparison is the real average rate of profit in the various industries, although we should remember that this whole discussion which the Senator from Oklahoma started is beside the point.

Mr. MONRONEY. Mr. President, will the Senator from Rhode Island again yield? Then I shall stop interrupting him, because I know it disorganizes the Senator's speech for Senators to continue to interrupt him.

Mr. PASTORE. He does not disorganize my speech at all.

Mr. MONRONEY. We have taken for the charts that have been referred to the rate most advantageous to the distributor. Where there were a cooking and a heating rate we have taken the one most advantageous to show the lowest spread. But it is not correct to assume a rate, because industrial sales are listed as wholesale sales and retail sales are listed as household sales.

Am I correct in the assumption that what was referred to as retail sales do include industrial sales as well as household sales?

Mr. DOUGLAS. That is correct.

Mr. MONRONEY. I thank the Senator for his fairness in this matter.

Mr. PASTORE. Mr. President, I wish to thank the Senator from Illinois and the Senator from Oklahoma for the enlightenment furnished by their colloquy.

I have reached the point in my remarks where I expect to discuss the bill. I shall discuss it from a tactical and legalistic point of view.

It would make me very happy if some of the great lawyers among the Members of the Senate were present. However, I hope they will read the RECORD.

The proponents of the bill will, of course, take the position that while it is true the abuses recited have existed in the past, the proposed legislation in this bill will remedy the situation for the future. Nothing could be further from the truth.

The heart of the bill is in the standard which serves as the measure of cost which the pipeline company may charge and then pass on to the distribution company in fixing its rate for the resale of natural gas. The bill sets up a new standard known as reasonable market price, and goes on to define how the standard shall be determined, in subsection (b) of section 3, which reads, beginning on line 22 of page 6, as follows:

> In determining the reasonable market price of natural gas under the provisions of this section 5, the Commission shall consider, among other things, whether such price has been competitively arrived at, the effect of the contract upon the assurance of supply, and the reasonableness of the provisions of the contract as they relate to existing or future prices.

This standard of "reasonable market price" as expressed in the bill has, I admit, a rather glamorous sound, unless we properly analyze and understand it. Yet, when we consider this standard in connection with the character of this industry and the way it operates in the bill, we quickly discover that this indeed is a Trojan horse.

I have already shown that the natural gas business at the pipeline-producer level is a far cry from what we understand to be a free competitive market.

Mr. POTTER. Mr. President, will the Senator yield?

Mr. PASTORE. I yield.

Mr. POTTER. First, I wish to commend the distinguished Senator from Rhode Island for his fight in opposition to the bill. He presents his case, as he always does, in logical, forthright fashion. He always is buttressed by having the facts on his side.

I wish to ask the Senator if it is not a fact that "reasonable market price" writes into law the escalation clauses which have brought about the constant rise in the cost of gas.

Mr. PASTORE. I will not go so far as to say that "reasonable market price" writes in the escalation clauses. I will say that escalation clauses are not prohibited by the bill. But any escalation clause will be able to trigger off a new higher market price of gas.

Mr. POTTER. Escalation clauses in present contracts are continued.

Mr. PASTORE. In present contracts and future contracts.

Mr. POTTER. Yes. Under the term "reasonable market price," is there any assurance that escalation clauses in contracts will not be considered as "reasonable market price," or the favored ration clauses as "reasonable market price"?

Mr. PASTORE. I shall point out in my remarks that the expression "reasonable market price" in the bill is in fact, under the circumstances, a gimmick. It is the sleeper in the bill. When we wake up to what the bill will do, if it ever passes, we shall be very much surprised at what will happen to the price of gas in the field.

Mr. POTTER. Is it not true that that is the heart of the bill?

Mr. PASTORE. That is the whole heart of the bill. I say so right here.

Within the past 5 years, the growth of this industry has been phenomenal. The pipelines have been figuratively scrambling all over the lot, trying to tie up additional reserves. The situation has become so aggravated that today the Federal Power Commission is literally bombarded with applications for increases in rates, as the result of the practices I have already pointed out.

This being the situation, it is impossible to understand how we are ever going to achieve a market that can be called free and reasonable, unless the supply of natural gas catches up with the tremendous demand for it.

Another point that must be borne in mind, and this I think is very important, is the way the use of this standard operates in the bill. To this argument, I invite the serious attention of my colleagues to subsection 10 and subsection 11 of section 2 of the bill, which very clearly move up the point of jurisdiction on the part of the Federal Power Commission, from the wellhead to a point beyond the production. Gathering, processing, treating, compression, and delivering of such natural gas into the transportation facilities of a person engaged in so transporting it.

The purpose of these two subsections is clearly to remove the producers and the gatherers from Federal supervision. When we consider later under section 3, where this so-called reasonable market price is to be applied, we find that the section reads:

> At the point at which the gas is delivered into the transportation facilities of the natural gas company in or within the vicinity of the field or fields where produced.

I invite the attention of the distinguished Senator from Michigan to that section, because I think it answers the question he asked me.

Clearly, that point under subsections 10 and 11 of section 2 is spelled out to be beyond the vicinity of the field or fields where produced, gathered, processed, treated, compressed, and delivered into the transportation facilities because that is the language in subsection 10 of section 2. Therefore, we are no longer talking about a market price which will be the result of the competition among the producers, as such. We are actually talking about a market price which is established and fixed at a point beyond the production, gathering, processing, treating, compressing, and delivering of such natural gas into the transportation facilities of the pipeline companies.

The proponents of the bill have been shedding all the crocodile tears. They have said, "Leave the 8,000 producers out of Federal supervision, and the competition among them will rectify the market and generate a fair and reasonable price."

According to the bill, however, the point where reasonable market price is applied has nothing to do with the small independent producer; that application will occur after the product has been gathered, after it has been processed, after it has been treated, after it has been delivered to the interstate line. That is the sleeper in the bill.

What does it mean? I do not know. I have asked the Senator from Arkansas [Mr. FULBRIGHT], I have asked the Senator from Texas [Mr. DANIEL], I have asked the Senator from Oklahoma [Mr.

MONRONEY]. I asked everyone in the committee at the time of the hearings. No one has given an intelligent answer. I think the people of the country are entitled to know what this means.

The logical question might be, "Well, what difference does this make?" Let me explain the difference. The proponents of the bill, both in the hearings and on the floor of the Senate, have argued that if the producer, especially the small producer, were removed from Federal supervision, the business practices among them would result in a "reasonable market price." The fact of the matter is that under this bill, the point where the "reasonable market price" will be determined is not in the activities among the producers themselves, as I have already pointed out, but rather at a point beyond the production, gathering, processing, treating, compressing, and delivering of such natural gas into the transportation facilities of the pipeline companies. Therefore, this great argument of 8,000 free producers to establish a reasonable market price actually boils down to a market which will be established, determined, and controlled by some 500 large gatherers.

I emphasize that to my dear friend from Michigan. This great field of 8,000 producers, over whom the proponents of the bill have been shedding crocodile tears, will be funneled through a small group of gatherers who are, in fact, all big operators. They will say what the market price is to be.

Mr. POTTER. Mr. President, will the Senator yield?

Mr. PASTORE. I yield.

Mr. POTTER. In the committee report, in the qualifications as to what may be the original fair market price, it is stated, "among other things." What is meant by that?

Mr. PASTORE. That the sky is the limit; the producers will be able to charge all that the traffic will bear. This is aimed in that direction. Who will ever decide that? Where will the market price be established?

Mr. POTTER. It will be far beyond the point where the gas leaves the producer.

Mr. PASTORE. I shall cover that later in my remarks.

Can the Federal Power Commission go to a producer later and say, "This is the fair market price, and you will have to accept it"? Oh, no. They will say to the pipeline company, "That is all you can charge the people." But they will say nothing to the producer. He will be able to do as he pleases. The pipeline company can buy the producer's gas at his price, if he likes, or he can leave it. That is how we are dealing with the public interest in the bill. That is what we are doing to the consumers of America. We are turning our backs on them in the bill.

Mr. POTTER. Would the Senator agree with me that when there is a limitation to be considered in language such as "among other things," we are really providing a blank check?

Mr. PASTORE. "Among other things"; and then a few specific instances are enumerated.

Mr. POTTER. But they are other factors.

Mr. PASTORE. If we do give them the blank check they ask for in the bill, we shall be throwing the matter into the courts for litigation for years and years and years, because the sky will be the limit. "Among other things"? What things? How will the court ever be able to tie the producers down to anything?

This, to me, is all the more significant and serious because it will lead to many disputes and much litigation. And what gives even more credence to my suspicion is how this bill treats the establishment of the price with reference to existing and future contracts.

Subsections 10 and 11 of section 2 of the pending bill remove the producers from Federal control. This bill does that. Subsection (e) of section 3 states that under an existing contract the pipeline company "shall be obligated to pay only such part of the increase in price as results in a price which does not exceed such reasonable market price."

Mr. President, it must be borne in mind, and I invite the attention of the distinguished Senator from Michigan [Mr. POTTER] to the fact, that this applies only under subsection (e) of section 3, which has to do with existing contracts. The pipeline companies are told, "Not only can't you charge it off; you are not obligated to pay."

I do not find much fault with that, but mind you this, Mr. President: in the case of future contracts, we find that under subsections (b) and (c), no such provision is made which prevents the pipeline company from paying more than the so-called reasonable price, as in the case of existing contracts. Let me show why I think this is quite serious.

A pipeline company is regulated as a public utility under the Natural Gas Act, in the public interest, and, I hope, to protect the consumer. The bill in no way imposes any restrictions or compulsions upon the producers and the gatherers of natural gas. Subsections 10 and 11 of section 2 take care of that by freeing the producer and the gatherer from supervision. Under the bill, the producers and gatherers of natural gas are permitted, in future contracts, to charge everything that the traffic will bear. They will be able to say to the pipeline companies, "We don't care what the Federal Power Commission says is a 'reasonable market price.' We are not bound by this bill in future contracts. Take our gas at our price, or leave it. How much you can charge off in establishing your rate is your business, and not ours."

The Federal Power Commission cannot step in and help the pipeline company out of his dilemma. The only remedy that the Federal Power Commission has in this case is punitive in nature against the pipeline company, because in some instances, it may be at the very mercy of the unscrupulous producer.

The producers and gatherers can say, "What can they do to us?" Under the bill, what can the Commission do to them? There is no supervision. The producer and the gatherer can charge anything they want to charge. But the smart boys for the gas producers say: "This will serve to discourage the pipeline from paying more," and that, so far as they are concerned, answers everything.

I say to the proponents of the bill—and here is the crux of the bill—"If you are sincere in this bill, then why do you not say to the pipeline company, 'Look, you here, we determine what the reasonable market price is: that is all you can pay,' and say to the producer and the gatherer, 'Look, you here, Mr. Gatherer and Mr. Producer, when we tell you what the reasonable price is, that is all you can collect'." If that were done, then the proponents could stand up and say honestly there is control and there is supervision in the public interest.

Now, the question I ask is, Why this difference between existing contracts and new contracts? I shall come to the question raised by the distinguished Senator from Michigan [Mr. POTTER], because the gimmick is that if the producer and gatherer are left out of the provision, if there is no method under the law to compel them to do anything, if they are free agents and can charge what the traffic will bear, then the pipeline company may be able to charge off, in establishing its cost, only so much. But what will be said to be the reasonable market price by the Federal Power Commission? If a sufficient number of persons do pay more than what the Federal Power Commission thinks is the reasonable market price, and that price becomes the practice and the habit, would that not be established as the price tomorrow? Does the Senator from Michigan agree with me on that?

Mr. POTTER. I certainly do. That would be the reasonable market price.

Mr. PASTORE. That is the gimmick in the bill. I have asked the question, time and time again, and I shall ask it again: Why do the proponents not explain why that has been done?

The proponents argue that the purpose of this provision is to discourage the pipeline company from paying more than the "reasonable market price," and that this indirectly ought to serve as a restraint upon the pipelines to pay any price which is above the reasonable market price. I say to the proponents, if they are sincere in their efforts, "Why don't you write into this bill, in clear, simple, precise language, that in any case, existing contracts or future contracts, the pipeline companies cannot pay more than the reasonable market price, and that the producers and the gatherers cannot charge more than the reasonable price of gas, and collect more than the reasonable market price?"

Mr. POTTER. Mr. President, will the Senator yield?

Mr. PASTORE. I yield.

Mr. POTTER. What happens when there is a pipeline company which is also a producer in this long-armed means of negotiating to determine a contract? Does the Senator think there would be any incentive, under this bill, for a pipeline which is also a producer to buy gas as cheaply as possible? In other words, would the incentive not be to raise the price of gas as much as possible, because in fact the pipeline would be raising the price of its own commodity?

Mr. PASTORE. That is correct. Let me tell the Senator something. There has been much discussion in the Senate about the Kerr bill and the pending bill. I have stated the exact difference, and I am glad the Senator brought up the point. The Kerr bill left unaffected the pipeline company which was also a producer. Congress has always assumed, and the courts have always agreed—there has never been an exception—that a pipeline company which was also a producer was under Federal control. I suppose the Senator from Oklahoma [Mr. KERR], when he introduced his bill in 1950, recognized that fact. The great Senator from Oklahoma has said that the pending bill is an even better bill than was the Kerr bill. Let us see how much better it is. I am sure my colleagues know that under the pending bill a pipeline company could separate its transportation activity from its producing activity, and charge more money for producing, and use a different rule for establishing a rate of transportation. This bill goes farther than the Kerr bill.

Mr. POTTER. That is correct.

Mr. PASTORE. Yet the argument is made—and I was amused when it was made—"This bill must become law because we find that since 1950, fewer and fewer"—I think that was the expression used—"pipeline companies are in the production and transportation business. They have been spinning off their production activities because they are not lucrative enough."

Mr. President, that makes a good argument; but I am sufficiently suspicious about the bill to speculate that the reason why they have been spinning off since 1950 is that they must think the Kerr bill will be coming forward again, to take care of them. So they have said, "Let us get out of the production business. Let us set up a new company, an affiliate, so that if the Kerr bill becomes law, we shall come in on the gravy train."

Mr. President, they made a needless effort, because in 1955 a bill to take care of those boys, too, was introduced; and the pending bill—S. 1853—is it.

Mr. DOUGLAS. Mr. President——

The PRESIDING OFFICER (Mr. MONRONEY in the chair). Does the Senator from Rhode Island yield to the Senator from Illinois?

Mr. PASTORE. I yield for a question.

Mr. DOUGLAS. I take it that what the Senator from Rhode Island is saying is that, regardless of whether the gas is produced by so-called independents or by pipelines and their affiliates, the effect of the bill will be to give increased prices to both. And that the more the pipelines pay to the producers the more they will get on the gas they produce themselves.

Mr. PASTORE. Yes, there can be no question about it. Why does the Senator from Illinois think the bill is before us? Does he think it was introduced for the purpose of reducing the prices? Mr. President, let us not be naive. Why does the Senator from Illinois think the bill has been under debate in the Senate for 4 days, and perhaps will continue to be under debate here for many weeks to come? Is it because of an effort to reduce prices? Who are behind the bill—the consumers or the companies serving the consumers? Where do those who favor the bill get their inspiration? Of course the purpose of the bill is to raise prices; that is why the bill is before us. I say to the American people, "Watch out."

In a few moments I shall refer to some of the many cases before the Federal Power Commission, under which application has been made for an increase in rates. Those cases have been held up. What will happen to those cases the day after this bill passes, if it does pass? In that event, the Federal Power Commission will not have any jurisdiction over those cases; and the rates requested in them will become the rates which will be paid. Who will stop that? The Federal Power Commission will not be able to stop it, for it will have no jurisdiction over the producers or gatherers, if this bill becomes law.

The proponents of the bill talk about chaos. The Senator from Oklahoma talks about the difficult conditions which will exist unless this bill is enacted. On the contrary, Mr. President, I say God help the poor consumer if this bill passes.

How the lines are drawn.

Does anyone suppose that the consumers of the Nation are being properly protected if the pipeline companies are going to be allowed, regardless of whether it is prudent or imprudent, to pay more than what they are able to establish in their basic rates? Where will all this lead?

What court in the land will say to a pipeline company, "You cannot charge more than a reasonable market price, even though you cannot fill an empty line with natural gas to serve a helpless, captive consumer," even though the consumers in Boston, Mass., could not get gas to burn in their stoves—"unless you pay more money than what the Federal Power Commission thinks is a reasonable market price." The pipeline will have no other course to follow; there will be no alternative. The producer could not be compelled to reject the higher charge, because there would be no control. The pipeline which thus would be blackjacked, would be told, "You have to pay it, because otherwise you will be unable to obtain gas, and then your customers will be without a supply of gas. But no matter what price you have to pay, you cannot take it into consideration in establishing your rate."

Is it really prudent, therefore, for us in the regulation of a pipeline company which operates in the public interest to encourage it to expend money which cannot be used as part of its basic cost? Where will this business frivolity lead? How imprudent can we become?

Mr. DOUGLAS. Mr. President, will the Senator from Rhode Island yield?

Mr. PASTORE. I yield.

Mr. DOUGLAS. I think the Senator from Rhode Island is making an extremely important point, and he is doing so with his customary outstanding ability. The point he is making is that, under the bill, when high prices are paid in the field, the Commission cannot in good conscience forbid the pipeline companies to pass on those prices to the distributing companies.

However, even if we suppose that the Federal Power Commission would refuse to allow the high prices to be passed on, could not the pipeline companies take the Federal Power Commission into court, and there argue that the Commission's ruling had been confiscatory, and had resulted in depriving them of their property and their funds—in view of their expenses—without due process of law. Could they not argue successfully therefore the Commission's action was a violation of the guaranteed protection of the Constitution, which forbids the taking of property without due process of law?

Mr. PASTORE. I completely agree with the Senator from Illinois, and that is exactly the argument I am making.

This bill would punish the pipeline companies. Regardless of whether they rightfully or wrongfully had paid higher prices, under the bill, the higher prices they had paid would not be considered in establishing the price they could charge their customers. Neither would consideration be given to the fact that the pipeline was dry, and that thus it was impossible for the pipeline to supply the needed gas to Detroit, Chicago, Oakland, Providence, or Boston. All that would make no difference.

Mr. President, how long do you think such an arrangement would last? What kind of regulation would that be? No court would accept such nonsense. Yet that is what the bill contemplates.

The proponents of the bill argue that if the pipeline companies are not allowed to expend the higher price they will be discouraged from paying more. I say, in simple English, if the proponents wish to prevent the pipeline companies from paying higher prices, why not say that no more can be paid, and then say to the producer, "That is your test. You cannot collect more or cannot charge more."

But, no, that is not satisfactory to the proponents of the bill. In this bill the producer has become the sacred cow. We are told that nothing must affect him, that he must be entirely without regulation, but that everyone else should be pushed around.

Mr. President, I say to the proponents of the bill that if they are sincere in their attempt to have the pending bill enacted, why do they not do something about this gimmick, unless it is the "sleeper" in the bill to open the door to all the traffic can bear?

So, in essence, what we would be doing by means of this bill would be to free the producer and the gatherer, and in future contracts to whack the pipeline company over the head.

In closing, let me say the only motive the Congress had, and should have had, when it passed the Natural Gas Act of 1938 was to protect the consumer. The consumers of natural gas are captive consumers, and number some 26 million Americans who have spent billions and billions of dollars for appliances and equipment. Therefore, it is necessary that, in the interest of these consumers, all the various segments of this industry having a relationship of continuity from

producer to consumer, should be under wise and reasonable regulation which must do equity to all.

Anything that disturbs or harms any one of the four segments interested in natural gas—the producers and gatherers, the pipeline transmission company, the distribution companies, and the ultimate consumer—will in fact disturb and defeat the public interest.

Because of the anxiety of the proponents of the bill to free one of these groups, namely, the producers, the bill would do so to the disadvantage of other groups, and more particularly to the great disadvantage and detriment of the helpless captive consumer. Moreover, the spirit behind this legislation is based upon the erroneous concept that the supervision of producers and gatherers by the Federal Power Commission is detrimental and harmful to these producers and gatherers. This bill implies that the producers and gatherers have a lack of confidence in the Federal Power Commission to administer its responsibility and to take into account the unique problems of the natural-gas industry. In this I believe that they are making a serious and grave mistake.

The reason why the producers and gatherers should and must remain under supervision of the Federal regulatory agency is primarily because of the intricate and unique character of this industry. The natural-gas industry is the sixth largest industry in the United States. A serious question which remains unanswered is whether the supply of natural gas will always be sufficient to meet the ever-increasing demand for it. The proponents use this question to bolster their argument that if we free the producer from Federal supervision, we will stimulate his initiative to explore for additional supplies. We of the opposition feel that the lack of the supply to meet the ever-increasing demand gives rise to a restricted market which will not develop into a reasonable market price as stated in the bill, and will eventually harm the consumer. Whichever one of us is wrong in our contention, have we lost all faith in the Federal Power Commission to protect both sides to this issue?

Mr. DOUGLAS. Mr. President, will the Senator yield for a question?

Mr. PASTORE. I yield.

Mr. DOUGLAS. Has not the Senator from Rhode Island been puzzled by the contradictory attitudes which the proponents of the bill take toward the Federal Power Commission? On the one hand they say the Commission would interpret the term "just and reasonable" in an unfair manner; and on the other hand they say they have implicit confidence that the same Commission would interpret the term "reasonable market price" in a most lucid and clear manner. Why is it that the Federal Power Commission, according to the proponents of this legislation, will fail to interpret the term "just" correctly, but can be trusted to interpret the term "reasonable" correctly?

Mr. PASTORE. That is precisely true; and that is quite evident from the debate in the Senate during the past several days. When it suited the purpose of the proponents of the bill to use the Federal Power Commission, they did so; and when it served their purpose not to use it, and to say what a mean group of people the Commission have been—perhaps they did not go that far, but that was the implication—they chose not to become wedded to them.

I heard the distinguished Senator from Arkansas [Mr. FULBRIGHT] ask only Tuesday afternoon, "Have we lost all confidence in the Federal Power Commission?" Those are precisely the words I am using. I have not lost confidence in the Commission. The day we lose confidence in our Federal regulatory agencies to regulate in the public interest, we shall have lost confidence in our democratic processes.

Mr. President, this bill involves the control of natural gas, with a helpless, captive consumer on the other end of the line.

Mr. POTTER. Mr. President, will the Senator yield, in order that I may cite another example of the proponents meeting themselves coming back?

Mr. PASTORE. I yield.

Mr. POTTER. On one hand they are playing with the idea that this is not a decontrol bill. On the other hand, they say, "Beware of the great Federal Government movement toward controlling and strangling the producers." On the one hand, they say it is not a decontrol bill. On the other hand, they bring up the bugaboo of a great Federal bureaucracy trying to control the little helpless, defenseless producers.

Mr. PASTORE. That is correct. Continually we hear the argument that, after all, natural gas at the well-head is only a commodity, like oil or coal. That is not true. The proponents of this bill have little understanding of what they are dealing with if they make such an analogy. After all, if a distribution company which is making fabricated gas by the use of oil runs out of oil, it can go to any oilfield and deal with the producer. It can make its own contracts with the railroads, the barge lines, and the trucking firms to bring the oil in. Even if those methods of transportation should fail, it could still pick up a bucket and go after some oil. Can that be done in the case of natural gas?

This question of increased demand and diminishing supplies is in fact the fault of no one, but it has led to many abuses. These abuses clearly justify the position taken by many witnesses before the Senate Interstate and Foreign Commerce Committee that the sale of gas at the producer-pipeline level is a seller's market and not a free, competitive, fluid market as we would like it to be. A phenomenal growth in this industry has taken place in the last 5 years chiefly because of the growth of the pipeline transmission network that has stretched out across the entire Nation. Because of efforts on the part of distribution companies and the pipeline transmission companies to increase the use of this fine product, the natural gas market has been so activated that it has led to an unwarranted and unpredictable rise in prices, to a point where the prices requested in cases now pending before the Federal Power Commission are somewhat in excess of 500 percent more than the price of natural gas at the time that the Natural Gas Act was passed in 1938.

The proponents of this bill have devised this legislation as an alleged cure for these abuses. I have given much thought and study to this legislation, both in and out of the hearings held by the Senate Committee. I have listened attentively to the arguments in the Committee and on the floor of the Senate. I admit that I come from a so-called Consumer State. However, I desire to make it abundantly clear that I am not only interested in the consumer in Rhode Island, but in fact my interest as a United States Senator is for all the 26 million American consumers of natural gas.

I am very serious when I tell the Senate that this bill is not the answer to our problem. This bill was introduced and provides patently for the benefit of the producers and gathers. The help intended for consumers of natural gas under this bill is nothing more than lip service given by the proponents of the bill. A careful study will substantiate this statement.

Therefore, for the reasons I have stated, and as I have said in the beginning, I am opposed to S. 1853, and unless it is substantially amended to adequately protect the consumers of this Nation, I must and I shall vote against it.

Mr. DOUGLAS. Mr. President, I wish to congratulate the Senator from Rhode Island for the magnificent analysis he has presented this afternoon. Temperate in tone, clear in thought, accurate and persuasive, and swayed by the public interest, he has made a contribution of the first magnitude to this subject.

I have only one regret in connection with his address, namely, that so few Members of the Senate were on the floor to listen to his magnificent speech. Senators who may be undecided would have profited from listening to the Senator's discussion. I know the Senator from Rhode Island would have welcomed questions which proponents of the bill might have addressed to him, and I am sure he would have been able satisfactorily to have answered them. Opponents of the bill, such as the Senator from Rhode Island, the Senator from Michigan [Mr. POTTER], the Senator from Connecticut [Mr. PURTELL], and the Senator from Illinois, have tried to be on the floor while the proponents were speaking, to listen carefully to what they have said and, for the purpose of developing the truth, to ask questions. I only regret that a similar policy was not followed by the proponents of the bill when the distinguished Senator from Rhode Island was speaking. Of course I except the present occupant of the chair, the Senator from Oklahoma [Mr. MONRONEY] who is always the soul of courtesy and the embodiment of fair play.

I wish to congratulate the Senator from Rhode Island. As a former New Englander, now happily transferred since boyhood to the Middle West, I am very proud that New England still produces great sons.

Mr. PASTORE. I thank the Senator from Illinois. I love him too much to

say that I can love him more for his very generous remarks. I do not flatter myself into believing that I have frightened away from this Chamber the great legal minds among the proponents. However, I do say, had they been here, I would have welcomed their presence and I would have welcomed their questions. As a matter of fact, I came prepared to meet with them.

Mr. POTTER. Mr. President, I too wish to commend the distinguished Senator from Rhode Island for his very fine presentation this afternoon. I served with the Senator when he was chairman of the subcommittee which held 7 long weeks of hearings on the natural gas bill. There is probably no other Senator who is better informed in regard to this proposed legislation than is the Senator from Rhode Island. I commend him also for the fact that after sitting through 7 long weeks of hearings he determined that the consumer's interests would not be protected by the passage of the pending bill. I also commend him for leading the fight he has been leading in opposition to the bill, the passage of which would be detrimental not only to the consumers of his own State but, as he has so ably stated, to the consumers of every State in the Union.

Mr. PASTORE. I thank the distinguished Senator from Michigan for his graciousness, which is exceeded only by his generosity.

MESSAGE FROM THE HOUSE—ENROLLED BILLS SIGNED

A message from the House of Representatives, by Mr. Bartlett, one of its clerks, announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the President pro tempore:

S. 1689. An act to authorize the Secretary of the Interior to execute a repayment contract with the Yuma Mesa Irrigation and Drainage District, Gila project, Ariz., and for other purposes; and

S. 1745. An act authorizing the Secretary of the Interior to issue a patent in fee to Nellie Ohlerking Archambeau Moran.

SECRETARY DULLES AND FOREIGN POLICY

Mr. KNOWLAND. Mr. President, the policy of deterring war by making known our position in advance and thus prevent miscalculation has been a basic principle of Secretary Dulles for many years and has three times been put into practical force by the present administration, each time with the full knowledge of the Congress and other nations.

In an article in Life magazine of June 10, 1946, John Foster Dulles, 6½ years before becoming Secretary of State, fully set out his views. He pointed out that most wars come about through miscalculation. At that time he stated:

It is quite true that no nation wants a big war or one the outcome of which is doubtful. That is almost always the case. Generally, such wars get started by mistake. National leaders begin by pushing outward their national domain and sphere of influence at points where, they calculate, there will be little resistance. When their calculation proves correct and no strong reaction occurs, they go on. Those within the country who advised restraint become discredited. Leadership becomes concentrated in the hands of the more reckless, who take more chances. Finally, they find to their chagrin that they have made a bad calculation.

If we have another great war, that is probably the way it will come. No one will deliberately plan it. It will be the result of miscalculating.

Twice within 25 years the United States has been drawn into a world war because the American people finally came to feel that aggressive policies in Europe and Asia threatened our conception of democracy and our ideals of personal freedom. In each case the foreign leaders would probably have followed a different course had they, at an early stage, realized that the American people would react as they did. In not making apparent, in time, our devotion to our ideals, we were guilty of contributory negligence. We must not make the same mistake three times in a generation.

We did, of course, make the same mistake a third time in a generation by the failure to provide, in the period 1945–50, an adequate defense force to the Republic of Korea and by announcing to the world that Korea was not of strategic concern to us we gave the Communists reason to feel that if they attacked, they would not be opposed. So they attacked and we had a third war in our generation.

When it came to ending that war, it was through the use of deterrent power which made them unwilling to see the war prolonged.

The pressures brought to bear upon the Communists to end the fighting in Korea was that if they did not terminate the conflict, the "privileged sanctuary" of Manchuria would no longer be out of bounds to our Air Force. The early act of President Eisenhower in changing the orders to our Seventh Fleet was itself notice of the intention to win the war if the fighting in Korea went on. In conjunction with the signing of the armistice, the United Nations powers themselves joined in declaring that if the armistice were broken by the Communists, it would probably "not be possible to confine hostilities within the frontiers of Korea."

The development of this principle and its application to Indochina was fully set out in an address which Secretary of State Dulles made on September 2, 1953, to the American Legion at St. Louis. In discussing the Art of Peace, Secretary Dulles said:

The Korean war began in a way in which wars often begin—a potential aggressor miscalculated. From that we learn a lesson which we expect to apply in the interests of future peace. The lesson is this: If events are likely which will in fact lead us to fight, let us make clear our intention in advance; then we shall probably not have to fight.

Big wars usually come about by mistake, not by design. Aggressive despots think that they can make a grab unopposed or opposed but feebly. So, they grab. And to their surprise they find themselves involved in unexpected opposition which means major war.

Many believe that neither the First World War nor the Second World War would have occurred if the aggressor had known what the United States would do. It is even more probable that the Korean war would not have occurred if the aggressor had known what the United States would do. The Communists thought, and had reason to think, that they would not be opposed except by the then small and ill-equipped forces of the Republic of Korea. They did not expect what actually happened.

There is in this a profound lesson. All the peoples of the world passionately want peace. But too often they think that peace is won merely by pacifism. They should know by now that peace is not had merely by wanting it, or talking about it, or seeming to accept the role of a doormat. To win peace is as hard, if not harder, than to win a war. To achieve peace is a science. Indeed, it is a most difficult, sometimes a rugged science.

Peace requires anticipating what it is that tempts an aggressor and letting him know in advance that, if he does not exercise self-control, he may face a hard fight, perhaps a losing fight.

The Korean war—the third such war in our generation—should finally have taught us that if we can foresee aggression which will cause us to fight, we should let this be known, so that the potential aggressor will take this into his calculations.

This administration intends to act realistically to win the battle for peace.

Secretary Dulles then went on to speak about the problem of Indochina and gave clear warning to Red China not to send its own army into Indochina. I quote from his address of September 2, 1953:

Communist China has been and now is training, equipping, and supplying the Communist forces in Indochina. There is the risk that, as in Korea, Red China might send its own army into Indochina. The Chinese Communist regime should realize that such a second aggression could not occur without grave consequences which might not be confined to Indochina. I say this soberly in the interest of peace and in the hope of preventing another aggressor miscalculation.

This warning of the Secretary of State, coupled with the subsequent program for united action in Indochina, undoubtedly prevented the entire area from being taken over by the Communists. Now three free and independent states exist there in replacement of French colonialism—Free Vietnam, Laos, and Cambodia. These are now covered by the Southeast Asia pact which expresses the policy of united action in that area. That treaty, which the Senate approved by an overwhelming majority, brings into play the deterrent of our retaliatory striking power. We can hope that peace and freedom will thereby be preserved.

When it came to the Chinese Communists' threat against Formosa and the Pescadores, there was applied the same principle of giving warning in advance lest the enemy miscalculate. That was the whole theory which underlay Public Law 4 of 1955 which authorized the President to use the Armed Forces of the United States in the Formosa area.

In his message to Congress on January 24, 1955, requesting this authority, President Eisenhower said:

It would make clear the unified and serious intentions of our Government, our Congress, and our people. Thus it will reduce the possibility that the Chinese Communists, misjudging our firm purpose and national unity, might be disposed to challenge the position of the United States, and precipitate a major crisis which even they would neither anticipate nor desire.

In the interest of peace, therefore, the United States must remove any doubt regarding our readiness to fight, if necessary, to preserve the vital stake of the free world in a free Formosa, and to engage in whatever operations may be required to carry out that purpose.

The idea of preventing war by preventing enemy miscalculation is basic and fundamental to peace. Whenever a potential enemy pushes to the point where war is a likely possibility, we owe it to ourselves and to the cause of peace to make clear what our intentions are. That is not to seek war; it is to prevent it.

The Eisenhower administration came into power on a platform which said:

> The supreme goal of our foreign policy will be an honorable and just peace. We dedicate ourselves to wage peace and to win it.

I am confident that the great majority of the American people will join in this objective of peace with honor. I hope we shall do nothing to undermine the courageous policies of strength which deter war by making known to a potential aggressor in advance that he will lose more than he will gain. For this Nation to announce we would yield to Soviet demands rather than to take any risks in defense of freedom would lead to the communization of Europe, Asia, and much of the Western Hemisphere.

That is the policy which has been and is in force with the strong endorsement of this body through the Korean Mutual Security Treaty, the treaty with the Republic of China, Public Law 4, and through the Southeast Asia Mutual Security Treaty. All these treaties and this law invoke the principle of deterring war by making clear in advance what we will do.

On August 24, at Philadelphia, President Eisenhower enlarged upon earlier declarations that the Soviets should demonstrate their good faith by deeds rather than by words by the following statement which I fully endorse:

> Eagerness to avoid war—if we think no deeper than this single desire—can produce outright or implicit agreement that injustices and wrongs of the present shall be perpetuated in the future. We must not participate in any such false agreement. Thereby, we would outrage our own conscience. In the eyes of those who suffer injustice, we would become partners with their oppressors.
>
> In the judgment of history, we would have sold out the freedom of men for the pottage of a false peace; moreover, we would assure future conflict.
>
> The division of Germany cannot be supported by any argument based on boundaries or language, or racial origin.
>
> The domination of captive countries cannot longer be justified by any claim that this is needed for purposes of security.
>
> An international political machine, operating within the borders of sovereign nations for their political and ideological subversion, cannot be explained away as a cultural movement.

Furthermore, Mr. President, on March 29, 1954, before the Overseas Press Club of America, Secretary Dulles had this to say:

> Under all the circumstances it seems desirable to clarify further the United States position.
>
> Under the conditions of today, the imposition on southeast Asia of the political system of Communist Russia and its Chinese Communist ally, by whatever means, would be a grave threat to the whole free community. The United States feels that that possibility should not be passively accepted, but should be met by united action. This might involve serious risks. But these risks are far less than those that will face us a few years from now, if we dare not be resolute today.
>
> The free nations want peace. However, peace is not had merely by wanting it. Peace has to be worked for and planned for. Sometimes it is necessary to take risks to win peace just as it is necessary in war to take risks to win victory. The chances for peace are usually bettered by letting a potential aggressor know in advance where his aggression would lead him.

Mr. President, during the early part of this afternoon the distinguished junior Senator from Minnesota said—and I believe I have here a correct quotation from his statement:

> I prefer to hear these pronouncements from the President and from the Secretary of State, and not in a magazine article.

I would say, Mr. President, that after Italy was knocked out of World War II, and the Allied Military Government had arranged to occupy disputed areas of Italy's northern frontier including Venezia Giulia pending a peace treaty, Tito changed his mind and began to occupy these areas exclusively with Yugoslav troops. Russia supported him. Great Britain and the United States protested and tried to dislodge him without success.

Now we learn, Mr. President, from a distinguished former President of the United States, Harry Truman. I quote from page 252 of the Memoirs of former President Truman, volume 1, as follows:

> Then on May 29 Dr. Ivan Subasic, the Yugoslav Foreign Minister, called on me, accompanied by the Yugoslav Ambassador. Dr. Subasic had been at the San Francisco conference and was on his way back to Belgrade. He was a leader in the Croatian Peasant Party, had been Prime Minister in the government-in-exile, and now represented the fusion element in the new Tito government. He made a fine impression on me. I talked very plainly to him and to the Ambassador. The Allies, I told them, intended to extend an impartial military administration to some of the disputed territory of Venezia Giulia without prejudice to the final disposition of the area, and we expected the Yugoslav Government to cooperate, as a member of the United Nations. Tito, I pointed out, had already violated the Yalta agreement by setting up a totalitarian regime and was now trying to extend it to Venezia Giulia by force. If Tito persisted in this, we would meet him with overwhelming force, and the time had come for a decision. I let Dr. Subasic know that we now had completed a draft agreement and would soon present it to Tito expecting him to cooperate without further obstructionist tactics.

Was this not taking a risk in the interest of preserving the peace and international commitments? I believe every Senator remembers very well the year 1948, at the time the Soviet Union was closing its iron ring around Berlin, in the Berlin blockade. This Government took calculated risks—very great calculated risks—in order to supply Berlin and to keep it from being starved out by the Soviet Union. Had we not been prepared to take those risks, undoubtedly Berlin would have fallen to the Communists. Had Berlin fallen to the Communists, probably West Germany would today be behind the Iron Curtain. No man can tell where the chain reaction might have ended.

But was not this a risk which was taken? Were we not in effect serving notice, when we sent our Air Force planes there, that if they were shot down the Soviet Union was risking a grave international incident, and very likely war with the United States of America?

Mr. President, what is the objective of the attacks upon Secretary Dulles? Not that the doctrine he announced is new, because I have documented it from 1946, prior to his becoming Secretary of State, and during the period he has been Secretary of State. On several occasions he has outlined this doctrine very clearly.

I can understand the purpose of those in the Soviet Union and Communist China who made radio broadcasts. The distinguished Senator from Minnesota today read some of the broadcasts from behind the Iron Curtain. Of course, the Communists do not want any policy which will work on behalf of the free world. The Soviet Union wants behind the Iron Curtain only Communist governments which are prepared to surrender to every demand. What is more, they want notice in advance that we will abandon our allies and free men in Europe and Asia.

But what is the proposal in the domestic critical course, if what I have just mentioned be the policy and the understanding of the reasons for the Communist broadcasts?

Is it to repudiate NATO? We take risks as a member of NATO.

Is it to abrogate the ANZUS pact? We take grave risks with our commitments to Australia and New Zealand.

Is it to abandon a free Korea, to whom we have pledged our word, both individually and as a member of the United Nations? We daily take risks with some of our Armed Forces still stationed in that country, which had been the victim of an aggression.

Is it to allow the free Chinese to go down the Communist drain? We daily take risks in regard to the Formosa Resolution.

Is it to let the Southeast Asia Pact be destroyed at the point of its creation, and to permit all of southeast Asia to pass into Communist hands? We take grave risks as a member of the Southeast Asia Pact.

Just what is being proposed? Is it that we should now serve notice to the men in the Kremlin that, despite their provocations or pressures against sovereign countries, they will know in advance that we will take no risks to support human freedom against a godless tyranny? Is that the proposal?

Is it proposed that we take our fleet out of the Pacific? We take grave risks in maintaining the 7th Fleet in the Pacific.

Is it advocated that we take our bases out of Europe and Africa? We stand grave risks in maintaining those bases in Europe and Africa.

Is it being suggested that we repeal the Formosa resolution, House Joint Resolution 159, which was passed on January 28, 1955, by a vote of 85 to 3?

Mr. President, I ask unanimous consent that, as a part of my remarks, the vote by which House Joint Resolution

159 was passed, be printed at this point in the RECORD.

There being no objection, the vote was ordered to be printed in the RECORD, as follows:

HOUSE JOINT RESOLUTION 159, AUTHORIZING PRESIDENT TO USE UNITED STATES ARMED FORCES FOR SECURING AND PROTECTING FORMOSA, THE PESCADORES, AND RELATED TERRITORIES—PASSAGE

The result was announced—yeas 85, nays 3, as follows:

Mr. KNOWLAND. Mr. President, every Member of the Senate, on both sides of the aisle, recognizes the fact that grave dangers still confront the United States and the free world from the Communist orbit. I am certain that no person wants to take a position by which those in the Kremlin, and those associated with them, would miscalculate or would feel that the treaties we had entered into and the obligations which we had taken upon ourselves were mere scraps of paper; that if the Communist wolf should huff and puff, then, having marched up the hill, we were going to march down again; that we would abandon our friends in Europe and Asia; that we would abandon freemen everywhere; that we would say, in effect, to the ruthless rulers of the Kremlin: "We dare not take any type of risk. Thereby, you have notice in advance that, no matter what you do, no matter what you threaten, you are free to move ahead, because this great Nation of ours is not prepared to take any risk for the preservation of peace, decency, and human freedom in the world."

IMPERILMENT OF SCENERY, FISHERIES, WILDLIFE, AND OUTDOOR RECREATION BY CONSTRUCTION OF PROPOSED BRUCES EDDY DAM

Mr. NEUBERGER. Mr. President, conservationists now have their warning as to what the loss of almost 3 million acre-feet of water storage at Hells Canyon means. This is the difference between the high Federal dam, proposed by my senior colleague [Mr. MORSE] and myself, and the three pygmy dams of the Idaho Power Co., backed by Secretary McKay and the administration.

In the budget for fiscal 1957, just sent to Congress, is a recommendation for funds for Bruces Eddy Dam on the North Fork of the Clearwater River. Thus does the administration hope to secure alternative sources of storage, for that lost at Hells Canyon through the administration's subservience to a private-power philosophy.

Bruces Eddy Dam will have an adverse impact on migratory steelhead trout migrations, on scenery, on the great north Idaho elk ranges, on outdoor recreation generally. Hells Canyon would have no ill effect on these important American values—values traditional in our national life.

Mr. President, I ask unanimous consent to have printed in the RECORD a statement which I issued on January 16, 1956, concerning the perilous policy involved in the Bruces Eddy project, as well as a letter sent to me on July 1, 1955, by Dr. Ira N. Gabrielson, distinguished biologist and president of the Wildlife Management Institute, emphasizing that Hells Canyon Dam would not adversely influence our outdoor resources, while these resources, conversely, would be endangered by proposed dams on the magnificent Clearwater and Salmon River systems.

There being no objection, the statement and the letter were ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR NEUBERGER

Every conservationist in America should view with profound dismay the administration's budget suggestion for partnership construction of Bruces Eddy Dam on the Clearwater River, Senator RICHARD L. NEUBERGER, Democrat of Oregon, said today. The Oregon Senator announced that he would fight unyieldingly to prevent construction of a project which he claimed would have an adverse effect on fish migrations, scenery and wildlife in the Bitterroot Mountain wilderness.

"Thus we see the Hells Canyon chickens at last coming home to roost," said NEUBERGER, coauthor of a bill for a huge Federal dam at the Hells Canyon site on the Snake River.

"Action by Secretary McKay has forced loss of the great Hells Canyon site, where no fisheries or recreational values are at stake," he continued. "Now, to recover the nearly 3 million acre-feet of storage surrendered at Hells Canyon, the administration is bearing out the warnings which I voiced early in 1955—that an attempt would be made to block the Clearwater River to recover this lost storage. The prediction has come true, far sooner than I thought."

NEUBERGER declared that Bruces Eddy project, proposed for partnership construction in the administration budget, would flood out valuable elk-feeding range in the Bitterroot foothills and would choke off anadromous fish such as steelhead trout. He added that many steelhead trout migrate up the North Fork of the Clearwater River, where the Bruces Eddy project would be located. The National Wildlife Federation and other outdoor groups support the stand taken by the Oregon Senator, he added.

NEUBERGER pointed out that the Bruces Eddy Dam, 570 feet in height, would be impossible of passage by Steelhead or any other fish. He also contended that invasion of the Clearwater solitudes by one dam would establish a precedent for later erection of Penny Cliffs Dam, which he insisted would be even more destructive of scenic and wildlife assets.

The Oregon Senator prophesied that conservation organizations all over the Nation would make Bruces Eddy another Echo Park before they will allow this desecration to occur.

WILDLIFE MANAGEMENT INSTITUTE,
Washington, D. C., July 1, 1955.

The Honorable RICHARD NEUBERGER,
United States Senate,
Washington, D. C.

DEAR SENATOR NEUBERGER: I have read with interest your speech which appeared in the CONGRESSIONAL RECORD for June 1 concerning the Hells Canyon Dam and the proposed dams on the Clearwater and Salmon Rivers. I wish to emphasize that the national conservation organizations are opposed to any dams on the Salmon and the Clearwater for the reasons which you advance. These are the two most important spring Chinook-salmon spawning streams still available in the Columbia-Snake River system, and they should be kept clear of dams at all costs.

In addition to their disastrous effect on the important salmon and steelhead runs, dams on the Salmon and the proposed Penny Cliffs and Bruces Eddy Dams would destroy essential big-game wintering range. Those on the Clearwater would destroy some of the most important part of the range for one of the largest remaining herds of elk in the country. I am quite sure that all national conservation organizations have taken a position in opposition to these dams and will do anything in their power to prevent their being authorized.

Conservation organizations generally have never opposed the Hells Canyon development and have taken no part in the controversy over that area. The development of the Hells Canyon site will not interfere with any major runs of fish and will not cause any important loss of wildlife resources. I am sure that generally we would rather see the needs of the Northwest for power met by the development of Hells Canyon power than see any developments on either the Clearwater or the Salmon Rivers. From our standpoint, it is a choice between a major impairment of wildlife, fishery, and scenic values as against one that has no great significance in any of these fields.

Sincerely,

IRA N. GABRIELSON,
President.

RECESS

Mr. CLEMENTS. Mr. President, in accordance with the order previously entered, I move that the Senate stand in recess until noon tomorrow.

The motion was agreed to; and (at 5 o'clock and 59 minutes p. m.) the Senate took a recess, the recess, being, under the order previously entered, until tomorrow, Thursday, January 19, 1956, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate January 18 (legislative day of January 16), 1956:

UNITED STATES ADVISORY COMMISSION ON EDUCATIONAL EXCHANGE

The following-named persons to be members of the United States Advisory Commission on Educational Exchange for the terms indicated, and until their successors have been appointed and qualified:

Rufus H. Fitzgerald, of Pennsylvania, for a term of 3 years, expiring January 27, 1959. (Reappointment.)

Arthur A. Hauck, of Maine, for a term of 3 years, expiring January 27, 1959. (Reappointment.)

GEOLOGICAL SURVEY

Thomas D. Nolan, of Nevada, to be Director of the Geological Survey. Vice William E. Wrather, retiring.

IN THE ARMY

The following-named officers to be placed on the retired list in the grade indicated under the provisions of subsection 504 (d) of the Officer Personnel Act of 1947:

To be generals

Gen. Joseph Lawton Collins, O5247, Army of the United States (major general, U. S. Army).

Gen. John Ernest Dahlquist, O7120, Army of the United States (major general, U. S. Army).

To be lieutenant general

Lt. Gen. Floyd Lavinius Parks, O10532, Army of the United States (major general, U. S. Army).

IN THE NAVY

Adm. James Fife, Jr., United States Navy, retired, to be placed on the retired list with the rank of vice admiral.

Vice Adm. Harold M. Martin, United States Navy, when retired, to be placed on the retired list with the rank of vice admiral.

Having designated, in accordance with the provisions of section 413 (a) of the Officer Personnel Act of 1947, the following-named officers for commands and other duties determined by the President to be within the contemplation of said section, I nominate them to have the grade, rank, pay, and allowances of vice admiral while so serving:

Vice Adm. Alfred M. Pride, United States Navy.

*Vice Adm. Stuart H. Ingersoll, United States Navy.

*Vice Adm. Charles R. Brown, United States Navy.

*Vice Adm. George L. Russell, United States Navy.

*Vice Adm. Stuart S. Murray, United States Navy.

*Vice Adm. Cato D. Glover, Jr., United States Navy.

*Rear Adm. Robert H. Meade, Civil Engineer Corps, United States Navy, to be Chief of the Bureau of Yards and Docks in the Department of the Navy for a term of 4 years.

*Capt. Rawson Bennett II, United States Navy, to be Chief of Naval Research in the Department of the Navy, with the rank of rear admiral, for a term of 3 years.

(NOTE.—The officers whose names are preceded by the symbol (*) were appointed or promoted during the recess of the Senate.)

IN THE MARINE CORPS

Gen. Randolph McC. Pate, United States Marine Corps, to be the Commandant of the Marine Corps with the rank of general for a period of 2 years from the 1st day of January 1956.

Having designated, in accordance with the provisions of section 415 of the Officer Personnel Act of 1947, the following-named officers for commands and other duties determined by the President to be within the contemplation of said section, I nominate them to have the grade, rank, pay, and allowances of lieutenant general while so serving:

Lt. Gen. Vernon E. Megee, United States Marine Corps.

Lt. Gen. Edwin A. Pollock, United States Marine Corps.

(NOTE.—The above-named officers were appointed or promoted during the recess of the Senate.)

IN THE NAVY

The following-named officers of the Navy for temporary promotion to the grade of rear admiral in the line and staff corps as indicated, subject to qualification therefor as provided by law:

Line

George F. Beardsley	Carl J. Pfingstag
Charles K. Bergin	Walter H. Price
John E. Clark	John Quinn
Thurston B. Clark	William F. Raborn, Jr.
Joshua W. Cooper	Lawson P. Ramage
Harold T. Deutermann	Claude V. Ricketts
Robert E. Dixon	Herbert D. Riley
Glynn R. Donaho	Horacio Rivero, Jr.
Wellington T. Hines	William A. Schoech
Leroy V. Honsinger	Courtney Shands
William D. Irvin	Ulysses S. G. Sharp, Jr.
Roy L. Johnson	
Martin J. Lawrence	William R. Sheeley
William H. Leahy	Leonard B. Sutherland
James R. Lee	
Wayne R. Loud	William A. Sutherland, Jr.
Charles B. Martell	
Charles L. Melson	John S. Thach
David L. McDonald	Frank Virden
Eugene B. McKinney	Charles E. Weakley
William M. Nation	Howard A. Yeager

Medical Corps

Courtney C. Clegg
Thomas G. Hays
Hubert J. Van Peenen

Supply Corps

John W. Crumpacker
Hugh C. Haynsworth, Jr.
Onnie P. Lattu

Civil Engineer Corps

Wallace B. Short

The following-named officers of the Navy for permanent promotion to the grades indicated:

Rear admiral, line

William Miller	Philip W. Snyder
William R. Smedberg III	Lawrence R. Daspit
	Paul H. Ramsey
Roy A. Gano	George W. Anderson, Jr.
Ralph S. Clarke	
Kenneth Craig	Clifford S. Cooper
Laurence H. Frost	Henry H. Caldwell
Paul L. Dudley	Joseph N. Murphy
William J. Marshall	Robert H. Rice
Frank W. Fenno, Jr.	Benjamin E. Moore
Walter F. Rodee	Miles H. Hubbard
Robert W. Cavenagh	Charles D. Griffin
William A. Dolan, Jr.	Allen Smith, Jr.
William K. Romoser	Leroy V. Honsinger
Robert B. Ellis	William H. Leahy
Frederick C. Stelter, Jr.	Carl J. Pfingstag
	Martin J. Lawrence
James H. Ward	

Real admiral, Medical Corps

Bartholomew W. Hogan

Rear admiral, Supply Corps

Thomas L. Becknell, Jr.	Hugh C. Haynsworth, Jr.
James W. Boundy	Onnie P. Lattu

Rear admiral, Chaplain Corps

George A. Rosso

Rear admiral, Civil Engineer Corps

Robert H. Meade

The following-named officers of the Reserve of the United States Navy not on active duty for temporary promotion to the grade of rear admiral in the line or staff corps indicated, subject to qualification therefor as provided by law:

Line

Duncan S. Baker	Charles R. Khoury
Clyde W. King	Lloyd V. Berkner

Medical Corps

Waltman Walters	Morton J. Tendler
Benjamin Tenney, Jr.	William G. Hamm

Supply Corps

George D. Horning, Jr.

The following-named officers of the Reserve of the United States Navy not on active duty for permanent appointment to the grade of rear admiral in the line or staff corps indicated:

Line

David S. Ingalls	Francis M. McCarthy
Robert V. Kleinschmidt	Ralph S. Moore
	George M. Wauchope

Dental Corps

George C. Paffenbarger

Civil Engineer Corps

Roy M. Harris

The following-named officers of the Retired Reserve of the United States Navy for permanent appointment to the grade of rear admiral in the Retired Reserve in the line or staff corps indicated:

Line

Claude O. Bassett	Joseph B. Lynch
Roger W. Cutler	Gene Markey
Howland R. Gary	Ernest F. Robinson
Webb C. Hayes	John D. Small
Milton "C" Jackson	Albert L. Swasey
Ernest L. Jahncke	Isaac J. Van Kammen
Robert Lee	Bernard O. Wills
Alvin O. Lustie	

Medical Corps

Thomas B. Magath
Thomas M. Rivers

Supply Corps

John W. Landregan
Norman L. McLaren

IN THE NAVY

The following-named officers of the Navy and the Reserve of the Navy on active duty, for temporary promotion to the grades indicated, subject to qualification therefor as provided by law:

Captain, line

Adair, Jamie	Belcher, Preston R.
Adams, Thomas M.	Belin, Peter
Aho, Kauko A.	Benson, Ralph H., Jr.

Vivian L. N. Parker, of California
Frederick C. Randall, of Maryland.
Walter Trenta, of New York.

To be secretaries in the diplomatic service

Morrill Cody, of the District of Columbia.
J. Foster Collins, of Virginia.
Raford W. Herbert, of Mississippi.

HOUSE OF REPRESENTATIVES

WEDNESDAY, JANUARY 18, 1956

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D. D., offered the following prayer:

O Thou Lord and Master of all mankind, whose incomparable life is the realized ideal of humanity and the supreme revelation of God, Almighty, we pray that daily our own life may come under the spell and sway of Thy spirit.

We penitently confess that our human spirit has so little in common with Thy divine spirit and that we are frequently so bewildered and confused, so faithless and faltering.

Thou knowest how desperately man needs Thy regenerating presence and power if our dreams and hopes of a better world are ever to become a blessed reality.

Grant that during this year we may accept more eagerly the overtures of Thy counsel and companionship, and venture out more courageously upon the nobler ways of life.

To Thy name we ascribe all the praise. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Carrell, one of its clerks, announced that the Senate agrees to the amendment of the House to a bill of the Senate of the following title:

S. 1689. An act to authorize the Secretary of the Interior to execute a repayment contract with the Yuma Mesa Irrigation and Drainage District, Gila project, Arizona, and for other purposes.

FOREIGN POLICY

Mr. LANHAM. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, to revise and extend my remarks, and include an editorial.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. LANHAM. Mr. Speaker, with my own remarks, I am including an editorial which appeared in the Washington Post for Wednesday, January 18, entitled "Mr. Dulles Explains." Really the title should be "Mr. Dulles Tries To Explain."

It is truly difficult to understand why a man with the supposed intelligence of Mr. Dulles would give his consent to what the Post so well calls "the nauseous article" in a recent issue of Life. Of course, in Mr. Dulles' statement which, if he did not make he at least allowed to be published, he is pleading guilty to conducting our foreign affairs on the basis of "bluff, bluster, and backdown." Our foreign policy has certainly descended to its nadir in this colossal blunder of Mr. Dulles, the last of a long line of statements and actions that subject us to the ridicule of the world.

[From the Washington Post and Times Herald of January 18, 1956]

MR. DULLES EXPLAINS

Secretary Dulles succeeded only partially in his effort yesterday to extricate his foot from his mouth. In his effort to explain the nauseating article in Life, he emphasized that it was not his own deliberate policy but the actions of the Communists that had led this country three times to the brink of war. With an after-the-fact modesty, he disavowed some of the tone and oversimplifications of the article. He quite properly recognized that the efforts to prevent miscalculation on the part of potential aggressors are not partisan policy but national policy of long standing.

So far so good. What remains is the bitter harvest the article has reaped abroad and the gift it has bestowed on Soviet propaganda through its appalling insensitivity and braggadocio, its distortions of history, its assumptions of omniscience. No one yet has explained why such an article was authorized; and Mr. Dulles' acknowledgment that the interview with the author had been recorded caps his own responsibility for the essence of what was said if not for the form. Mr. Dulles' surprise at the reaction to the article tells a good deal about the sort of blinders he has imposed on himself. What seems to have been thoroughly messy handling of the affair by the State Department also reflects ultimately on the Secretary. In all Mr. Dulles' 3 years in the Department, during which his good ideas and efforts at flexibility have been cluttered with a number of indiscretions, legalistic quibbles, and instances of political truckling, it is impossible to recall any embarrassment more needless or more clumsily entered.

In the circumstances, nevertheless, it is possible to feel sorry for Mr. Dulles. He has been his own worst enemy; and no American can take pride in seeing his country or its chief spokesman in foreign affairs humiliated even through the official's own fault. The best thing now is to let the article pass and to hope that next time Mr. Dulles will manage to pull himself back from the brink of thoughtless utterance.

DR. WILL W. ALEXANDER

Mr. HAYS of Arkansas. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. HAYS of Arkansas. Mr. Speaker, I know that all of the Members of the House who had the privilege of knowing Dr. Will W. Alexander, of Chapel Hill, N. C., are saddened by the news of his death on last Friday, January 13. His passing marks the end of a useful and inspiring career. His unusual talents and his qualities of leadership were dedicated to improving the lot of many groups of people throughout the country, particularly in the South where he labored to find solutions to social and economic problems. He rendered a notable service as head of the Farm Security Administration, and as a member of the boards of various educational and philanthropic institutions. Disclaiming personal ambition and working quietly with those whose sympathies established a congenial and effective association, he exerted a tremendous influence for good. He will be sorely missed.

To Mrs. Alexander and their three sons, Edgar, John, and William, and their families, I extend my deepest sympathy.

EXTENSION OF REMARKS

Mr. MORANO. Mr. Speaker, I ask unanimous consent to insert in the RECORD two speeches made by Hon. CHESTER MERROW, of New Hampshire. Notwithstanding their length, I ask unanimous consent that they may be printed in full.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

AMENDING SMALL BUSINESS ACT OF 1953

Mr. O'NEILL. Mr. Speaker, by direction of the Committee on Rules, I call up the resolution (H. Res. 369) providing for the consideration of H. R. 7871, a bill to amend the Small Business Act of 1953, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 7871) to amend the Small Business Act of 1953. After general debate, which shall be confined to the bill, and shall continue not to exceed 2 hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Banking and Currency, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. O'NEILL. Mr. Speaker, at the conclusion of my remarks, I yield one-half hour to the gentleman from Illinois [Mr. ALLEN].

Mr. Speaker, I rise to urge the adoption of House Resolution 369, which makes in order the consideration of the bill (H. R. 7871) to amend the Small Business Act of 1953. On August 19, 1955, the Northeast section of this country was hit terrifically hard by Hurricane Diane. For a period of about 5 days over 20 inches of rain fell in this section. Considerable damage was done in the entire Northeast section, particularly in southern New England, Connecticut being very badly hit as well as Rhode Island and the southern portion of the State of Massachusetts. Lives were lost and communities had to be evacuated. Homes were destroyed and swept away by the flood. Factories and industries were wrecked or damaged. Business establishments were flooded and their goods swept away or destroyed. Over $2 billion of havoc was visited on southern New England. The damage in the State of Massachusetts was so great that it defies adequate description.

Mr. Speaker, I want at this time to congratulate the Small Business Administration for the great work they did in those trying days. They assisted companies in fulfilling their contractual obligations which could not be filled because of the flood damage. They assisted in the way of machinery and raw materials for production. They had engineers and their contractors in estimating the work. All in all, they did a marvelous job and we should be proud of them.

This is the forerunner of much legislation that will come before the Congress this year dealing with flood relief, hurricane relief, drought, and things of that nature. This bill as amended and reported by the committee would increase the limit of disaster loans from $25 million to $75 million.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. I yield.

Mr. McCORMACK. As I remember, before this session of Congress convened, the Small Business Administration had run out of money for disaster loans, and there was an urgency and necessity. The White House contacted the leadership on both sides of the aisle and asked if we would agree on a reimbursable basis that they could make regular business loans, with the understanding that when we met there would be authority made for appropriations so that they could reconvert those loans made at 6 percent to a 3 percent disaster loan, and that is contemplated in this bill.

Mr. O'NEILL. That is absolutely correct. The bill as amended and reported by the committee would increase the limit on disaster loans from $25 million to $75 million and would make a corresponding increase from $275 million to $325 million in the amount authorized to be appropriated to the revolving fund provided for in the act, to finance loan and contract operations under the act. The committee unanimously agreed to keep the present separation between the disaster-lending program and the business-lending program.

After the hurricane last fall it became apparent that the statutory limitation on disaster loans was going to be exceeded if all eligible disaster-loan applications were to be given assistance. Consequently, it was decided that the Small Business Administration would continue to make loans at its 6-percent interest rate to business in disaster areas, and a clause was inserted in the loan authorization stating that the rate would revert to 3 percent at such time as congressional action would permit.

As of December 31, 1955, it was estimated the need for disaster loans totaled $38,573,000. While accurate estimates cannot be made at this time, it is possible that the disaster-loan applications from California, Oregon, and Nevada, where extensive flood loss occurred last month, will amount to between 15 and 20 million dollars. The Administrator of the Small Business Administration testified before the committee that increasing the disaster loan limit to $75 million would be sufficient, insofar as can be estimated, to meet the need through June 30, 1957.

The loan assistance granted in disaster areas over the years has done much to alleviate suffering and assist in the rehabilitation of the areas affected. I urge the adoption of House Resolution 369 so the House may proceed to the consideration of H. R. 7871.

Mr. MORANO. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. I yield.

Mr. MORANO. I expect to support this resolution, as a whole, but was there any testimony that would indicate that perhaps the 3-percent interest rate could be reduced to 2 percent or even lower?

Mr. MULTER. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. I yield.

Mr. MULTER. There was no such testimony before the committee one way or the other.

Mr. MORANO. Does the bill provide that the limit is 3 percent and that the Administrator would have authority to grant loans at a lesser rate of interest?

Mr. MULTER. I think we would only be fooling the public, if we indicated that there was any possibility that they could get one of these loans at less than 3 percent. That is the maximum rate fixed in the bill.

Mr. MORANO. Does the Administrator have authority to make loans for a lesser rate?

Mr. MULTER. I think the answer is "Yes."

Mr. MORANO. He does have?

Mr. MULTER. Yes.

Mr. ALLEN of Illinois. Mr. Speaker, as always, the able gentleman from Massachusetts has fully stated the principles and purposes involved in this extension of the Small Business Act of 1953. I know of no objection on this side to either the rule or the bill.

Mr. Speaker, I yield such time as she may desire to the gentlewoman from Massachusetts [Mrs. ROGERS].

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to extend my remarks and include therein a copy of a bill which I introduced on yesterday, H. R. 8491, to carry out the President's recommendations in his state of the Union message with regard to alleviating conditions in places of chronic unemployment. There are other similar bills.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

(The bill is as follows:)

H. R. 8491

A bill to assist areas to develop and maintain stable and diversified economies by a program of financial and technical assistance and otherwise, and for other purposes

Be it enacted, etc., That this act may be cited as the "Area Assistance Act of 1956."

DECLARATION OF PURPOSE

SEC. 2. The Congress declares that, notwithstanding the prosperity enjoyed by the Nation as a whole, some of our communities are suffering substantial and persistent unemployment; that such unemployment causes hardship to many individuals and their families and detracts from the national welfare by wasting vital human resources; that to overcome this problem the Federal Government, in cooperation with the States, should help areas of substantial and persistent unemployment to take effective steps in planning and financing their economic development; that the Federal assistance should enable communities to achieve lasting improvement and enhance the domestic prosperity by the establishment of stable and diversified local economies; and that new employment opportunities should be created rather than merely transferred from one community to another.

AUTHORITY OF SECRETARY OF COMMERCE

SEC. 101. (a) To assist areas in the United States designated by the Secretary of Labor as areas of substantial and persistent unemployment, the Secretary of Commerce, hereinafter referred to as the Secretary, is authorized—

(1) to make grants for technical assistance for such areas; and

(2) to provide financial assistance by loans, participation in loans, or guarantee of loans.

(b) The Secretary is also authorized—

(1) to assist rural areas and rural communities in the United States in their efforts to develop manufacturing, processing, and service activities to supplement agricultural activities;

(2) to provide technical assistance and field consultation to areas in the United States in establishment of new industries based on local resources, in expansion of existing industries, and in economic diversification; and

(3) to coordinate the functions of the Secretary authorized by this act with other Federal programs affecting local economic conditions.

(c) As used in this act, the term "United States" includes the several States, the Territories of Alaska and Hawaii and the District of Columbia.

AUTHORITY OF SECRETARY OF LABOR

SEC. 102. (a) The Secretary of Labor shall from time to time, upon request of the appropriate State government, certify to the Secretary the existence of an area of substantial and persistent unemployment whenever he finds—

(1) in the case of a major labor market area or other labor market area for which appropriate historical labor force data are available as determined by the Secretary of Labor, that the unemployment rate in such area (A) is currently 8 percent or more, adjusted seasonally, and (B) has been at least 8 percent for the major portion of each of the preceding 2 years; or

(2) in the case of other labor market areas for which appropriate historical labor force data have not been compiled, that the unemployment rate and duration, based on a survey of available labor force data, generally equals or exceeds the rate and duration specified in section 102 (a) (1).

(b) The Secretary of Labor may undertake studies, or provide assistance to others in their studies, of the size, characteristics, skills, adaptability, and related aspects of the labor force of an area certified under section 102 (a).

(c) When skills of the labor force in an area certified under subsection (a) are not suited to reemployment of workers in such area, the Secretary of Labor may provide advice and technical assistance in developing and carrying out a program to increase employability of such labor force. Whenever the Secretary of Labor finds a need for vocational education services in such area, he shall so advise the Secretary of Health, Education, and Welfare. The Secretary of Health, Education, and Welfare, through the Commissioner of Education, may provide assistance, including financial assistance when necessary or appropriate, to the State vocational education agency in the provision of such services in the area.

AUTHORITY OF HOUSING AND HOME FINANCE ADMINISTRATOR

SEC. 103. Title I of the Housing Act of 1949, as amended, is amended by adding the following new heading and section at the end of title I:

"AREAS OF SUBSTANTIAL AND PERSISTENT UNEMPLOYMENT

"SEC. 111 (a). When the Secretary of Commerce certifies to the Administrator (1) that any county, city, or other municipality (referred to as 'municipality' in this section) is situated in an area designated by the Secretary of Labor pursuant to the Area Assistance Act of 1956 as an area of substantial and persistent unemployment, and (2) that there is a reasonable probability that with assistance provided under the Area Assistance Act of 1956 and other undertakings the area will be able to achieve lasting improvement in its economic development, the Administrator is authorized to extend financial assistance to a local public agency in any such municipality under this title and the provisions of this section.

"(b) The Administrator may provide such financial assistance under this section without regard to the requirements or limitations of section 110 (c) of this title that the project area be clearly predominantly residential in character or that it be redeveloped for predominantly residential uses.

"(c) Financial assistance under this section may be provided for any project involving a project area including primarily industrial or commercial structures suitable for rehabilitation under the urban renewal plan for the area.

"(d) Notwithstanding any other provisions of this title, a contract for financial assistance under this section may include provisions permitting the disposition of any land in the project area designated under the urban renewal plan for industrial or commercial uses to any public agency or nonprofit corporation for subsequent disposition as promptly as practicable by such public agency or corporation for the redevelopment of the land in accordance with the urban renewal plan: *Provided*, That any disposition of such land under this section shall be made at not less than its fair value for uses in accordance with the urban renewal plan: *And provided further*, That the purchasers from or lessees of such public agency or corporation, and their assignees, shall be required to assume the obligations imposed in conformity with the requirements of section 105 (b) hereof.

"(e) Following the execution of any contract for financial assistance under this section with respect to any project, the Administrator may exercise the authority vested under this section for the completion of such project notwithstanding any determination made after the execution of such contract that the area in which the project is located may no longer be an area of substantial and persistent unemployment."

SEC. 104. The first sentence of section 202 (c) of title II of the Housing Amendments of 1955 is amended to read as follows:

"(c) In the processing of applications for financial assistance under this section the administrator shall give priority first to applications of counties, cities, and other municipalities and political subdivisions for financing needed public facilities in areas determined to be areas of substantial and persistent unemployment under the Area Assistance Act of 1956: *Provided*, That the Secretary of Commerce certifies there is reasonable probability that with assistance made available under the Area Assistance Act of 1956 and other undertakings such areas will be able to achieve lasting improvement in their economic development; and second to applications of smaller municipalities for assistance in the construction of basic public works (including works for the storage, treatment, purification, or distribution of water, sewage, sewage treatment, and sewer facilities; and gas distribution systems) for which there is an urgent and vital public need."

SEC. 105. The second sentence of Section 701 of the Housing Act of 1954 is amended to read as follows:

"The Administrator is further authorized to make planning grants for similar planning work (a) in metropolitan and regional areas to official State, metropolitan or regional planning agencies empowered under State or local laws to perform such planning, and (b) to counties, cities, and other municipalities, having a population of 25,000 or more according to the latest decennial census, situated in areas designated by the Secretary of Labor under the Area Assistance Act of 1956 as areas of substantial and persistent unemployment."

GRANTS FOR TECHNICAL ASSISTANCE

SEC. 106. In carrying out section 101 (a) (1), the Secretary is authorized to make grants for technical assistance including studies evaluating the needs of, and developing potentialities for, economic growth of areas designated under section 102 (a). These grants may be made without regard to section 3648 of the Revised Statutes, as amended (31 U. S. C. 529). Appropriations are hereby authorized for these grants in an amount not to exceed $1,500,000 annually.

LOANS, PARTICIPATIONS, AND GUARANTIES

SEC. 107. (a) In carrying out section 101 (a) (2) of this Act, the Secretary is authorized to purchase evidences of indebtedness and to make loans (including participations therein and guaranties thereof) to aid in financing any project for the purchase or development of land and facilities for industrial usage, for the construction of new factory buildings, for rehabilitation of abandoned or unoccupied factory buildings, or for the alteration, conversion, or enlargement of any existing buildings for industrial use. Such financial assistance shall not be extended for working capital, for purchase of machinery or equipment, or to assist establishments relocating from one area to another when such assistance will result in substantial detriment to the area of original location by increasing unemployment.

(b) Financial assistance under this section shall be on such terms and conditions as the Secretary determines, subject, however, to the following restrictions and limitations:

(1) The total amount of loans, loan participations, and loan guaranties (including purchased evidences of indebtedness) outstanding at any one time shall not exceed $50,000,000;

(2) Such assistance shall be extended only to persons, both private and public, approved by the State (or any agency or instrumentality thereof concerned with problems of economic development) in which the project to be financed shall be located;

(3) No such assistance shall be extended hereunder unles the financial assistance applied for is not otherwise available from private lenders or other Federal agencies on reasonable terms;

(4) No loan shall be made unless it is determined that a participation is not available, and no immediate participation shall be purchased unless it is determined that a loan on a guaranteed or deferred participation basis is not available;

(5) All evidences of indebtedness purchased and all loans shall provide, in the judgment of the Administrator, a reasonable assurance of repayment;

(6) No loan, including renewals or extensions thereof, may be made hereunder for a period exceeding 20 years and no evidences of indebtedness maturing more than 20 years from date of purchase may be purchased hereunder: *Provided*, That the foregoing restrictions on maturities shall not apply to securities or obligations received by the Secretary as a claimant in bankruptcy or equitable reorganization or as a creditor in other proceedings attendant upon insolvency of the obligor, or if extension or renewal for additional periods, not to exceed, however, a total of 10 years, will aid in the orderly liquidation of such loan or of such evidence of indebtedness;

(7) Such assistance shall not exceed 25 percent of the aggregate cost of acquiring or developing land and facilities, and of constructing, altering, converting, rehabilitating, or enlarging the building or buildings of the particular project and shall, among others, be on the following conditions:

(A) That other funds are available in an amount which, together with the assistance provided hereunder, shall be sufficient to pay such aggregate cost, and

(B) That not less than 15 percent of such aggregate cost be supplied by the State or any agency, instrumentality, or political subdivision thereof or by a community or area organization, as equity capital or as a loan repayable only after the financial assistance hereunder has been repaid in full according to the terms thereof and, if such loan is secured, its security shall be sub-

ordinate and inferior to the lien or liens securing the financial assistance hereunder.

(8) No such assistance shall be extended unless there shall be submitted an overall program for the economic development of the area and a finding by the State, or any agency, instrumentality, or local political subdivision thereof, that the project for which financial assistance is sought is consistent with such program: *Provided*, That nothing in this act shall authorize financial assistance for any project prohibited by laws of the State or local political subdivision in which the project would be located.

AREA ASSISTANCE FUND

SEC. 108. (a) There is hereby authorized to be established in the Treasury of the United States a revolving fund to be known as the Area Assistance Fund (hereinafter referred to as the "fund"), which shall be available to the Secretary for the payment of all obligations and expenses in connection with the functions authorized under section 101 (a) (2).

(b) When requested by the Secretary, advances shall be made to the fund from the appropriations made therefor. There is hereby authorized to be appropriated for the purpose of making advances to the fund, without fiscal year limitation, an amount not exceeding $50 million.

(c) Receipts arising from the program authorized by section 101 (a) (2) shall be credited to the fund.

(d) Any moneys in the fund determined by the Secretary to be in excess of current needs shall be credited to the appropriation from which advanced to be held for future advances to the fund.

(e) Unless the Congress shall otherwise direct, there shall be paid into miscellaneous receipts of the Treasury at the close of each fiscal year interest on advances to the fund at a rate determined by the Secretary of the Treasury, taking into consideration the current average rate on all outstanding marketable obligations of the United States.

(f) Contributions shall be made from the funds—

(1) to the civil-service retirement and disability fund, on the basis of annual billings as determined by the Civil Service Commission, for the Government's share of the cost of civil-service retirement systems applicable to officers and employees (and beneficiaries thereof) occupied on a full-time basis on this program of financial assistance; and

(2) to the employees' compensation fund, on the basis of annual billings as determined by the Secretary of Labor, for benefit payments made from such fund on account of officers and employees (and beneficiaries thereof) occupied on a full-time basis on this program of financial assistance.

BUDGET AND AUDIT

SEC. 109. In the performance of and with respect to the functions, powers, and duties vested in him by this act in connection with the program of loans and participation in loans, the Secretary shall—

(a) prepare annually and submit a budget program as provided for wholly owned Government corporation by the Government Corporation Control Act, as amended; and

(b) maintain an integral set of accounts which shall be audited annually by the General Accounting Office in accordance with the principles and procedures applicable to commercial transactions as provided by the Government Corporation Control Act, as amended, and no other audit shall be required: *Provided*, That the determinations of the Secretary with respect to the program of financial assistance authorized by section 101 (a) (2) shall be final and conclusive upon all other officers of the Government.

AREA ASSISTANCE ADMINISTRATOR

SEC. 110. The Secretary is authorized to appoint an Area Assistance Administrator who shall perform such duties as the Secretary may prescribe. The Area Assistance Administrator shall receive compensation at a rate equal to that received by Assistant Secretaries of Commerce.

POWERS

SEC. 111. In the performance of, and with respect to the functions, powers, and duties vested in him under this act, the Secretary may—

(a) under such regulations as he may prescribe, make such findings and determinations as may be required for the proper administration of this act and such findings and determinations, together with those required to be made by the Secretary of Labor pursuant to section 102 hereof, shall be final and shall not be subject to review in any court by mandamus or otherwise: *Provided*, That with respect to the validity, effect, and enforcement of loans and participations provided for by section 101 (a) (2) hereof or security taken thereunder, statutes, rules and regulations pertaining generally to suits by and against the United States shall be applicable;

(b) under regulations prescribed by him, assign or sell at public or private sale, or otherwise dispose of for cash or credit, in his discretion and upon such terms and conditions and for such consideration as the Secretary shall determine to be reasonable, any evidence of debt, contract, claim, personal property, or security assigned to or held by him in connection with the payment of loans granted under this title, and to collect or compromise all obligations assigned to or held by him and all legal or equitable rights accruing to him in connection with the payment of such loans until such time as such obligation may be referred to the Attorney General for suit or collection;

(c) deal with, complete, renovate, improve, modernize, insure, rent, or sell for cash or credit, upon such terms and conditions and for such consideration as the Secretary shall determine to be reasonable, any real property conveyed to or otherwise acquired by him in connection with the payment of loans granted under this title;

(d) pursue to final collection, by way of compromise or other administrative action prior to reference to the Attorney General, all claims against third parties assigned to the Secretary in connection with loans made by him. Section 3709 of the Revised Statutes, as amended (41 U. S. C. 5), shall not be construed to apply to any contract of hazard insurance or to any purchase or contract for services or supplies on account of property obtained by the Secretary as a result of loans made under this title if the premium therefor or the amount thereof does not exceed $1,000. The power to convey and to execute in the name of the Secretary deeds of conveyance, deeds of release, asignments and satisfactions of mortgages, and any other written instrument relating to real property or any interest therein acquired by the Secretary pursuant to the provisions of this title may be exercised by the Secretary or by any officer or agent appointed by him for the purpose;

(e) acquire, in any lawful manner, any property (real, personal, or mixed, tangible or intangible), whenever deemed necessary or appropriate to the conduct of the activities authorized in section 101 (a) (2) of this act; and

(f) in addition to any powers, functions, privileges, and immunities otherwise vested in him, take any and all actions, including the procurement of the services of attorneys by contract, determined by him to be necessary or desirable in making, servicing, compromising, modifying, liquidating, or otherwise administratively dealing with or realizing on loans made under the provisions of this title.

ADVISORY BOARD

SEC. 112. To advise the Secretary in the performance of functions authorized by this act, there is authorized to be created an Area Assistance Advisory Board, hereinafter referred to as the "Board", which shall consist of the following members, all ex-officio: The Secretary, as Chairman, the Secretaries of Agriculture, Health, Education and Welfare, Labor and Treasury, the Administrators of the Housing and Home Finance Agency and of the Small Business Administration. The Chairman may from time to time invite the participation of officials of other agencies of the executive branch interested in the functions herein authorized. Each member of the Board may designate an officer of his agency to act for him as a member of the Board with respect to any matter there considered.

DEPOSITARIES AND AGENTS

SEC. 113. The Federal Reserve banks are authorized and directed to act as custodians and fiscal agents for the Secretary in the general performance of the powers conferred by this title. Any banks insured by the Federal Deposit Insurance Corporation, when designated by the Secretary of the Treasury, may act as custodians and financial agents for the Secretary. Each Federal Reserve bank shall be entitled to be reimbursed for all expenses incurred as such fiscal agents.

PENALTIES

SEC. 114. With respect to lending activities authorized by this act—

(a) Whoever makes any statement knowing it to be false, or whoever willfully overvalues any security, for the purpose of obtaining for himself or for any applicant any loan, or extension thereof by renewal, deferment of action, or otherwise, or the acceptance, release, or substitution of security therefor, or for the purpose of influencing in any way the action of the Secretary, or for the purpose of obtaining money, property, or anything of value, under this act, shall be punished by a fine of not more than $10,000 or by imprisonment for not more than 5 years, or both.

(b) Whoever, being connected in any capacity with the Secretary (1) embezzles, abstracts, purloins, or willfully misapplies any moneys, funds, securities, or other things of value, whether belonging to it or pledged or otherwise entrusted to it, or (2) with intent to defraud the Secretary or any other body politic or corporate, or any individual, or to deceive any officer, auditor, or examiner of the Secretary makes any false entry in any book, report, or statement of or to the Secretary, or, without being duly authorized, draws any order or issues, puts forth, or assigns any note, debenture, bond, or other obligation, or draft bill of exchange, mortgage, judgment, or decree thereof, or (3) with intent to defraud participates, shares, receives directly or indirectly any money, profit, property, or benefit through any transaction, loan, commission, contract, or any other act of the Secretary, or (4) gives any unauthorized information concerning any future action or plan of the Secretary which might affect the value of securities, or, having such knowledge, invests or speculates, directly or indirectly, in the securities or property of any company or corporation receiving loans or other assistance from the Secretary shall be punished by a fine of not more than $10,000 or by imprisonment for not more than 5 years, or both.

(c) As used in this section the term "Secretary" shall mean, with respect to the lending activities of the Housing and Home Finance Administrator authorized under this act, the Housing and Home Finance Administrator.

USE OF OTHER FACILITIES

SEC. 115. (a) To avoid duplication of activities and minimize expense in carrying

out the provisions of this act, the Secretary shall to the extent practicable and with their consent use the available services and facilities of other agencies and instrumentalities of the Federal Government on a reimbursable basis.

(b) Departments and agencies of the Federal Government shall exercise their powers, duties, and functions in such manner as will assist in carrying out the objectives of this act. This act shall be supplemented to any existing authority and nothing herein shall be deemed to be restrictive of any existing powers, duties, and functions of any other department or agency of the Federal Government.

CONSULTANTS

SEC. 116. The Secretary is authorized to procure the temporary service of experts and consultants or organizations thereof, including stenographic reporting services, by contract or appointment and in such cases such service shall be without regard to the civil-service and classification laws, and, except in the case of stenographic reporting services by organizations, without regard to section 3709, Revised Statutes, as amended (41 U. S. C. 5). Any individual so employed may be compensated at a rate not in excess of $50 per diem, and, while such individual is away from his home or regular place of business, he may be allowed transportation and not to exceed $15 per diem in lieu of subsistence and other expenses.

ANNUAL REPORT

SEC. 117. The Secretary shall make a comprehensive annual report of his operations under this act for the fiscal year ending on the preceding June 30 to the President, for transmission to the Congress as soon as practicable in each year, but in no case later than the third day of the following January.

AUTHORIZATION FOR APPROPRIATIONS

SEC. 118. In addition to appropriations specifically authorized by sections 106 and 108, appropriations are further authorized for the carrying out of other provisions and purposes of this act.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I am very anxious to endorse and vote for this bill for disaster loans, and for other purposes, with the hope that I will be more successful in securing help from the small business association.

Mr. O'NEILL. Mr. Speaker, I yield 5 minutes to the gentleman from Massachusetts [Mr. MCCORMACK].

Mr. MCCORMACK. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and proceed out of order.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. MCCORMACK. Mr. Speaker, in the message of the President in relation to agriculture, there is a recommendation in relation to the disposal of surplus agricultural products. It is a very interesting one but I think it should be viewed very cautiously. The President said:

Because the problem continues to be so serious and stubborn, the Secretary of Agriculture is appointing an Agricultural Surplus Disposal Administrator who will report directly to the Secretary.

My reference is not so much to that. The message continues:

Expanded opportunities will be sought to barter agricultural products which deteriorate and are costly to store, for increased quantities of nonperishable strategic materials. Additional legislation may be needed in this field.

Here is the important part:

Present provisions of surplus disposal legislation permit export dispositions of Government stocks to friendly nations only. Opportunities clearly to our interest may develop in the future to sell to countries excluded by this legislation. To enable us to realize on such opportunities I recommend repeal of section 304 of Public Law 480.

Secretary Benson on January 12 in appearing before the Senate Committee on Agriculture and Forestry made a brief reference to this. He said:

The President recommended repeal of section 304 of Public Law 480. This section restricts export dispositions of Government stocks to friendly nations.

The repeal of the section means that the sale of surplus farm commodities can be made to Communist countries, or deals made with them. We have now started the cold war all over again on the economic level, and we all know that if this section were repealed we would weaken ourselves in the economic field through making arrangements with Communist countries. It would be to our disadvantage, for such an arrangement would enable them to carry on more effectively their economic cold war against us and other countries of the West.

I am particularly interested in our own national interest. I think it would be unwise for us to do this, and I hope the Committee on Agriculture of both branches of the Congress will carefully go into this matter to ascertain fully the facts, because I do not think the people of America in general and the great majority of the Members of Congress will favor selling surplus agricultural products to Communist countries. It would help them in their efforts toward world revolution and domination.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. MCCORMACK. I yield to the gentleman from Iowa.

Mr. GROSS. I quite agree with the gentleman. I think we should proceed most cautiously in the repeal of that section of the law. I am sure the gentleman understands that the Communist countries have been shipping food products into this country for a long, long time and they are still doing it.

Mr. MCCORMACK. There are many things happening that probably should not happen. One such thing, for instance, is the black market in nickel, which is making the American businessman pay from $2.80 to $3 a pound for nickel.

I hope the Committees on Agriculture of both branches of Congress will very carefully go into the subject to ascertain the facts. They should be very cautious in making any recommendations to repeal existing law, and I think if such recommendation should be made the Congress of the United States should be very careful in the consideration of any such bill or agreeing to any such action, because we are engaged in the cold war and we have got to do those things that are consistent with our own national interest. It seems to me that selling or bartering our surplus agricultural products to Communist nations would certainly help them but certainly is not going to help us.

Mr. O'NEILL. Mr. Speaker, I yield 5 minutes to the gentleman from Texas [Mr. PATMAN].

SBA UNSATISFACTORY

Mr. PATMAN. Mr. Speaker, I am not going to take up much time of the House at this time because I want to speak on this bill when it comes up for consideration. I should like to invite your attention, however, to certain important things about the bill.

First, the object is to mix the funds, the $150 million for business loans, the $100 million for prime contract loans and $25 million for disaster loans. It is desired to mix them all together, then add on the $50 million. Those of us who have studied this proposal agree this will be a bad thing because it will give the Small Business Administration an excuse not to make business loans. They have not been making business loans in a satisfactory way up to this time. This would give them an excuse for not making any business loans at all. They could simply state: "Well, we do not know; we might need all this money for disaster-loan purposes." So we do not want the loan funds mixed.

The bill as is reported will keep them separated. It will just increase the disaster-loan fund from 25 to 50 million dollars.

DISGRACE

The Small Business Administration has certainly not been a success. Without going into too much detail, may I state that they have averaged in inquiries in different forms for business loans to the amount of about 100,000 to 110,000 per month. After getting those inquiries in the first 11 months that they were in business they actually extended disbursed loans amounting to $1,900,000, which is a ridiculous amount. They have not at any time disbursed more than $26 million and this in a period of over 2½ years, notwithstanding the fact they have 750 employees. I think it is safe to say that the amount of money paid for administration purposes has been far in excess of the aggregate amount of business loans made. This is an absolute disgrace. People will spend their time and their money traveling 100, 200, or 300 miles to these various offices, and these inquiries have been coming in at the rate of 100,000 a month, and then they are persuaded not to file an application. They are told various reasons why they should not file these applications; for instance, that they can get their loans elsewhere. Out of the hundreds of thousands of inquiries that have been made only a few thousand are actually filed, then only a very much smaller number are approved. After 23 months about 326 applications had actually been approved and disbursed. That does not average one for each congressional district, although I do not say they should be allocated according to congressional districts, or one for every two employees.

When this bill came up for consideration previously we discovered that some loans could only be made at 8 percent interest. We put a restriction in there, last August that the rate of interest charged shall be the prevailing rate but shall not exceed 6 percent. Recently, Mr. Barnes, Director of the Small Business Administration was on the witness stand and I interrogated him. He admitted that they were charging 6 percent clear across the board everywhere, and I asked him why he was doing that. He said, "We used the rate of 6 percent and fixed that rate in connection with the loans because the loan policy board set up the policy and fixed the interest rates." Now, here is the loan policy board consisting of the Secretary of the Treasury, the Secretary of Commerce, and the Director of the Small Business Administration. It is really in violation of the law. The law says it shall not exceed 6 percent. They say charge 6 percent and not charge the prevailing rate. And, that causes us to wonder. Are we going to have a government of law or are we going to have a government of men? Will men be privileged to change the law when they want to, in this case against the small-business man, which has been changed by the loan policy board?

Now, another thing. I want to mention prime contracts. We gave the Small Business Administration $100 million authorization to take prime contracts. During World War II that was the finest provision the Small War Plants Corporation had. They would take a contract and divide it up among small people. It was wonderful. It worked fine. But, we discovered that the Small Business Administration has not taken one prime contract. It has not spent one penny of that $100 million.

DISTRESSED AREAS

Now, here, all of you who are in distressed areas, who are in depressed areas, please listen to what I say. If the Small Business Administration will carry out its authority as granted by the Congress and use the money that has been authorized, the Small Business Administration can restore every depressed community in these United States within 30 or 60 days, or in a very short time, by giving contracts to people in those areas which will, in turn, give people jobs. They have the power, they have the money available, and there is no reason on earth why they should not do it.

I am just bringing those things to your attention. I do not want to take any more of your time, because I expect to discuss this more fully later on.

Mr. ALLEN of Illinois. Mr. Speaker, I yield 3 minutes to the gentleman from Colorado [Mr. HILL].

Mr. HILL. Mr. Speaker, I am somewhat surprised and dumfounded that my friend, the gentleman from Texas, would make the statement he makes concerning small business. I am very much afraid that he makes these remarks because he has not been able to have the Small Business Administration perform just exactly like he wants to.

I have listened to the gentleman from Texas [Mr. PATMAN] make many comments during this session on the activities of the Small Business Administration. I can unequivocally state that I have always disagreed with the gentleman from Texas in his general criticism of the work of the Small Business Administration. He has constantly disregarded the good work done and the assistance rendered to small-business concerns by SBA during the past 2 years, and has completely ignored the difficult problems of small firms and the attempts made for their solution.

As the gentleman from Texas knows, these difficulties encountered by small-business concerns can only be resolved by nonpartisan support. There is no place here for political analysis and political criticism—such an approach only contributes to confusion, not to correction or assistance. This should be true when we discuss the share of Government contracts acquired by small business and when we consider the need for a business lending program. It is particularly true when we give consideration, as we are now, to the need for financial assistance to business concerns and homeowners who have incurred damage as a result of floods, hurricanes, and other types of disasters.

Mr. Speaker, I appreciate the fine remarks of the gentleman from Massachusetts. I want to say to you that there is no basis in fact in regard to what the policy board of the Small Business Administration has done.

I have here the report from which I shall read. This is as of December 31, 1955. The SBA had approved 2,270 business loans, all of them necessary, amounting to a total of more than $114 million. Of this amount the agency's share was $94 million, nearly $95 million. There had been some 441 cancellations up to that date amounting to a little under $22 million. This left a net of approved loans of 829, amounting to over $91 million.

I know what is the matter with the gentleman from Texas [Mr. PATMAN]. He is just like a lot of other people who speak from this floor who think that everything should be done from a political standpoint. I am getting sick and tired of the partisan approach to these questions.

The small business loans which they may make, if they are only half a dozen, those half dozen loans affect perhaps 1,000 people in those communities or areas. And the gentleman from Texas knows that better than I do.

Mr. ALLEN of Illinois. Mr. Speaker, I yield 3 minutes to the gentleman from Massachusetts [Mr. HESELTON].

Mr. HESELTON. Mr. Speaker, I ask unanimous consent to speak out of order, to revise and extend my remarks, and to include certain excerpts from committee reports on legislation in the House.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. HESELTON. Mr. Speaker, I have just been handed a release from the Federal Power Commission entitled "News Digest," from Washington, dated Thursday, January 12, 1956. I shall read only a portion of the last paragraph on the first page, but anyone who wishes to see the full quotation may, of course, obtain it from the Federal Power Commission:

IOCC executive unit discusses gas legislation (Tulsa World, January 10), Oklahoma City: "The executive committee of the Interstate Oil Compact Commission met here Monday and discussed ways of supporting a bill * * * to take Federal price controls off natural gas at the wellhead. The committee, with New Mexico Gov. John F. Simms as chairman, took no formal action, however, in support of the Fulbright-Harris bill * * *."

I could be amazed if the Interstate Oil Compact Commission should think that it has any power or right, as an official group, to take any position on this legislation.

For some time I have been personally critical of certain of the activities of this commission as have others. I was glad that last year an amendment was adopted by this House to the basic law as I recall it unanimously, which went into effect this last fall, and which had as its purpose to see to it that the commission carries out the original objective of interstate compact legislation. I think it is extremely unfortunate that any such commission should see fit, if it has done so, to gather as an official unit to try to exert influence on legislation pending before this House or elsewhere. I hope that they will correct that position promptly if it is one that they have taken.

Let me make it clear beyond any question that I am not criticizing the right of any individual to express any opinion or to take any action he chooses as to any legislation pending in Congress or proposed to Congress. Neither am I questioning the right of any such individual joining with other individuals in a group for such purposes, except as a member of this executive committee. I am concerned with the fact, if this report is accurate, that this executive committee should be of the opinion that it could meet with propriety to discuss "ways of supporting a bill to take Federal price controls off natural gas at the wellhead." It is interesting to note the statement that the committee "took no formal action." But it would have been far more interesting to know whether this was because the committee recognized finally the clear mandate of article V of the Interstate Oil Compact to which the consent of Congress has been given eight times since August 1935, and which I now quote:

ARTICLE V

It is not the purpose of this compact to authorize the States joining herein to limit the production of oil or gas for the purpose of stabilizing or fixing the price thereof, or create or perpetuate monopoly, or to promote regimentation, but is limited to the purpose of conserving oil and gas and preventing the avoidable waste thereof within reasonable limitations.

I call specific attention to the following words of limitation: "* * * but is limited to the purpose of conserving oil and gas and preventing the avoidable waste thereof within reasonable limitations."

In connection with my comments, I want also to quote the language of the committee amendment when the most

recent extension of the legislation was on this floor last July 5. It is as follows:

SEC. 2. The Attorney General of the United States shall make an annual report to the Congress for the duration of the Interstate Compact to Conserve Oil and Gas as to whether or not the activities of the States under the provisions of such compact have been consistent with the purpose as set out in article V of such compact.

This amendment was accepted and is a part of the law, Public Law 185, approved July 28, 1955.

I do not know whether this reported meeting of the executive committee of the Interstate Oil Compact Commission comes within the purview of the annual report the amendment, now a part of the existing law, requires the Attorney General of the United States to make annually to the Congress. I believe it does. If not, the amendment should be clarified.

Anyone familiar with the terms of Senate Joint Resolution 38 and particularly of section 2 of Public Law 185 and the background which led to its adoption, as recommended by the House Committee on Interstate and Foreign Commerce, will recognize, I am sure, that in the original legislation Congress attempted to devise and subsequent Congresses have approved language which should be a clear guide to the Commission, its committees and its officials as to the primary objectives of the compact, as consented to by Congress, and as to activities which are quite beyond those objectives and which should not be undertaken in the name of the Commission.

However, I am submitting a copy of this Federal Power Commission News Digest to the Attorney General so that the matter will be definitely brought to his attention for whatever action he believes to be proper.

Mr. O'NEILL. Mr. Speaker, I yield 5 minutes to the gentleman from California [Mr. ROOSEVELT].

ADMISTRATION'S POLICIES: OPEN DOOR TO SMALL BUSINESS FAILURES

Mr. ROOSEVELT. Mr. Speaker, when I listened to the President's state of the Union message, I was somewhat surprised at the rosy report on the state of small business, as well as at the glowing claims made for this administration's help to small business.

Summing up in one great splash of color, this message claims that—and I quote—"an integral part of the administration's efforts to foster an expanding free economy is keeping open the door of opportunity to new and small enterprise, checking monopoly, and preserving a competitive environment."

When I heard this, I merely thought, "Well it is too bad, the President simply has not been informed about what his administration has been doing." In fact, I was even inclined to excuse the people who concocted the President's message—on the grounds of ignorance. These people are big-business men, and it has been obvious for some time that they are not in touch with small business. They have a certain way of thinking, and small-business problems simply do not fit into their way of thinking.

In the last few days, however, I have been shocked to discover that this is not just a matter of ignorance, but what appears to be a deliberate effort to mislead. And the most amazing thing is that the misleading reports are coming right from the Small Business Administration itself. If I am right about the nature of these reports, then we have an awkward problem. The SBA was set up by Congress to be the special protector of small business, to keep its finger on the pulse of small business, and report to Congress. It is extremely awkward then to find this agency propagandizing for the administration and its big business policies and turning out misleading reports on the status of small business.

The thing which attracted my attention to this matter was a news item which appeared in the Washington Post and Times Herald last Wednesday, January 11. An INS news story which purports to cover an interview with Mr. Wendell Barnes, the SBA Administrator, contained the following statement:

SBA Administrator Wendell P. Barnes insists that despite allegations to the contrary, small-business failures are at the lowest ebb of any normal year in recorded history.

Since this statement appeared to be contrary to all recent reports on business failures, I inquired as to the basis for it. I learned that the statement was something of a conclusion drawn from a SBA press release which was issued by Mr. Barnes on December 27. That press release contains the statement on business failures which reads as follows:

The extremely low rate of business failures is also a good sign for the future.

This press release further states that in 1955 the rate of business failures was 42 out of every 10,000 firms in existence, as compared with an average annual rate of 71 out of 10,000 over the past 55 years. In other words, the SBA had to go pretty far back into ancient history in order to find a normal year. On SBA's same basis of computation, business failures averaged only 20 for each 10,000 of operating firms in the 10 years before the administration took office. In fact, failures at the rate of 42 for each 10,000 firms in 1955 was greater than the average for the 20 years beginning with 1933—which includes the depression years.

The SBA press release relied on Dun & Bradstreet figures—which I presume to be good figures, as far as they go. According to the Dun & Bradstreet reports there were approximately 11,000 business failures last year. All of these can be counted as small-business failures—well over 90 percent of them involved total liabilities of less than $100,000.

During the first 10 months of 1955 there were slightly in excess of 9,000 business failures. It may be interesting to note the lines of business in which these failures took place. There were 1,800 failures in manufacturing and mining; there were approximately 1,000 failures in wholesale trade. There were 4,500 failures in retail trade; there were 1,100 failures in building and construction contractors. There were 700 failures among commercial services firms.

Here I should point out that Dun & Bradstreet does not report on all business failures. It reports only those failures among firms on its regular listings. And, the rate of failures which I have cited are failures for each 10,000 firms among Dun & Bradstreet's listings. Dun & Bradstreet does not purport to list all firms; there are many more business firms in operation. For example, Dun & Bradstreet had in its listings in 1953 only 2.7 million firms, and the rate of failures for 1953 is computed on the basis of a total population of 2.7 million firms. But the Department of Commerce figures show a total of 4.2 million firms in operation in 1953.

Naturally we would expect a higher rate of failures among those firms which are not listed and rated by Dun & Bradstreet than among those which Dun & Bradstreet does rate. Allow me to read therefore a short statement from a report on the Committee on Appropriations as of April of last year. Here the committee is reporting on advice from the Administrator of the Federal Courts. The statement is:

The committee was advised that approximately 65,000 bankruptcy cases will be filed in 1955, that a total increase to 75,000 in 1956 can be expected. This would be the highest number of bankruptcies recorded in the history of the country.

There are several other statements in Mr. Barnes' press release of December 27 which should interest the Members. One of these praises and looks forward to a "continuation of the Government's sound fiscal policies." The main sweep of the whole release is to forecast exhilarating levels of prosperity in 1956 and to assure that businessmen can confidently plan for expansion. There is no hint that small business might have any problems or that small business is doing less than bursting with prosperity.

There is a statement, however, which would have us believe that the "competitive position" of small business deteriorated all through World War II and continued deteriorating through the postwar years; and that after 1 year in office, in 1954, the administration checked and reversed the downward trend of small business. The statement is as follows:

The competitive position of small business deteriorated during World War II and the postwar years. This downward trend continued through 1953, and was not reversed until 1954.

Well, certainly the Dun & Bradstreet figures on business failures do not suggest that there was a downward trend in small business prior to this administration's taking office; nor would they suggest that an upward trend for small business started in 1954. On the contrary, the facts suggest that Mr. Barnes either has his trend charts upside down or that he is standing on his head.

If the Dun & Bradstreet figures on business failures are not sufficient to show that something is cockeyed in SBA's reporting, then I might cite the figures on the profit rates of manufacturing corporations which are compiled by the Securities and Exchange Commission and the Federal Trade Commission. Specifically I might cite the rate of profits on stockholders' equity. This is a standard way of measuring the profita-

bility of a firm. Stockholders' equity is the capital which the stockholders put in originally, plus all of the firms' earnings over the years which have been left in the firm and not paid out in dividends.

In 1952, the rate of profits of the smallest class of corporations—those with less than a quarter of a million dollars of assets—was 9.3 percent. In other words, corporations in this size class had a profit, after taxes, which amounted to 9.3 percent of the stockholders' investment. In 1953, the first year of the present administration, the rate dropped to 6.8 percent; in 1954 the rate dropped to 3.2 percent. And finally during the first three quarters of 1955, the profit rate of the smaller corporations was back up to an annual rate of a bare 6.4 percent. These figures hardly suggest any decline in the competitive position of small business before the present administration took over, but they do suggest a drastic decline in the competitive position of small business since this administration took over. And I might add the trend in the figures for the smaller corporations is precisely the reverse of the trends in the figures for the giant corporations. Those corporations which have more than $100 million of assets had a profit rate of 11.8 percent after taxes in 1952. In 1953, this rose to 12.1 percent. It stayed at 12.1 percent in 1954 despite the depression, the recession, the readjustment—or whatever you want to call it—of that year. And in the first three quarters of 1955, the profits of the giant corporations were up to an annual rate of 14.1 percent.

Comparing the profit rates between the first three quarters of 1955 and the first three quarters of 1952, we find that the profitability of the smallest class of firms has declined by 39 percent, while the profitability of the giant size class has increased by 25 percent.

These facts are alarming in themselves and warrant, I think, our serious attention. They also leave me skeptical however, as to whether they will receive the attention they deserve from the Small Business Administration.

The administration's claim that it has kept open the door of opportunity to new and small enterprises bears on a most important matter. There are slightly more than 4 million small businesses in the country as compared to about 5 million farm families. And it is quite probable that more people make a living from small business than make a living from farming. It is important that the door to small business be kept open, and that business opportunities grow with our growing populations and with the increasing business activity. But the most remarkable single business fact of the past few years is that the number of operating businesses in the country has remained almost unchanged. Between 1952 and the third quarter of last year, the national income had increased by about 12 percent. Our population had increased by about 5 millions. But on July 1 of last year, there were only 13,000 more business firms in operation than 2 years earlier—in other words, an average growth of 6,500 per year. In contrast, during the years 1948 through 1952, the number of business firms in the country increased by 210,000, or better than 50,000 a year.

It is true that the annual growth of the national income during the past 3 years has fallen far short of the rate of growth which took place during the Truman administration. But it will take something more than this fact to explain the cessation in the growth of business firms since this administration came into office. Whatever the explanation, the record of small business failures suggests that the administration has kept open the door for small business to go out, not to come in.

Mr. O'NEILL. Mr. Speaker, I yield 4 minutes to the gentleman from Pennsylvania [Mr. FLOOD].

Mr. FLOOD. Mr. Speaker, with reference to the pending matter I should like to say as my Pennsylvania Dutchmen do that I have something sweet and something sour to say. The sweet part is to say a word of praise to the small-business people, particularly the Philadelphia office, which handles my area, for the great work they did in this disaster relief, which affected northeastern Pennsylvania. That was commendable. They expedited the effort. Certainly I want to help them now to add to this fund, which was depleted under these national disasters. That is very proper.

However, Mr. Speaker, I must say that as far as the basic, the organic Small Business Act is concerned, it is my opinion that it became law not for the purpose of granting loans to small business but for the purpose of not granting loans to small business.

I sit on the Appropriations Committee and have had hearings on this bill since its inception. What I say is not mere hearsay. These things have taken place in executive session with the administrators of this act from the time it was born. I would like to point out, Mr. Speaker, in the early months in the first year of this bill, practically nothing was done under the original administrator. Then, if you will recall, a slight recession took place, or whatever you wish to call it. Then there was great excitement and orders to get loans out. "Let us make loans quick," and they did for a while. Then when that recession was corrected, the loans stopped. It is true that recently they have seen the error of their ways and efforts have been made to grant loans. But, Mr. Speaker, the act itself is bad. It is not the fault of the people who are handling the Philadelphia administrative office; it is the fault of the Congress. It is a bad law and they are handcuffed under the provisions of this act and cannot properly function. If we want to help small business, and I think we all do, let us amend the basic Small Business Administration Act in such a way that they can properly function for the purpose for which it was intended.

Mr. Speaker, I yield back the balance of my time.

Mr. ALLEN of Illinois. Mr. Speaker, I yield to the gentleman from Michigan [Mr. WOLCOTT] for a unanimous consent request.

Mr. WOLCOTT. Mr. Speaker, in behalf of the gentleman from Connecticut [Mr. SEELY-BROWN], I ask unanimous consent that he may extend his remarks in the debate on this bill.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. SEELY-BROWN. Mr. Speaker, the people of the Second District of Connecticut are vitally concerned with the legislation being considered by this body today. Businessmen and homeowners in my district suffered extreme damage from the hurricanes and floods which hit the eastern part of the United States last summer and fall. Hurricane Diane in particular inflicted millions of dollars worth of damage by destroying stores, homes and factories, community water and communication systems, and left hundreds of workers unemployed.

In these days of need, the Small Business Administration, Red Cross, Civil Defense workers, Army Engineers and other groups rendered invaluable assistance in the rehabilitation of the many communities affected.

Emergency offices were quickly established by the Small Business Administration to handle applications for loans with which to restore dwellings, inventories, commercial and industrial real estate. In Connecticut alone eight of these emergency offices were established, in addition to the agency's branch office located in Hartford. From these offices alone, the SBA received some 5,500 inquiries concerning types of assistance rendered, procedures for filing applications and other matters.

From the eastern part of the United States the Small Business Administration received, as of January 12, some 2,250 applications for disaster loans of which 1,933 have already been approved for a total of almost $29 million.

For the country as a whole and since the inception of the agency, SBA had approved, as of December 31, 1955, approximately 3,300 disaster loans for a little under $38 million. Applications are still being received as a result of Hurricane Diane and as we all know, only recently parts of California, Oregon and Nevada suffered great damage because of floods. Here again, emergency offices were established by SBA and within a week over half a million dollars in disaster loan applications had been received.

There is absolutely no question that the disaster loan authority of SBA must be increased. No section of the country is immune from the possibility of a major disaster, whether it be by tornado, hurricane, flood, drought, or freeze. It certainly is not inconceivable that they may occur in the same section of the country many times. Local and statewide credit facilities are not presently equipped to handle these situations and it is imperative that we have a program of Federal assistance to supplement local financing. I believe that in this respect the Small Business Administration disaster program is absolutely essential. The disaster authority under the act must be continued and enlarged.

Mr. O'NEILL. Mr. Speaker, I yield 1 minute to the gentleman from New York [Mr. MULTER].

Mr. MULTER. Mr. Speaker, I just want to take a moment or two to request the gentleman from Pennsylvania [Mr. FLOOD] to spread upon the RECORD precisely where he feels the Small Business Administration Act is bad. I had considerable to do with the preparation of the act and its enactment. Administration representatives have been before our committees. We have asked them to indicate to us what provisions of law must be changed or liberalized so that they can carry out the full and complete intent of the Congress. We have tried to liberalize it in every respect that they have indicated. We rejected their suggestions only when they sought to limit their functions or restrict their operations. The only thing that I know that is bad about the Small Business Act is the provision which destroys its independence by setting up a Loan Policy Board consisting of the Secretary of the Treasury, the Secretary of Commerce, and the Administrator. That is the only thing that anybody can point out and say is bad in this act. If there is anything else, I would like to have the gentleman come before us and tell us what it is. I am sure we will correct it very quickly.

Mr. O'NEILL. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania [Mr. FLOOD].

Mr. FLOOD. Mr. Speaker, the gentleman from New York should know that there is no district in this Nation which is more concerned with economic relief than the distressed economic area which I represent. This is not hearsay and I have discussed this matter in my committee and the record of the Appropriations Committee shows this problem. Now I think that is a proper request and I am delighted for the opportunity to have these people in the administration who have given me this request present to his committee and to mine exactly what they feel is proper and essential to have all of us get what we think we need. I will be glad to do it.

Mr. O'NEILL. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The resolution was agreed to.

PROVIDING HOSPITALIZATION AND CARE FOR THE MENTALLY ILL IN ALASKA

Mr. COLMER. Mr. Speaker, by direction of the Committee on Rules, I call up the resolution (H. Res. 368) providing for the consideration of H. R. 6376, a bill to provide for the hospitalization and care of the mentally ill of Alaska, and for other purposes, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 6376) to provide for the hospitalization and care of the mentally ill of Alaska, and for other purposes. After general debate, which shall be confined to the bill, and shall continue not to exceed 2 hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interior and Insular Affairs, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. COLMER. Mr. Speaker, I yield 30 minutes to the gentleman from Illinois [Mr. ALLEN], and pending that I yield myself such time as I may consume.

Mr. Speaker, this is an open rule providing for 2 hours of general debate, with opportunity to offer amendments. If I may have the attention of the chairman of the committee and the members of that committee, let me say that personally I am in favor of the objectives of this bill. I do want to call attention to the fact that I think a dangerous precedent is being set here, in that a million acres of Alaskan land is being earmarked for dedication for the support of this hospital. I believe the House will understand the danger of setting such a precedent.

I can appreciate that the Territory of Alaska is in a different position from the several States of the Union in that outside of the municipalities there is no source of revenue; and, therefore, there must be some fund created for the operation and maintenance of this institution. On the other hand, let us assume that gold, uranium, oil, or some other valuable mineral were discovered in substantial quantities. We would then have the situation where the hospital could well become more wealthy than the whole Territory of Alaska. It is certainly not impossible that another Klondike gold strike might be had on the particular land selected. This is particularly true in view of the fact that this is the first dedication of public lands. It is, therefore, natural to assume that those charged with the selection would select the best lands possible.

Therefore, Mr. Speaker, if the committee or some member thereof does not see fit to offer an amendment striking this provision, or at least substantially amending it, I shall myself offer what I consider to be an appropriate amendment to bring about the result desired.

Mr. ALLEN of Illinois. Mr. Speaker, I yield 5 minutes to the gentleman from Nebraska, Dr. MILLER.

Mr. MILLER of Nebraska. Mr. Speaker, the bill H. R. 6376, now before us, provides commitment procedures for the mentally ill in Alaska. It provides for finances to pay for the care of the mentally ill. The bill provides for an outright grant to Alaska for building facilities to care for the mentally ill. Title 2, section 371, is one which gives specific grant to Alaska for mental health purposes. It authorizes Public Health to make available $6 million beginning with the fiscal year of June 1958 with a payment of $1 million and then tapering off to the sum of $200,000 in 1966.

Section 372 of title 2 is the phase of the bill which I think Congress should give serious consideration. I will return to that section after briefly discussing title I.

The commitment procedure as outlined in title I of H. R. 6376 follows closely that recommended by the American Psychiatric Association. Their standards are very high. I believe no more than 3 or 4 States have been able to adopt and follow their recommendations. I doubt very much if the commitment procedures could be followed entirely by the Territory of Alaska. There seems to be little doubt that the commitment procedures for the insane in Alaska are in need of changes and being made modern. They are archaic at the present time. While I think the proposed standards are rather high in the proposed bill, I think it is well to try and reach perfection and this section of the bill should be adopted even though it could not be followed in toto by the Territory of Alaska or the new State.

Now I wish to direct some remarks to section 372 of the bill, which provides an outright grant of $6 million for the construction of the hospital and other facilities that might be needed in providing a comprehensive program for the mentally ill. It should be pointed out that the word "construction" means not only construction but equipment for building including transportation facilities, architectural, and engineering fees and the cost of the land to be acquired for the site.

If section 372 is adopted it will set up an entirely new policy of making an outright grant to any Territory or State for the purpose outlined. I do not believe we should adopt such a principle of making outright grants as provided in the bill.

The procedure in the past has been one that provided that the State or Territory match Federal funds. This system has been followed in the road program, the education program and similar programs offered by the Federal Government. If we start now to make outright grants, then the other Territories and States should have the right to be considered on the same basis.

It is my intention to offer an amendment to section 372 which will, in effect, make the Federal funds available on a matching basis. This is done in the Hill-Burton hospital bill and, indeed, Alaska has benefited greatly from the provisions of this bill. It is a liberal provision.

I ask my colleagues to give serious consideration to the principles and policies which would be adopted were the funds made available to the State without the matching provisions normally followed when Government funds are made available to the States.

I trust, Mr. Speaker, that you will give serious consideration to just how far the Federal Government should go in making outright grants to the States and Territories for the purposes of providing health facilities and care of those who might be ill.

I would further call your attention to the fact that after these facilities are

completed, it apparently will be the responsibility of the Federal Government to continue making appropriations for the mental hospital. Once the principle has been adopted, the door will be wide open for all of the States to ask for similar treatment. I trust you will support the amendment which will be offered, designed to correct this situation.

Mr. COLMER. Mr. Speaker, I yield such time as he may desire to the gentleman from Colorado [Mr. ASPINALL].

Mr. ASPINALL. Mr. Speaker, I shall wholeheartedly support this resolution making in order the provisions of the bill H. R. 6376.

Mr. Speaker, the legislation provided in H. R. 6376 is long overdue. H. R. 6376, sponsored by Congresswoman GREEN, is identical to H. R. 6334, introduced by Congressman O'BRIEN, chairman of the Subcommittee on Territories and Insular Affairs.

As amended, H. R. 6376 is fourfold in nature. It provides (a) for the establishment of modern legal procedures for the commitment and hospitalization of mentally ill in Alaska; (b) for the administration of the Alaska Mental Health Act by the Territorial government; (c) for the gradual assumption over a 10-year period, of financial responsibility for the program by the Territorial government through generous land grants and Federal grants-in-aid for hospitalization of those who are mentally ill; and (d) for constructing and equipping a hospital or hospitals and related facilities as are required.

The need for Alaskan mental-health legislation is not new. It has been recognized for many years. Bills in recent years providing for hospitalization and care of these unfortunate persons were also introduced in the 81st, 82d, and 83d Congresses. Approximately 1½ years ago, representatives of the Departments of the Interior, Health, Education, and Welfare, and Justice sat down together to work out a modern inclusive bill which would meet the needs of Alaska. H. R. 6334 and H. R. 6376 were prepared on the basis of the Draft Act Governing Hospitalization of the Mentally Ill, a publicaion of the United States Public Health Service, which carries the recommendations for enactment of the Council of State Governments.

I think it is well to remind ourselves that the commitment, care, and treatment of the mentally ill of the Territories are usually regarded as inherent responsibilities of the respective Territorial governments. Such is not the case with the Territory of Alaska, where responsibility was initially assumed by the Federal Government because the Territory at that time had no local government. Congress has specifically denied the Territorial legislature authority to amend or repeal the existing Federal law pertaining to the commitment of the mentally ill. As a result, Alaskans are being committed to mental institutions and cared for and treated in a private sanitarium under contract with the Department of the Interior pursuant to title 48, United States Code, sections 24, 46, and 47.

This procedure has been followed since 1905 and has many shortcomings and weaknesses. The hundreds of pages of testimony our Subcommittee on Territories has taken, both here and in the field, have brought to light the archaic and inhumane commitment methods used in Alaska.

Title I of H. R. 6376 establishes hospital procedures. Title II concerns financial and land grants. Title III contains a number of miscellaneous provisions relative to Federal statutes to be repealed by the act, the existing contract for the present hospitalization of Alaska's mentally ill, the transfer of unexpended balances of appropriations available to the Department of the Interior for care of Alaskan insane to the Governor of Alaska, and finally, that until July 1, 1956, expenses for transportation of all patients to be hospitalized outside Alaska shall be paid by the Justice Department.

H. R. 6376 is an administration bill. It has strong recommendations from the Department of the Interior, the Department of Health, Education, and Welfare, the Department of Justice, from the Governor of Alaska, the Alaska Legislature, the American Medical Association, and dozens of Alaskan organizations and individuals.

Mr. COLMER. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The resolution was agreed to, and a motion to reconsider was laid on the table.

TO AMEND THE SMALL BUSINESS ACT OF 1953

Mr. SPENCE. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 7871) to amend the Small Business Act of 1953.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H. R. 7871, with Mr. PRICE in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Kentucky [Mr. SPENCE] will be recognized for 1 hour and the gentleman from Michigan [Mr. WOLCOTT] will be recognized for 1 hour.

The Chair recognizes the gentleman from Kentucky [Mr. SPENCE].

Mr. SPENCE. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, one of the essential functions of a free government is to give aid and comfort to its citizens who have suffered from disaster. Most disasters that cause pecuniary loss can be insured against, but the disasters that come from a major force of nature such as the great floods which devastated the eastern seaboard last summer and the floods that recently devastated northern California cannot be foreseen, and their effects cannot be insured against at the present time. It is a big problem for the people affected; it is a big problem in which many Members of Congress are interested, for 28 bills have been introduced and referred to the Committee on Banking and Currency in an attempt to provide some form of insurance protection to these disaster areas where the people have suffered from forces far beyond their control.

On the 23d of this month the Committee on Banking and Currency will hold hearings on the general subject of disaster insurance, and we invite all Members who come from devastated areas to present their views to the commttee. We will consider all of the bills in an endeavor to work out a bill which will provide protection against natural disasters.

The Small Business Act provides that $150 million should be used for loans to small business. One hundred and five million dollars has actually been appropriated under the act. As of December 31, 1955, the Small Busness Administration had disbursed only $32 million in small-business loans.

It seems to me that is a small amount to be lent to the business interest of this country. When we boast of our prosperity, the small-business man should be able to expand his business and participate in this prosperity. I hope that in the future a liberal policy will be adopted by this administration which will give to the small-business man a new hope and assurance that he may obtain loans if his credit is good and his outlook is satisfactory.

When these disasters came, $25 million was authorized for disaster purposes. The Small Business Administration's figures show that the need for disaster loans as of December 31, 1955, totaled $38 million. This includes $12 million of loans which are really disaster loans but have been made as business loans.

There is a provision of convertibility in these contracts. When this legislation is passed, these loans will be converted into disaster loans. Instead of paying 6 percent interest, then these people will pay 3 percent, as provided for disaster loans.

As I stated, the need for disaster loans as of the end of the year was $38 million, and it is estimated that $16 million more will be needed for the west coast, or a total of $54 million.

We provide authorization for an additional appropriation of $50 million for disaster loans which will make the total amount available $75 million, giving a free board to the Small Business Administration of $21 million which they think will be sufficient to meet all needs for the next fiscal year.

Mr. Chairman, it must be remembered that we are not talking about money. These sums are authorized for appropriation and unless the Appropriations Committee makes the appropriations that they require the funds will not be forthcoming.

We ought to give our people the assurance that when these disasters fall upon them the Government is behind them and the Government will endeavor to give them relief. I think that would make a happier and less apprehensive people, and I hope this administration will use the liberality that we expect

them to use. We have spent vast sums of money for the people abroad. They were disaster loans. And, if we could do that, we certainly can take care of our people at home.

However, I think that we should insist, after looking over the record that the Small Business Administration has made, that they attempt to carry out the purposes of Congress in the future in a more liberal spirit than they have in the past. And, unless they do, what we do here today is a futility. Legislation providing for appropriations to afford relief from future disasters cannot be made with assurance of their adequacy. We must rely upon the best evidence we can obtain at this time. I do think that this bill has in it, so far as we can see, sufficient funds to carry relief to all those who need it.

We must remember that the $38 million that I have spoken of covered the necessary loans that resulted from the great disasters on the eastern seaboard. That book is now closed. But, now we have to meet a similar disaster in the West. I am confident that if we write a reasonable bill, the Committee on Appropriations will see that money is appropriated in conformity with the amounts we have placed in the bill.

Mr. Chairman, I hope that the bill will be passed and that the relief will promptly be afforded to these people who need it so much.

Mr. WOLCOTT. Mr. Chairman, I yield 8 minutes to the gentleman from New Jersey [Mr. WIDNALL].

Mr. WIDNALL. Mr. Chairman, first of all I should like to say that we all feel that the Small Business Administration moved in on the disaster areas in a very expeditious manner. I know from personal contact with the people back home who were very vitally affected because of floods in August, what a wonderful service they performed. I think we are all very proud of the program as it has worked out under the administration of Wendell Barnes.

I should like to address my remarks to other phases of the operation of the Small Business Administration. I think it is completely unfair and misleading to the American people to talk about the number of inquiries that an agency receives as though those inquiries meant that people wanted loans, were entitled to loans and should have obtained a line of credit from the Federal agency. Every single small business has the right to file an application with the Small Business Administration. There is nothing to prevent the filing of that application.

When we are considering figures as to the operation of the agency, we must look at the applications filed and the authorizations made and the amount disbursed. Looking at those figures, a fine record has been established by the agency, a mounting record of cooperation, a mounting record of disbursement and help throughout the length and breadth of the United States.

One thing, I believe, has not been pointed out and pointed out well to the American people; and that is the fact that the Small Business Administration has advised and consulted with prospective applicants and shown thousands of them how they could obtain their loans through normal lending agencies, their own local banks. Certainly, I do not believe it was the intent of Congress to set up the Small Business Administration purely as an agency that would give money to every small business in the United States that wanted a loan, regardless of background, operation or actual need. To the eternal credit of the agency, they have tried to secure participation of local banks. They have secured the cooperation of hundreds of banks throughout the United States so that lines of credit have been established for these prospective applicants through the banks.

What happens if a person gets a loan through the Small Business Administration, a direct loan without participation by a bank? If he is fortunate enough to be able to pay it off at the expiration of the lending time, he has not established a line of credit with a single local agency. He is no better off, creditwise, than he was before he started.

It makes me a little bit tired to hear all this talk about the administration being so much for big business and so much against little business. During this last period away from Washington, I spent considerable time talking to small-business men in my area and in my district. They have been doing well this year. They have been doing better than they did last year. They have had some fine business all up and down the little main streets through the district. Their business has improved. Employment figures show that business has improved, because the number of people employed in the United States is larger than ever before. There are just 2.4 million unemployed.

Where are those people employed? They are employed by small business to a much greater extent than by large business and they would not be spending unless small businesses were doing all right.

I have a few figures as to business failures that I should like to read into the RECORD. The number of failures in 1955 will be approximately 11,000. The annual average for the last 50 years is nearly 14,000. Failures were 14,768 in 1939, 13,619 in 1940, and 11,848 in 1941.

These figures are, of course, deceptive. The number of businesses in existence has risen greatly since the prewar period. In 1939 there were 3,222,000 businesses in the United States, while in 1955 there were 4,196,000. That evidences an expansion of business, and essentially small business, of almost 1 million firms.

The rate of failures was lower during World War II and during the Korean hostilities, as might well have been expected. New enterprises were not being formed at that time. It was also lower during the postwar years because of the unlimited demand for goods.

The present rate of failures is the lowest we have ever experienced for a normal period of economic activity.

Those are the facts, those are the considerations that we should keep in mind when we are trying to analyze what is happening in business in this country.

Within my district, and I can speak only for my district, I have not had one complaint in the last 6 months from any businessman as to his inability to obtain a loan through the Small Business Administration, or criticism of a lack of cooperation. The record speaks for itself.

Mr. SPENCE. Mr. Chairman, I yield such time as he may desire to the gentleman from Georgia [Mr. BROWN].

Mr. BROWN of Georgia. Mr. Chairman, I rise in support of H. R. 7871. This bill, as reported by the House Banking and Currency Committee, would increase the limit on the disaster loans authorization of the Small Business Administration from $25 million to $75 million and would make a corresponding increase, from $275 million to $325 million in the amount authorized to be appropriated to the revolving fund provided for in the Small Business Act to finance all loan and contract operations under that act.

H. R. 7871 was unanimously reported by the Committee on Banking and Currency on January 6, 1956. I am delighted that the President, in his budget message to the Congress on the 16th, also recommended an increase in the amount of money available to the SBA to make disaster loans.

The Small Business Act of 1953, which established the Small Business Administration, also provided, you will recall, for the Administration "to make such loans as the Administration may determine to be necessary or appropriate because of floods or other catastrophes."

By June 30 of 1955 the Small Business Administration had approved a total of 1,243 disaster loans in the amount of $8,614,587. On August 15, 1955, the first declaration of a disaster area in a series of hurricanes was made in the Carolina area. During August the hurricane declarations included the entire State of Connecticut, 3 counties in Delaware, 9 counties in Massachusetts, 12 counties in New Jersey, 6 counties in New York, 27 counties in Pennsylvania, and 1 county in Rhode Island.

To meet the needs of hurricane victims 21 emergency offices were established by SBA throughout the New England area. It was necessary at this point for the Administrator to invoke special emergency measures. Personnel were transferred to this area from other regional offices and, in addition, banks in the area assigned some 63 credit people to assist in the work at no cost to the Government. In addition, procedures were amended, increasing the authority of local offices and simplifying the forms necessary for small disaster loans.

It soon became apparent that the statutory limitation on disaster loans was going to be exceeded if all the eligible disaster loan applicants were to be given assistance. After consultation with congressional leaders and members of the White House staff, it was decided that until the Congress could reconvene and lift this limitation, the Small Business Administration would continue to make loans at its 6 percent business loan interest rate to qualifying businesses in the disaster areas. A clause was inserted in the loan authorization stating that the

rate would revert to 3 percent at such time as congressional action permitted.

Through December 23, 1955, the Small Business Administration had approved 3,224 disaster loans. Of these, 2,706 were 3 percent disaster loans totaling $26,667,000 and 518 were processed as business loans for a total of $10,202,000. These approval figures are cumulative and will exceed the dollar amount of loans outstanding by reason of repayment and cancellations. The great bulk of the disaster loans which have been made so far were in connection with the hurricanes and floods commencing in August of 1955. For these recent disasters 1,915 loans, totaling $28,004,141, have been approved. As of December 31, 1955, it is estimated that the need for disaster loans, as reflected in loans approved and applications pending—including disaster loans made as business loans—totaled $38,573,000.

To further accentuate the problem, floods struck in California, Oregon, and Nevada in the latter part of December, causing widespread destruction and extensive property loss to homes and businesses. While accurate estimates cannot be made at this time, it is possible that disaster loan applications for these areas may be received amounting to from $15 million to $20 million.

Only $450,000 of disaster loan authority is now available for loans to homeowners. The west coast floods apparently have affected a much greater percentage of homeowners than did the northeast floods. Homeowners, you will recall, cannot qualify for 6-percent business loans. The available $450,000 is obviously grossly inadequate to serve the humanitarian needs.

The Administrator of the Small Business Administration testified before the committee that increasing the disaster loan limit to $75 million, would be sufficient, insofar as he is able to estimate, to meet the need through June 30, 1957. This would allow for converting business loans to disaster loans in those cases where, as I have explained disaster loan applicants were granted business loans with the understanding that they would be converted to disaster loans if Congress raised the limit on such loans. In most cases repayments of these loans will not be due until February or March. If this legislation is enacted promptly these loans can be converted from 6- to 3-percent loans before any repayments are made. In case any repayment is made at 6 percent, however, a rebate would be allowed as to interest paid in excess of 3 percent; provisions to that effect were included in the loan authorization in each case.

Each year floods, fires, earthquakes, and storms have taken their toll of the Nation's resources. Since 1933 there has been available to inhabitants of stricken areas disaster lending programs carried out by RFC and SBA. Over this period, at one time or another, disaster areas have been declared in every State of the Union and the loan assistance granted has done much to alleviate suffering and assist in the rehabilitation of the inhabitants and resources of the areas. In view of the worthiness of the proposal and the urgency of the situation, I urge a favorable vote.

Mr. SPENCE. Mr. Chairman, I yield 5 minutes to the gentleman from New York [Mr. MULTER].

Mr. MULTER. Mr. Chairman, one of the finest tributes we can pay to the American people is that whenever a disaster strikes, whether at home or abroad, the American people rise up as a unit and go to the aid of the distressed.

I hope that the issue here today will not be confused. This discussion is not about the business loan program of the Small Business Administration. It should be limited to the disaster loan program. They are two separate and distinct programs, and we should keep that in mind at all times.

In any administration, particularly one dealing with money, there will always be criticism. I suppose we cannot stop any criticism being leveled against this administration whether it is deserved or not, as to its business loan program. I urge that we leave that debate for another time.

I must say with reference to the handling of the disaster loan program that the Administration moved in quickly and brought to bear all of its manpower, took them off whatever else they might be doing and concentrated their efforts on the disasters whenever and wherever they occurred in the country; and unfortunately there were many during the last year.

Of course, there were some hurdles that they had to overcome administratively. There were some mistakes made in the beginning as they moved into the program. There were some restrictions that should not have been imposed. Those difficulties have been worked out and eliminated, at least as far as the disaster-loan program is concerned. I think that that program is running smoothly and satisfactorily today.

The sole question we should concern ourselves with here today is the question of how much more money must be authorized so that this program may properly cover disasters that have occurred and to have enough money on hand to cover, as far as we can anticipate, any disasters that may unfortunately occur in the year ahead. We hope they will not occur, but we know from past experience that they will and we must prepare accordingly for that. I join with those of my colleagues who say that by increasing the authorization now to $75 million for the disaster-loan program, we are not raising the authorization high enough. I will support any amendment that may be offered to increase that authorization beyond the $75 million.

Bear in mind that every dollar of this money is being lent—it is not being spent. Any money that you authorize no matter what you appropriate in maximum amounts for a loan program is not being spent—it is being lent and it does not necessarily mean you are going to lend all of the money that you authorize or appropriate.

The testimony of Mr. Barnes as administrator before our committee amply demonstrates that $75 million will not be enough for this program because almost $56 million is practically committed now; the total applications for loans from recent disasters will certainly bring that amount higher than the $56 million that we have been told about up to now. If you increase it only to $75 million, you will have for the next year $19 million on hand plus, of course, whatever small payments may be made. We cannot be sure what those repayments will be because we do not have enough experience with a loan disaster program to be certain as to how fast this money will come back. Having in mind that we started the year beginning with the end of the first session of this Congress with a balance of $17 million on hand for our loan disaster program, we certainly should not start the new year with only $19 million uncommitted or unapplied for. Within a matter of four months the fund was exhausted in 1955. We must not run the risk of a repetition of that in 1956.

The figures were given to us by the Administrator and they are part of the record. They cannot be disputed. They amply demonstrate the need for a larger fund despite the reluctance of the administration to ask for it.

The question was raised during the debate on the rule, as to what interest rate may be charged. May I call your attention to the fact that throughout this act both for business loans and disaster loans, the law sets a maximum rate. It is not a fixed rate. It is the maximum.

What the rate shall be under that maximum is fixed by the Loan Policy Board consisting of the Secretary of the Treasury, the Secretary of Commerce, and the Administrator. Unfortunately, we know from experience that the maximum written into the law have been fixed in each instance as the rate to be charged. Until we wrote into the law a maximum of 6 percent on business loans, this administration in some instances was charging as much as 8 percent—mind you, 8 percent on money being borrowed by our Government for less than 3 percent. I say it is unconscionable to charge that rate of interest. When we learned of that we wrote into the law a proviso that the maximum rate shall be 6 percent on business loans. The Policy Board immediately fixed that as the uniform rate. We wrote into the law a section fixing an interest rate of 3 percent to 5 percent as the rate to be charged on pooled loans, and the Policy Board immediately said the maximum of 5 percent right across the board will be charged no matter where the loan is being made or to whom.

When we got to the disaster-loan program, we found they were charging 6 percent for disaster loans. So we wrote into the law that section fixing the maximum rate at 3 percent and that has now become the fixed uniform rate.

The sooner we eliminate the Loan Policy Board the better this entire program will operate.

In the meantime, let us increase the amount of the disaster-loan program sufficiently to meet present needs and reasonably anticipated future needs.

Mr. BETTS. Mr. Chairman, I yield 3 minutes to the gentleman from California [Mr. BALDWIN].

Mr. BALDWIN. Mr. Chairman, I would like to congratulate the Committee on Banking and Currency for the promptness with which they have brought out this bill. I am one of the Representatives from northern California. Both counties which I represent were among those declared disaster areas in the last weeks of December as a result of the flood.

The Small Business Administration moved into northern California with tremendous speed. They set up emergency offices throughout the major disaster areas, and made public announcements. It was something that the area appreciated.

Over 10,000 people were fed in public buildings. The cities of Yuba City and Santa Cruz were greatly affected by the flood. Many homes and businesses were ruined. Small communities on the Klamath River and Eel River were completely wiped out. Buildings were destroyed or washed away in the flood. Prompt action on the part of the House today in taking this bill up is something that will be appreciated by those people.

I would like to congratulate the committee on the action they have taken, and I urge the House to pass this legislation.

Mr. BETTS. Mr. Chairman, I yield 2 minutes to the gentleman from California [Mr. JOHNSON].

Mr. JOHNSON of California. Mr. Chairman, I wish to congratulate the committee on bringing up this excellent bill. In the area where I live in California we had a rather severe flood. In fact, a great many streets in the lower part of Stockton were nothing but streams flowing into the San Joaquin River. East of us 300,000 acres of land were flooded, which might have been prevented if we had had proper levees.

I had a very pleasant experience with the Small Business Administration. I have dealt with the San Francisco office of that group and they were always very courteous in trying to help us, and on several occasions the relief asked was given us. I appreciate that very much.

I am glad to see that this agency is doing such a fine job.

Mr. BETTS. Mr. Chairman, I yield 19 minutes to the gentleman from Colorado [Mr. HILL].

Mr. HILL. Mr. Chairman, a few moments ago someone discussed business failures. I would like to make a few remarks about that. It depends entirely on what figures you use, I agree. But let us see what the actual facts are. These figures I am giving are absolutely accurate. The number of failures in 1955, as near as we can figure it, will be about 11,000. The average number for the last 50 years is around 14,000. If we compare the failures with the figures during the recovery period from the recession of 1937 and 1938, we find that the failures are well below those levels. The failures of 1939 were 14,768. The failures in 1940 were 13,619. The failures in 1941, 11,848.

These figures of course are deceptive because the number of businesses in existence has risen greatly since the prewar period. That is, the total number of businesses in 1939 were 3,222,000. By 1955 there were 4,196,000. That is an increase of nearly a million.

To get a truer picture, we must examine the failure rate in terms of the number of failures per 10,000 of business firms.

The failure rate in 1954 and 1955 has been about 42 for every 10,000 concerns. For the years 1900–1955, the average failure rate has been 71. For the 3 years 1939–41, immediately preceding the war, the failure rate was 63 per 10,000 concerns.

The rate of failures was lower during World War II and during the Korean hostilities, as might well have been expected. It was also lower during the postwar years because of the unlimited demand for goods.

The present rate of failures is the lowest that we have ever experienced for a normal period of economic activity.

Mr. Chairman, may I take this opportunity to register my complete approval of legislation now under consideration to increase the disaster loan authority of the Small Business Administration. At this time also I believe further review of SBA's program and accomplishments is desirable.

I wish to state first, however, that my colleagues on the Small Business Committee, Mr. RIEHLMAN, Mr. SEELY-BROWN, and Mr. MCCULLOCH made a complete analysis and statement of SBA operations at the time amendments to Public Law 163, 83d Congress, were passed by the House this past session. I also made a statement during the debate on the amendments which fully demonstrated the progress made by the Small Business Administration since its establishment in 1953.

I have seen many letters of commendation in SBA files from congressional members of both parties commenting on the dispatch, thoroughness, and competency with which the agency carries out not only its loan program but all other functions as well. Now I cannot understand why criticism should be voiced at this time—or at that time either—particularly when critics ignore the full scope and effect of the agency's program.

For example, 23 months after passage of Public Law 163, as of June 30, 1955, SBA had approved 1,645 business loans. Of this number, some 327 had been canceled, leaving net approved business loans of 1,318 and, of this number, 981 had been disbursed or 74 percent. In fact, disbursements had been at the rate of 74 percent or 75 percent for a long time.

In addition, 1,243 disaster loans had been approved by June 30, 1955, 162 canceled, and 909 disbursed, or approximately 84 percent.

May I state here that loans are canceled for many reasons. An applicant's business may have taken an important upswing and the need for a loan has diminished, or a bank may take the entire loan after SBA has shown it to be a desirable loan, or such an adverse change has occurred in the applicant's business that SBA cannot make the loan.

It is certainly inappropriate to ignore bank participation in loans. I know there are a good many of my colleagues, however, who object to bank participation in loans. The theory of bank participation in loans is fine because of its effect, and, just as important, it keeps the business at home where it can be properly supervised and when the business firm gets to the point where it does not need Federal Government aid they are out from under Government control or direction; and that is exactly what we had in mind and have had in mind all the way through in the carrying out of this legislation.

I know there are objections to the bills, but after all if you are going to make a loan it is of the Government's money and it is going to be for a considerable length of time.

Mr. HILL. It is based on the volume of business and the way that business has been handled. May I ask any Member of this House who has had business experience, does he not want the Government to be careful? We want the Government to be cautious and we want all the experience and all the information we can possibly get from the local banker and the local people in reference to how this businessman has conducted his affairs in the immediate past.

I have the latest lending figures. I shall not bother you with reading them, but I will put them in the RECORD. Up to December 31, 1955, these figures show that the rate of loans approved has been 79 percent.

Mr. ROOSEVELT. Mr. Chairman, will the gentleman yield?

Mr. HILL. I yield to the gentleman from California.

Mr. ROOSEVELT. May I ask my colleague from Colorado 2 questions, 1 on this last subject? Is it not true that the figures on disbursal of approved loans are quite different from figures that are given out on approved loans? In other words, the net figure shown there does not always mean that is the amount of money that really went into actual small business concerns. Many loans are approved, then conditions are not finally met for one reason or other, yet they stand as approved loans and disbursal of the loan is never made. Does not the gentleman think we should ask the Small Business Administration to give us figures as to the actual amount of money disbursed rather than figures which on paper show loans approved?

Mr. HILL. When I used 79 percent of the loans that have been applied for, and I say they have been processed, I mean exactly what I said. Those are loans that have been approved. The gentleman is talking about volume of money. I know the gentleman is fair and he wants his questions to leave a fair impression. If a bank participates 25 percent, the bank's participation in a loan of $100,000 would be 25 percent or $25,000, but the amount and the volume of the loan that the SBA would make would only be $75,000. Let us follow that further. As we go along, most of these loans will be paid out over a period of time by the Government and by the banks. Some of these businessmen will not ask for the entire loan at the time they make the loan. If they received the full $100,000, for instance, they would

have to pay interest on that amount. I know of several instances in my own experience where they refused to accept the full amount and made it a part of the contract that they did not have to accept the money except as they needed it. That does not show on the record, but it does show in the percentage of loans that the SBA has made.

Mr. ROOSEVELT. Would it not be a good idea that we have a figure given to us of money actually received by Small Business? I think I can give it to the gentleman. The figure of disbursals, as of the 31st of December, 1955, is $32.4 million.

The CHAIRMAN. The time of the gentleman from Colorado has expired.

Mr. BETTS. Mr. Chairman, I yield the gentleman 2 additional minutes.

Mr. HILL. The gentleman is talking about the actual cash that would be paid out on a $100,000 loan. That may be only $10,000, but the SBA is obligated for the full $75,000. That is where our discrepancy comes about. I am sure the gentleman does not argue that they should force these small-business people to take the full amount of the loan at one time.

Mr. ROOSEVELT. I know of a good many cases where a loan has been approved subject to certain conditions and where the loan still stands on the books of the SBA as an approved loan. They keep it there even though the company tells them they cannot use the money.

Mr. HILL. For how long a time do they keep that on the record? I would like to find out.

Mr. ROOSEVELT. I wish the gentleman would find out. I have not been able to up to this time.

Mr. HILL. I have not asked them because no loan like that has ever come to my attention.

Mr. ROOSEVELT. They keep no figurges on that. Once they have approved it they never go back to find out if it has been paid.

Mr. HILL. They know whether they made the loan, do they not?

Mr. ROOSEVELT. Unfortunately, they will not give that information to me.

Mr. HILL. I am talking about the percentage of loans. I am sure the gentleman agrees with me they are approving 79 percent of the real applications that come down to the SBA and that they are doing a very good job.

Mr. ROOSEVELT. I think they are doing a very good job on that, sir, but I think they are giving out misleading figures as to the amount of money being given to small business.

Mr. HILL. I am sorry the gentleman was not here when we were talking about the business failures. There we have the same situation on that.

Mr. ROOSEVELT. Yes. May I make one brief comment on that?

Mr. HILL. Certainly.

Mr. ROOSEVELT. I think I know about that, and the figures the gentleman has given are the figures given to me, but unfortunately I do not think they told you, sir, that those figures are based upon Dun & Bradstreet's figures. They are not based, for instance, on Department of Commerce figures.

Mr. HILL. The gentleman would not advise me to assume that Dun & Bradstreet was not a reliable business barometer in regard to this matter?

Mr. ROOSEVELT. No. But I tried to explain to the gentleman that the figures Dun & Bradstreet puts out relate to those firms listed in Dun & Bradstreet. Now, there are many firms listed in Dun & Bradstreet. For instance, you would have to be in business some time, perhaps several years, before you could get listing. Therefore, if a firm has a failure in the first 1 or 2 years, that does not come into the Dun & Bradstreet figures.

One more example. Dun & Bradstreet had in its listings in 1953 only 2.7 million firms, and they computed the failures of that year on that figure. But the Department of Commerce figures show a total of 4.2 million firms in operation in 1953. I, therefore, think it is misleading for the Agency not to use the official set of figures which are available to them as Government figures.

Mr. HILL. In other words, the gentleman is saying to the House that he would much prefer the figures of the Department of Commerce?

Mr. ROOSEVELT. Yes; and the figures that the Committee on Appropriations of the House has available to them.

Mr. HILL. The gentleman does not think he would do that on all the figures the Department of Commerce puts out, does he?

Mr. ROOSEVELT. Well, I am not going to argue about that.

Mr. HILL. I think the gentleman, as much as I love him, would say, "Well, I prefer Dun & Bradstreet."

Mr. ROOSEVELT. If that is so, it is unfortunate.

Mr. GATHINGS. Mr. Chairman, will the gentleman yield?

Mr. HILL. I yield to the gentleman from Arkansas.

Mr. GATHINGS. I would like to ask the gentleman whether or not he took into consideration the many inquiries that have come into the various State offices; those various businessmen who have come there asking about the regulations and asking whether or not a loan could be made available to them to assist them in their business operations. Has the gentleman taken into consideration the various people who have come there under the setup they have that have been thrown out initially and not given an opportunity to file an application? I hold in my hand here a report filed by the Small Business Committee, 84th Congress, 1st session, and on page 16 it says that on the basis of the SBA record inquiries concerning loans at the rate of about 11,000 per month have been coming in. A total of approximately 231,000 inquiries would have been made to these various State offices, and out of some 231,000 inquiries only 5,085 have successfully passed the SBA screening operation. So it is the screening operation that I am asking the gentleman about. You get down a little further here and you will find that only 276 actually have received the money. You might bring out the percentage in a favorable light, but at the same time the screening operation has knocked out thousands upon thousands of small-business men of the opportunity to obtain a loan for their business or expand their operations.

Mr. HILL. The only answer to that is this: I know first-hand personally several offices in the gentleman's area or district, and some of them absolutely function entirely different than others. And we have the same situation in the Farmers Home Loan Administration. Any organization that loans money can be tough at the point of origination of the loan. I might say before I answer the gentleman's question that they had a great deal of trouble in finding the right type of qualified officials to take care of these applications.

Mr. GATHINGS. That may be true in some cases but I believe the fault lies in the policy under which the agency operates.

Mr. HILL. And they have done as good a job as they could do under the circumstances. Remember, they asked us for more money, and we said "Nothing doing." Now, we are responsible if they do not have a better set-up out in some of these offices than they have, because we curtailed the very thing they needed in the last session. Now, let us keep that in mind. We did not give them the additional help they needed so now you come in and complain. But, when you follow it up, you will find they should have had more qualified loan personnel. The President asked for $30 million additional funds last year to provide funds for additional Farmers' Home Administration; it was not granted either.

Mr. GATHINGS. Let me say this. You have about as many employees in the SBA organization as the number of loans they make. That is the truth of the matter.

Mr. HILL. I do not think that is the fact.

Mr. GATHINGS. The gentleman is a reasonable man. I cannot conceive of the gentleman from Colorado coming on this floor and defending the SBA. I cannot understand it.

Mr. HILL. First of all, I do not think it needs any defense. Ask the gentleman who introduced this bill if it needs any defense. Let us be sensible. The gentleman from Arkansas [Mr. GATHINGS] may be having trouble in his area, I do not know.

Mr. GATHINGS. I am devoted to the gentleman from Colorado. He has done a splendid piece of work on small business. But to come in here and tell this Committee of the Whole that he wants SBA continued, I cannot understand that.

Mr. HILL. If the SBA is not working well, according to the gentleman from Arkansas, I shall be glad to go with the gentleman to the SBA head office and go into the details and try to tell him what is the matter with the particular office he has in mind. What I should like to do is to take the gentleman and go down to the office with him. I know of an office that is working well. I think we might go into details with our friend from New York. He has a fine office there. They have done some wonderful work.

Mr. GATHINGS. I should like the gentleman to go to Arkansas.

Mr. HILL. The gentleman may have a bad situation in Arkansas.

Mr. GATHINGS. Does the gentleman know what the record of the office is in Arkansas? In the first many months of operation SBA approved six meager loans out of hundreds who sought them. There were hundreds of people who applied but they did not come to the point to which the gentleman has referred of being screened properly or presented with an application or approved to obtain a loan. There were only six loans made in Arkansas during a period of several months.

Mr. HILL. The SBA office in Denver, Colo., might have had a thousand loan applications, but I suggest that the gentleman go look at them; 780 of them could have been where mines had been closed for 10 years. What kind of a loan would that be?

Mr. GATHINGS. Would the gentleman from Colorado object to the recreation of the Reconstruction Finance Corporation?

Mr. HILL. I should say I would.

Mr. GATHINGS. The gentleman would be against that?

Mr. HILL. Absolutely. All I would have to do would be to look at the loans that the RFC made. One comes to my mind immediately. That is the Lustron loan.

Mr. GATHINGS. Does the gentleman know that the Reconstruction Finance Corporation made a profit of $620 million from the time of its inception in 1932 to 1952?

Mr. HILL. I cannot compete with the gentleman from Arkansas [Mr. GATHINGS] in sidestepping. The gentleman talks about how much they made. How they lost is the question. We are not talking about how much they made but how much they lost of the money of the taxpayers of this country.

Mr. GATHINGS. They made a profit of $620 million.

Mr. HILL. I will say to the gentleman that I will be more than happy to go with him to the SBA office and help him find out what the difficulty is with the office in Arkansas.

Mr. GATHINGS. I think we should wipe out the SBA and re-enact the Reconstruction Finance Corporation.

Mr. HILL. Then all you would have made would be political loans.

Mr. SPENCE. Mr. Chairman, I yield 5 minutes to the gentleman from California [Mr. HAGEN].

Mr. HAGEN. Mr. Chairman, I wish to congratulate the Banking and Currency Committee on their early action on this legislation which is vital to my district in the light of recent disaster floods in California which have caused hundreds of millions of dollars damage statewide and approximately $20 million damage in Tulare and Kings Counties in my district.

The committee amendment to this bill incorporates in the original Spence bill the proposal which I introduced to increase the disaster loan authority by $50 million without decreasing the availability of money for other types of small business loans. In this sense, I pride myself on being a coauthor of this legislation.

The necessity for this bill arises from the fact that the obligational authority of the SBA in the field of disaster loans has been exhausted in satisfying the needs of east coast residents as a result of disasters early last year. Very little remains of such authority to take care of applications arising from the recent California floods. According to the report of the administrator of this program, an additional $50 million will care for determined California needs and also future contingencies. We are hopeful that if this authorization is approved, the Appropriations Committees will see fit to support it by providing the necessary money.

The basic justification for the original disaster features of the SBA apply here. The program is valuable to owners of businesses and homeowners who have had their property destroyed through no fault of their own and who are in possible need of a lending program at a reasonable rate of interest to take care of the problem, not only of getting capital in situations where their acquired equities have been devalued, but also securing such capital at a rate of interest which their disaster condition warrants. I do not feel that the program is liberal enough in this regard, but even this program if augmented by the necessary authority, can do a great deal of good and has already held out hope to a great many distressed people in my district.

The existence of this program is beneficial in another respect. It provides some assurance that conventional lending agencies will more readily make loans at comparable rates of interest. To the extent this occurs, the Government program need not even become operational in particular situations.

Finally, I would like to remind you that this is a loan program and not a gift program. Amounts advanced by the Government are very likely to be returned in toto with an increment of 3 percent interest. This is sufficient comment on the solvency of this particular program which represents one of the conventional ways in which the Federal Government can demonstrate its interest in the distressed and unfortunate in this country.

Mr. SPENCE. Mr. Chairman, I yield 3 minutes to the gentleman from Oregon [Mr. ELLSWORTH].

Mr. ELLSWORTH. Mr. Chairman, along about the 22nd of December the flood waters in 6 of the 7 counties of the congressional district I represent caused serious damage, and those 6 counties are now declared disaster areas by both the Small Business Administration and the Farmers' Home Administration. Each agency has the power to grant disaster loans.

I am very much in favor of the bill now under discussion. I introduced a bill identical to this one on the second day of this session.

This bill will allow the Small Business Administration to make disaster loans in the Oregon disaster areas. Until this law is enacted the Small Business Administration's power to make disaster loans there is practically nil. The agency has only $450,000 left after having met demands from the northeastern and middle Atlantic disaster areas last summer. So it becomes quite apparent that if the western section of the country which has recently suffered these floods is to have equal treatment with the other parts of the country which have enjoyed the assistance of the Small Business Administration, this legislation will have to be enacted increasing the amount of the disaster lending capacity of the Small Business Administration.

I am very much in favor of the legislation. I hope it will proceed through the other body very rapidly because the Small Business Administration has anticipated, I think, the passage of such new authorization and emergency offices are now installed in the flood areas of Oregon and applications for loans are being taken.

The difference between what will happen if this law is not passed and what will happen if it is passed is that the flood victims of the Oregon-California areas may still be able to get loans, the small businesses may still be able to get loans, but unless this legislation is enacted providing money under the disaster category those little businesses in our part of the world will have to pay 6 percent for their loans instead of 3 percent, as in the case of the other disaster loans. So in justice and fairness this bill should pass.

Mr. CUNNINGHAM. Mr. Chairman, will the gentleman yield?

Mr. ELLSWORTH. I yield to the gentleman from Iowa.

Mr. CUNNINGHAM. Is there anything in this bill that directs the Small Business Administration to make loans when there is a disaster? The reason for that question is this. Two years ago Iowa had a terrific flood. The President of the United States declared a certain county a disaster area. Business concerns there applied for small business loans. They would not make the loans unless it was a bankable loan. Under those conditions, they did not need Small Business. What is it there for, if not to help people when a disaster strikes? I think there should be something written into this bill to hammer some sense into the heads of the Small Business Administration to make loans to help the people. They have not been doing that. I am willing to bet that you will find in your area thousands of people who have made applications for disaster loans in a disaster area and they will not all get loans. The Small Business Administration will rule their credit is not good and then refuse the loan. What good is that kind of help to the people when there is a disaster? I understand small business is supposed to help those in distress as the result of a disaster. If they can borrow at a bank they are not in distress. Is there anything in this bill to make the Small Business Administration do as it ought to do?

Mr. ELLSWORTH. All this bill does is increase the amount of money available for loans. The question the gentleman asks, I think, might be answered by one of the members of the committee. I can point out, however, that the pending legislation is needed because the Small Business Administration actually did loan nearly every cent it could under the disaster loan provisions of the law last year.

Mr. BETTS. Mr. Chairman, I yield 3 minutes to the gentleman from Massachusetts [Mr. HESELTON].

Mr. HESELTON. Mr. Chairman, I want to congratulate all of the members of the committee for their very prompt action with reference to what I believe to be a very important change in existing law. It so happens that during the August and October hurricane floods last year, portions of the First District of Massachusetts, which I represent, were severely affected. The officials of the Small Business Administration came into Massachusetts and set up emergency offices. So far as I was able to determine, they did excellent work in servicing all the applications. It is true that some loans were not granted, and I did have a few complaints. But so far as I know the entire force of the Small Business Administration was able to satisfy everyone with a justifiable appeal, acted promptly, and certainly contributed a great deal toward the relief of a very disastrous condition in that particular area of the country. Mr. Barnes and the officials of the Administration deserve our commendation.

I note from the committee's report that through December 23, the Administration had approved of 3,224 disaster loans, and apparently 2,706 of these amounted in all to $26,667,000. My further understanding is that under the terms of some emergency arrangement which was made, it was able to continue its assistance temporarily under the business loan authorization. In any event, I am convinced that these officials conducted their office on a truly bipartisan and nonpartisan basis, and it made no difference to them who applied so long as they qualified. They attempted to be of real assistance and they succeeded.

I know and you know that such disasters may come to anyone of our districts at any time. I am convinced that the action of the committee on this particular phase of the amendment it proposes is amply justified. Again, I want to congratulate the chairman and ranking members for calling their meeting as soon as they did and the full committee for reporting this bill to the floor as promptly as they have. I know it is deserving of our unqualified and unanimous support.

Mr. BETTS. Mr. Chairman, I yield 3 minutes to the gentleman from California [Mr. MCDONOUGH].

Mr. MCDONOUGH. Mr. Chairman, I take this brief time merely to say that I think, as the gentleman from Massachusetts [Mr. HESELTON] has just said, the action of the committee is timely and justified. However, I further feel that $50 million is not enough, because we are not certain what the disasters of 1956 may prove to be and we do not have the total amount of loss in some parts of the country for the disasters of 1955. A disaster occurred since the first of the year in northern California which may run into considerably more than we now anticipate, when it is totaled. For that reason I am proposing to amend the bill to increase the amount from $50 million authorization to $100 million. This is not an obligation on the debt. It is not an obligation on the tax structure of the Nation. It is a loan. With the possibility of disasters that may exceed this authority, why should we run the chance too little, too late?

Mr. JOHNSON of California. Mr. Chairman, will the gentleman yield?

Mr. MCDONOUGH. I yield.

Mr. JOHNSON of California. I think the gentleman has proposed a very timely amendment. In our State, and also in Oregon, we do not know what the amount of the disaster is, because the floods have not stopped and the rains are still falling. As you say, it is money to be loaned out to people who will pay it back at a reasonable rate of interest. I compliment the gentleman on his amendment.

Mr. MCDONOUGH. I thank the gentleman.

As far as my district is concerned, I am not in a disaster area. I appeal to the Members who are in disaster areas to support my amendment which I will offer under the 5-minute rule.

I trust my amendment will be approved.

Mr. SCUDDER. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. SCUDDER. Mr. Chairman, I arise in support of the amendment offered by the gentleman of California [Mr. MCDONOUGH], to increase the authorization for disaster loans from $75 million to $125 million and increasing the overall authorization for the Small Business Administration to $375 million.

If this amendment is adopted it will give a safe margin of authorization to take care of a very large catastrophe. It must be remembered that this is an authorization and not an appropriation. The appropriation bill will follow.

In my district and in many other locations in California, the people have suffered great losses. A very large percentage of the loans to be made will be for reconstruction of homes and while the average home loan is far less than the loans for business, it may well be that the requirements will exceed the $75 milion presently written into the bill.

I trust that this bill is speedily acted upon because of the fact that there presently remains in the disaster loan office only $450,000 for disaster loans. The people need the relief now and the urgency of this measure is unquestioned.

Mr. BETTS. Mr. Chairman, I have no further requests for time at this time.

The CHAIRMAN. Does the gentleman yield back the remainder of his time?

Mr. WOLCOTT. I reserve the remainder of the time on this side.

Mr. SPENCE. Mr. Chairman, can the gentleman reserve his time?

The CHAIRMAN. Unless the gentleman yields time it will be necessary to read the bill.

Mr. SPENCE. Well, we have one speaker on this side.

The CHAIRMAN. Does the gentleman desire to yield at this time?

Mr. SPENCE. I want a ruling from the Chair. We are entitled to the conclusion. I think the gentleman should use his time.

Mr. WOLCOTT. I have no further requests at this time.

Mr. SPENCE. That does not answer it. I would like a ruling from the Chair on whether we have the conclusion.

The CHAIRMAN. Ordinarily that is true. The gentleman from Michigan also has 20 minutes remaining which he does not desire to use at this time, but he has reserved his time.

If there are no further requests for time——

Mr. SPENCE. I yield the balance of our time, 35 minutes, to the gentleman from Texas [Mr. PATMAN].

The CHAIRMAN. The gentleman from Texas is recognized.

CRITICAL OF SBA

Mr. PATMAN. Mr. Chairman, I know I have been critical of the Small Business Administration, and I expect to be critical in the statements that I shall make here today. But I am not doing this in my own interest, certainly not, and not in the interest of the Democratic Party; I am doing it in the interest of the country. The criticisms that I point out will be such criticisms as the Republicans can correct if they desire and not have any political issue over the Small Business Administration.

REPUBLICANS VULNERABLE

I am going to state why the SBA has absolutely been a disgrace, and if I have the time I am going to prove it, and I am going to give you 1, 2, 3, exactly the criticisms that make the Republicans vulnerable and give the Democrats an advantage. I am doing this not for the purpose of making a political issue out of it, but for the purpose of trying to help the Administration; and you gentlemen when you hear them can get after the Small Business Administration and correct these criticisms, and in that way we will still have a bipartisan sponsorship of the Small Business Administration. That is what we want; we should not have any partisanship in it.

This Small Business Administration has been organized according to the appropriation authorizations for three purposes: One is to make business loans, and for that purpose $150 million was authorized; and, two, accept prime contracts from the Defense Department or other departments of our Government, take those prime contracts and allocate them to small business concerns, and for that purpose $100 million has been set aside; the third purpose is for disaster loans, and for this purpose $25 million has been set aside. I am not going to argue with the Small Business Administration, criticise them, or anything else, about disaster loans; that is not the part I am critical of; it is what they were originally organized for and are failing to carry out that I shall criticise them about.

TO TAKE PLACE OF RFC

This agency was organized to take the place of the Reconstruction Finance Corporation. The Reconstruction Finance Corporation was organized in 1932. I was here and voted for it.

BIG BUSINESS LEAD FIGHT AGAINST RFC

It was organized for three purposes: to help the banks, the railroads, and the insurance companies; and I think they saved over 7,000 banks and a majority of

the railroads, and a large number of the insurance companies. As soon as they were saved and they were on their feet again and the RFC was only helping the little fellows and independent business and was not needed by big business they commenced a campaign to destroy the RFC. Since the RFC was no longer needed by big business like railroads, banks, and insurance companies a great clamor to destroy RFC arose, and it was destroyed; and this organization was set up for the purpose of taking the place of the RFC. Let us see how far they have gone in taking the place of the RFC.

The situation today with reference to small business is—and I will have to compare it with big business in order to show the situation, and I am not criticizing big business because it is big, I do not attack big business because it is big; we have no right to attack big business for that reason. But if they go beyond their bigness and use their size to destroy smaller concerns, to destroy competitors and gouge the public on extortionate prices, there is where we should come in and stop them; we should be an umpire; we should stop men from injuring one another.

NINE MONTHS UNDER DEMOCRATS IN 1952 AND NINE SIMILAR MONTHS UNDER THE REPUBLICANS IN 1955

I have here a statement of cash dividends and retained funds available for expansion of the smallest and largest manufacturing corporations for the first 9 months of 1955 and the percent changes from the first 9 months of 1952. Here is where the Republicans are vulnerable. I am going to talk frankly to you; you are vulnerable today, and I am giving you these figures so that you may overcome them if you wish between now and election time and there will be no issue. That is the way it should be. This is January; the election is the first Tuesday in November. There will be plenty of time to correct them. Therefore, I am giving you this information so you will correct the situation.

Let us analyze the percentage change from 1952 to 1955.

Profits after taxes of small concerns of less than a quarter of a million dollars, minus 53 percent. Cash dividends minus 33 percent. Retained profits minus 55 percent. Depreciation and depletion plus 3 percent. Retained profits minus 32 percent. Annual rate of profits and percent of stockholders equity, minus 38 percent.

Those figures cover the little fellows throughout America—minus, minus, all the way down the line and covers the first 9 months of 1952 as compared with the first 9 months of 1955.

Now, let us look at the big fellows and compare their figures. These are corporations with over $100 million of assets and take their profits after taxes in the same 9 months of 1955 compared with the same 9 months of 1952, the last Democratic year. Profits after taxes, and these are $100 million concerns, percent change from 1952, plus 63 percent. Cash dividends plus 30 percent. Retained profits plus 107 percent. Depreciation and depletion plus 56 percent. Retained profits 79 percent. Annual rate of profits and percent of stockholders equity, plus 27 percent. Everything plus for these over $100 million concerns.

REASONS FOR SBA LOANS TO SMALL BUSINESS

(a) Business operates on two kinds of finance—debt and what is called equity capital. Equity capital is usually raised by the sale of common stock. The people who put up equity capital are owed no definite amount of money; they simply own a share of the business and share in the profits or losses of the business.

(b) Despite the great amounts of equity capital put into businesses, business debt is also a staggering sum. At the end of 1954, the debt of incorporated businesses alone stood at $208.9 billion.

(c) The RFC was created in 1933, by President Hoover, at a time when big business needed help. During the first 10 years, RFC aided more than 7,000 banks and 100 insurance companies. One-third of the railway mileage of the country fell into bankruptcy even after help from the RFC. Before RFC was abolished in 1953, it had made loans to all kinds of businesses and financial institutions. It made loans totaling more than $12 billion. It paid its expenses, its salaries, its office rent, and so forth, and then made a profit on its loan business. When big business became flush and no longer needed Government loans, the RFC was abolished and its function for making small-business loans was transferred to the SBA.

It has long been recognized that small firms do not have access to the equity markets. A recent survey by the Department of Commerce shows that most of the small firms which tried to obtain equity capital during 1954 did not succeed. Only 33 percent of the funds which small firms tried to obtain were actually obtained. The same survey shows that small business had better luck in getting loans, but even here the demands were far from satisfied. Twenty-four percent of the funds which small business tried to obtain on loans were not obtained—Department of Commerce, Survey of Current Business, October 1955, page 19.

A great many studies, surveys, and so forth have been made over the past 20 years by congressional committees, by private organizations, the Federal Reserve Bank, and so forth, all of which lead to a general recognition of the fact that presently existing financial organizations fall far short of serving the legitimate needs of small business for loan funds. This is particularly true of long-term loans which are needed for business expansion. The kind of savings which local commercial banks have at their disposal can be made available for short-term loans such as inventory financing, but the commercial banks cannot do an adequate job of supplying small business with long-term loans.

The present administration has made a great point of business expansion, and it has made serious changes in the Government's economic policies with an explanation that these are intended to foster business expansion.

In recent years expenditures on new plant and equipment by United States business has amounted to between $25 and $30 billion annually—see Department of Commerce, Survey of Current Business, September 1955, page 4.

Recent experience indicates that the need of small firms for outside financing is not decreasing but increasing. But the administration's policies have had just the opposite effect on big business. The big corporations are now accumulating more costless capital than ever before. The 1953 and 1954 changes in the tax laws and particularly the removal of the excess-profits tax, gave big business an incentive to raise prices, to make more profits, pay higher dividends, and yet obtain more profits, which are available, for expansion purposes. Changes in the profits picture for large and small manufacturing corporations between the first 9 months of 1952 and the first 9 months of 1955 may be noted as follows:

Corporations in the giant class, those with more than $100 million assets had 63.8 percent more profits after taxes; paid 30.1 percent more dividends; retained 107.8 percent profits in the business; received 56.7 percent more funds from depreciation and depletion allowances and considering retained profits and write-off allowances together, accumulated 79.8 percent more funds which are available for expansion.

In contrast, corporations having less than one-quarter million dollars of assets had 53.7 percent less profits after taxes than in 1952; they paid 33.3 percent less cash dividends; they had 55.8 percent less retained profits; and counting retained profits and depreciation and depletion allowances together, they had 32.4 percent less funds available for expansion.

Profits, cash dividends, and retained funds available for expansion of smallest and largest manufacturing corporations, 1st 9 months of 1955 and percent changes from 1st 9 months of 1952

[In millions]

	Corporations with less than ¼ million dollars of assets		Corporations with more than $100 million of assets	
	1955	Percent change from 1952	1955	Percent change from 1952
Profits after taxes	$132	−53.7	$7,057	+63.8
Cash dividends	$18	−33.3	$3,165	+30.1
Retained profits	$114	−55.8	$3,892	+107.8
Depreciation and depletion	$174	+3.6	$3,550	+56.7
Retained funds—available for expansion	$288	−32.4	$7,442	+79.8
Annual rate of profits as percent of stockholders' equity	6.4	−38.6	14.1	+27.0

BIG-BUSINESS MAN'S ADMINISTRATION

Mr. Chairman, that shows this is a big-business man's administration. It is a big business administration. You cannot escape those figures because they are there. They are your own figures. I am giving these to you so that you will have plenty of time to correct the situation between now and the first Tuesday in November. I think you ought to start pretty soon because this ought to be done promptly.

SCOPE OF BUSINESS POTENTIALLY ELIGIBLE FOR SBA LOANS

(a) For loan purposes, SBA has made different definitions for manufacturers, wholesalers, retailers, and so forth. Moreover, certain types of businesses such as newspapers, taverns, and so forth, have been declared by SBA's Loan Policy Board to be ineligible. SBA estimates that of the approximately 4.1 million business firms in operation in the United States, 3.5 million come within its definitions of eligible small businesses.

(b) It is estimated that the 3.5 million firms potentially eligible for SBA loans account for between one-third and one-half of the volume of business done in the United States, excluding businesses of farmers.

Let me refer to loan inquiries and applications accepted. According to the last report we have they were receiving 11,000 inquiries per month. The SBA has been in business since August 1953, therefore this is the thirtieth month of their existence. That would be about 310,000 applications for aid received from small business follows all over the Nation asking, "We want your assistance. You were set up by Congress to give us aid."

How many applications have they had? They have had 7,110 formal applications, just as the gentleman from Arkansas [Mr. GATHINGS] said. Here is where you are vulnerable, my friends on the Republican side. I do not hate a single Republican, I do not dislike a single Republican. I am a friend of every Republican on that side. As individuals you are wonderful. As a party sometimes you are not so good. But I am telling you now how to help your party.

Are you going to have a large percentage of 310,000 people get up at 4 o'clock in the morning, drive their automobiles 200 miles to the nearest Small Business Administration office, wait in line to finally see some clerk, be screened, go to somebody else and be screened, then finally get to the boss and be told: "You should not file. You should go back and do something else." Out of these 310,000 approximately 7,000 were able to get a written application in.

The applicants who have not succeeded, and who have hope held out to them, who have traveled hundreds of miles, who have spent their money for hotel bills and to hire accountants and engineers, who have received statements from bankers that they would not accept a loan, who run back and forth day in and day out for months, have spent several times the amount, in pursuing unsuccessful applications than the few successful applicants received in aggregate loans. An agency of that type is a disgrace to our country.

LOAN INQUIRES AND APPLICATIONS ACCEPTED

(a) The House Small Business Committee made a study of SBA's records in April of 1955 and found that up until that time, SBA had received an average of 11,000 inquiries per month from small businessmen seeking loans. These inquiries included telephone calls, letters, and office visits.

It is SBA's policy to discourage small businessmen from filling out formal applications. It has instructed its field officers to discourage such applications unless the officer finds on interview that he thinks the loan will be approved. In past experience, these officers know that only a minute fraction of the small business applications for loans will meet the standards of approval which SBA actually practices. In view of the experiences which small businessmen have, who do file formal applications, SBA's usual refusal to let such applications be filed is perhaps the most merciful thing it does for small business.

After 2½ years of operation, through December 31, 1955, the SBA had allowed 7,110 formal applications to be filed. A number of these were subsequently withdrawn, either on the initiative of the applicant or SBA, leaving a total of 6,013.

Initially, SBA approved 2,270 applications, but 441 were subsequently canceled, either by the applicant or by SBA leaving a net total of 1,829. Of these only 611 were direct SBA loans, and another 430 were bank participation loans in which SBA made an immediate commitment to put up a part of the loan funds. An additional 778 were what are called deferred participation loans. In these latter loans, SBA makes a commitment to put up some part of the funds if at some later date the local bank should call upon SBA to do so.

In summary, out of 3½ million potentially eligible small businesses in the United States, less than 2,000 small businesses have had a loan approved, including deferred participation loans.

Number and amount of business loan applications made to the Small Business Administration August 1953 through December 31, 1955

[Amounts in millions]

	Number	Gross amount [1]	SBA's share [1]
Total applications:			
Received	7,110	$400.9	
Withdrawn	1,097	62.3	
Net applications	6,013	338.7	
Declined	3,423	194.6	
Pending	320	20.1	
Approved	2,270	114.0	
Canceled	441	22.4	
Net approvals, total	1,829	91.6	$76.2
Direct SBA loans	611	26.3	26.3
Immediate SBA participation	430	23.8	19.0
Subtotal	1,041	50.2	45.3
Deferred SBA participation	788	41.4	30.8

[1] Details may not add to total due to rounding.

AUTHORIZATIONS AND APPROPRIATIONS

(a) Public Law 163, which became effective in August 1953, authorized SBA to have a revolving fund for which the following amounts could be outstanding at any one time: $150,000 for bank loans, $100,000 for small-business prime contracts, $25,000 for disaster loans, total $275,000.

(b) The initial appropriation to SBA's revolving fund was $55 million and on 2 occasions, for fiscal 1954 and fiscal 1955, additional appropriations of $25 million each were made, giving the revolving fund a total of $105 million.

Appropriations have not been earmarked for purpose but since no more than $25 million is authorized to be outstanding on disaster loans and SBA has used none of its appropriations to take the prime contracts, it is apparent that SBA has had a minimum of $80 million available for small-business loans.

AMOUNT OF LOANS APPROVED

(a) The 7,110 formal applications which were filed with SBA through December 31, 1955, requested a total of $400.9 million.

(b) The 1,829 loans approved by SBA and not subsequently canceled were approved for a total of $91.6 million, a major share of which when disbursed, will come from bank funds.

(c) The 611 direct loans approved by SBA will take $26.3 million from SBA funds and in addition SBA is committed on immediate participation loans to put up another $19 million, making a total of $45.3 million of immediate demand on SBA funds. Assuming the wild possibility that SBA will be called upon to put up its total contingent commitment on deferred participation loans, there would be another $30.8 million of SBA funds involved.

DISBURSEMENTS

As compared to at least $80 million which SBA had available for small-business loans, its total disbursements on small-business loans through December 31, 1955, were only $32 million.

Disbursements of SBA funds on business loans, August 1953 through December 31, 1955

Type of loan	Number	Amount (in millions)
Direct	468	$18.4
Immediate participation	308	12.2
Deferred participation	(1)	1.8
Total		32.4

[1] Represents purchases of certain deferred loans.

Through December 31, 1954, the total disbursements of SBA funds amounted to $13.1 million. Thus more than 60 percent of the disbursements for the whole 2½ years of operation have been made within the last calendar year.

The actual disbursements for business loans are as follow:

June 30, 1954	$1,900,000
June 30, 1955	18,300,000
Dec. 31, 1955	26,100,000

PROCUREMENT—DEFINING SMALL BUSINESS

When Public Law 163 was passed in August 1953 it reiterated the public policy that small business shall be given a

fair proportion of Government purchases and Government contracts for supplies and services. This law also gave the SBA the very urgent task of making sensible definitions of small business. The statute states that a "small-business concern shall be deemed to be one which is independently owned and operated and which is not dominant in its field of operations." In addition to the foregoing criteria, the Administration—meaning the Small Business Administration—in making a detailed definition may use these criteria, among others: Number of employees and dollar volume of business—section 203, Public Law 163, 83d Congress:

The report of the House Banking Committee accompanying the SBA bill speaks of a number of ways in which firms may be classified as to size, such as gross assets, dollar volume of sales, number of employees, etc., and then states:

"Within any of these classifications, as well as others not mentioned, there is wide variation between industry and commercial groups as to what is small business and what is big business.

"The determination must take into consideration the general size structure within the industry or commercial group to which the particular concern belongs. For instance, a given volume of sales or number of employees for a concern considered small business in one industrial group, if applied to a concern in another industrial group might well place that concern in the big business category of its particular group. It would be impractical to include in the act a detailed definition of small business because of the variation between business groups. It is for this reason that the act authorizes the administration to determine within any industry the concerns which are to be designated small-business concerns for the purposes of the act."

As yet SBA has made no definitions of small business for purposes of determining whether or not a fair proportion of Government contracts is going to small business.

In the meantime the Department of Defense and the other Federal procurement agencies have a definition of 500 employees or less, irrespective of industry—which is clearly contrary to both the intent and plain words of the statute.

Reports on the basis of 500 employees without respect to industry are noninformative and nonsensical. For example, the largest blueprint plant in the country is reported to have less than 500 employees. On the other hand, the smallest motor-vehicle plant in the country is reported to have about 35,000 employees.

In summary, no attempt has been made to make even a casual appraisal of the question of whether small business is getting a fair proportion.

It is wholly false hope to the people of this country.

Now, you gentlemen on the Republican side can correct that. I am giving you these facts so that you can, and I am reiterating, and you will not deny it is a disgrace so far as small-business loans are concerned. All right. I will put all these facts in the RECORD.

ANOTHER CATCH—NOT DISBURSED

The 7,110 formal applications were approved, but there is another catch to that. After they are approved, then you have just as hard a time getting the money paid out. Do you know how long it takes? One hundred and forty-six days, average, to get that money paid out, lacking 4 days of being an average of 5 months. That is a disgrace, gentlemen. You can correct that between now and election day and not have it a part of the campaign. If you will, it can be corrected.

COMPARISONS WITH RFC

(a) In 2½ years of operation SBA had authorized 611 direct loans totaling $26.3 million. SBA loan limit during this period was $150,000 for an individual loan. RFC loans were reported separately for loans in the amount of $100,000 or less. Thus, a comparison between RFC and SBA understates RFC's small business lending but the comparison may be made as follows:

Year	Number	Amount (in millions)
1949	3,073	$77.5
1950	4,904	136.2
1951	2,411	75.0

Thus it is apparent that in the year of RFC's smallest lending activity, it authorized about three times as much money in loans to small business as SBA has authorized in 2½ years.

While it is true that SBA takes credit for bank participation loans made to small business, it is also true that RFC made substantial amounts of bank participation loans to small business. But the RFC record does not break down its participation loans as between small business and big business.

SOCK THE PEOPLE THE LIMIT ON INTEREST

Now let me show you about the interest rate, and here is another place the Republicans are vulnerable, because the people have an idea that you hit them just as hard as you can with interest every opportunity you get, every chance you get, and you sock them with the limit. All right. You ought to correct that. I am inviting it to your attention. I am calling it to your attention. Our investigation last August by the Committee on Banking and Currency disclosed that the Small Business Administration was charging some of these little fellows in distress 8 percent when the local bank was probably charging them 5, a punitive rate of interest. Our committee stopped it and put a provision in there covering it. Let me quote you the exact language. Here it is right here in the 1955 law: "and any such loans shall bear interest at the rate prevailing in the area where the money loaned is to be used."

Do we understand that? What is the rate of interest? "Any such loans shall bear interest at the rate prevailing in the area where the money loaned is to be used."

That is the rate, if it is 4 percent or 5 percent or 6 percent. Then there is another phrase added: "but shall not exceed 6 percent per annum."

GOVERNMENT BY MEN INSTEAD OF GOVERNMENT BY LAW

All right. Now, that is very plain. Anybody with any sense at all, common, book, or horse makes no difference, will understand that, that first it is the local rate, it is the prevailing rate, but shall not exceed 6 percent. Do you know what that Small Business Policy Board, composed of Mr. Humphrey, Secretary of the Treasury, Mr. Weeks, Secretary of Commerce, and Mr. Barnes, Administrator of the Small Business Administration, did? Notwithstanding this specific language, they issued an order that all rates of interest should be 6 percent, not less. Now, there is a case where you are nullifying existing law by regulation of an agency. There is a case where you are recognizing and endorsing government by men instead of government by law. That is a bad thing to do, I will say to my Republican friends.

INTEREST RATES

Investigations of the House Banking Committee in the summer of 1955 revealed that on its direct loans SBA was charging small business 6 percent interest, without regard to prevailing rates in the locality. On its bank-participation loans, however, SBA charged whatever rate the local bank charged except that it would not permit a rate of not less than 5 percent. On some loans it charged a rate as high as 8 percent.

The amendments to the SBA law which became effective in August of 1955 specified that on its direct loans, the SBA shall charge the prevailing local rate, but in no instance more than 6 percent. According to Mr. Wendell Barnes' testimony before the House Banking Committee during this session of Congress, it is still SBA's policy to charge 6 percent on direct loans irrespective of the prevailing rate in the locality where the loan is made.

You got out on a limb on this; you have gone too far. It is a good political point for us, the Democrats. We should not be allowed to use it, because you should say, "As soon as it was called to our attention, we corrected it." Well, let us see you correct it. I hope you do and relieve us of that point. It will help the little fellow if you will.

I could point out other cases where the law has been nullified, but I shall not do it at this time.

SBA LOAN PRACTICES

SBA loan policies are determined by its Loan Policy Board. The Loan Policy Board is established by law to consist of the Administrator of SBA, the Secretary of the Treasury, and the Secretary of Commerce or designees of the latter two Secretaries.

SBA loan policies, including standards of eligibility, interest rates, and so forth, have been made by the Loan Policy Board.

As previously indicated, SBA's practice is to discourage the filing of a formal application unless the officer interviewing the applicant thinks the application will pass current loan standards.

The Small Business Committee has received a great number of complaints along the following lines:

(a) Delays in processing applications.

(b) Sending applications back requiring voluminous information, employment of C. P. A., and so forth.

(c) Further delays and suggestions from SBA that the amount of the loan, the time for when the loan is requested,

and so forth, be reduced and that more security be pledged.

(d) Security requirements so high that an applicant being able to meet the requirements would not need SBA assistance.

(e) Finally, getting a loan approved and when the final papers come through, additional conditions and terms have been added; such as the amount of salary the officers may receive, requirements for a periodic set-aside of gross receipts, and so forth.

(f) Delays in making disbursement on the loan long after all conditions, terms, and so forth, have been met.

Mr. Chairman, it is a disgrace. I am telling it to you so you can correct it. Take it out of politics. This is January, the election is in November. You have time in which to do it.

NEGOTIATED CONTRACTS

Let us now consider the subject of negotiated contracts. Remember, there are two people on this Board who are "in the know" in the administration. They come as near to being on the inside and having as much to do with directing the affairs of this Board as any two people in the Presidents' Cabinet. Let us see about these negotiated contracts.

The Committee on Armed Services of the House recently made a study of Department of Defense contracting methods, and they found that from January 1953 through June 30, 1955, 94 percent of all defense contracts awarded had been negotiated. Naturally, they went to big business.

That is wrong. That is a good point that the Democrats have against you, and I hope you correct it. You are vulnerable there.

The Department of Defense has conveniently defined a fair proportion of these loans as whatever small business can get, provided they are given an equitable opportunity to compete. But small firms are not given a good chance. So, when the contracts are awarded on a negotiated basis this method cuts out the small man.

The Committee on Armed Services has been conducting some very important investigations and it has disclosed that in 2½ years firms employing less than 500 employees got 64 percent of the value of the contract awarded where they were advertised and where there was competitive bidding. But where they were negotiated small business only received 13 percent. Who is favored there? Big business.

That is a point against my Republican friends. They are vulnerable there. That is a point in favor of the Democrats. They ought to overcome that vulnerable point.

They have 750 employees and those 750 employees have collected more money from the United States Government that the aggregate of the loans that the Small Business Administration has put out, direct business loans. That is another reason why it is a disgrace.

BIG BUSINESS GETS THE CONTRACTS UNDER THIS ADMINISTRATION

The Armed Services Procurement Act of 1947 reiterates long-standing public policy that Government contracts shall be awarded on the basis of advertised competitive bids. This law sets out, however, certain exceptions for emergency use.

The House Armed Services Committee recently made a study of the Department of Defense contracting methods and found that in January 1, 1953, through June 30, 1955, 95 percent of the value of all of the defense contracts awarded had been negotiated.

The Department of Defense has conveniently defined the fair-proportion mandate of the law as whatever small business wins provided small firms are given an equitable opportunity to compete. Small firms are not given an equitable opportunity to compete on negotiated contracts. the Armed Services Procurement Act of 1947 prohibits the placing of negotiated contracts with firms which pay any fee or commission to solicit or secure such contract. Small firms necessarily do business in civilian markets through a variety of commissioned agents, brokers, and so forth, who are employed on a fee basis. Only a very large firm can afford to have all of the specialized people it needs to negotiate contracts on the company payroll.

So when contracts are awarded on a negotiated basis, this method automatically cuts off small business from its normal way of competing and its only practical way of competing.

SBA ABSENT

During the last few weeks the House Armed Services Committee has been holding hearings on the matter of contract negotiations, with the announced intention of finding a way to return defense contracting to the advertised competitive-bid method. This is of vital importance to small business. Representatives of the General Accounting Office came forward and assisted the committe with testimony and advice; the House Small Business Committee did likewise. The principal agent of small business, namely the Small Business Administrator, was conspicuously absent.

During the 2½-year period covered by the report of the House Armed Services Committee, firms with less than 500 employees got 64 percent of the value of all the contracts awarded on an advertised competitive basis. Firms of this size got only 13 percent of the negotiated contracts.

The Department of Defense during the past several years has handed out about $1.5 billion annually in subsidies for research and development. There is no indication whether the Small Business Administration has ever taken an interest in this matter or suggested that the Department of Defense make a separate report, on the small-business share of such subsidies. Congress, however, wrote such a requirement into the revised Small Business Act in August 1955.

In the 4 months ended October 1955 less than 7 percent of the contracts awarded by the armed services for research and development work went to firms with less than 500 employees.

When the SBA was established, or at least when its predecessor was established in 1950, it was not intended to try to duplicate the work of the procurement agencies. It has a small staff of about 750 employees, as contrasted to about 35,000 in the Pentagon alone. It was intended to do a high-level planning and advisory job to the procurement agencies, to make recommendations and require reports to see that the policies and practices of these agencies give small business a fair break. And to enforce its position, it was given the power to take prime contracts from the procurement agencies and distribute such contracts among small firms.

If SBA has made any positive recommendations or required any reports of the procurement agencies, this fact has not been revealed.

Liaison between SBA and the Department of Defense was first established in December of 1954, just before the present Congress convened.

One other thing. The Smaller War Plants Corporation which this Congress created during World War II was ineffective until we amended the law and gave the Smaller War Plants the power to take any contract from Defense, to take any contract from any procurement officer and say, "We will do that and divide it up with small firms." That is what you call taking a prime contract.

In the case of the Small Business Administration Congress set aside $100 million for that purpose and gave them the authority in the law. I will put the law in the RECORD. It is plain. It cannot be disputed. No one will dispute it.

Not to exceed an aggregate of $100 million shall be outstanding at any one time for the purposes enumerated in sections 207 (c) and (d).

* * * * *

GOVERNMENT CONTRACTS

(c) To enter into contracts with the United States Government and any department, agency, or officer thereof having procurement powers obligating the Administration to furnish articles, equipment, supplies, or materials to the Government;

SUBCONTRACTS

(d) To arrange for the performance of such contracts by negotiating or otherwise letting subcontracts to smal-business concerns or others for the manufacture, supply, or assembly of such articles, equipment, supplies, or materials, or parts thereof, or servicing or processing in connection therewith, or such management services as may be necessary to enable the Administration to perform such contracts.

How much of that money has the Small Business Administration spent? Not one penny. How many contracts have they taken? Not one. How many have they tried to get? Not one so far as I know, and I have been trying to find out one.

UNUSED POWER

So far, SBA has not used its power to take prime contracts, and it has never suggested taking such a contract.

SBA's predecessor agency assigned a number of employees to various procurement offices of the military services—to look over proposed procurements and make recommendations on those procurements which might be set aside for competition exclusively among small firms. SBA's sole effort at obtaining a

fair proportion of the defense contracts for small business appears to have been to continue this operation.

In the two and a half years ended June 30, 1955, the contracts earmarked for competition among small firms amounted to 1.7 percent of the value of the contracts awarded in that period. And the earmarked contracts which were actually awarded to small business amounted to 1.2 percent of the value of the contracts awarded in that period. Small firms succeeded in getting about 20 percent of the value of the contracts, without the benefit of earmarking.

ATTENTION MEMBERS FROM DEPRESSED AREAS

I am giving you Members from distressed areas this cue, and I am giving the Republican Party this cue. You, the Republicans, are vulnerable. Congress has given you the power, Congress has given you the money, Congress made it possible for you to relieve these distressed or depressed areas, every one of them, and you have not touched a one of them, not a one.

All you Members from distressed or depressed areas get together and call on the Small Business Administration and on the administration generally and say, "You have told us in the state of the Union message, Mr. President, and you have told us, Mr. Hagerty, and you have told us, Mr. Burns, of the Council of Economic Advisers, that you were not only going to stop further distressed areas but you were going to prevent the existing ones from spreading by giving them opportunities to have work and employment and purchasing power."

HAVE THE POWER BUT NOT USED

They have not carried it out. They have the power to do it but they have not done it. That is a good point in favor of the Democrats. We are not entitled to it, we should not have it. It is at the expense of the small-business men, it is at the expense of the depressed areas of this country. We do not want it. We want you to correct it so we will not have that point and so you will not be so vulnerable. We believe we can win on our own merits.

WHERE WAS SBA?

In the next few days the Committee on Armed Services will have before the House a good bill, I understand. Our committee has been working with the Committee on Armed Services. We have furnished them some information we thought was valuable. We tried to be helpful. They did a splendid job. In their efforts they had our cooperation. We have a wonderful staff on the Small Business Committee. They have a good staff on Armed Services. They had the help of our staff. They had the help of our members. They had the help of the General Accounting Office. But the Small Business Administration, charged with the duty of looking out for and being on the alert against any harm to small business and to help small business, did not show up. Ask Chairman VINSON. He did not see a one of them They were not there. They were conspicuously absent.

The Republicans are vulnerable on that point too. That is another point. You ought to change. You can correct it. This is January and the election is not until November.

I cannot question the sincerity of people. Mr. Barnes, I must assume, was trying to do his best with what he had to work with, but he was handicapped by having two high administration people on that board who would not let him turn a hand that would be antagonistic to any other agency in the executive branch of the Government. He had his handicaps and I recognize that, but it seems to me that he could have done a little more. If he could not do something, he ought to have had the self-respect to say so and resign. He should not hold onto the office and not try to do something.

SBA ADVISES SMALL RETAILERS TO HANDLE UNIQUE ITEMS

I could point out dozens of instances of silly things they have attempted to do to help small concerns. They really ridicule desperate people who are seeking aid. Two years after the law passed, here is a weekly publication from Washington, D. C. It was carried in dozens of publications all over the land. It was about small business. What was the warning to small business, the advice given to small business in these publications?

To help retailers boost sales, the Government has put out a leaflet that suggests how small stores—this is helping the small man—can handle stuff the big stores turn down, such as special cheeses, oversized clothes, and so forth. Write into the branch office of the Small Business Admiinstration for the booklet Attracting Customers Into Your Store.

That is the title of it.

If you want the address of the nearest Small Business office, ask us for it.

Imagine—here is the aid that they want to give these small men—do not handle what the big people handle, but handle some of these queer and unique things like long-handled underwear and high button shoes, goose neck hose, lamp-wicks, buggy whips, buggy sockets, and other unusual and unique things. Handle oversized clothes, great big coats, little coats and great big breeches, very small breeches, and odd shoes, like pairs of shoes size 10 on the right foot and size 8 on the left foot. They say that is what you small-business retailers should do. You are overlooking a big market. That is the advice of this great agency which we set up to help the small-business people of this Nation. They are advising them that that is what they should do to make their money.

I am inserting an article by George Dixon that appeared in the Chicago American January 12, 1956:

The Small Business Administration always is on the lookout for opportunities for Americans who want to start, or augment, their own small businesses.

Now there may be a big opportunity for a manufacturer: produce brassieres for short-legged cows.

The idea was conceived by a farmer named Frank Newman Turner, who has 80 cows on his farm near Shaftesbury in England's west country.

Turner has been doing more than making hay while the sun shines. He has been spending months pondering the delicate problem of how to alleviate the misery of his short-legged cows who don't have enough clearance between themselves and the rocky terrain.

The other day his thought and research resulted in a solution. He invented an uplifting apparatus to which he has given the alluring name "cow-bra."

For the present, he is making them himself, but he is looking for someone to put them into mass production. He says there still are a few hitches.

"I am making my cow-bras out of semi-transparent plastic," he confides, "but they are not entirely satisfactory. The plastic makes a sort of cracking noise when the cows pad about. They don't like the noise."

If the Small Business Administration only can come up with an idea for a noncracking bovine foundation, it will make some small-business man rich and low-chassis cows happy.

REPUBLICANS SHOULD MAKE CORRECTIONS NOW

I have pointed out to you honestly and sincerely with the idea in my mind and heart that we Democrats, do not want any advantages out of this. We are not entitled to it. We are not entitled to win by sacrificing the small-business people of this Nation. We do not want that privilege. But, if you keep on like you have been going, and you keep up what I have recited to you here—1, 2, 3, 4, 5, and 6, we cannot keep from winning—you will make us win on your mistakes and because of the greed of your administrators. We want to win on our merits. You show that you are for big business. You are not for little business. You are for big business and big bankers. Why did you, when Mr. Eisenhower came down here, and he is a great President and a great man, and I am not condemning President Eisenhower because he is our President and I want to cooperate with him, but he has to take the advice of other people—take the advice of 5 New York bankers from 1 board of directors of 9 members, the New York Federal Reserve Bank. He brought them down here with him when he went into office, and they are the ones who are administering this hard-money policy and high-interest policy, which only helps big business for big profits. Last year the big-business concerns and corporations of this country in their reports, disclosed that they had $11 billion of retained profits. I do not object to a reasonable amount of retained profits, but how did they get that money? They had to make an attack on our private-enterprise system to do it. They were the concerns that have no competition. We have always heard, "Charge all that the traffic will bear in prices." Well, that it all right, and I agree with that—but in a competitive market only. But this is in a noncompetitive market. So they charge on automobiles, steel, aluminum, copper, and everything else which is noncompetitive. They charged not only what a utility would be allowed to charge under similar and like circumstances—for the cost of their labor and materials, and obsolescence of their machinery and depreciation, as well as a generous share for their stockholders—they charged not only that in 1955, but they added $23 billion more to the price that the consumers of this country had to pay. Then after paying the 52-percent tax on it, they had $11 billion left over, which cost them not 1 penny. That

was "costless capital" to them. That is contrary to the private enterprise system.

The private-enterprise system contemplates that when people need money for expansion purposes they will borrow that money in the markets and let the savers who have saved their money be able to invest in the concern and have a stock interest and receive dividends on it. But not according to this costless-capital method. What chance has small business against costless capital?

GET GREEDY HANDS OFF THE THROTTLE

Now they have the gall to put into the papers every day that they are going to raise their prices again for the purpose of getting more expansion capital. In other words, causing the consumers of this country to invest involuntarily in their expansion without getting one penny of return. No dividends. No interest. Is that the democratic way, American way, or the private-enterprise way? No. That is the monopolistic way. That is the big-business and big-banker way. We have got to do something about it. If we do not, we are riding for a fall. With all of these supports and all the things we have built in to protect our economy, a depression in this country is not impossible. I do not say it is probable. I know if greedy hands are kept off the controls of our economy, we will never have a depression, because depressions are manmade. They can be prevented. But with greedy hands on the lever that protects our economy, we could have a depression, and we are headed in that direction if these big people are not restrained in some way. To that extent the Republicans are vulnerable. The Democrats have a good point, because we can prove that you are a part of big business, big bankers, big profits; that you are the enemy—not intending to be except it is in the way of your politics—that you are the enemy, as far as your actions speak, of the small-business man and the small farmer.

So I urge you to correct those vulnerable things. This is January. The election is the first Tuesday in November. You have time to do it. The Democrats are not entitled to win on your destruction of small business and small farmers. They do not deserve to win at the expense of the small farmer and the small-business man of this Nation.

I am for this bill. I am for the $50 million increase. In fact, I will vote for the $100 million amendment which the gentleman intends to offer. But let us not have disaster tied with business loans, because we know how reluctantly they make business loans now. How easy it would be for them to say, "We cannot make any business loans, knowing that disaster might overtake us." The Congress would not be in session. You could not make any more business loans. I am bound to say that the administration of the Small Business Administration is disgraceful. You have plenty of time to correct it. The statements I make are for the purpose of honestly and sincerely pleading with you, begging you to correct your policy against small business and the small farmers and quit coddling and favoring big business and the big banks.

The CHAIRMAN. The time of the gentleman from Texas [Mr. PATMAN] has expired.

Does the gentleman from Michigan desire to use any further time?

Mr. WOLCOTT. I have no further requests for time.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Be it enacted, etc., That section 204 (b) of the Small Business Act of 1953, as amended, is hereby amended by striking out the fifth and sixth sentences and substituting therefor the following: "Not to exceed an aggregate of $175,000,000 shall be outstanding at any one time for the purposes enumerated in sections 207 (a) and 207 (b) (1)."

With the following committee amendment:

Page 1, line 3, strike out all after the enacting clause and insert "That the sixth sentence of section 204 (b) of the Small Business Act of 1953 is amended to read as follows: 'Not to exceed an aggregate of $75,000,000 shall be outstanding at any one time for the purposes enumerated in section 207 (b) (1).'

"SEC. 2. Section 204 (b) of such act is further amended by striking out '$275,000,000' each place it appears and inserting in lieu thereof '$325,000,000'."

Mr. McDONOUGH. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. McDONOUGH: On page 1, line 11, strike out "$75,000,000" and insert "$125,000,000"; on line 5, page 2, strike out "$325,000,000" and insert "$375,000,000."

Mr. McDONOUGH. Mr. Chairman, I appreciate the opportunity of immediately following my committee colleague, the gentleman from Texas [Mr. PATMAN], who has been so generous to the Republican Party in his remarks. I began to wonder if he had arranged with Lew Hall to take over the chairmanship of the Republican National Committee.

I am sure he is sincere in his approach, but I doubt some of the figures he gave here today. I do not know the source of his figures, nor do I know how diversified are the lines of industry in his district, but I do know that in Los Angeles County, which is probably one of the highest industrial diversified areas in the Nation, the Small Business Administration has met the problem of small business, has had no complaints, has thoroughly screened all of the loans, and where a person who is eligible for the loan he has obtained it. I also refute the statement made by the gentleman from Texas that the salaries paid to Small Business Administration employees exceeds the amount of loans approved by them.

In 1955 SBA approved business loans totaling $54,645,000 and disaster loans totaling $32,429,000 for an overall total amount approved in 1955 of over $87 million. For salaries in 1955 the Small Business Administration paid out $2,367,000 to agency personnel assigned to the lending program. I repeat—$87 million in loans approved in 1955 against $2,367,000 paid in salaries.

I gathered from what the gentleman from Texas said that the Small Business Administration should accept every application that is filed without any question; which, of course, would be ridiculous and then he berates the fact that they have to go so many miles in an automobile and wait in line to be processed. I wonder what those same people would have to do if they want to obtain a loan from a bank. I think the Small Business Administration is on thoroughly sound ground and should have his support rather than be the subject of attack. The Administration is trying to do a good job across the Nation for small business.

Mr. BATES. Mr. Chairman, will the gentleman yield?

Mr. McDONOUGH. I yield.

Mr. BATES. I am happy that the gentleman from California manifests an interest in the figures cited by the gentleman from Texas. I was intrigued by them also, but not because of what he said, but rather because of what he left unsaid in reference to the Procurement Act before the Armed Services Committee. The fact is that the dollarwise percentage of negotiated contracts under the Democratic administration was slightly higher than under the Republican administration. I do not say that is bad. I only say those are the facts.

Mr. McDONOUGH. That is a good point. I doubt his figures very much.

But let me turn my attention now in support of my proposed amendment. The purpose of the amendment is to increase the authorization of this bill from $50 million to $100 million. I am not in a disaster area. I have had no disaster in my district, but the State of California, the New England States, and parts of Texas, and southern California, the Imperial Valley, and other parts of the country have been seriously affected by disasters during the past year.

This is a loan; this is not an obligation on the debt; it is not a tax obligation. The $50 million the bill proposes will be subject to thorough review by the Committee on Appropriations. I think $50 million is not enough, because last year during the disaster period in the New England States, and since then in California, we have exceeded the authority that was granted, and we do not know what is going to occur between now and the end of this fiscal year. By contrast we are setting up a fund of $100 million for an International Finance Corporation which this Congress approved last year. We have loaned billions through the Export-Import Bank, loans to foreign countries to help them recover from disaster, disaster either as the result of war or some other cause. Those are things we are doing for foreign countries, and here we are just coming up to the line I would say with this $50 million to take care of disasters that may occur in 1956, and to take care of the disasters that have occurred in the latter part of 1955. Here in the United States, we should be as generous to our own people as we have been to foreigners.

I believe the amendment is justified. I do not think $100 million is too much. I think $50 million is too little.

I ask the Committee to support the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California.

The amendment was agreed to.

The CHAIRMAN. The question is on the committee amendment, as amended.

The committee amendment, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. PRICE, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H. R. 7871) to amend the Small Business Act of 1953, pursuant to House Resolution 369, he reported the bill back to the House with an amendment adopted in the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PROVIDING HOSPITALIZATION AND CARE FOR THE MENTALLY ILL OF ALASKA

Mr. ENGLE. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 6376) to provide for the hospitalization and care of the mentally ill of Alaska, and for other purposes.

The motion was agreed to.

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H. R. 6376, with Mr. PRICE in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

Mr. ENGLE. Mr. Chairman, I yield such time as he may desire to the gentleman from New York [Mr. O'BRIEN], chairman of the Subcommittee on Territories and Insular Affairs.

Mr. O'BRIEN of New York. Mr. Chairman, I think that few persons in the United States are aware of the shocking fact that in a great Territory of our country the handling of mental illness is surrounded by the ugly and grim trappings of criminal machinery. That Territory is Alaska, a great land which on several occasions has missed achieving the full dignity of statehood by a handful of votes in Congress.

This bill is designed to erase a blot from our national honor, to treat sick people as such and not as criminals.

Briefly, the bill authorizes the expenditure of $6½ million for the establishment of mental-health facilities in Alaska, plus $6 million in the form of diminishing annual aid for 10 years, to take care of the transition, responsibility, and cost from the Federal Government to the Territory. I shall attempt to demonstrate a little later that this is a financial bargain for the taxpayers of the United States.

First, however, I should like to emphasize that this is not a Democratic bill, nor a Republican bill. Neither is it in the true sense the Green bill or the O'Brien bill or the Bartlett bill. It is the experts' bill. It comes before you with a strong and I might say vehement backing of three great departments of our Government—the Department of Justice, the Department of the Interior, and the Department of Health, Education, and Welfare. It was prepared in very large measure by those departments and it is, in my considered judgment, the best and most practical legislation on the subject ever to be considered by this House.

I would like to tell the members of the committee some of the experiences a group of your colleagues had last fall when we visited Alaska. We took more than 600,000 words of testimony in various parts of the Territory, and I would estimate that approximately 100,000 of those words dealt with the problem of mental health. We had before our committee judges, United States attorneys, doctors, policemen, businessmen, representatives of practically every walk of life in Alaska. They were unanimous in their testimony and in their earnest plea that we lift from their backs a barbaric system which exists by treating sick people as criminals. We stood on the corner in Juneau, Alaska, one windy, cold day, and we looked at the jail in that city; a four-story wooden structure with wiring going back to a period prior to World War I. The prisoners are housed on the first floor of what is literally a firetrap, and with them from time to time are housed sick people whose crime, whose presence in those cells is due to the fact they are mentally sick instead of physically sick. We had a United States attorney tell us that he felt in a sense degraded by the fact that he was part of this kind of machinery. We had doctors and clergymen tell us that there are instances in Alaska where people conceal mental illness in their families.

I wonder if I could bring the point a little closer home. Suppose any one of us was employed in Alaska and was receiving what would be considered an ordinary wage, a wage or salary inadequate to finance the sending of a loved one down to the States and housing that loved one in a private hospital. If this person about whom I speak was a man and his wife at a certain time of her life tipped a little mentally, what would you do in that case? Would you summon up the criminal procedures, have your wife accused, in effect, of the crime of being mentally ill, be tried by a lay jury of usually the first six persons who call for their mail at the post office, convicted, and then placed in jail with common criminals until the United States marshal had the time to take her 1,500 or 2,000 miles away to a private hospital in Oregon operated for profit? And, often on those expeditions the United States marshal would take with that sick person people who had been convicted of serious crimes because it saves the Government a bit of money.

Gentlemen, these are our people about whom I speak. They are citizens of our country. They are your neighbors and friends. They come from Iowa, New York, California, most any part of the States you want to mention. They are pioneers, many of them. They are keeping furnished what will be one day the great living room of the United States. They are not all from the States. Some of them are natives of Alaska. Some of them are Eskimos.

May I say in passing that we seem to have developed in this country something of a global conscience. We appropriate large sums of money for faraway places with strange-sounding names. I have voted for some of those appropriations, but occasionally I wonder.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. O'BRIEN of New York. I yield to the gentleman from Iowa.

Mr. GROSS. I may not agree with certain provisions of this bill, but I certainly agree with the statement the gentleman has just made that with the greatest of ease we can shovel the money out all over the world and refuse to take care of the people who are close to us in our own territory.

Mr. O'BRIEN of New York. I thank the gentleman.

These Eskimos about whom I speak, as to them I should like to say to the Members of this House that I have never seen a more loyal group under the American flag. Our committee went to Point Barrow, almost within whistling distance of Siberia. We had a hearing in the native hall. We were astonished, all of us, by the meager list of requests for aid from the Congress of the United States. A great general in charge of our Air Forces in Alaska told us, the members of the committee, that these Eskimos were invaluable. He said you cannot turn over a stick in the Bering Sea that they miss. They are our eyes and ears in a very strategic part of that great frozen back door of ours which could thaw so swiftly under the hot breath of a hot war. Yes, these Eskimos, too, would benefit from this proposed legislation.

I am very sure that there is no question in the minds of the Members present of the humane aspects of this proposed legislation, of the desperate need to eliminate something which goes back to the Dark Ages. But very often as individuals and as Members of Congress we must weigh the things we want to do against the things we can afford. I say to you sincerely that we cannot afford not to do what we propose under this proposed legislation.

It is true that the substitution of a decent system for what we have will cost the Government of the United States $12½ million over the next 10 years. That is a lot of money. We are conscious of the need for a balanced budget. But may I point out to you that in the process of spending this money we will save nearly $900,000 a year. That is what it is costing us to transport these people from Alaska to Morningside Hospital in Oregon and to house them there—$900,000 every year going down a dismal rathole.

Mr. Chairman, if we spend the $12½ million, at the end of 20 years we will be

nearly $6 million ahead and Alaska will have a decent system of mental health. Frankly I do not think any banker in the land would deny my statement that this is a good bargain.

You might say Alaska is looking for a handout, Alaska is looking for something for nothing. May I point out that if dollars were the only consideration the people of Alaska would oppose this bill because financially they are better off through the continuation of this terrible system they now have, for bad as it is the Government of the United States is picking up the entire check. So the people of Alaska who testified before our committee were in effect asking us to increase their own taxes in order to do the decent thing.

I know it will be suggested and it has been suggested that Alaska might not be able to do the job with the $12,500,000. I say to you very sincerely that I have accepted the assurances of the people of Alaska from the Governor down to the little local businessman that they can do the job and that they will not come back here pounding on our doors for more money.

I say to you further that if the day came when they came back here, and I was still a Member of this House, I would be the first to vote "No" on a bill for additional aid. They have told us that this will do the job. I accept their word. The three great departments of Government I have mentioned have told us that this will do the job. I accept their word.

I know, too, that it will be suggested that perhaps we should split the cost, we should pay half and the Territory of Alaska should pay the other half. I mentioned earlier that Alaska has sought statehood but, if you will recall the statehood bills we discussed here, they contained the sinews of statehood. Alaska without those sinews of statehood cannot match funds on this project. If it is compelled to do so, this plan of the experts and the humanitarians will fail. If we ask them to match funds, we will, in effect, be saying, "Well, stand on your own feet, in spite of the fact that we have cut your legs from under you."

Ninety-nine and one-half percent of all the vast acreage in the Territory of Alaska is owned by the Federal Government, leaving Alaska very little maneuverability. If Alaska were to attempt to raise its half of even $6 million in 1 year—and that is the only way they could do it, because we do not permit them to issue bonds—it would represent a 10-percent increase for this 1 thing alone in their annual budget. Ten percent is quickly said, but if we were to add 10 percent to the Federal budget for something other than national defense, to the tune of $6.5 billions, there would be many screams from the people.

I have never believed, Mr. Chairman, in a giveaway theory. I think if I were to be classified in my thinking it might be just a little on the conservative side. I am aware, too, that my State, the State of New York, pays on the average 15 percent of each dollar we appropriate here. I am fully aware that of this $12,500,000 approximately $1,850,000 will come from the taxpayers of my State. Yet I feel that the taxpayers of my State want me to support this legislation, not only because of its humane aspects but because they realize or will realize that it is plain good business, for my State is paying $135,000 a year of the $900,000 we are wasting in the perpetuation of this horrible system they now have in Alaska.

It has been suggested by some that perhaps the people of Alaska who become mentally ill would be better off going to Oregon and leaving their families 1,500 or 2,000 miles away.

Mr. JOHNSON of California. Mr. Chairman, will the gentleman yield?

Mr. O'BRIEN of New York. I gladly yield to my colleague.

Mr. JOHNSON of California. Is there any doubt in the gentleman's mind as to the propriety of the Government of the United States paying for this as long as Alaska is a territory of the United States? Is there anyone who would vote against taking care of these people when they are under our jurisdiction?

Mr. O'BRIEN of New York. I hope that all Members will reason that way. What we are proposing here is that the Government not continue to spend this money in perpetuity, but that it spend the money more sensibly by changing the system.

Mr. JOHNSON of California. I agree with the gentleman and I voted against the bill providing for Alaska statehood not because I do not like Alaska but for other reasons. In my opinion, however, this bill is a sound bill. There is an obligation on the national government that the Government should assume. I am sure that is the way the people in this House will look at it today.

Mr. O'BRIEN of New York. I am very grateful to the gentleman for his observation. I think, perhaps that would be a good point at which to conclude. But, Mr. Chairman, I would simply like to say that I believe this bill to be a perfect marriage of the humane and the practical. Simultaneously, we are ripping out a shameful thing and we save money in the process.

Mr. CARRIGG. Mr. Chairman, will the gentleman yield?

Mr. O'BRIEN of New York. I am glad to yield to my colleague.

Mr. CARRIGG. I compliment the gentleman for the wonderful presentation he has made to the House on this particular legislation. I commend him for the marvelous way he conducted these hearings in Alaska during the recess. For myself, I want to say it is not out of charity that we owe this legislation to the people of Alaska, but it is a matter of justice, and I, too, speaking as one Republican will be very happy to support the gentleman on this legislation.

Mr. O'BRIEN of New York. I am very grateful to the gentleman especially because I recall that before coming to the House of Representatives he was a distinguished attorney and he had considerable experience with the prosecution of criminals. I am very sure that the gentleman shares the feeling of our United States attorneys in Alaska that it is a degrading thing for a man, even though it be his sworn duty to treat sick people like criminals.

Mr. McCORMACK. Mr. Chairman, will the gentleman yield?

Mr. O'BRIEN of New York. I am glad to yield to the distinguished majority leader.

Mr. McCORMACK. Is my understanding correct that this is the first bill that the gentleman from New York has handled on the floor?

Mr. O'BRIEN of New York. It is, sir.

Mr. McCORMACK. I think the remarks of our friend, the gentleman from Pennsylvania, represent the views of all who are present listening to the able address of the gentleman from New York to the membership of the House. I compliment the gentleman because you have made one of the ablest and one of the most effective and convincing arguments in support of a bill that I have ever heard in my 28 years of service in this body. You have given us a clear picture, presenting a case not only in an able and gentlemanly manner, but in a most effective manner. Every Member here has listened to every word you have spoken because they recognize that you know your subject and they know that you believe in everything that you have said. That you believe in the bill and the humanitarian motives and purposes which prompt the bill and the purposes of justice as referred to by our friend, the gentleman from Pennsylvania, which means so much to our people—and they are our people in Alaska. I congratulate my friend, the gentleman from New York, in making this able presentation every word of which has been listened to attentively in complete silence by the membership of this body.

Mr. ENGLE. Mr. Chairman, will the gentleman yield?

Mr. O'BRIEN of New York. I yield.

Mr. ENGLE. I think this should be an appropriate time for me to add to the remarks made by our distinguished majority leader to say that the gentleman from New York is chairman of the subcommittee on territories, a matter in which he has taken a very special interest. The gentleman from New York [Mr. O'BRIEN] has dedicated himself to this bill. He has a wide knowledge of the subject and has the most detailed information on it. He has been asked to handle this bill on the floor because of that detailed knowledge. This past fall, the gentleman from New York [Mr. O'BRIEN] and the subcommittee visited the Territory of Alaska in order to improve his own information and in order that when he presents bills from that important subcommittee on the floor of this House, he may be able to do so with an intimate knowledge of the subject matter on which he speaks and a knowledge of the area which is affected by the legislation and the people who are most intimately concerned with it.

I certainly associate myself with everything the distinguished majority leader [Mr. McCORMACK] has said about the excellent presentation which the gentleman from New York [Mr. O'BRIEN] is making, as chairman of the Subcommittee on Territories. He is one of the most valuable members of our committee.

Mr. O'BRIEN of New York. I am very grateful to the gentleman for his kind remarks.

Mr. McVEY. Mr. Chairman, will the gentleman yield?

Mr. O'BRIEN of New York. I yield.

Mr. McVEY. I want to commend the gentleman for his very excellent presentation of this subject. As I understand this bill, it involves the expenditure of about $12½ million over a period of 10 years. Can the gentleman tell me if this expenditure was taken into consideration in the formulation of the budget that was presented a few days ago?

Mr. O'BRIEN of New York. May I say this: I do not know exactly how deeply they go into these things, but I will answer the gentleman in this way, that those who prepared the budget are 100 percent for this bill. I take the liberty of quoting the gentleman from California [Mr. UTT], who made a statement during one of our hearings in Alaska, that it was considered important, this particular bill, by the White House. I assume the White House shared a little of my optimism in hoping that the bill will become law this year.

Mr. Chairman, I bolstered my courage for this first appearance before the House, in presenting this bill, but I was not prepared for the many expressions of kindness and I am a little overwhelmed with that. But I am grateful for your patience and your courtesy. I have never raised my voice here or elsewhere in a cause in which I believed more deeply or firmly. I thank you.

Mr. MILLER of Nebraska. Mr. Chairman, I yield 10 minutes to the gentleman from Utah [Mr. DAWSON].

Mr. DAWSON of Utah. Mr. Chairman, I, too, want to join in the words of commendation of the chairman of our subcommittee, Mr. O'BRIEN. I was one member of the subcommittee who had the opportunity of going to Alaska this last summer, and we heard throughout Alaska many, many witnesses. I assure the Members of this House that I have never been on a committee that worked any more conscientiously or presented a more bipartisan effort than was presented by this committee in Alaska this last summer.

Having had some experience in mental health work and having taken a little interest in this measure, I would like to address my remarks to some of the details of the bill itself. It was my privilege, before coming to this body, to observe as State welfare commissioner in charge of mental hospitals, some of the operation. I do not claim to be a psychiatrist, but I do believe I know something about the processes for commitment to mental hospitals. I want to tell you the present commitment procedures in Alaska are an absolute disgrace. As I understand it, there has been no revision of Alaskan mental health laws for some 50 years. At the present time there are no mental health facilities in Alaska. If a person is determined to be a mental case he is picked up by the marshal and probably thrown into a jail somewhere in Alaska and held for transportation to Morningside Hospital in the State of Oregon.

It is entirely possible that after they arrive there it may be determined they should never have been sent down; nevertheless the stigma of commitment is attached to them.

In many States of this Union we have commitment procedures to mental institutions which are nearly as bad as those in Alaska. My State was in the same situation until approximately 7 years ago. At that time we adopted what is known as the American Psychiatric Association model code, a code which has been adopted by a good many States, I cannot tell you exactly how many; and this is the model procedure that we have set up in this act. It provides that a patient shall not be railroaded in, nor shall he be taken into court and submitted to a court hearing unless he requests it.

An amendment has been written into the bill to give the patient a right to trial by jury if he insists upon it. But in an average case if someone has a member of the family or a friend who should be committed he is not required to take them into court. Under the terms of this bill he may get a certificate of a physician and a court certificate on the application of friends and relatives go directly to the hospital and be admitted. Once the patient is at the hospital he is examined by psychiatrists and others in a position to know whether he can be helped. The patient is left there if it is determined that he should be. It is an ideal procedure. As I say, it has been in effect in my State for some 7 years and it is working very successfully. I highly commend it to you.

Mrs. CHURCH. Mr. Chairman, will the gentleman yield?

Mr. DAWSON of Utah. I yield.

Mrs. CHURCH. I am very much interested in the legislation, and particularly in the exposition the gentleman is making of the terms. Is the patient's consent required in the procedure the gentleman outlines?

Mr. DAWSON of Utah. There are three procedures set up: In one of them the patient himself can make an application to enter the hospital if he is over 16 years of age and capable of making such application; in the other two procedures a peace officer can make an application, or the relatives and a physician.

Mrs. CHURCH. But at that stage the consent of the patient is not required.

Mr. DAWSON of Utah. That is correct.

Mrs. CHURCH. Even for commitment?

Mr. DAWSON of Utah. That is true. Remember, the patient can request a trial and a court hearing and demand a jury if he so desires. That amendment was written into the bill.

Mrs. CHURCH. I am very glad the amendment was written in. I would like to congratulate the gentleman for his part in writing this very meritorious legislation.

Mr. MILLER of Nebraska. Mr. Chairman, will the gentleman yield?

Mr. DAWSON of Utah. I yield.

Mr. MILLER of Nebraska. I will say that the model adopted in the bill is the model proposed by the American Psychiatric Association with the exception of the jury trial and commitment procedures. I think it is fair to say that it is a very high standard that has been adopted, I think perhaps so high that very few of the States have been able to adopt it; I think three or four States have adopted the model commitment procedures recommended by the American Psychiatric Association; but it is an ideal procedure and I think it is one that can well be adopted by any State. I doubt whether very many States will be able to follow it because the standards are very high, but the principle is right as to the commitment proceedings.

If the gentleman will permit, I wanted to ask him one other question relative to the cost of the hospital and how many beds the $6,500,000 authorized in this bill would provide?

Mr. DAWSON of Utah. I may say to the gentleman that in Alaska we have approximately 350 mental cases. It is estimated by the department that the $6,500,000 will provide a hospital or hospitals with 275 beds; in other words, another 75 beds would be required to meet the situation completely.

It is my understanding based on the testimony that was given before our committee that the Territory of Alaska is going to have to assume considerable responsibility in the administration of this program. I for one favor that. I favor statehood for Alaska. I also introduced a bill the other day to give Alaska the right to elect its own governor. I think we have got to take them step by step and give them some responsibilities if they are ever to qualify for statehood.

For that reason I feel that the Territory of Alaska should bear some of the responsibility. They will be bearing some of the responsibility if just $6½ million is appropriated.

The people in Alaska are practically uniform in their feeling on this bill. We held hearings up and down Alaska from one end to the other and the people are very anxious about it. They are willing, and I think able, to assume this extra responsibility. It is my opinion that we should not attempt to reduce the $6½ million or to require the Territory to match it because if we do they just have not sufficient funds to take care of it. It is my understanding that it would increase their levy approximately 10 percent if they were required to put up this additional money. They just do not have it.

We wrote a provision in this bill giving to the Territory of Alaska a million acres of land. Mind you, the Federal Government today owns 98 percent of all the land in Alaska. How in the world can you expect that Territory to raise the necessary funds, to take over from scratch and set up a health program, including the construction of all the facilities, when the Federal Government owns 98 percent of all the land? They have no tax base up there except what they can pick up from some of their industries.

If we do not give them statehood, the least we can do is to take care of their mentally ill and it is going to take this amount of money to do it.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. DAWSON of Utah. I yield to the gentleman from Iowa.

Mr. GROSS. With the gentleman's wide experience in the field of mental health, is he saying now that he supports this bill as it is brought to the floor of the House?

Mr. DAWSON of Utah. I do.

Mr. GROSS. And all of its provisions?

Mr. DAWSON of Utah. Yes, I do.

Mr. GROSS. I want to compliment the gentleman for his presentation and I also wish to compliment the gentleman from New York [Mr. O'BRIEN] for his very able presentation.

Mr. DAWSON of Utah. I thank the gentleman.

Mr. ASPINALL. Mr. Chairman, I yield 10 minutes to the gentlewoman from Oregon [Mrs. GREEN].

Mrs. GREEN of Oregon. Mr. Chairman, since Morningside Hospital is in my district and I have observed what has happened there over a period of years, I would like to add my comments to those which have been made by my colleagues from New York and Utah. The gentleman from Utah has described in some detail the commitment procedures where a person can be accused of the crime of being insane in Alaska. He is arrested as a common criminal and is thrown in jail. Then if he is found guilty he is transported to Portland, Oreg.

The law says that a person is entitled to a jury trial within 10 days. The testimony before the committee showed that on several occasions this time might extend to 6 weeks or even a greater period of time.

Mr. Chairman, I have a letter in my hand from a mother in Fairbanks, Alaska, which I think the Members of this House might be interested in. She wrote to the Fairbanks News-Miner and said to them:

> I sent the following telegram to a Representative. We don't care what you do with it; if you would like to publish it, it doesn't matter to us, or if you don't. Just as long as we get a mental hospital.

Following is the letter:

> Our son graduated from college just 1 year ago. He lost his mind 1 week later due to overstrain in some manner. If we had mental hospitals in Alaska, he could have been treated here, near his family who loves him. Because there are no facilities in Alaska for sick minds, he had to be placed in jail, on a mattress on the floor and have a trial such as might happen to the most hardened criminal. We had to send two escorts with him to Morningside Hospital since he was so sick, making the transportation tremendous in cost. Even a Congressman should hate to have a thing like this on his conscience, such as blocking a bill that would provide mental hospitals for hundreds of Alaska's sick minds. I have been to Morningside Hospital. I have seen the homesick children there, 1,600 miles away from their loved ones. Give us a hospital for Alaska's mentally ill.

Recently in Portland there was the case of a 17-day-old baby who went through this commitment procedure in Alaska, who was arrested, had a jury trial, and who was confined to Morningside Hospital 1,600 miles away. When I was in Alaska with my colleague the gentleman from New York [Mr. O'BRIEN] I also visited some of the jails there, and I submit that jails are not the proper place to receive, to detain, or to observe persons suffering from mental disorders.

Speaking of the compulsory jury trial, Dr. Overholser, who is recognized as one of the experts on mental health, had this to say before the committee:

> I think it is an outrage, something that should not exist in any civilized country. I have had many patients tell me that the worst thing that happened to them, the thing that hurt them the most, was being brought before a jury and having their troubles and their conduct brought before an open court and having the family testify against them. It is a dreadful thing.

We had this amazing testimony in the city of Nome. A public health officer was testifying before the committee, and in his experience he said that one gentleman had been brought before a lay jury to decide whether or not he was insane. The jury found him not guilty of the crime as charged, and the judge, when he excused him, said this to the man: "You have been found not guilty. You are excused, but remember, don't let this ever happen again."

Mr. MILLER of Nebraska. Mr. Chairman, will the gentlewoman yield?

Mrs. GREEN of Oregon. I yield to the gentleman from Nebraska.

Mr. MILLER of Nebraska. Does this bill not have the jury trial provision in the bill?

Mrs. GREEN of Oregon. The gentleman from Nebraska knows that under present legislation a jury trial is required—there is no alternative. Under this new legislation examination by medical doctors is much to be preferred and I think most of the members of the committee hoped that a jury trial would be used in only very rare instances—and better not at all.

Now, as to the present condition at Morningside, it is the only institution of its kind in the country where the Government contracts with a private party for the care of the mentally ill and where profit, necessarily so, becomes a primary consideration.

Again I quote Dr. Overholser:

> The fundamental principle of contract care of mental patients in proprietary institutions is wrong. It has long been outmoded in the United States and no situation comparable to the one which pertains with respect to the treatment of Alaska patients exists elsewhere in the Nation. It is subject to criticism on sound humanitarian grounds. Regardless of how satisfactory present care may be, the treatment of mental patients should not be subject to a law requiring competitive bidding for such services.

How long has this gone on? The testimony again before the committee shows that negotiated contracts have been made for a period of 50 years, and I would like to call the attention of the Members of this House to the fact that during that 50-year period of time there has never been an audit of the books of Morningside Hospital in spite of the fact that millions of dollars of Government funds have been spent. Now, there are those who have said that everything at Morningside is fine, and in regard to that I would like to make a few observations.

First, I think that it is fundamentally wrong for the Federal Government to enter into a contract with a private party for profit for the care of the mentally ill. I think the commitment procedures are barbaric, and I think it is wrong to specifically prohibit Alaska from exercising care for their patients. I also agree with those who have said that if Morningside Hospital were the best place in the world, we still should not allow this condition to continue, for the three reasons just mentioned.

Some may ask, Is profit really a consideration? In the financial statement which was submitted by the owner of Morningside to the committee, it showed that in the last 18 years he had taken out in profit and in salary over a million dollars. The man who owns Morningside is not a doctor, and neither is his son. According to the testimony, neither one of them has ever been to Alaska.

There are those who would argue that $1 million in 18 years is a reasonable profit. I do not intend to argue that point today. But in this connection may I point out that with $1 million in profit, Morningside Hospital has never hired a full-time, fully accredited psychiatrist to look after the some 360 patients; and that in spite of the $1 million profit, up to 1952 or 1953 there was only 1 registered nurse for the 360 patients. That is for around the clock treatment. And in spite of the $1 million profit, there are no social workers to work in liaison with the homes from which these people come and to which they may return. The testimony further shows there has never been a trained dietician at Morningside.

Because I happen to live in the district, I have page after page of complaints from former employees and former patients who have been there. I have not used those in my statement today, nor do I intend to. But the observations I have made are from testimony given before the committee.

These things are important—the kind of care which is given in the hospital. They are very important to the man or to the woman who is a patient there. They are very important to the families, the loved ones who hope and pray that with adequate care of their loved ones they may return to their homes physically and mentally sound.

The basic question, however, is not the profit nor the personnel at Morningside at the present time. The basic question is whether there is any longer a sound reason why the Territory should not be treated as competent to assume responsibility for the hospitalization of the mentally ill, as do Hawaii and Puerto Rico.

Dr. Albrecht, the commissioner of health, Dr. Haldeman, and Dr. Overholser all testified to the need of a comprehensive mental-health program. I think this bill provides that; at least a statutory foundation is provided for an integrated program and a more modern and hopeful program for dealing with the problems of mental health.

It is now recognized that the problem of mental health, vast and difficult as it is, is not one which can be dealt with

successfully on a piecemeal basis. Certainly it cannot be solved merely by paying the cost of shutting away in institutions persons who have been legally committed thereto. Medical, humanitarian, and financial considerations as well point to the need of dealing with the problem as one of illness, to be prevented if possible by early recognition of the inducing factors; by early treatment of individuals who become mentally ill, where possible without removal from a normal environment; and where hospitalization is necessary, readjustment as soon as possible to a community environment. All this calls for an integrated program and one calling for community leadership. The communities in Alaska want the chance to show that leadership. They want the chance to assume the responsibility of caring for their own mentally ill.

Mr. Chairman, I join the Delegate from Alaska [Mr. BARTLETT], my colleague from New York [Mr. O'BRIEN], and my colleague from Utah [Mr. DAWSON] in urging favorable consideration of this bill without any crippling amendments.

Mr. MILLER of Nebraska. Mr. Chairman, I yield myself such time as I may need.

Mr. Chairman, the bill before us is an administrative measure. The bill is a great improvement over any measure we have had heretofore for the mentally ill. This House and the committee in the past several years have considered bills for the mentally ill of Alaska. I do wish to point out, however, that the requirements set up, the standards set up, by the American Psychiatric Association, adopted in the measure, are very high standards. I hope that the Territory or the new State can follow them. When they do the expense will be great. I wish all States in the Union were in a position to adopt such standards and to follow them. Even though they are not followed in toto, I think we should make the effort to have as high standards as possible.

I do want to call my colleagues' attention to several provisions of the bill. There is a provision in section 371 of title II that provides $6 million for the care of the mentally ill. The money is given to the Territory, $1 million the first year and then tapers off to $200,000 in 1966. After 1966 it is proposed that the Territory assume all the costs of the mentally ill. The gentleman from New York [Mr. O'BRIEN] has said he would oppose any further grants to the Territory. The taxpayer gets off right easy for the care as of now. It costs between $6 and $7 a day for the care of the mentally ill at the Morningside Hospital in Portland, Oreg. I predict the costs under this bill may reach $25 a day. Alaska after the 10-year period or after the hospital is constructed must bear that cost. I hope that is crystal clear.

It has been costing the Government through the Interior Department an average of about $800,000 a year to care for an average of 345 mentally ill that are generally taken care of at the Morningside Hospital in Portland.

I visited the hospital and was amazed at the splendid care the patients were receiving. I am not familiar with the economic arrangements or the money that may have been made by the Morningside Hospital. I do know it has cost an average of about $181 a month for a psychiatric patient. I do not know where in this country we could go and get care at the rate of $181 a month. It costs an average of about $24 a day in most psychiatric hospitals in the United States, so there is quite a wide spread between $181 a month and $24 a day.

I expect to support the bill. I do have an amendment or two I should like to suggest. One of the amendments to the bill, which gives the Territory 1 million acres of land, was my amendment. We increased it from 500,000 to a million acres. I think it might be well to spell it out a little more clearly, as the gentleman from Mississippi [Mr. COLMER], of the Committee on Rules, said this morning, that the funds might well be earmarked for the use of the Territory in running the mental institution. I believe such an amendment will be offered to the bill, and it will receive my support.

The other point I wish to call to your attention is section 372, which provides an outright grant of $6 million. That would be $12,500,000 in 10 years, but the grant is $6 million. The construction grant is $6.5 million.

I call your attention to the word "construction." We spell it out in the report as meaning not only the construction but the initial equipment of buildings, including medical transportation facilities, the architects' and engineering fees, and the cost of the land to be acquired by the Territory. In other words, the Territory has no financial responsibility—not a thin dime of their own in this building—I do not think that right.

It is a principle with me that we should not give an outright grant without requiring some responsibility on the part of the people of Alaska. In other words, in the Hill-Burton bill we provide for a matching of funds. Alaska has shared very generously in the hospital-construction bill and the Hill-Burton provisions of the bill, and I think it is right.

I am going to vote for the bill, whether my amendment is adopted or not, but I am going to offer an amendment which would require the Territory to match funds that are made available by the United States Treasury. We follow that in our Federal aid, with our highway program, and with the Hill-Burton bill. If we are going to give them a complete hospital without any effort on their part, no responsibility at all, I think the principle is wrong. If we are going to do that for this Territory we ought to do it for the other Territories and we ought to do it for the other States in the Union. With that in mind, I expect to offer at the proper time such an amendment. In other words, let us have it on the principle of matching that has prevailed in this country and throughout the Territories for many years.

As I said at the beginning, I think this is a good bill. It is not a perfect bill. It can be improved. Whether the two amendments I hope will be offered are adopted or not, I expect to support the bill.

I want to compliment the gentleman from New York [Mr. O'BRIEN] on his splendid handling of the bill, and also the committee that went to Alaska to investigate closely, on the job, the mental health problem in Alaska. The problems of Alaska are such that they must look to Congress for help. Perhaps some day when they become a State they can assume all obligations. They can if we give them not less than 50 percent of their 375 million acres of land. It was my intention that by increasing from 500,000 to 1 million acres of land granted the Territory that they could use the proceeds of the land to run the hospital and for other expenses of government. Some day they should control their lands. In my opinion there is a great future for Alaska. Great untold resources that might make it one of the rich States. I trust they use their resources wisely.

Mr. O'BRIEN of New York. Mr. Chairman, I yield 10 minutes to the Delegate from Alaska [Mr. BARTLETT].

Mr. BARTLETT. Mr. Chairman, because this bill has to do with a territory in which I have a personal as well as an official interest, I desire at this time to express my warmest thanks to those who have spoken for the bill and also to those who are going to vote for this bill. I am delighted that the Alaska mental health bill bears the name of EDITH GREEN, of Portland, Oreg. It is an act of rare courage on her part to offer that bill in view of the fact that the institution where the mentally ill of Alaska are placed is located in her district. I was thrilled when the distinguished chairman of our subcommittee, the gentleman from New York [Mr. O'BRIEN] took such an interest in this matter during the months that the bill was under consideration, and when he made such an eloquent plea for it on the floor here today. I want to thank also the gentleman from Utah [Mr. DAWSON] who has joined with me on so much legislation affecting the Territory of Alaska. I want to express my appreciation at this time likewise to the gentleman from Nebraska, Dr. MILLER. Although it is true that I am opposed to the matching amendment which the gentleman proposes to offer, I want to say that Dr. MILLER did offer the amendment to double the land grant under this bill, and he has been most helpful on many occasions regarding Alaska legislation.

Mr. Chairman, what does this bill seek to do? It has, I should say, five important subheads. In the first place, it revises the commitment procedures. And how badly and how sadly they are in need of such revision has been pointed out by previous speakers. It is an archaic and outmoded system which is in use now, and it is a shame and disgrace that the Federal Government has allowed this situation to continue.

Next, the bill turns over to the Territorial government the administrative and legislative authority over this subject, as is proper to do.

Third, the bill authorizes the appropriation of $6½ million in Federal money for the construction of needed physical facilities.

Fourth, it provides a system for grants-in-aid over a 10-year period.

Fifth and last, the bill grants to Alaska a million acres of land as a sort of economic prop to help the Territory in carrying out the financial aspects of this program.

It might be asked: What is Alaska going to do in all of this? That is important in view of the amendment which I have been informed will be offered later on. Alaska is going to do everything at the end of 10 years, but long before that time, Alaska will start to make its important contribution to this program.

I want to emphasize here that the Congress of the United States long ago forbade Alaska to take any action whatsoever regarding the mentally ill of the Territory. We in the Territory could not even if we wanted to, and I assure you we did want to, pass a single law relating to this subject. Fifty-six years ago the Congress passed an act giving the Governor of Alaska authority to hospitalize our mentally ill. Five years later, or in 1905, that authority was turned over to the Secretary of the Interior. In Alaska's Organic Act which was approved in August of 1912, it was specifically spelled out that the Territory could not alter the 1905 act in any respect whatsoever. So our hands have been tied. We could not do anything about this program although we wanted to.

When the bill which is now before you becomes law in its present form, as I hope and expect it will, then the grant-in-aid program will work in this fashion: For each of the first 2 years the Federal Government will appropriate $1 million. Thereafter the appropriation will be reduced $400,000 in each biennium until at the end of 10 years the entire financial responsibility will be the Territory's. If we had had an opportunity to legislate on this subject in the past, had we been permitted to move into this field, then I do not imagine Alaskans would have been urging the Federal Government to make even this relatively minor contribution financially. But we have not had that opportunity.

Let me make this suggestion, that if we go along as we now are, the Federal Government during the next 10 years will have spent only $3½ million less than it will have spent if we adopt the bill before us. That is the difference—only $3½ million. Look what the expenditure of that $3½ million will bring us. It will bring us a modern system. It will bring us a Government-owned hospital and clinics within the Territory. It will bring us a proper system. We have made 100-percent grants for hospitals in the Virgin Islands. I have before me now a magazine article written by the late Senator Hugh Butler, of Nebraska, in which he speaks of the United States having financed hospitals in Guatemala and in Ecuador. A few hundred beds in maternity hospitals in Ecuador are mentioned. Honduras was also the beneficiary of an outright Federal grant.

I make no complaint about that. I simply point out that it has been done before, and having been done elsewhere it surely ought to be done in the Territory of the United States which has been under this terrific handicap for 56 years. Give us this start and we will go it on our own. I join with the chairman of the subcommittee, the gentleman from New York [Mr. O'BRIEN] in saying that we will not come back to seek more Federal money for this activity. Everywhere the O'Brien committee went throughout Alaska last fall we were told by scores of witnesses, "Start us out. Give us an aiding hand in the beginning of this program and we will carry it from there on out, and gladly."

The CHAIRMAN. The time of the gentleman from Alaska [Mr. BARTLETT] has expired.

Mr. MILLER of Nebraska. Mr. Chairman, I have no further requests for time at this time.

Mr. O'BRIEN of New York. Mr. Chairman, I yield to the gentleman from Michigan [Mr. HAYWORTH], such time as he may require.

Mr. HAYWORTH. Mr. Chairman, I rise to support this legislation, and I ask unanimous consent to revise and extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. HAYWORTH. Mr. Chairman, during the previous session I came to realize there was doubt as to the desirability of committing patients with mental disabilities from the Territory of Alaska to the States. Therefore, last fall when on committee business in Alaska, I looked into the problem.

Of the many citizens of that Territory with whom I discussed this question, every one disapproved the present practice. This was no casual judgment. In every case there was instant, wholehearted and vigorous condemnation. They feel, and it seems to me, rightly so, that they are victims of a great social injustice. If you, as a parent, suffered the misfortune of having a child in need of psychiatric treatment, I am sure you would not want to see him transported thousands of miles away so that it would be virtually impossible for you to visit him while he is ill.

And that is all the more true because under present conditions and with the attention given him where he is now being sent in the States, there is scarcely any possibility that he will get treatment—merely confinement.

Modern psychiatry is calling for more and more outpatient treatment. In other words, increased success is being attained by allowing patients to remain in their homes under normal environment and treating them only at intervals. Moreover, mental health is often improved not only by dealing with the patient but also by cooperating with other members of the household. All this is impossible if patients are shipped for treatment to a distant part of the continent.

While in the city of Sitka last fall, I had the privilege of visiting the hospital of Mount Edgecumbe with some 350 beds, and was told there are many other hospitals in Alaska, both governmental and private. The hospital I visited compared favorably with similar institutions in the States. I noted that special consideration was given health problems more often found in the Territory. Today our citizens in Alaska are being denied comparable specialization for the treatment of the mentally ill—for all of which there is no good reason.

Anyone interested in good government and in dealing fairly with the citizens of Alaska should be everlastingly grateful to the gentlewoman from Oregon [Mrs. GREEN] for her willingness to propose this bill. The reason the gentlewoman from Oregon [Mrs. GREEN] is interested is because, for a number of years, she lived close to the private institution in her own district to which patients from Alaska are now sent. For years she has been aware of this great injustice to the people of Alaska and to the taxpayers of the United States.

It is normally expected by the public that Members of Congress work for such legislation as will bring increased appropriations into their districts. This bill does just the opposite for the gentlewoman from Oregon [Mrs. GREEN]. If this bill is made law, approximately a million dollars a year less of Federal appropriations will go into her district. This is log-rolling in reverse. Instead of saying to us, "I'll help roll your log, if you'll help roll mine," the gentlewoman from Oregon [Mrs. GREEN] is saying, "I'll do my duty in saving the taxpayer's dollar in my district, and I assume that's what we're all expected to do."

Mr. O'BRIEN of New York. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. The Clerk will read.

Mr. O'BRIEN of New York. Mr. Chairman, I ask unanimous consent that the bill be considered as read and open for amendment.

The CHAIRMAN. Is there objection?

There was no objection.

The bill is as follows:

Be it enacted, etc., That this act may be cited as the "Alaska Mental Health Act."

TABLE OF CONTENTS

Sec. 1. Short title and table of contents.
Sec. 2. Purpose.
Sec. 3. Powers of the Territorial Government.

Title I—Hospitalization of the mentally ill

Sec. 101. Definitions.
Sec. 102. Powers of the Governor.
Sec. 103. Authority to receive patients.
(a) On application by patient or by guardian of minor.
(b) On application by others.
Sec. 104. Emergency hospitalization.
(a) Upon medical certification and endorsement.
(b) Without certification or endorsement.
Sec. 105. Examination of newly admitted patients; discharge by hospital.
Sec. 106. Right to discharge on application; emergency detention.
Sec. 107. Petition for judicial determination.
Sec. 108. Hospitalization upon court order; judicial procedure.
Sec. 109. Commitment to an agency of the United States.
Sec. 110. Detention under special circumstances.
(a) Pending removal to a hospital.
(b) Subject to court order pending judicial determination.
(c) Subject to order of court in criminal proceedings.
Sec. 111. Writ of habeas corpus.

Title I—Hospitalization of the mentally ill—Continued
Sec. 112. Appeal from decision or order of United States Commissioner.
Sec. 113. Transportation.
Sec. 114. Notice of hospitalization.
Sec. 115. Right to humane care and treatment.
Sec. 116. Mechanical restraints.
Sec. 117. Right to communicate and visitation; exercise of civil rights.
Sec. 118. Transfer of patients generally.
Sec. 119. Transfer of nonresident patients.
Sec. 120. Contract care outside Alaska; rights under State law.
Sec. 121. Release on convalescent status.
Sec. 122. Readmission.
Sec. 123. Discharge upon medical review and certification.
Sec. 124. Provision for personal needs of a patient on discharge.
Sec. 125. Disposition of unclaimed funds of patients.
Sec. 126. Disposition of funds subject to claim.
Sec. 127. Disclosure of information.
Sec. 128. Unwarranted hospitalization or denial of rights; penalties.
Sec. 129. Liability for expense of hospitalization.
Sec. 130. Fees and expenses for judicial proceedings.

Title II—Grants

Sec. 201. Special grants to Alaska for mental health.
Sec. 202. Land grant.

Title III—Miscellaneous Provisions

Sec. 301. Laws repealed.
Sec. 302. Existing contract and appropriations.
Sec. 303. Separability.
Sec. 304. Effective date.

PURPOSE

SEC. 2. The purpose of this act is to transfer from the Federal Government to the Territory of Alaska basic responsibility and authority for the hospitalization, care, and treatment of the mentally ill of Alaska and, in connection with such transfer—

(a) to modernize procedures for such hospitalization (including commitment), care and treatment and to authorize the Territory to modify or supersede such procedures;

(b) to assist in providing for the Territory necessary facilities for a comprehensive mental-health program in Alaska, including inpatient and outpatient facilities;

(c) to provide for a land grant to the Territory to assist in placing the program on a firm long-term basis; and

(d) to provide for a 10-year program of grants-in-aid to the Territory to enable the Territory gradually to assume the full operating costs of the program.

POWERS OF THE TERRITORIAL GOVERNMENT

SEC. 3. (a) The Territory of Alaska is hereby authorized to appropriate such sums from the public money of Alaska for the administration of its responsibilities under this act as it may deem appropriate.

(b) Notwithstanding the provisions of section 3 of the act of August 24, 1912 (37 Stat. 512; 48 U. S. C., sec. 24), or any other law, the Territorial Government of Alaska is hereby authorized to enact such laws as it may deem appropriate relating to the hospitalization (including commitment), care, and treatment of residents of or persons in Alaska who are mentally ill, and such legislation may supersede any of the provisions of title I of this act.

TITLE I—HOSPITALIZATION OF THE MENTALLY ILL

DEFINITIONS

SEC. 101. As used in this title—

(a) The term "Alaska" means the Territory of Alaska.

(b) The term "designated examiner" means a licensed physician designated by the Governor as specially qualified, under standards established by him for the purpose of this title, in the diagnosis of mental or related illness: *Provided*, That, for areas in which no licensed physician so qualified is available, any licensed physician may be designated.

(c) The term "Governor" means the Governor of Alaska.

(d) The term "head of a hospital" means the individual in charge of a hospital, or his designated representative, except that when the individual in charge of a hospital is not a licensed physician, authority placed in the head of a hospital by this title which involves in major part the exercise of medical judgment shall be exercised by the highest licensed medical official of the hospital.

(e) The term "hospital" means a public or private hospital or institution or part thereof, equipped and otherwise qualified to provide inpatient care and treatment for the mentally ill.

(f) The term "individual," as used in sections 103 and 104, means a resident of or a person in Alaska.

(g) The terms "interested party" or "interested parties" include the legal guardian, spouse, parent or parents, adult children, other close adult relatives, or an interested, responsible adult friend of a mentally ill individual or a patient.

(h) The term "licensed physician" means an individual licensed under the laws of Alaska to practice medicine or osteopathy; a medical officer of the Government of the United States while in Alaska in the performance of his official duties; or a medical officer of the Territory of Alaska.

(i) The term "mentally ill individual" means an individual having a psychiatric or other disease which substantially impairs his mental health or an individual who is mentally defective or mentally retarded.

(j) The term "patient" means a resident of or person in Alaska qualified under this title for hospitalization as a mentally ill individual.

(k) The term "police officer," when used in connection with cases which involve individuals who, because of mental illness, are likely to injure themselves or others if allowed to remain at liberty, includes a United States marshal.

(l) The term "resident of Alaska" means (i) a person who has lived continuously in Alaska for 1 year immediately preceding his admission as a patient or immediately preceding his becoming a proposed patient, or (ii) a person who has a present intention to make Alaska his home for an indefinite period of time. Such intention may be evidenced by prior statements or it may be implied from facts which show that the person does in fact make Alaska his permanent home. A married woman shall be capable of establishing a legal residence apart from her husband, and an emancipated child under 21 years shall take the legal residence of the parent or guardian with whom he is actually living.

(m) The term "State" or "States" includes the States, the District of Columbia, the Territories and possessions of the United States, and the Commonwealth of Puerto Rico.

(n) The term "United States commissioner" means a United States commissioner, appointed pursuant to section 6 of the act of June 6, 1900 (31 Stat. 323; 48 U. S. C., sec. 104).

POWERS OF THE GOVERNOR

SEC. 102. Except insofar as this title specifically confers certain powers, duties, and functions upon others, the Governor shall be charged with the administration of this title. In addition to such authority as may be conferred upon him by other sections of this title, the Governor is hereby authorized—

(a) to designate hospitals equipped and otherwise qualified to provide inpatient care and treatment for individuals who are mentally ill;

(b) to (1) provide for the hospitalization of mentally ill patients in designated hospitals of Alaska, (2) enter into arrangements with the Surgeon General of the Public Health Service for the care and treatment of such patients in hospitals of the Service in Alaska, (3) negotiate and enter into contracts with any hospital in Alaska for the care and treatment of such patients, and (4) negotiate and enter into contracts, which shall incorporate safeguards consistent with the provisions of this title, with any hospital in the continental United States for the care and treatment of such patients;

(c) to prescribe the form of applications, records, reports, and medical certificates required by this title, and the information to be contained therein;

(d) to require reports from the head of a hospital concerning the care of patients;

(e) to visit each hospital to review methods of care for all patients;

(f) to investigate complaints made by a patient or an interested party on behalf of a patient;

(g) to establish such rules and regulations not inconsistent with the provisions of this title as he may find to be reasonably necessary for the proper and efficient administration of this title; and

(h) to delegate to any officer or agency of the Territorial Government of Alaska any of the duties and powers imposed upon him by this title.

AUTHORITY TO RECEIVE PATIENTS

SEC. 103. The head of any hospital which has been designated by the Governor pursuant to section 102 is authorized to receive therein for observation, diagnosis, care, and treatment any individual whose admission is applied for under one of the following procedures:

On application by patient or by guardian of minor

(a) Any individual who is mentally ill or who has symptoms of mental illness but who has sufficient insight or capacity to make responsible application for admission and who, being 16 years of age or over, applies therefor may be admitted on his own application. Any individual under 16 years of age who is mentally ill or has symptoms of mental illness may be admitted if his parent or legal guardian applies therefor in his behalf.

On application by others

(b) Any individual may be admitted for care and treatment in a hospital upon written application by an interested party, by a health or welfare officer, by the Governor, or by the head of any institution in which the individual may be, if the application is accompanied by a certificate of a licensed physician that, on the basis of an examination held not more than 15 days prior to the individual's admission, such individual in his opinion is mentally ill and because of his illness, either (1) is likely to injure himself or others if allowed to remain at liberty, or (2) being in need of care or treatment in a hospital, lacks sufficient insight or capacity to make responsible application in his own behalf.

EMERGENCY HOSPITALIZATION

Upon medical certification and endorsement

SEC. 104. (a) If the certificate by a licensed physician under section 103 (b) states a belief that the individual is likely to injure himself or others if allowed to remain at liberty, any health, welfare, or police officer, or any person deputized by a United States commissioner, shall have authority, upon endorsement of the certificate for such purpose by the Governor or by a United States

commissioner, to take the individual into custody, apply to a designated hospital for his admission, and transport him thereto.

Without certification or endorsement

(b) Any health, welfare, or police officer who has reason to believe that an individual is mentally ill and, because of his illness, is likely to injure himself or others if not immediately restrained pending examination or certification by a licensed physician or pending endorsement of such certification as provided in subsection (a) of this section, may take the individual into custody, apply to a designated hospital for his admission and transport him thereto. The application for admission shall state the circumstances under which the individual was taken into custody and the reason for the officer's belief.

EXAMINATION OF NEWLY ADMITTED PATIENTS; DISCHARGE BY HOSPITAL

SEC. 105. The head of the hospital shall arrange for an examination by a designated examiner of every patient hospitalized pursuant to section 103 (b) or section 104 within a period not to exceed 5 days after the day of admission. At the end of such period, any patient so admitted shall, without need of application therefor, be discharged if an examination has not been held or if, upon examination, the designated examiner refuses or fails to certify to the head of the hospital that in his opinion the patient is mentally ill and either is likely to injure himself or others if allowed at liberty, or is in need of care or treatment in a hospital and because of his illness lacks sufficient insight or capacity to make responsible application therefor.

RIGHT TO DISCHARGE ON APPLICATION; EMERGENCY DETENTION

SEC. 106. (a) Any individual admitted to a hospital under authority of section 103 or 104 shall be forthwith discharged therefrom upon his request or upon the request in writing by an interested party, except that—

(1) if admitted upon his own application, his discharge may be conditioned upon his agreement;

(2) if under 16 years of age and admitted pursuant to section 103 (a), his discharge prior to becoming 16 years of age may be conditioned upon the consent of his parent or guardian;

(3) if the head of a hospital, within 48 hours from the receipt of the request, files with a United States commissioner a certification that in his opinion the discharge of the patient would be unsafe to the patient or others, the discharge may be postponed for such period not to exceed 5 days as the United States commissioner may determine to be necessary for the commencement of commitment proceedings pursuant to section 108: *Provided*, That if the United States commissioner finds that, because of circumstances beyond control, proceedings for judicial hospitalization cannot reasonably be instituted in such time, the discharge may be postponed for a period not to exceed 15 days.

(b) The head of the hospital shall provide reasonable means and arrangements for informing patients of their right to discharge as provided in this section and other sections of this title and for assisting them in making and presenting requests for discharge.

PETITION FOR JUDICIAL DETERMINATION

SEC. 107. Any patient hospitalized pursuant to section 103 (b), 104, or 108 shall be entitled to have the need for his continued hospitalization determined or redetermined on his own petition, or that of an interested party, to the United States commissioner. Upon receipt of the petition, the United States commissioner shall conduct proceedings in accordance with section 108, except that such proceedings shall not be required to be conducted if the petition is filed sooner than 6 months after the issuance of an order of hospitalization under section 108 or sooner than 1 year after the filing of a previous petition under this section.

HOSPITALIZATION UPON COURT ORDER; JUDICIAL PROCEDURE

SEC. 108. (a) An interested party, a licensed physician, a health officer, or the Governor may, by filing a written application with a United States commissioner, commence proceedings for the hospitalization of an individual by judicial commitment. Any such application shall be accompanied by a certificate of a licensed physician stating that he has examined the individual and is of the opinion that the individual is mentally ill and should be hospitalized, or by a written statement by the applicant that the individual has refused to submit to examination by a licensed physician.

(b) Upon receipt of an application, the United States commissioner shall give notice thereof to the proposed patient, to his legal guardian, if any, and to one or more of the other interested parties, if any. If, however, the United States commissioner has reason to believe that notice would be likely to be injurious to the proposed patient, notice to him may be omitted.

(c) As soon as practicable after notice of the commencement of proceedings is given or it is determined that notice to the proposed patient should be omitted, the United States commissioner shall appoint two designated examiners except that when he finds that two such examiners are not available, he may appoint a single examiner, to examine the proposed patient and report to the United States commissioner their findings as to the mental condition of the proposed patient and his need for care in a hospital.

(d) The examination shall be held at a hospital or other medical facility, at the home of the proposed patient, or at any other suitable place not likely to have a harmful effect on his health. A proposed patient to whom notice of the commencement of proceedings has been omitted shall not be required to submit to an examination against his will, but if the designated examiners report that the proposed patient refuses to submit to an examination, the United States commissioner shall give notice to the proposed patient and order him to submit to such examination.

(e) If the report of the designated examiners states that the proposed patient is not mentally ill, the United States commissioner may, without taking any further action, terminate the proceedings and dismiss the application. Otherwise, he shall forthwith fix a date for and give notice of a hearing to be held not less than 5 nor more than 15 days from receipt of the report of the designated examiners.

(f) The proposed patient, the applicant, the legal guardian, and other interested parties as determined by the commissioner, shall be given notice and afforded an opportunity to appear at the hearing, to testify, and to present and cross-examine witnesses, and the United States commissioner may, in his discretion, receive the testimony of any other person. The proposed patient shall not be required to be present, and the United States commissioner is authorized to exclude all persons not necessary for the conduct of the proceedings. The hearings shall be conducted in as informal a manner as may be consistent with orderly procedure and in a physical setting not likely to have a harmful effect on the mental health of the proposed patient. The United States commissioner shall receive all relevant and material evidence which may be offered concerning the mental condition and the residence of the proposed patient and shall not be bound by the rules of evidence. An opportunity to be represented by counsel shall be afforded to every proposed patient, and if neither he nor others provide counsel, the United States commissioner shall appoint counsel.

(g) If, upon completion of the hearing and consideration of the record, the United States commissioner finds that the proposed patient—

(1) is mentally ill; and

(2) (A) because of his illness is likely to injure himself or others if allowed to remain at liberty; or

(B) is in need of custody, care, or treatment in a hospital and, because of his illness, lacks sufficient insight or capacity to make responsible decisions concerning hospitalization,

the United States commissioner shall order his hospitalization either for an indeterminate period or for a temporary observational period not exceeding 6 months; otherwise, he shall terminate the proceedings and dismiss the application. If the United States commissioner orders the hospitalization of the proposed patient, he shall issue a finding on the legal residence of the patient. If the order is for a temporary period of hospitalization, the United States commissioner may at any time prior to the expiration of such period, on the basis of a report by the head of a hospital and such further inquiry as he may deem appropriate, order either indeterminate hospitalization of the patient or dismissal of the proceedings.

(h) The order of hospitalization shall be directed to the Governor and shall state whether the individual shall be detained for an indeterminate or for a temporary period and, if for a temporary period, then for how long. Unless otherwise directed by the United States commissioner, it shall be the responsibility of the Governor to assure the carrying out of the order of hospitalization within such period as the United States commissioner shall specify.

(i) Notwithstanding any other provision of this title except for section 119, commitment proceedings under this section shall not be commenced with respect to a patient admitted pursuant to section 103 (a) unless release of the patient has been requested by him or by an interested party on his behalf.

COMMITMENT TO AN AGENCY OF THE UNITED STATES

SEC. 109. (a) If an individual ordered to be hospitalized pursuant to section 108 is eligible for hospital care or treatment at the expense of any agency of the United States, the United States commissioner, upon receipt of a certificate from such agency showing that accommodations are available and that the individual is eligible for care, may order him to be placed in the custody of such agency for hospitalization. When any such individual is admitted, pursuant to the order of a United States commissioner, to any hospital or institution operated by any agency of the United States within or without Alaska, he shall be subject to the rules and regulations of such agency. The chief officer of any hospital or institution operated by such agency and in which the individual is so hospitalized shall with respect to such individual be vested with the same powers as the Governor or the head of a hospital concerning the detention, custody, transfer, conditional release, or discharge of patients. Jurisdiction is retained in the United States commissioner to inquire at any time into the mental condition of an individual so hospitalized, and to determine the necessity for continuance of his hospitalization, and every order of hospitalization issued pursuant to this section is so conditioned.

(b) An order of a court of competent jurisdiction of any State, authorizing hospitalization of any individual by any agency of the United States, shall have the same force and effect as to the individual while in Alaska as in the jurisdiction in which the court entering the order is situated; and

the courts of the jurisdiction issuing the order shall be deemed to have retained jurisdiction of the individual so hospitalized for the purpose of inquiring into his mental condition and of determining the necessity for continuance of his hospitalization, as is provided in subsection (a) of this section with respect to individuals ordered hospitalized by the United States commissioner. Consent is hereby given to the application of the law of the State in which is located the court issuing the order for hospitalization with respect to the authority of the chief officer of any hospital or institution operated in Alaska by any agency of the United States to retain custody, transfer, conditionally release, or discharge the individual hospitalized.

DETENTION UNDER SPECIAL CIRCUMSTANCES

SEC. 110. (a) Pending his removal to a hospital, a patient taken into custody under section 104 or ordered to be hospitalized pursuant to section 108 may be detained in his home, a licensed foster home, or any other suitable facility under such reasonable conditions as the Governor may fix, but he shall not, except because of and during an extreme emergency, be detained in a nonmedical facility used for the detention of individuals charged with or convicted of penal offenses. The Governor shall take such reasonable measures, including provision for medical care, as may be necessary to assure proper care of an individual temporarily detained pursuant to this section.

(b) Notwithstanding any other provision of this title, no patient with respect to whom proceedings for judicial hospitalization have been commenced and whose discharge would, in the opinion of the head of the hosptal, be unsafe to the patient or others shall be released or discharged from a hospital during the pendency of such proceedings unless ordered by a United States Commissioner upon the application of the patient or of an interested party.

(c) No patient held on order of a court or judge having criminal jurisdiction in any action or proceeding arising out of a criminal offense shall be discharged except upon order of a court of competent jurisdiction.

WRIT OF HABEAS CORPUS

SEC. 111. Any individual detained pursuant to this title shall be entitled to the writ of habeas corpus upon proper petition by himself or a friend to any court generally empowered to issue the writ of habeas corpus in the jurisdiction in which he is detained.

APPEAL FROM DECISION OR ORDER OF UNITED STATES COMMISSIONER

SEC. 112. Any party may appeal to the District Court for the Territory of Alaska from any decision or order of a United States Commissioner pursuant to this act within 10 days of the date of the decision or order, and the District Court for the Territory of Alaska shall review the case on the record. While such appeal is pending, the decision or order of the United States Commissioner shall, unless otherwise directed by the court, be given full force and effect as if no appeal had been taken. Any appeal from a final or interlocutory decision of the District Court for the Territory of Alaska in a proceeding under this act shall be governed by the law applicable generally to appeals from the District Court for the Territory of Alaska.

TRANSPORTATION

SEC. 113. Whenever an individual is about to be hospitalized under the provisions of this title, the Governor shall arrange, upon the request of a person having a proper interest in the individual's hospitalization, for the individual's transportation to the hospital, with appropriate medical or nursing attendants and by such means as may be suitable for the patient's medical condition. Whenever practicable, the individual to be hospitalized shall be permitted to be accompanied by one or more of his relatives or friends who shall travel at their own expense. When necessary the Governor shall arrange for a police officer to accompany the individual.

NOTICE OF HOSPITALIZATION

SEC. 114. Whenever a patient has been admitted to a hospital pursuant to this title other than upon his own application, the head of the hospital shall notify immediately the patient's legal guardian, parent or parents, spouse, or next of kin, if known. The head of the hospital admitting an individual under any provision of this title, or discharging an individual so admitted, shall forthwith make a report thereof to the Governor.

RIGHT TO HUMANE CARE AND TREATMENT

SEC. 115. Every patient shall be entitled to humane care and treatment and, to the extent that facilities, equipment, and personnel are available, to medical care and treatment in accordance with the highest standards accepted in medical pratcice.

MECHANICAL RESTRAINTS

SEC. 116. Mechanical restraints shall not be applied to a patient unless it is determined by the head of the hospital or his designee to be required by the medical needs of the patient. Every use of a mechanical restraint and the reasons therefor shall be made a part of the clinical record of the patient under the signature of the head of the hospital or his designee.

RIGHT TO COMMUNICATE AND VISITATION; EXERCISE OF CIVIL RIGHTS

SEC. 117. (a) Subject to the general rules and regulations of the hospital and except to the extent that the head of the hospital determines that it is necessary for the medical welfare of the patient to impose restrictions, every patient shall be entitled—

(1) to communicate by sealed mail or otherwise with persons, including official agencies, inside or outside the hospital;

(2) to receive visitors; and

(3) to exercise all civil rights, including the right to dispose of property, execute instruments, make purchases, enter contractual relationships, and vote, unless he has been adjudicated incompetent and has not been restored to legal capacity.

(b) Notwithstanding any limitations authorized by this section on the right of communication, every patient shall be entitled to communicate by sealed mail with the governor and with the United States Commissioner, if any, who ordered his hospitalization.

(c) Any limitations imposed by the head of a hospital on the exercise of these rights by a patient and the reasons for such limitations shall be made a part of the clinical record of the patient.

TRANSFER OF PATIENTS GENERALLY

SEC. 118. (a) The governor may authorize the transfer of a patient from one hospital to another hospital if he determines that it would be consistent with the medical needs of the patient to do so. Whenever a patient is transferred, written notice thereof shall be given to his legal guardian, if any, parent or parents, and spouse, or, if none be known, to any other interested party. In all such transfers, due consideration shall be given to the relationship of the patient to his family, legal guardian, or friends, so as to maintain relationships and encourage visits beneficial to the patient.

(b) Upon receipt of a certificate from an agency of the United States that accommodations are available for the care of any individual heretofore ordered hospitalized pursuant to law or hereafter hospitalized pursuant to section 108 of this title in any hospital for care or treatment of the mentally ill, and that such individual is eligible for care or treatment in a hospital or institution of such agency, the Governor may cause his transfer to such agency of the United States for hospitalization. The United States Commissioner who ordered the individual to be hospitalized, and the guardian, spouse, and parent or parents, or if none be known, some other interested party, shall be notified immediately of the transfer by the Governor. No person shall be transferred to an agency of the United States if he is confined pursuant to conviction of any felony or misdemeanor, or if he has been acquitted of a criminal charge solely on the ground of mental illness, unless prior to transfer the United States Commissioner who originally ordered confinement of such person shall enter an order for the transfer after appropriate motion and hearing. Any person transferred as provided in this section to any agency of the United States shall be deemed to be hospitalized by that agency pursuant to the original order of hospitalization.

TRANSFER OF NONRESIDENT PATIENTS

SEC. 119. (a) The admission papers of any person hospitalized pursuant to this title shall include a statement as to his legal residence. The Governor is authorized to transfer any patient who has been hospitalized by the judicial procedure and who is not a resident of Alaska to the State in which he has legal residence. In addition, the Governor is authorized to transfer any other patient who is not a resident of Alaska to the State in which he has a legal residence, if the consent of the patient or his legal guardian has been obtained. If the patient or his legal guardian refuses to give consent, the Governor may order the discharge of the patient: *Provided*, That if the patient is certified by the head of a hospital to be dangerous to himself or to others, the Governor may cause proceedings for judicial hospitalization to be initiated with respect to such patient, pursuant to section 108 of this title. For the purposes of this subsection, the term "State" (as defined in section 101 (m)), shall mean only a State which has agreed to the transfer or return of patients hospitalized pursuant to this title.

(b) For the purpose of facilitating the return of such nonresident patients, the Governor may enter into a reciprocal agreement with any State providing for the prompt transfer, under appropriate supervision, of residents of such State or Alaska who are mentally ill. Mentally ill residents of Alaska who have been hospitalized outside Alaska may be transferred, with the approval of the Governor, to a hospital designated by the Governor. All expenses incurred in returning to their legal residence patients who are nonresidents of Alaska may be paid from funds appropriated for the administration of this title, but the expense of transferring residents of Alaska who have been hospitalized for mental illness outside Alaska shall be borne by the State making the transfer.

(c) The Governor is hereby further authorized to enter into a reciprocal agreement with any State providing for the care and treatment of mentally ill residents of Alaska by such State, and for the care and treatment of mentally ill residents of such State by Alaska, each on a reimbursable basis.

(d) In taking action under subsections (a) and (c) of this section, due consideration shall be given to the relationship of patient to his family, legal guardian, or friends, so as to maintain relationships and encourage visits beneficial to the patient.

CONTRACT CARE OUTSIDE ALASKA; RIGHTS UNDER STATE LAW

SEC. 120. Nothing in this act shall be deemed to alter or impair the application or availability to any patient, while hospitalized in a State outside Alaska pursuant to contractual arrangements under section 102 (b), of any rights, remedies, or protective safeguards provided by the law of such State.

RELEASE ON CONVALESCENT STATUS

SEC. 121. The head of a hospital may place an improved patient on convalescent status when he believes that such status is in the best interests of the patient. Convalescent status shall so far as practicable include provisions for continuing responsibility to and by the hospital, and for a plan of treatment on an outpatient basis or under the direction of a licensed physician. Prior to the end of a year on convalescent status, and not less frequently than annually thereafter, the head of the hospital shall reexamine the facts relating to the hospitalization of the patient on convalescent status and, if he determines that in view of the condition of the patient hospitalization is no longer necessary, he shall discharge the patient.

READMISSION

SEC. 122. At any time prior to such discharge, the head of the hospital from which the patient is given convalescent status may readmit the patient. If in the case of a patient committed under section 108 there is reason to believe that it is to the best interest of the patient to be rehospitalized, the Governor or the head of the hosptial may issue an order for the immediate rehospitalization of the patient. Such an order, if not voluntarily complied with, shall, upon the endorsement by a United States commissioner of the precinct in which the patient is resident or present, authorize any health, welfare, or police officer to take the patient into custody and transport him to the hospital, or if the order is issued by the Governor to a hospital designated by him.

DISCHARGE UPON MEDICAL REVIEW AND CERTIFICATION

SEC. 123. The head of a hospital shall cause the condition of every patient to be reviewed as frequently as practicable, but not less often than every 6 months, and whenever the head of a hospital certifies that the conditions justifying hospitalization no longer obtain, the patient shall be discharged. If the patient was admitted on other than his own application, notice of such discharge shall be given to the patient's legal guardian, parent or parents, spouse, or next of kin, if known, and, if the patient was hospitalized by judicial process, to the United States commissioner who ordered him to be committed.

PROVISION FOR PERSONAL NEEDS OF A PATIENT ON DISCHARGE

SEC. 124. The Governor shall make such arrangements as may be necessary to insure—

(a) that no patient is discharged or granted a conditional release from a hospital without suitable clothing; and

(b) that any indigent patient discharged or granted a conditional release is furnished suitable transportation for his return home and an amount of money not exceeding $50.

DISPOSITION OF UNCLAIMED FUNDS OF PATIENTS

SEC. 125. All articles of personal property belonging to a patient who has died prior to his release on convalescent status or discharge or who has eloped therefrom, and remaining in the custody of the head of the hospital, shall, if unclaimed by such patient, or his legal heirs or reprstatives, within the period of five years after the decease of such patient or the date of his leaving the hospital, be disposed of in such manner as the Governor may prescribe, and any proceeds resulting therefrom shall be covered into the Treasury of the Territory of Alaska. Any moneys remaining to the credit of such patient, if unclaimed by his legal heirs or representatives or by such patient within the period if five years after the decease of such patient or the rate of his leaving the hospital, shall be covered into the Treasury of the Territory of Alaska.

DISPOSITION OF FUNDS SUBJECT TO CLAIM

SEC. 126. The Governor shall cause diligent inquiry to be made, in every instance after death or elopement of any patient, to ascertain his whereabouts or that of his legal heirs or representatives and shall turn over to the proper party or parties any moneys or articles of personal property in the custody of the head of the hospital to the credit of such person. Claims to such moneys or articles of personal property may be presented to the Governor at any time. In the event a claim is established by competent proof more than five years after the death or elopment of a patient, it shall be certified to the Territorial legislature for consideration.

DISCLOSURE OF INFORMATION

SEC. 127. (a) All certificates, applications, records, and reports, other than on order of a court or United States commissioner made for the purposes of this title, and directly or indirectly identifying a patient or former patient or an individual whose hospitalization has been sought under this title together with clinical information relating to such patients shall be kept confidential and shall not be disclosed by any person except insofar—

(1) as the individual identified or his legal guardian, if any (or, if he be a minor, his parent or legal guardian), shall consent; or

(2) as disclosure may be necessary to carry out any of the provisions of this title; or

(3) as a court may direct upon its determination this disclosure is necessary for the conduct of proceedings before it and that failure to make such disclosure would be contrary to the public interest.

(b) Nothing in this section shall preclude disclosure, upon proper inquiry, of information concerning current medical condition to the members of the family of a patient or to his relatives of friends.

(c) Any person violating any provision of this section shall be guilty of a misdemeanor and subject to a fine of not more than $500 or imprisonment for not more than 1 year, or both.

UNWARRANTED HOSPITALIZATION OR DENIAL OF RIGHTS; PENALTIES

SEC. 128. Any person who willfully causes, or conspires with or assists another to cause—

(a) the unwarranted hospitalization of any individual under the provisions of this title; or

(b) the denial to any individual of any rights granted to him under the provisions of this title, shall be punished by a fine not exceeding $500 or imprisonment not exceeding 1 year, or both.

LIABILITY FOR EXPENSE OF HOSPITALIZATION

SEC. 129. (a) It shall be the duty of a patient, or his legal representative, spouse, parents, adult children, in that sequence, to pay or contribute to the payment of the charges for the care or treatment of such patient when hospitalized pursuant to the provisions of this title in such manner and proportion as the Governor may find to be within their ability to pay: *Provided*, That such charges shall in no case exceed the actual cost of such care and treatment. The order of the Governor relating to the payment of charges by persons other than the patient, or his legal representative, shall be prospective in effect and shall relate only to charges to be incurred subsequent to the order: *Provided, however*, That if any of the above-named persons willfully conceal their ability to pay, such persons shall be ordered to pay, to the extent of their ability, charges accruing during the period of such concealment. The Governor may cause to be made such investigations as may be necessary to determine such ability to pay, including the requirement of sworn statements of income by such persons.

(b) As used in subsection (a), the term "actual cost of care," shall mean either the rate provided for by a contract entered into pursuant to section 102 (b) of this title, or, in the absence of such contract, a per diem rate fixed by the Governor.

(c) The Governor is authorized to accept from any interested party any payment for the care and treatment of any patient, even if such payment is not required by an order of the Governor under subsection (a), so long as the total payments received under subsection (a) and this subsection do not exceed the actual cost of care and treatment.

FEES AND EXPENSES FOR JUDICIAL PROCEEDINGS

SEC. 130. A United States commissioner and the witnesses, in proceedings for judicial hospitalization shall be entitled to the same compensation and mileage as in civil actions. All compensation, mileage, fees, and all other expenses arising from judicial hospitalization proceedings shall be audited and allowed by the district judge of the division in which said proceedings are held, and when so audited and allowed shall be paid by the clerk of the court in said division in the same manner and from the same fund as he pays the other incidental expenses of the court. To the extent that services of a United States marshal or deputy marshal are utilized to carry out the provisions of this title, such marshal or deputy marshal shall be entitled to fees and actual expenses from the same source and in the same manner as for their other official duties.

TITLE II—GRANTS

SPECIAL GRANTS TO ALASKA FOR MENTAL HEALTH

SEC. 201. Title II of the Public Health Service Act, as amended, is hereby amended by adding thereto a new part as follows:

"PART H—GRANTS TO ALASKA FOR MENTAL HEALTH

"Grants for Alaska mental health program

"SEC. 371. (a) There are hereby authorized to be appropriated the following sums to be available to the Surgeon General of the Public Health Service for the purpose of making grants to the Territory of Alaska to assist it to carry out plans, submitted by the Governor of the Territory or his designee and approved by the Surgeon General, for an integrated mental health program for the Territory, including the outpatient and inpatient care and treatment of the mentally ill as defined in title I of the Alaska Mental Health Act: For each of the fiscal years ending June 30, 1957, and June 30, 1958, the sum of $1 million; for each of the fiscal years ending June 30, 1959, and June 30, 1960, the sum of $800,000; for each of the fiscal years ending June 30, 1961, and June 30, 1962, the sum of $600,000; for each of the fiscal years ending June 30, 1963, and June 30, 1964 the sum of $400,000; and for each of the years ending June 30, 1965, and June 30, 1966, the sum of $200,000.

"(b) The Surgeon General shall, prior to the beginning of each calendar quarter or such shorter period as the Surgeon General may find necessary, estimate the cost of carrying out the approved plan, on the basis of estimates furnished by the Territory, including estimates of the amount of contractual obligations for the hospitalization of the mentally ill, and on the basis of such further investigations as he may find necessary. From the amounts appropriated for any fiscal year, the Surgeon General shall pay to the Territory the amount requested by it but not to exceed the amount so estimated by the Surgeon General for each such period, reduced or increased, as the case may be, by any sum (not previously adjusted under this section) by which he finds that the amount paid for any prior period was greater or less than the amount which should have been paid. The amount of any balance of payments made to the Territory under this section and remaining unobligated on July 1, 1966, shall be repaid to the Treasury of the United States.

"(c) Whenever the Surgeon General finds, after affording opportunity for hearing, that

the Territory has failed to comply substantially with any provisions of the approved plan, he shall notify the Governor that no further payments will be made under this section (or that further payments will not be made for parts of the plan affected by such failure) until he is satisfied that there will no longer be any such failure.

"(d) The Surgeon General is authorized to enter into arrangements with the Territorial government to provide for the care and treatment, in hospitals operated by the Service, in Alaska, of patients requiring hospitalization on account of mental illness. Such arrangements shall be subject to the availability of suitable facilities therefor and shall provide for charges to the Territorial government in amounts determined by the Surgeon General which shall be sufficient to cover the full cost of such care and treatment. Upon payment by the Territory the amount of such charges shall be credited to the appropriation from which such costs were incurred: *Provided*, That, during the period of grants under this section, payment may be effected by deductions from the amount of such grants otherwise payable to the Territory, and credited to the appropriation from which such costs were incurred.

"(e) The Governor of Alaska is hereby authorized, until April 1, 1957, and without further authorization from the Territorial legislature, to expend such funds as may be made available to the Territory of Alaska pursuant to this section.

"*Payments for construction of hospital facilities*

"SEC. 372. (a) There is hereby authorized to be appropriated for the period beginning July 1, 1956, and ending June 30, 1966, a total sum in the amount of $6.5 million, to remain available until expended, to enable the Surgeon General to make payments to the Territory of Alaska for the cost of construction of hospital and other facilities in Alaska needed for the carrying out of a comprehensive program for the mentally ill as defined in title I of the Alaska Mental Health Act.

"(b) Such facilities shall be scheduled for construction in accordance with a comprehensive construction program, developed by the Territory in consultation with the Public Health Service and approved by the Surgeon General. Projects shall be constructed in accordance with such approved program and in accordance with plans and specifications for the project approved by the Surgeon General.

"(c) Upon certification by the Territory, based upon inspection by it, that work has been performed upon a project, or purchases have been made in accordance with approved plans and specifications, and that payment of an installment is due, the Surgeon General shall certify such installment for payment: *Provided, however*, That the Surgeon General may cause the project to be inspected at any time, and if such inspection indicates that the project is not being constructed in accordance with approved plans and specifications, he may, after notice and affording opportunity for hearing, withhold further payment until he finds that adequate corrective measures have been taken.

"(d) The term 'cost of construction' means the amount found necessary by the Surgeon General for the construction of a project and includes the construction and initial equipment of buildings (including medical transportation facilities), architects' and engineering fees, the cost of land acquired specifically for the purpose of the project, and on-site improvements.

"(e) If, within 20 years from the date of completion of construction, any hospital or other medical facility constructed with the aid of grants under this section shall cease to be a publicly owned facility operated for the care of the mentally ill, the United States shall be entitled to recover from the Territory the then value of the hospital or other medical facility reduced, however, proportionately to the extent to which the Territory may have contributed to the cost of construction thereof."

LAND GRANT

SEC. 202. (a) The Territory of Alaska is hereby granted and shall be entitled to select, within 5 years from the effective date of this act, not to exceed 500,000 acres from the public lands of the United States in Alaska which are vacant, unappropriated, and unreserved at the time of their selection: *Provided*, That nothing herein contained shall affect any valid existing rights. All lands duly selected by the Territory of Alaska pursuant to this section shall be patented to the Territory by the Secretary of the Interior.

(b) The lands authorized to be selected by the Territory of Alaska by subsection (a) of this section shall be selected in such manner as the laws of the Territory may provide, and in conformity with such regulations as the Secretary of the Interior may prescribe. The authority to make selections shall never be alienated or bargained away, in whole or in part, by the Territory. All selections shall be made in reasonably compact tracts, taking into account the situation and potential uses of the lands involved. Upon the revocation of any order of withdrawal in Alaska, the order of revocation shall provide for a period of not less than 90 days before the date on which it otherwise becomes effective during which period the Territory of Alaska shall have a preferred right of selection, subject to the requirements of this act, except as against prior existing valid rights or as against equitable claims subject to allowance and confirmation. Such preferred right of selection shall have precedence over the preferred right of application created by section 4 of the act of September 27, 1944 (58 Stat. 748; 43 U. S. C., sec. 282), as now or hereafter amended, but not over other preference rights now conferred by law. As used in this subsection, the words "equitable claims subject to allowance and confirmation" include, without limitation, claims of holders of permits issued by the Department of Agriculture on lands eliminated from national forests, whose permits have been terminated only because of such elimination and who own valuable improvements on such lands.

(c) All grants made or confirmed under this section shall include mineral deposits.

(d) Following the selection of lands by the Territory and the approval of such selection by the Secretary of the Interior, but prior to the issuance of final patent, the Territory shall be authorized to lease and to make conditional sales of such selected lands.

(e) All lands granted to the Territory of Alaska under this section, together with the income therefrom and the proceeds from any dispositions thereof, shall be administered by the Territory of Alaska as a public trust for the hospitalization and care of the mentally ill in Alaska. Such lands, income, and proceeds shall be managed and utilized in such manner as the Legislature of Alaska may provide. Such lands, together with any property acquired in exchange therefor or acquired out of the income or proceeds therefrom, may be sold, leased, mortgaged, exchanged, or otherwise disposed of in such manner as the Legislature of Alaska may provide, in order to obtain funds or other property to be invested, expended, or used by the Territory of Alaska. The authority of the Legislature of Alaska under this subsection shall be exercised in a manner compatible with the conditions and requirements imposed by other provisions of this act.

TITLE III—MISCELLANEOUS PROVISIONS

LAWS REPEALED

SEC. 301. (a) The following acts and all amendments thereto and parts of acts and all amendments thereto are repealed:

(1) Section 8 of the act of January 27, 1905 (33 Stat. 619; 48 U. S. C., sec. 47);

(2) Section 7 of the act of February 6, 1909 (35 Stat. 610; 48 Stat. U. S. C., sec. 46);

(3) Act of June 25, 1910 (36 Stat. 852; 48 U. S. C., sec. 46b);

(4) Act of April 24, 1926 (44 Stat. 322; 38 U. S. C., secs. 50 and 50a); and

(5) Act of October 14, 1942 (56 Stat. 782; 48 U. S. C., secs. 46, 46c, 47a, 47b, 47c, 48, 48a, 50, 50a): *Provided*, That the Secretary of the Interior shall retain the authority conferred upon him by the act of April 24, 1926, as amended (48 U. S. C., secs. 50, 50a), with respect to the moneys and personal property of any patient who has died or eloped prior to the effective date of this act.

(b) Any rights or liabilities now existing under the acts, the amendments thereto, and parts of acts referred to in subsection (a) hereof shall not be affected by this repeal.

EXISTING CONTRACT AND APPROPRIATIONS

SEC. 302. (a) Within 30 days from the date of enactment of this act, the Secretary of the Interior, with the concurrence of the Governor of Alaska, shall either (i) assign all of his rights and duties under contract numbered 13-04-001-81, entered into on June 18, 1953, between the Secretary of the Interior on behalf of the United States, and the Sanitarium Co., of Portland, Oreg., to the Territory of Alaska, such an assignment to become effective on the effective date specified in section 304 hereof, or (ii) terminate the said contract in accordance with the terms thereof. Upon such assignment, such contract shall have the same binding effect upon the Territory as would a contract negotiated pursuant to section 102 (b) of this act.

(b) On the effective date of this act, so much of all unexpended balances of appropriations as are available to the Department of the Interior for the care of the Alaska insane shall be transferred to the Governor of Alaska to be available for expenditure by him for the administration of this act, and the Secretary of the Interior shall, as soon as practicable, after the date of enactment hereof, before or after the effective date of this act, transfer to the Governor of Alaska all papers and documents used primarily in the administration of all laws pertaining to the Alaska insane.

(c) Until July 1, 1956, expenses for the transportation to a hospital outside of Alaska of all patients hospitalized pursuant to section 108 of title I of this act shall be paid by the Department of Justice.

SEPARABILITY

SEC. 303. If any portion of this act or the application thereof to any person or circumstance is held invalid, the remainder of the act and the application of such provision to other persons or circumstances shall not be affected thereby.

EFFECTIVE DATE

SEC. 304. Except as otherwise provided in section 302 hereof, this act shall become effective on the 210th day immediately following the date of its enactment.

The CHAIRMAN. The Clerk will report the committee amendments.

The Clerk read the following committee amendments:

Page 2, Table of Contents, strike out "Sec. 128. Unwarranted hospitalization or denial of rights; penalties." Renumber "Sec. 129." as "Sec. 128." and "Sec. 130." as "Sec. 129."

Page 15, line 2, strike the words "less than five nor."

Page 15, line 17, after the word "receive", insert the words "and maintain a record of."

Page 15, line 23, at the end of the line add the following language: "If, not less than five days prior to the date fixed for the hearing, the proposed patient, his counsel, or any member of his immediate family files a written request with the United States Commissioner therefor, the Commissioner shall summon and impanel a jury of six adult residents to hear and consider the evidence concerning the mental condition of the proposed patient."

Page 16, line 1, after the word "Commissioner", insert the following words: "or, in the event the right to a jury has been exercised pursuant to subsection (f) hereof, the jury."

Page 28, lines 17 and 18, strike the words "or granted a conditional release."

Page 28, lines 20 and 21, strike the words "or granted a conditional release."

Page 30, line 22, strike the word "this" and insert in lieu thereof the word "that."

Page 31, strike all of lines 8 through 17, and renumber all subsequent sections in title I.

Page 32, line 14, strike the words "of care" and insert in lieu thereof the words "of such care and treatment."

Page 32, lines 25 and 26, strike the words "and the witnesses" and insert in lieu thereof the words ", the witnesses, and the jurymen, if any."

Page 33, line 16, strike the roman numeral "II" and insert in lieu thereof the roman numeral "III."

Page 35, line 18, strike the words "in Alaska."

Page 36, line 4, strike the word "and" and insert in lieu thereof the words "with such deductions to be."

The committee amendments were agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Page 36, line 12, strike all of lines 12 through 20, inclusive, and insert in lieu thereof the following:

"SEC. 372. (a) There is hereby authorized to be appropriated an amount not exceeding the total sum of $6,500,000, to remain available until expended, to enable the Surgeon General to make payments to the Territory of Alaska as the total contribution of the Federal Government to be used in the construction of hospital and other facilities in Alaska needed for the carrying out of a comprehensive program for the mentally ill as defined in title I of the Alaska Mental Health Act."

Mr. MILLER of Nebraska. Mr. Chairman, I offer an amendment to the committee amendment.

The Clerk read as follows:

Amendment offered by Mr. MILLER of Nebraska to the committee amendment: On page 37, line 6, after the word "act", strike out the period and insert a semicolon and the following: "*Provided*, That the Territory of Alaska shall match dollar for dollar all Federal money advanced for the construction of the hospital and other facilities."

Mr. MILLER of Nebraska. Mr. Chairman, I will not belabor the Committee with a long explanation of the amendment; it speaks for itself. It requires that the Territory have some responsibility. As it is under the proposed bill they have not a thin dime invested in the new hospital.

The principle in the United States is to require States to match Federal funds. We do it under the Hill-Burton Act, and the Federal matching for roads; and I feel that the principle should be included in this bill. I am also convinced that the present cost of six or seven dollars a day care at Morningside Hospital—may well be twenty-five to thirty dollars a day in the new hospital. The standards set up in this bill, if followed, will cost a great deal. The Alaska people may not thank this Congress when they assume the much greater financial burden which will occur under this bill.

Mr. O'BRIEN of New York. Mr. Chairman, I rise in opposition to the amendment.

The proposed amendment, in my considered judgment, would sink the bill.

When we went to Alaska last fall we inquired very carefully into this question of ability to match. We looked, I might add, for hidden assets. We were assured by the Governor of Alaska and practically everyone in Alaska that the Territory could not financially meet the obligation which would be imposed under the gentleman's amendment.

I may say in passing that when this transition is completed, the annual cost to Alaska for operating its own mental health system will be about $733,000 a year, I am informed. I do not think that Alaska can do any more. If we were to require Alaska, which is not a State, and should not be treated as a State unless it has the sinews of statehood, to match dollar for dollar, then this bill will fall and we will not be able to accomplish this desperately needed facility.

Mr. DAWSON of Utah. Mr. Chairman, I, too, rise in opposition to the amendment to the committee amendment, not that I disagree with my colleague from Nebraska in regard to his position; that is, that he wants Alaska to share in the responsibility for the case of the mentally ill in Alaska. I think his position is commendable and I agree with him. But it is my contention, however, that Alaska is participating with the Government in caring for the mentally ill.

I call the committee's attention to the fact that as the bill was originally written it provided, starting with line 14 on page 3ℓ, that the $6,500,000 was to remain available until expended, to enable the Surgeon General to make payments to the Territory of Alaska for the cost of construction of hospital and other facilities, and so forth.

The committee felt that the Territory should have some responsibility over and above this $6½ million, so the bill was amended as provided in line 23, page 36, and the words added on page 37, "the total contribution of the Federal Government to be used in the construction of hospital and other facilities in Alaska" anticipating there were to be other costs that had to be incurred. So the committee felt we were not prepared to go beyond this amount.

It has been estimated that the $6½ million will only provide 275 beds, yet we have 350 patients in Alaska, which means that the Territory will be required to assume the burden for these additional 75 beds. This is their joint participation.

So I say to my colleague from Nebraska, I agree with him they should participate, and as provided under the terms of the committee amendment they are participating. That is about the extent they can go. If they were required to match on a 50-50 basis, it has been estimated it would mean a 10 percent increase in taxes to the citizens of the Territory of Alaska which they simply cannot bear in view of the fact the Federal Government owns 98 percent of all the Territory of Alaska.

Mrs. GREEN of Oregon. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Nebraska [Mr. MILLER].

Mr. Chairman, I join the gentleman from Utah in again reminding the Members that the Federal Government does own more than 99 percent of all of the land in Alaska. I might add, also, that the Federal Government prohibits the Territory of Alaska from issuing revenue bonds. Therefore, it seems obvious it would be impossible for them at the present time to match the funds. This amendment would take the heart out of the bill.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Nebraska [Mr. MILLER] to the committee amendment.

The amendment to the committee amendment was rejected.

The CHAIRMAN. The question is on the committee amendment.

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment:

Page 37, line 15, strike the words "cost of."

Page 38, line 8, strike the word "five" and insert in lieu thereof the word "ten."

Page 38, lines 9 and 10, strike the words "five hundred thousand" and insert in lieu thereof "one million."

The committee amendments were agreed to.

The Clerk read as follows:

Committee amendment: Page 40, line 15, after the word "trust" insert the following words: "for the hospitalization and care of the mentally ill in Alaska."

Mr. ASPINALL. Mr. Chairman, I offer an amendment to the committee amendment.

The Clerk read as follows:

Amendment offered by Mr. ASPINALL: On page 40, line 15, after the word "trust" insert "and the income therefrom shall first be applied to meet the necessary expenses of the program."

Mr. ASPINALL. Mr. Chairman, this language is offered to take care of some of the objections that appeared in the discussion while we were requesting a rule. I am authorized at this time to state that the gentleman from Mississippi [Mr. COLMER], who had some reservations as to the legislation, will withdraw his opposition if this amendment is adopted by the committee.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. ASPINALL. I yield to the Delegate from Alaska.

Mr. BARTLETT. I think the amendment is a worthy one, and I hope it is adopted.

Mr. MILLER of Nebraska. Mr. Chairman, will the gentleman yield?

Mr. ASPINALL. I yield to the gentleman from Nebraska.

Mr. MILLER of Nebraska. In my opinion it helps the bill also, and I will be glad to accept it on this side. I would also point out that there was some question about the 1 million acres of land. The gentleman will recall that it was my amendment in the committee that changed it from 500,000 to 1 million, and it seems if they get this land shortly after the bill is passed or within a reasonable time, they can soon begin to get some revenue from the land that will assist them in providing additional mental facilities to take care of their patients.

Mr. ASPINALL. I am in full agreement with the gentleman's statement. The gentleman will recall that I was one of the first in the committee to go along with him in the request to change it from 500,000 to 1 million.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Colorado, Mr. ASPINALL, to the committee amendment.

The amendment was agreed to.

The committee amendment as amended was agreed to.

The Clerk read as follows:

Committee amendments:

Page 40, line 24, strike the number "610" and insert in lieu thereof the number "601."

Page 41, line 3, strike the number "38" and insert in lieu thereof the number "48."

The committee amendments were agreed to.

The CHAIRMAN. Under the rule the committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. PRICE, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H. R. 6376) to provide for the hospitalization and care of the mentally ill of Alaska, and for other purposes, pursuant to House Resolution 368, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en bloc.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE TO EXTEND

Mr. ASPINALL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to extend their remarks on the bill H. R. 7871.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

OPPOSITION TO ORGANIZATION FOR TRADE COOPERATION

The SPEAKER. Under previous order of the House, the gentleman from West Virginia [Mr. BAILEY] is recognized for 20 minutes.

Mr. BAILEY. Mr. Speaker, the so-called reciprocal trade agreements program is now 21 years of age. That represents a very considerable span of years, and has given us enough time to test the program and particularly its administration.

It is no longer a reciprocal agreement. Its administration by our State Department makes every small American industry a pawn in the game of international politics with Secretary Dulles playing our hand at the poker table in Geneva.

There can no longer be any doubt about the meaning of this trade program so far as Congress is concerned. What the final objective is, no longer lies hidden. It is open to view for anyone to see. I refer to the administration of the Trade Agreements Act and the separation of Congress from its constitutional authority over the regulation of our foreign commerce under the administration of the trade program as it has been carried out.

Nor can there any longer be any doubt about the meaning of the trade program and the character of its administration to American industry, to American agriculture, to mining and fishing operations, to those who work at these pursuits, millions of men and women whose incomes and livelihood depend upon employment in domestic plants, mills, mines, and other gainful occupations. Import competition is not a matter of indifference to them. The trade agreements program and how it is handled is of the greatest importance and concern to them.

The unfolding of this program, the trade agreements program, especially since abandonment of the bilateral agreements and the substitution of the multilateral system, when the Geneva agreement went into effect 8 years ago, left many of us with the gravest misgivings, wondering how far it would go.

Now there is no longer any mystery about it. With the resurrection of the badly defeated ITO proposal, now again rearing its head in the recently negotiated OTC, there no longer remains a shred of doubt what the plan is.

To refresh the memory of those Members who were here 5 or 6 years ago and to call attention to those Members who arrived here thereafter, to a little history, let me say that the letters "ITO" were the initials of the International Trade Organization, the charter for which was signed in Habana, Cuba, in 1948. This ITO charter, which called for a world trade organization under the United Nations, was brought to Congress for approval. However, it never got beyond the House Committee on Foreign Affairs where it was pigeonholed after full hearings in 1950.

That was the end of the ITO.

Now 6 years later the OTC is brought before us, dressed in innocent garb and trotted out as a harmless lamb.

The fact is that the proposed OTC, which stands for the Organization for Trade Cooperation, is not only the abandoned ITO all over again in essence and potential, but is more attractively packaged.

It has been advertised as calling for no supernational power; but that is exactly what it would have in practice and in fact. Since it would have an assembly, which means a law or rule-making body, it could turn itself into the ITO at any time it saw fit to do so. We would have 1 vote out of an initial total of 35.

Unquestionably this resurrected International Trade Organization under the innocent-sounding name of Organization for Trade Cooperation, would make a meek beginning, as a fledgling of the United Nations. Once more the Members of Congress would lose sight of the body sitting in Geneva. Before many years, however, in fact, quite soon, we would find that the coils of the python had been silently but thoroughly thrown around us.

The authority that we find, when we read the Constitution, conferred upon Congress in unmistakable black and white, to regulate foreign commerce and to lay and collect duties on imports, would be found to be little more than so many words.

That is the prospect that faces Congress during this session.

Mr. LANHAM. Mr. Speaker, will the gentleman yield?

Mr. BAILEY. I yield to the gentleman from Georgia.

Mr. LANHAM. How can the Constitution be amended and that power taken away from the Congress? Has it ever been tested in the courts?

Mr. BAILEY. It has not. This undelegated authority was assumed by the delegate at Geneva when this General Agreement on Trade and Tariffs was entered into. It has never been authorized or approved by the Congress. If the gentleman recalls, even in the last extension of the Trade Agreements Act in the 1st session of the 84th Congress, since the other body always writes into that legislation a caveat or a disclaimer of responsibility, there was written into the legislation language to the effect that nothing contained in this legislation shall be construed as a determination of the policy or attitude of the Congress of the United States in the matter of the recognition of the reciprocal agreement in Geneva.

Mr. LANHAM. Then the Congress has only acquiesced in the assumption of power by the State Department?

Mr. BAILEY. By its neglect of its duty.

Mr. LANHAM. Is not the OTC a legislative body?

Mr. BAILEY. It consists of 35 members. It is a rule-making body; it will conduct hearings. But while there is

just one American representative, there are 34 other nations that are members.

Mr. LANHAM. I understand it has the right to legislate. Is not that getting pretty close to a worldwide organization to take over the function of legislation that the Constitution places on the Congress?

Mr. BAILEY. I would like to say to the gentleman I am sure the proponents of this are afraid to submit it to the other body in a formal way for ratification. They hope by getting legislation here to lull the Congress into silence in the future, so that we will forget all about it as we forgot all about it since 1945, in the hope that when we make up, it will be too late to do anything about it, and that we will be so bound by it that we cannot do anything about it except to go along. Let me remind the gentleman, a couple of years ago we got angry with Czechoslovakia because they put one of our outstanding newspapermen in prison. We attempted to annul the reciprocal trade agreements with Czechoslovakia. You did not know and I did not know, and few, if any, Members of this Congress knew that the general agreement on tariffs made at Geneva in 1945 bound America to this extent—that we had to reconvene the conferees of the signatory nations to the Geneva agreement in Geneva and get their consent for the Congress of the United States to revoke the Czechoslovakian Treaty. You did not know about it and I did not know about it. It ought to be a lesson to the Congress that we have had enough of that kind of foolishness.

Mr. LANHAM. I agree with the gentleman that to ratify this organization or to pass this act would be a very dangerous act on our part and would remove the Congress one step further from its duty and its responsibility to regulate foreign trade.

Mr. BAILEY. I thank the gentleman from Georgia for his comments. May I continue to say the prospect that faces this present session of Congress is that we will have to take action on the question of recognizing OTC, which is the Office of Trade Cooperation.

The OTC is to be brought before us as H. R. 5550.

But there is more.

Congress has legislated repeatedly since 1951, when I offered the escape-clause amendment to the Trade Agreements Extension Act of that year, and it was adopted—I say Congress has made its will known repeatedly in legislation, in many amendments to that escape clause, to make sure that all American producers faced with hurtful import competition have a reasonable remedy.

Just as surely this legislation has been batted down at the other end of Pennsylvania Avenue. The prime mover has been the State Department, a department that seems to find it hard to believe that American producers are entitled to the most elementary considerations of fair treatment.

It is my opinion that Congress has exercised great patience and restraint under the circumstances—in fact too much patience. The power and responsibility of Congress in the field of trade has already been taken over so far by the State Department that what we have left is a mere shadow. Even this will disappear into the twilight if OTC is approved and then into the night, to be lost for good. I say to you that this is indeed the year of decision in this most important struggle.

Because of the repeated, conscious and stubborn blocking of the will of Congress in this field of its undoubted authority, by the executive, it has become obvious that the escape clause has little value in the area of its intended application. It has been overridden and ignored.

How does this reflect upon the integrity and standing of the Congress? The escape clause, in its present form, is the product of Congress. It was adopted by a heavy majority of both Houses, and was amended from time to time. You would not believe this from the treatment it has received. The State Department has shown it neither honor nor respect.

The fact is and, as I have said, it can no longer be hidden: the State Department has not only undertaken the regulation of our foreign commerce, but has been most diligent and tireless in throwing a high fence of international moral obligations around Congress against the day when Congress awakened to its loss of power.

Now let us see where we are today as a result of the executive practices and maneuvers that have just been described.

Our experience with import competition during the past few years has shown that import quotas would in a considerable number of cases offer a better way of regulating the flow of imports than does the tariff, hacked, slashed, and bound as it has been in the past 21 years.

Therefore, efforts have been made to place import quotas on different products by direct legislation. This has been piecemeal legislation and Congress did not accept it.

Now, however, a general import quota bill has been proposed and it was introduced as H. R. 7925 by our respected colleague from Georgia [Mr. LANHAM]. I have subsequently introduced the same bill, as have a number of other colleagues.

What do we find?

This will come as a shock to members who have not made a specialty of tariff and trade legislation and who have been absorbed in other special fields.

The Congress cannot legislate quotas or provide the mechanism for their imposition by an administrative agency without violating the letter and spirit of the General Agreement on Tariffs and Trade. This is the agreement entered into by the State Department in 1947 and which became effective January 1, 1948. It is known as GATT.

By just what pattern of reasoning the State Department could arrive at the notion that they could properly bind Congress against any particular type of legislation on quotas, or anything else has not yet been explained—neither who originated the idea, who propagated it, or who executed it. But it has been given effect in the false majesty of the general agreement which has never come near Congress for approval, not even in the OTC proposal.

I commend to you the general import quota bill as a method of dealing with import competition in a reasonable and liberal fashion in those instances where the tariff for one reason or another is relatively useless. It will meet many of the problems of import competition that cannot be solved under the restrictions that have been fashioned for us by the State Department.

We either take the reins of foreign commerce regulation back into our own hands without further delay or we lose the authority perhaps irretrievably. At the same time we will dishonor our position as legislators in the American system of government.

FORD MOTOR CO. STOCK

The SPEAKER. Under previous order of the House, the gentleman from Missouri [Mr. CURTIS] is recognized for 15 minutes.

Mr. CURTIS of Missouri. Mr. Speaker, today the Ford Motor Co. stock went on the market and several hundred thousands of America's smartest investors were eager to buy it, most of them unsuccessfully.

Just a few months ago, May 26, 1955, to be exact, the hourly wage personnel of the Ford Motor Co. was offered one of the most amazing bargains in history. The employees were given the opportunity to purchase this stock at one-half the market price when, as anticipated, the stock was offered to the public by the Ford Motor Co. It was as described by the spokesman for the Ford Co. the most challenging and comprehensive single package of direct wage increases and benefits in the history of the automotive industry. If 100 percent of eligible employees participated fully in their right to participate, and assuming existing levels in employment, $54 million of Ford stock would have been available each year with the Ford Motor Co. paying $27 million. Over the 5-year life of the proposed contract, this could have meant that Ford hourly workers would have owned $270 million of Ford stock, of which the company would have paid $135 million. Practically, this maximum figure would not have been reached, but certainly the figure would have been well beyond $40 million per year.

This offer was just as revolutionary as Henry Ford's dynamic wage scale set in the early decades of the 20th century which enabled, as he said, his workers to have the take-home pay to be buyers of Fords. This new proposal would have led the way for American workingmen on a large scale to be part owners in the great wealth of this country.

This offer was turned down by CIO president, Walter Reuther, as an inadequate wheel of fortune.

I think it is quite appropriate for the employees of the Ford Motor Co. and, indeed, union men all over this country to ask Mr. Reuther and other national labor leaders who hold to a similar philosophy, just whose interest they thought they were representing when they turned

down this offer to share in our great private enterprise system in favor of a guaranteed wage, as it was termed, which was dependent upon Government subsidy and which, indeed, in the State of Ohio, turned out to be a program which the people of Ohio, at any rate, were unwilling to aid and abet?

Mr. Reuther and other national labor leaders working with him have been accused of being primarily politicians, using the labor movement to further their political ends, rather than labor leaders looking after primarily the interests of the working men they represent.

The position Mr. Reuther and his allies have taken on many national issues as well as national candidates; the activities of the CIO–PAC in building political machinery outside the two political parties with union members' dues to further these political positions and candidates gives great weight to these charges.

Is it possible that Mr. Reuther and his political allies outside the two political parties do not want the American working man to become a sharer in the wealth of this country? Do not want him to become a stockholder? Do not want him to become a homeowner, as their opposition to and distortion of the Eisenhower administration's housing program which emphasizes homeownership instead of the tenancy of public housing indicates?

I think Mr. Reuther owes an explanation not only to the union people who hire him and pay his salary and expenses, but to the American public. Just why did he turn down the Ford Motor Co.'s great and magnaminous offer which would have so greatly benefited the people he was representing and would have led the working man into a new era of achievement and responsibility?

TERRITORIAL EXPANSION MEMORIAL COMMISSION

The SPEAKER. Pursuant to the provisions of public resolution 32, 73d Congress, the chair appoints as members of the United States Territorial Expansion Memorial Commission the following Members on the part of the House: Mr. KARSTEN of Missouri, Mr. HAYS of Ohio, and Mr. LECOMPTE of Iowa.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. HESELTON, for 10 minutes today.

Mr. BAILEY, for 30 minutes on Thursday.

Mr. BENTLEY, for 30 minutes on next Wednesday.

Mr. HOFFMAN of Michigan (at the request of Mr. MARTIN), for 15 minutes on Monday and Tuesday next.

SPECIAL ORDERS VACATED

Mr. LANHAM. Mr. Speaker, the gentleman from Florida [Mr. SIKES] has a special order granted him to address the House for 20 minutes this afternoon. On his behalf I request that it be canceled and that he be permitted to address the House for 20 minutes on Thursday next, after all the business of the day has been completed.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. CURTIS of Missouri. Mr. Speaker, I ask unanimous consent that the special order granted my colleague, Mr. HESELTON, for today be transferred to tomorrow.

The SPEAKER. Is there objection?

There was no objection.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. LANE and to include extraneous matter.

Mr. EVINS.

Mr. GARY and to include an address by Hon. BENJAMIN F. JAMES at the commemorative exercises marking the 250th anniversary of the birth of Benjamin Franklin at the Government Printing Office on January 17, 1956.

Mr. ABBITT (at the request of Mr. WILLIAMS of Mississippi) and to include extraneous matter notwithstanding the fact it exceeds the limit and is estimated by the Public Printer to cost $220.

Mr. REUSS in two instances and to include extraneous matter.

Mr. JOHNSON of California and to include two articles from the California Farmer.

ENROLLED BILLS SIGNED

Mr. BURLESON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H. R. 938. An act for the relief of Mrs. Elena Apostolescu Bustiuc;

H. R. 1015. An act for the relief of Mr. and Mrs. Defery William Wright;

H. R. 1022. An act for the relief of Antonio Andrea Chitato;

H. R. 1145. An act for the relief of Ora L. Powers;

H. R. 1146. An act for the relief of the Pacific Music Supply Co.;

H. R. 1183. An act for the relief of Baldomero R. Garcia, Teresa Garcia y Braganza, Francisco Garcia, Teresita Garcia, and Eduardo Garcia;

H. R. 1219. An act for the relief of the estate of Mrs. Margaret A. Swift;

H. R. 1447. An act for the relief of Aleksandra Borkowski;

H. R. 1752. An act for the relief of Johanna Juresic Grgurich;

H. R. 1768. An Act for the relief of the Jefferson and Plaquemines Drainage District and certain persons whose properties abutt on the Federal Government's right-of-way for Harvey Canal in Louisiana;

H. R. 1910. An act for the relief of Blanka Goldstein;

H. R. 2273. An act for the relief of Der Chuck Yee and Wu Mei On;

H. R. 2278. An act for the relief of Consuelo Calderon de Villarreal;

H. R. 2296. An act for the relief of Simone Gilliland;

H. R. 2466. An act for the relief of Marino and Giselda Proni;

H. R. 2467. An act for the relief of Ivo and Elia Monari;

H. R. 3027. An act for the relief of Leo E. Verhaeghe;

H. R. 4582. An act to amend the Internal Revenue Code of 1954 with respect to deductions from gross income of amounts contributed to employee trusts;

H. R. 5428. An act to amend the Internal Revenue Code of 1939 with respect to the period of limitation for filing claims by certain transferees and fiduciaries for credit or refund of income taxes;

H. R. 7036. An act to amend section 37 of the Internal Revenue Code of 1954 with respect to the earned income limitation on retirement income;

H. R. 7282. An act relating to the allowance of the credits for dividends received, for dividends paid, and for a Western Hemisphere trade corporation in computing the alternative tax of a corporation with respect to its capital gains; and

H. R. 7364. An act relating to the application of the documentary stamp tax to transfers of certain obligations paid for in installments.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 1689. An act to authorize the Secretary of the Interior to execute a repayment contract with the Yuma Mesa Irrigation and Drainage District, Gila project, Arizona, and for other purposes; and

S. 1745. An act authorizing the Secretary of the Interior to issue a patent in fee to Nellie Ohlerking Archambeau Moran.

ADJOURNMENT

Mr. ASPINALL. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 24 minutes p. m.) the House adjourned until tomorrow, Thursday, January 19, 1956, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1386. A letter from the Secretary of Agriculture, transmitting the annual report of the Federal Extension Service for the fiscal year ended June 30, 1955, pursuant to section 7 of Public Law 83, 83d Congress; to the Committee on Agriculture.

1387. A letter from the Under Secretary of the Navy, transmitting a draft of proposed legislation entitled "A bill to amend the Career Compensation Act of 1949, as amended, in relation to the refund of reenlistment bonuses"; to the Committee on Armed Services.

1388. A letter from the executive secretary, National Advisory Committee for Aeronautics, transmitting a draft of proposed legislation entitled "A bill to promote the national defense by authorizing the construction of aeronautical research facilities by the National Advisory Committee for Aeronautics necessary to the effective prosecution of aeronautical research"; to the Committee on Armed Services.

1389. A letter from the Director, Legislative Liaison, Department of the Air Force, transmitting a report relative to the number of officers assigned or detailed to permanent duty in the executive element of the Air Force at the seat of the Government as of the end of the second quarter of fiscal year

1956 (December 31, 1955), pursuant to section 201 (c) of the Air Force Organization Act of 1951 (Public Law 150, 82d Cong.); to the Committee on Armed Services.

1390. A letter from the Acting Secretary of the Treasury, transmitting a report showing the payment of claims for damage occasioned by vessels of the Coast Guard, which have been settled by the Treasury for the period January 1, through December 31, 1955, pursuant to section 646 (b) of title 14, United States Code; to the Committee on the Judiciary.

1391. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, transmitting copies of orders granting the applications for permanent residence filed by the subjects, pursuant to section 6 of the Refugee Relief Act of 1953; to the Committee on the Judiciary.

1392. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, transmitting copies of orders granting the applications for permanent residence filed by the subjects, pursuant to section 4 of the Displaced Persons Act of 1948, as amended; to the Committee on the Judiciary.

1393. A letter from the Director, Administrative Office of the United States Courts, transmitting a draft of proposed legislation entitled "A bill to provide that the United States district judges for the districts of Hawaii and Puerto Rico shall have the same tenure of office and retirement rights as all other United States district judges"; to the Committee on the Judiciary.

1394. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, transmitting copies of orders involving seven individuals whose applications for adjustment of status to permanent residence have been granted, pursuant to section 6 of the Refugee Relief Act of 1953, as amended; to the Committee on the Judiciary.

1395. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, transmitting copies of orders suspending deportation as well as a list of the persons involved, pursuant to the act approved July 1, 1948 (Public Law 863), amending subsection (c) of section 19 of the Immigration Act of February 5, 1917, as amended (8 U. S. C. 155 (c)); to the Committee on the Judiciary.

1396. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, transmitting copies of orders suspending deportation as well as a list of the persons involved, pursuant to section 244 (a) (1) of the Immigration and Nationality Act of 1952 (8 U. S. C. 1254 (a) (1)); to the Committee on the Judiciary.

1397. A letter from the Commissioner, Immigration and Naturalization Service, United States Department of Justice, transmitting copies of orders suspending deportation as well as a list of the persons involved, pursuant to section 244 (a) (5) of the Immigration and Nationality Act of 1952 (8 U. S. C. 1254 (a) (5)); to the Committee on the Judiciary.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. ENGLE: Committee on Interior and Insular Affairs. H. R. 4656. A bill relating to the Lumbee Indians of North Carolina; without amendment (Rept. No. 1654). Referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Miss THOMPSON of Michigan: Committee on the Judiciary. H. R. 1892. A bill for the relief of Dr. Lu Ho Tung and his wife, Ching-hsi (nee Tsao) Tung; without amendment (Rept. No. 1649). Referred to the Committee of the Whole House.

Mr. FEIGHAN: Committee on the Judiciary. House Joint Resolution 457. Joint resolution for the relief of certain relatives of United States citizens; with amendment (Rept. No. 1650). Referred to the Committee of the Whole House.

Miss THOMPSON of Michigan: Committee on the Judiciary. House Concurrent Resolution 201. Concurrent resolution approving the granting of the status of permanent residence to certain aliens; with amendment (Rept. No. 1651). Referred to the Committee of the Whole House.

Miss THOMPSON of Michigan: Committee on the Judiciary. House Concurrent Resolution 202. Concurrent resolution favoring the granting of the status of permanent residence to certain aliens; with amendment (Rept. No. 1652). Referred to the Committee of the Whole House.

Mr. ENGLE: Committee on Interior and Insular Affairs. H. R. 6618. A bill for the relief of Etha Dora Johnson; with amendment (Rept. No. 1653). Referred to the Committee of the Whole House.

Mr. FEIGHAN: Committee on the Judiciary. House Joint Resolution 472. Joint resolution for the relief of certain aliens; without amendment (Rept. No. 1655). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. CANNON:

H. R. 8576. A bill to amend the Internal Revenue Code of 1954 to relieve farmers from the excise tax on gasoline and lubricating oils used exclusively in farm tractors or farm machinery or for other agricultural purposes; to the Committee on Ways and Means.

By Mr. BALDWIN:

H. R. 8577. A bill to amend the Civil Service Retirement Act of May 29, 1930, to make certain benefits applicable to Canal Zone and other employees retired prior to April 1, 1948; to the Committee on Post Office and Civil Service.

By Mr. BRAY:

H. R. 8578. A bill to amend the Internal Revenue Code of 1954 to relieve farmers from the excise tax on gasoline and lubricating oils used exclusively in farm tractors or farm machinery or for other agricultural purposes; to the Chairman on Ways and Means.

By Mr. BYRNE of Pennsylvania:

H. R. 8579. A bill to permit the flying of the flag of the United States for 24 hours of each day over Independence Hall, Philadelphia, Pa.; to the Committee on the Judiciary.

By Mr. DAVIS of Georgia:

H. R. 8580. A bill to amend title II of the Social Security Act to provide that an individual may qualify for the "disability freeze" with 40 quarters of coverage, regardless of when such quarters occurred; to the Committee on Ways and Means.

By Mr. DENTON:

H. R. 8581. A bill to permit all wheat farmers (including those who plant less than 15 acres of wheat) to vote in any wheat marketing quota referendum; to the Committee on Agriculture.

By Mr. DORN of South Carolina:

H. R. 8582. A bill to provide coverage under the Federal old-age and survivors insurance system, as self-employed individuals, for individuals performing agricultural labor under share-farming arrangements and (in certain cases) for the owners and tenants of the land on which such labor is performed; to the Committee on Ways and Means.

By Mr. FLOOD:

H. R. 8583. A bill to amend the Veterans Regulations to provide that arthritis, psychoses, or multiple sclerosis developing a 10 percent or more degree of disability within 3 years after separation from active service shall be presumed to be service connected; to the Committee on Veterans' Affairs.

By Mr. LAIRD:

H. R. 8584. A bill to amend the Agricultural Act of 1954 to extend and augment the program for the eradication of brucellosis; to the Committee on Agriculture.

By Mr. LESINSKI:

H. R. 8585. A bill to provide for the payment of unpaid entitlements under Public Law 815, 81st Congress, relating to school construction in federally affected areas; to the Committee on Education and Labor.

By Mr. BEAMER:

H. R. 8586. A bill to amend the Internal Revenue Code of 1954 to relieve farmers from the excise tax on gasoline and lubricating oils used exclusively in farm tractors or farm machinery or for other agricultural purposes; to the Committee on Ways and Means.

By Mr. BOYLE:

H. R. 8587. A bill to amend the Railroad Retirement Act of 1937 and the Railroad Retirement Tax Act to provide that the maximum amount of railroad earnings includible in benefit computation and subject to tax shall be determined on an annual rather than a monthly basis; to the Committee on Interstate and Foreign Commerce.

By Mr. BURNSIDE:

H. R. 8588. A bill to provide for Federal disaster insurance and reinsurance; to the Committee on Banking and Currency.

By Mr. DOYLE:

H. R. 8589. A bill to establish a national policy with respect to commercial fisheries; to establish the Office of Assistant Secretary of Commerce for Commercial Fisheries, and define his functions, powers, and responsibilities; to strengthen the commercial fisheries segment of the national economy, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. FOGARTY:

H. R. 8590. A bill to establish a national policy with respect to commercial fisheries; to establish the Office of Assistant Secretary of Commerce for Commercial Fisheries, and define his functions, powers, and responsibilities; to strengthen the commercial fisheries segment of the national economy, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. HALEY:

H. R. 8591. A bill to amend the Civil Service Retirement Act of May 29, 1930, as amended, to provide that annuities shall be adjusted simultaneously with general adjustments in Federal employees' salaries; to the Committee on Post Office and Civil Service.

By Mr. JOHNSON of California:

H. R. 8592. A bill to authorize the Secretary of Defense to lend certain Army, Navy, and Air Force equipment and provide certain services to the Boy Scouts of America for use at the Fourth National Jamboree of the Boy Scouts of America, and for other purposes; to the Committee on Armed Services.

H. R. 8593. A bill to authorize the Secretary of Defense to lend certain Army, Navy, and Air Force equipment and to provide transportation and other services to the Boy Scouts of America in connection with the

World Jamboree of Boy Scouts to be held in England in 1957, and for other purposes; to the Committee on Armed Services.

By Mr. LOVRE:

H. R. 8594. A bill to amend the wheat marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended; to the Committee on Agriculture.

By Mr. McCORMACK:

H. R. 8595. A bill to amend section 207 of the Legislative Reorganization Act of 1946 to provide that boards for the correction of military or naval records shall take into account evidence relating to the character and conduct of persons subsequent to their discharge from the service in determining whether their records should be corrected; to the Committee on Armed Services.

By Mr. McDOWELL:

H. R. 8596. A bill to increase the education and training allowances under the Veterans' Readjustment Assistance Act of 1952; to the Committee on Veterans' Affairs.

By Mr. MINSHALL:

H. R. 8597. A bill to amend an act of July 3, 1926, relating to the issuance and validity of passports, to change the periods of validity of passports and passport visas; to the Committee on Foreign Affairs.

H. R. 8598. A bill to amend an act of July 3, 1926, relating to the issuance and validity of passports, to change the periods of validity of passports and passport visas; to the Committee on Foreign Affairs.

By Mr. PRIEST (by request):

H. R. 8599. A bill to amend the Federal Food, Drug, and Cosmetic Act, so as to prohibit the movement in interstate or foreign commerce of unsound, unhealthful, diseased, unwholesome or adulterated poultry or poultry products; to the Committee on Interstate and Foreign Commerce.

By Mr. CANNON:

H. J. Res. 477. Joint resolution providing for the filling of a vacancy in the Board of Regents of the Smithsonian Institution, of the class other than Members of Congress; to the Committee on House Administration.

H. J. Res. 478. Joint resolution providing for the filling of a vacancy in the Board of Regents of the Smithsonian Institution, of the class other than Members of Congress; to the Committee on House Administration.

H. J. Res. 479. Joint resolution providing for the filling of a vacancy in the Board of Regents of the Smithsonian Institution, of the class other than Members of Congress; to the Committee on House Administration.

By Mr. PRIEST:

H. Con. Res. 204. Concurrent resolution to commemorate the 50th anniversary of the national pure food, drug, and cosmetic law; to the Committee on the Judiciary.

By Mr. KING of California:

H. Res. 377. Resolution directing the United States Tariff Commission to make an investigation to determine whether, as the result of a trade agreement with Japan, fresh or frozen albacore tuna is being imported in the United States in such increased quantities as to cause or threaten serious injury to the domestic industry; to the Committee on Ways and Means.

By Mrs. FARRINGTON:

H. Res. 378. Resolution directing the United States Tariff Commission to make an investigation to determine whether, as the result of a trade agreement with Japan, fresh or frozen albacore tuna is being imported in the United States in such increased quantities as to cause or threaten serious injury to the domestic industry; to the Committee on Ways and Means.

By Mr. RIVERS:

H. Res. 379. Resolution requesting a review of reports on Charleston Harbor, S. C.; to the Committee on Public Works.

MEMORIALS

Under clause 4 of rule XXII, memorials were represented and referred as follows:

By Mr. FORAND: Resolution of the Rhode Island General Assembly memorializing the Congress of the United States to enact legislation providing effective aid to labor surplus areas; to the Committee on Public Works.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ALLEN of California:

H. R. 8600. A bill for the relief of Jana Marie Svidenska; to the Committee on the Judiciary.

By Mr. BARRETT:

H. R. 8601. A bill for the relief of Dr. David Wei Chi Shen; to the Committee on the Judiciary.

By Mr. BOSCH:

H. R. 8602. A bill for the relief of Aneida Alonso Amaral; to the Committee on the Judiciary.

By Mr. BOYLE:

H. R. 8603. A bill for the relief of Robert W. Dewaal; to the Committee on the Judiciary.

By Mr. CARRIGG:

H. R. 8604. A bill for the relief of Mrs. Shirley Davis; to the Committee on the Judiciary.

H. R. 8605. A bill for the relief of Mrs. Paula Markert; to the Committee on the Judiciary.

By Mr. CURTIS of Missouri:

H. R. 8606. A bill for the relief of the beneficiaries of William Lee La May; to the Committee on the Judiciary.

By Mr. ENGLE:

H. R. 8607. A bill to authorize and direct the Secretary of the Interior to convey to David Peters, or to his heirs or assigns, title to land held by the United States in trust for him; to the Committee on Interior and Insular Affairs.

By Mr. FINO:

H. R. 8608. A bill for the relief of Giovanni Di Prima; to the Committee on the Judiciary.

By Mr. JUDD:

H. R. 8609. A bill for the relief of Shee-go Chin; to the Committee on the Judiciary.

By Mr. MOSS:

H. R. 8610. A bill for the relief of Antonio Alejandres-Diaz (also known as Antonio Alejandres-Valencia); to the Committee on the Judiciary.

By Mr. PATTERSON:

H. R. 8611. A bill for the relief of Mrs. Sabastiano Poletto; to the Committee on the Judiciary.

By Mr. POWELL:

H. R. 8612. A bill for the relief of John H. Orth; to the Committee on the Judiciary.

By Mr. TEAGUE of Texas:

H. R. 8613. A bill authorizing the Secretary of the Treasury to strike a gold medal of appropriate design to be awarded posthumously by the President to the parents of James Edward Sarran for an act of valor which caused his death; to the Committee on Banking and Currency.

By Mr. ZABLOCKI:

H. R. 8614. A bill for the relief of Maria Knaziewicz; to the Committee on the Judiciary.

By Mr. MINSHALL:

H. Res. 380. A resolution providing that the bill, H. R. 8572, and all accompanying papers shall be referred to the United States Court of Claims; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

440. By Mr. BUSH: Petition of residents of Troy and Bradford County, Pa., favoring the passage of legislation to prohibit the transportation of alcoholic beverage advertising in interstate commerce and its broadcasting over the air; to the Committee on Interstate and Foreign Commerce.

441. By Mr. MUMMA: Petition of Mrs. Mary M. Carnes, and 28 other residents of Duncannon, Pa., and vicinity, urging action on legislation to prohibit the transportation of alcoholic beverage advertising in interstate commerce and its broadcasting over the air; to the Committee on Interstate and Foreign Commerce.

442. By Mr. NORBLAD: Petition of Mrs. Harry Markwart and 35 other citizens of Dallas, Oreg., urging enactment of legislation to prohibit the transportation of alcoholic beverage advertising in interstate commerce; to the Committee on Interstate and Foreign Commerce.

EXTENSIONS OF REMARKS

Segregation in the Public Schools of Virginia

EXTENSION OF REMARKS
OF
HON. WATKINS M. ABBITT
OF VIRGINIA
IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 18, 1956

Mr. ABBITT. Mr. Speaker, on January 9, 1956, Virginians voted overwhelmingly to continue segregation of the races in the public schools of Virginia. The issue was simple and clear cut. I am proud of the great progress that Virginia has made in building up a great public school system. We have a splendid system but on May 17, 1954, the Supreme Court of the United States of America struck our school system a staggering blow which will eventually wreck our schools unless the proper steps are taken to combat the decision. The only hope to save public education in Virginia is the will and the determination of our people to resist tyranny on every occasion and to fight the grasping usurpation of power on the part of those people in this country who would change the habits, customs, mores and traditions of the people of the Commonwealth of Virginia.

The white and Negro races in Virginia each have much to be proud of. We have a fine relationship between the two races. If let alone by outside influence of misguided people we can work out our problems to the mutual satisfaction and advantage of all. I am convinced that if we are to remain strong and aggressive and continue to progress, we must keep intact the integrity and identity of the two races. I believe that

mongrelization of the races will lead to deterioration of the stability of the people of our State and will be ruinous to our advancement as a people. Our people are not going to accept integration of the races in the public schools or the mongrelization of the races. We in Virginia are fighting for a principle that we know to be right and just. We know that the decision of the Supreme Court of the United States in declaring segregation in the public schools unconstitutional was without authority in law. The Court, against all legal precedent, followed the theory of a foreign-born sociologist who, I am informed, has connections with several groups that have been listed as subversive. This means that we can no longer anticipate what the Court might do or where it might strike next. The Constitution is simply what the nine judges might say it is. They have abrogated unto themselves rights, privileges, and authority that were never given them by the people of this Nation. We of Virginia cannot sit idly by and see the privileges and rights of our people taken from them against their will and in violation of the Constitution by a Court following the theories of a foreign-born sociologist who knows nothing of the ways, habits, customs, traditions, and mores of our people. To stand idle at a time like this would be traitorous to our forefathers as well as to our children and grandchildren. We must not fail by supinely submitting to such desecration. One of the men who has been in the forefront of the fight to continue our way of life in Virginia has been the Honorable W. M. TUCK, Member of the House of Representatives from the Fifth District of Virginia. Representative TUCK is one of the outstanding men of our generation. On every occasion he has been in the forefront fighting to preserve the rights of the people. On January 5, 1956, at Farmville, Va., in my congressional district, Governor TUCK delivered to a large audience an address which in my opinion states the issue clearly and distinctly. Under leave to extend my remarks I include herewith the address of the Honorable W. M. TUCK:

ADDRESS OF REPRESENTATIVE WILLIAM M. TUCK, DEMOCRAT, VIRGINIA, JARMAN HALL, LONGWOOD COLLEGE, FARMVILLE, VA., JANUARY 5, 1956

Mr. Chairman, ladies and gentlemen, I am glad to have this opportunity of appearing before you in support of the proposed constitutional convention in the election to be held on January 9, 1956. I intend to go to the polls early on that date and vote for the convention and to do everything I can appropriately do to insure a large majority at my precinct and in my home county of Halifax.

The issue is a simple one. It concerns itself only with the amendment of section 141 of the Virginia constitution, which at present forbids the appropriation of public money for the support of any school or institution not wholly owned or controlled by the State or some political subdivision thereof. The proposed amendment will authorize the general assembly, if in its discretion it deems wise so to do, to enact a law making it possible for the State and the localities to appropriate public funds or make available grants in aid to individual parents or pupils who wish to attend a private nonsectarian school. These grants will apply to both races alike.

We do not vote next Monday on whether we shall have public schools or on any of the many other extraneous matters which have crept into the debate on this subject. The only question at issue next Monday is: Shall there be a constitutional convention to amend section 141 of the Virginia Constitution to authorize the general assembly to enact a law which will permit the State and localities to make funds available to parents who wish to send their sons and daughters to private nonsectarian schools. There is nothing in this proposal to require the general assembly to do anything. It simply expands the constitution to give our representatives more leeway and latitude in dealing with this important and far-reaching subject.

The people of this great Commonwealth understand the problem confronting us. The question is, shall we operate our schools according to the time honored policy of local self-government, or shall we supinely submit to an unwarranted attack upon our rights and liberties and be forced to integrate?

In this matter there is no middle ground. We cannot harmonize, compromise, or temporize. The issue must be met head on. I have said from the very time that this iniquitous decision was rendered, and I shall repeat at every opportunity, that in Virginia we do not intend to send our children to mixed schools.

I have held public office in Virginia for 35 years. There are few others in Virginia now living who have been thus honored and for so long. I shall ever cherish the honors conferred and the trusts imposed, but I would be unfaithful and unworthy if I did not in this tragic hour of our history speak frankly and unequivocably on this subject so close to our hearts and so vital to the welfare and safety of us all. Whether it is popular or unpopular, expedient or inexpedient, polite or impolite, I want it distinctly understood that I am opposed to the mixing and the intermingling of the races in our schools, and I intend to use whatever power and influence I may have to prevent it.

If stating these unequivocal and positive views on this inflammatory subject requires that I be classified as an immoderate or extremist, I will without cringing bear the odium. There is one thing certain: it will never be said of me that I collaborated and that I joined up, directly or indirectly, or in any other way, with our traducers, who would not only expose us to calumny and shame, but who would if they could, encompass the complete destruction of our way of life. We must not let them do it.

This is the issue and I hope and believe that the people of Virginia will be Virginians and vote like Virginians, and will give the proposal an overwhelming endorsement. Although I would warn against overconfidence and taking too much for granted and urge that every possible pro voter to go to the polls next Monday, I predict with complete confidence that the proposed constitutional convention will carry by a substantial majority. Thus, we will have brushed aside with a resounding voice the spurious statements and charges which have been spread to becloud the clear-cut issue.

The constitutional proposal originated with the commission headed by Senator Gray and composed of 32 members of the general assembly from all sections of Virginia and various schools of political thought, who, after giving more than a year's study and consideration to the subject, unanimously recommended it. Governor Stanley approved the proposed constitutional amendment and recommended its adoption. The general assembly at its recent special session approved the amendment by a vote of 131 of its 140 members, with 3 absent. It is a nonpartisan matter, because all Virginians, irrespective of political party affiliations, are affected and have a deep interest therein. In fact, it comes to us on a nonpartisan basis. The referendum was approved by every Republican in the House of Delegates and by all Democrats except 5, and in the Senate by all Democrats and 2 Republicans with only 1 Republican voting against.

I commend the Governor and the general assembly on the forthright, dignified, and patriotic manner in which they approached the consideration of this problem. In fact, one of the many things for which Virginia is noted and for which she has a just right to be proud is the high caliber of her legislators. Hon. John H. Daniel and Senator James D. Hagood from this legislative and senatorial district are examples of the high qualities of character and leadership which mark the membership of the bodies to which they belong. I am sure that the voters of this district would have no hesitancy in trusting them with matters of public concern and involving the education and training of their children.

I cannot find words sufficient and adequate to commend the people of Prince Edward County for their courage and forthrightness in standing firm against this infamous assault upon our rights. The people of Prince Edward County have enhanced the standing of Virginia and have made pages of history which will ever be cherished by patriots everywhere. Had it not been for your firm and unswerving stand, I fear that we would have already had integration.

I also commend the Defenders of State Sovereignty and Individual Liberties, in which I am proud to hold membership, for its defense of the right of the localities to determine what type of school system they shall operate.

There has been created in Virginia much misunderstanding and unnecessary confusion by the opponents of the referendum. Whether it was intended or not, the facts are, a smokescreen has been set up to hide the real issues and to prevent the matter from being settled upon its merits. When these clouds are dispelled and dissipated and we get down to the plain unvarnished facts and naked truth, there is but one question, and that is whether or not we favor or oppose the mixing of the races in the schools. Those who vote for the amendment will be credited as being opposed to the mixing of the races and those who oppose the convention will be considered as favoring the mixing of the races in the schools. As a matter of fact, many, if not most, of the individuals and organizations who publicly oppose the constitutional change have already declared themselves as favoring the integration of the races, and it is my opinion that if you scratch down deep enough the others who have not so publicly declared themselves are at heart true integrationists.

Now as to whether or not the adoption of this amendment will prove to be against the public interest and so destructive of Virginia's institutions, I would, in addition to our governor and the members of the general assembly list as supporters of this change the names of both of our United States Senators, BYRD and ROBERTSON, two of our former governors, Battle and Darden, the latter of whom is a noted educator and president of our highest seat of learning, the University of Virgina, and now delegate to the United Nations. It has also the support of our State board of education, our superintendent of public instruction, Dr. Dowell J. Howard, as well as all former superintendents including Dr. Harris Hart, and Dr. G. Tyler Miller, now president of Madison College, and Dr. Dabney S. Lancaster, former president of Longwood College at Farmville, at both of which institutions our Virginia teachers are trained. Dr. Lancaster is so firmly convinced of the necessity and soundness of the program that he

has charge of the organizational drive with headquarters in Richmond. He is attempting to see that the people are properly informed as to the facts, and will on January 9 vote for the convention. No persons in Virginia have contributed more to the education and training and culture of the people of Virginia than have these distinguished educators who have devoted a lifetime of service and toil in that field of endeavor. In their endeavors in this direction they are supported by members of school boards, school superintendents, and teachers who have the welfare of Virginia and her people at heart.

The eyes of our Southland and of the Nation are focused upon Virginia and her electorate as never before in recent times. Not in a long time have we had a more challenging situation than that which confronts us. Virginia ranks high in the sisterhood of States, and what we do here may well determine or to a large extent affect the course of other southern States. May the vote on January 9 be a resounding victory for the convention, reflecting the confidence of the people in Virginia leadership, particularly at the educational level, and the course which she is undertaking to establish. May the vote and verdict be such that liberty-loving people everywhere will have a renewed and invigorating faith in the determination of our people to chart their own destiny, free from these evil and extraneous influences from without, which threaten to engulf us and the things which we hold dear.

Unless we choose to resist these outside influences now, the hour may be too late, and we will have accepted without challenge political and judicial doctrines which we hold to be untrue and without foundation.

On December 28, we witnessed in the columns of the newspapers a flagrant and unbridled attempt by outsiders to influence the outcome of next Monday's referendum in favor of integration. It is shocking that this outsider was none other than the United States Department of Justice, and although I have no way of knowing, I have cause to believe that it was the Attorney General of the United States himself. In our daily Virginia newspapers, and in fact all over the Nation, a statement was published as coming from a high Justice Department official in Washington to the effect that such action as we contemplate to set up tuition grants for pupils to attend private schools rather than submit to the unconstitutional act of forced integration of the races would be declared invalid, and that individuals and organizations in Virginia and in the South are being investigated. This self-made and self-appointed law giver and conscriptionist who, for reasons best known to himself, hides behind the cloak of anonymity, would declare the laws of a sovereign State invalid even before they are enacted, and would prevent us in the Commonwealth of Virginia from holding free and untrammeled elections. I demand information as to the authority by which the Justice Department or the Attorney General has set up a secret gestapo to impose upon the people and government of this sovereign Commonwealth a supermonitorship. I dispatched to the Attorney General of the United States a prompt and vigorous protest against this bold and brazen attempt at intimidation and coercion, and I shall continue to make known to those outside meddlers that we do not intend to be bullied by the Attorney General of the United States, the Department of Justice, or others.

In the matter of race relations we have never dealt unkindly with the Negroes. In this regard I can stand upon my record. In 1926 as a young member of the House of Delegates of Virginia I supported the antilynch law enacted at that session recommended by Governor Byrd, the strongest antilynch law on the statute books of any State in the entire Nation. Since that date Virginia has not suffered a single death by lynching. Among other things, during my own term as governor, I recommended in my very first message to the general assembly an appropriation of $15,000 for the establishment of a monument to a Virginia Negro, Booker T. Washington. This appropriation was made, and I know of no other State in the Nation, north or south, that has made an appropriation to memorialize a Negro. I entered an executive order setting up a large sum of money for the establishment of a State park for Negroes in Prince Edward County. I entered another order setting aside a day to be known as Joseph Jenkins Roberts Day in honor of a Virginia-born Negro who became the first president of the Republic of Liberia. On another occasion during my term I drove to a small town on the outskirts of Philadelphia to participate in the dedication of a monument to the Negro composer and musician, James A. Bland, who penned that nostalgic song, "Carry Me Back to Old Virginia." That monument, incidentally, was erected by the Lions Clubs of Virginia, and that song was adopted as our official State song by resolution of the General Assembly of Virginia, and there is not a Negro among the membership of either body. I recommended as governor, and the general assembly enacted into law, the largest single general tax increase in the history of the Commonwealth, of which many millions of dollars went for public health and education among both races. I ask where were these lovers of public education then? They were with us until we passed the collection plate and then they vanished and left us to fight the battle alone. My interest and zeal in the education and training of our youth has not diminished since that time. We must make whatever sacrifice in expenditures and effort as may be necessary to ensure the education of our Virginia children, but in separate schools.

After I returned to my home in South Boston, the late Dr. Roper, director of public health, wrote me that during my term, and upon my recommendations, more money had been appropriated for capital outlay in the eradication of tuberculosis in Virginia than had been appropriated through all the combined years that had intervened from the founding of the Virginia Health Department down to that time, and most of this was spent for Negroes, where the disease existed and where the need was greatest. I cite these facts as to my own record for the purpose of demonstrating that I have never exercised authority conferred upon me by the people in a manner unfair or unjust to any minority group, and what is more I never will.

In Virginia our people, I am glad to say, have on the whole kept themselves free from the faithless and perfidious conduct so characteristic of some of our leaders on the national scale who have not hesitated throughout the years to use the Negro as a political pawn.

These modern-day abolitionists and latter-day reconstructionists know nothing about the Negro and his problems and care less. Their principal interest in the Negro is to use him as a vehicle upon which to ride into high public office and to secure their vote in pivotal States to control the election of Governors, Senators, and Presidents. Their actions remind me of Billy Mahone, of Virginia, who was a brave Confederate general under Lee, but who after the war and in the dark days of reconstruction by making wild and chimerical promises succeeded in forming a coalition among the worst elements of both races in our Commonwealth and captured control of the government of Virginia. He himself was elected to a seat in the United States Senate. John Jasper, the celebrated colored preacher of Richmond, had no faith in Billy Mahone and refused to yield to his blandishments. The colored people excel in at least two particulars in that they have superior powers of illustration, and the other is that they can instantly recognize a gentleman, and vice versa. In order to illustrate his lack of faith in Mahone, the Reverend Jasper told his congregation that he had dreamed of going to heaven and that St. Peter refused him entrance because he was walking. As he dejectedly descended from the pearly heights he met Billy Mahone approaching by foot, his face lighted and filled with hope and ambition. After John had related his difficulties, Mahone replied: "Shucks, John, I can remedy that. Get down on your all fours and I will get on your back and ride you right through the pearly gates and then we will both be in heaven." John succumbed to his plea, particularly since Mahone weighed less than 100 pounds. After again wending his weary way to the celestial portals with Mahone on his back, the latter knocked, and St. Peter said: "Who comes there?" Mahone replied: "This is United States Senator Billy Mahone, of the Commonwealth of Virginia, late a major general in the Confederate States Army of America." "Are you riding, or are you walking," said the keeper of the gates. "I am riding, sir," replied Mahone. Then the heavenly gates opened and Mahone tied his faithful "horse," John Jasper, on the outside, deserting the vehicle upon which he had gone to glory, and went in to enjoy the pleasures of heaven.

I am proud of the fact, as all patriotic Virginians should be, that the white and colored people have lived here in our Commonwealth in peace and harmony for more than 300 years—longer than any other place in the Western Hemisphere. We understand each other's problems and we have been able to maintain mutual respect. I confidently predict that we will continue to coexist on the same sort of basis despite the handicaps imposed upon us by the decision of the United States Supreme Court, which has inflamed bitterness and anger where it previously existed and has spread it into areas where it did not heretofore exist. It has fostered and provoked anger, discord, and distrust. As harsh as it may seem, I am constrained to say that any Christian gentleman would be ashamed of being the author of such a situation. The dangers and implications of the Supreme Court decision transcend the race question because it threatens to destroy the basic political philosophy upon which our Nation was founded. The Court has undertaken to override the constitutional division of powers by judicial fiat, without respect to its own previous decisions, and in contravention of the same, and in violation likewise of the powers of the legislative branch of the National Government, as well as the constitutional powers of the respective States.

The authority cited for this monstrosity was the maudlin views of at least one sociologist of questionable repute and loyalty, whose name blackens the pages of the reports of the Un-American Activities Committee of the United States House of Representatives. On such authority the Court has attempted to reverse the exact intention of the framers of the Constitution, not by the due processes of constitutional amendment, but by arbitrary decision unrelated to the law precedent or the facts. Because the Supreme Court has strayed so far beyond the constitutional framework, it behooves the people to adopt such measures as may be necessary to restore the traditional balances of power which have raised this Nation to a position of greatness.

For more than 50 years, the Supreme Court of the United States had stood by the principle of separate but equal school facilities for the races. At least five previous decisions of the United States Supreme Court of this period have upheld the constitutional rights of the separate States to control their own schools. It is strange that this long chain of opinions and the constitutions of many

States, including our own, should be upset, reversed, nullified and scrapped, jeopardizing the public schools of a large segment of the country, as well as the wishes, traditions and the rights of millions of our citizens.

This is one sample of what can happen when we deviate from government based on the Constitution. Under the cloak of judicial robes a "super legislature" has arisen with a veto power over the rights of the States and the people. It is time that we, through our State governments, reasserted the powers that were reserved to us under the Constitution. On the basis of Constitutional considerations, as well as common sense, the States have every right to operate their public schools as they see fit. We here in Virginia have not become so destitute of mind and character, as well as of ability to govern ourselves, that we are ready to ask anyone to cross over the Potomac and indoctrinate us with false and spurious doctrines that are alien to our American way of life.

If we are to maintain our liberties and freedom as well as our State functions, we have a long, hard fight and rocky road ahead. It will require sacrifice, endurance and patience. If we are to succeed we must unite and stand together. With the weight of the long line of judicial and historical precedents to support us, and with right on our side, and determination in our hearts, how can we fail in the venture to protect our children and children's children.

What can or shall we do in this momentous hour? There are 2 things we can do, yea, 3 and more. First, we can go out early next Monday morning and vote for the constitutional convention. Secondly, we can join the Defenders of State Sovereignty and Individual Liberties and ally ourselves with that patriotic organization which was conceived in love not hate. Thirdly, we can stand upon the ramparts of liberty unruffled, unashamed and unafraid, and let these impertinent meddlers know that we are determined never to surrender our freedom. We will also let them know that we will not forsake our children and grandchildren who in their innocence and helplessness are now playing around the family fireside and hearthstones and have none but us to whom they can look for deliverance from these flagitious forces who would not only mongrelize them and destroy the identity of both races, but also deprive and deny them and all others the constitutional guarantees for which our forefathers struggled so hard and which we have enjoyed for so long. In such a crises with so much at stake we shall not flag or fail, we will resist to the end. Our children will rise up to love, to praise, and to bless us. They will never, no never, have cause to look upon our faces or reflect upon our memories in dishonor, disdain and scorn. Hence, we will go forth inspired by an infallible and unflagging courage so well exemplified by Napoleon's 14 year old drummer boy on the battle fields of Austerlitz 150 year's ago, to be exact the 5th day of December, 1805, and we will never beat a retreat. In that battle Napoleon's trained soldiers and seasoned troops were retiring from the field in disorder. This brilliant but heartless general and dictator was faced with what he thought was certain defeat and in an effort to restore some semblance of order among his troops, he galloped up on his steed to the 14 year old drummer boy and commanded him to beat a retreat. The young man looked up into the face of his mighty and gallant commander and replied, "Sir, in the Army of Napoleon I have never been taught to beat a retreat, but I can beat a battle charge that will wake the dead upon this field." Napoleon then commanded him to do so. The men of that army were so stirred by the musical notes emanating from the drum, as well as the courage of that boy, that they reformed the battle lines and won the battle of Austerlitz, thus bringing to the Emperor Napoleon and to France one of the most glorious victories ever established on any field of battle in the annals of military history. Sustained by such unfaltering determination and imbued with quality of character which constitutes manhood and which enables us to meet danger with a firmness of spirit that knows no fear, victory on Monday will surely be ours to claim.

In the dark days of World War II when England was being bombarded by day and night and an invasion of the channel and the fall of that country was imminent, the late King George in one of his speeches used this quotation, "I asked the man who stood at the gate of the year to give me a light that I may tread safely into the unknown," and he replied, "Go out into the darkness, put your hand into the hand of God, that shall be to you better than a light and safer than a known way."

"God of our fathers, known of old,
Lord of our far-flung battleline,
Beneath whose awful hand we hold
Dominion over palm and pine,
Lord God of Hosts, be with us yet,
Lest we forget, lest we forget."

Address by Congressman Benjamin F. James, of Pennsylvania, at Commemorative Exercises Marking the 250th Anniversary of the Birth of Benjamin Franklin, at the Government Printing Office, January 17, 1956

EXTENSION OF REMARKS
OF

HON. J. VAUGHAN GARY

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 18, 1956

Mr. GARY. Mr. Speaker, under leave to extend my remarks in the RECORD, I include an address delivered by our distinguished colleague, Representative BENJAMIN F. JAMES, at the commemorative exercises marking the 250th anniversary of the birth of Benjamin Franklin, at the Government Printing Office, January 17, 1956.

We all know that the gentleman from Pennsylvania is a valuable and able Member of the House and an impressive speaker. I have particular knowledge of and admiration for his ability, because we work together on the Committee on Appropriations. His selection, however, as the principal speaker for this commemorative occasion was peculiarly appropriate. He is not only the namesake of the great American patriot, but also now owns and operates the printing business which Benjamin Franklin established and operated. I know that his remarks at the ceremony will be of unusual interest to this House:

Let me say at once I feel highly honored with the privilege of having a part in this fine program commemorating the 250th anniversary of the birth of the amazing Benjamin Franklin—the first civilized American and the patron saint of printers.

From the earliest time that Benjamin Franklin became a popular subject for authors, biographers, and orators, until the present—250 years after his birth—something over 1,000 separate works about him (some of them very extensive indeed) have been compiled and published.

There has been a tendency in Franklin scholarship that has emphasized the philosopher, the scientist, inventor, diplomat, the man of broad international culture, the patriot, and the author, and even the lover, all at far greater extent than Franklin the printer.

This despite the fact that Franklin's phenomenal success as a printer and a publisher was the springboard—economically and politically—for his advancement in the many and varied fields of endeavor that claimed his interest.

Eulogies in vast numbers have been pronounced on many occasions.

The shortest and pithiest of these was by Whitelaw Reid, himself a distinguished journalist, who once said, rather incidentally in a speech about something else:

"I honor the memory of Benjamin Franklin because he was a philosopher who wrote commonsense, an officeholder who did not steal, and a journeyman printer who did not drink."

Then there is the little story of a young scholar whose class was given the assignment of writing a brief composition about Benjamin Franklin. This lad turned in the following:

"Benjamin Franklin was born at a very early age in Boston, on a street called Milk. He went to school for 2 years and then went into the printing business with his brother. He didn't like his brother so he took a boat and went to Philadelphia. He was very hungry when he got off the boat so he bought two loaves of bread and carried one of them under his arm while eating the other. This made a young lady smile at him, so he married her and discovered electricity."

That is brevity in rare form, but it does make the point that in the public mind two things about Franklin are preeminent—his association with the printing business, which was real, and the completely false notion that he discovered electricity.

This evening I should like to speak particularly about Benjamin Franklin, the printer. It seems most appropriate that I should do so here in this, the greatest of all printshops in our day.

It will not be my purpose, however, to trace an orderly account of his career in printing, of his experiences as an apprentice with his brother, James, or with his partners in Philadelphia and also in five of the colonies, in Jamaica and in Antigua.

However, some discussion of the social and economic climate in which Franklin learned his trade and then followed it as the leading master printer of his time will be helpful to an understanding of the role of a printer in colonial America.

The printer then was a jack of many skills and trades, which in these times of specialization and modern equipment are all separate and distinct callings.

Were we able to compress into one person a typographer, pressman, advertisting man, author, magazine and newspaper publisher, reporter and editor, stationer and bookseller we would have an amalgam somewhat resembling the early American master printer.

At the time that Franklin became an apprentice in his brother's shop in Boston the printer had not yet achieved an honorable and influential status in the American Colonies except possibly in the city of Philadelphia and doubtless that exception was owing to the broad, tolerant policy of William Penn.

As late as 1733 the Governor of New York felt obliged, for some offense, real or imagined, to stop the press then running in that city.

In 1718 the Governor of Virginia, when advertising a reward for the capture of pirates, was compelled to send to Philadelphia to have the handbills struck off. On

another occasion that same Governor thanked God they had no press in Virginia.

Earlier—in 1686, Governor Bradford of Massachusetts had forbidden anyone to print without his consent.

Four years before that, the General Court of Massachusetts had decreed that there should be no printing press used except one at Cambridge, and that one only under the supervision of two licensees.

These restrictions were apparently deemed necessary to prevent editorial and printed abuse of the constituted and privileged authorities.

Even in Philadelphia in those days printing was not regarded as a preferred occupation, but the road to better conditions in that city in the printing trade was yet to be plotted by Benjamin Franklin.

Although printing dealt with making books, of which the youthful Benjamin was so much enamored almost from babyhood, he was not inclined to look with favor upon learning the printer's trade. However, the decision was his father's and he was apprenticed, or bound, to his brother James, a master printer in Boston, for a term of 9 years.

His father's first choice for the boy's future had been the trade of the cutler, but the terms demanded by the master cutler required that he be paid a sum equal to about $100, whereas the price named by James Franklin for his brother's instruction in the printer's art was equal to about $50.

It might be said, the want of $50 made Benjamin Franklin a printer instead of a cutler.

In addition to the payment of a lump sum for instruction, his brother would, of course, have his free services during the term of the apprenticeship.

A rather elaborate contract had to be drawn between Franklin's father and his brother James, in which Benjamin was bound to a number of obligations such as keeping his master's secrets, gladly performing his lawful commands, he must not frequent taverns, inns, or alehouses—play at cards, dice tables or other unlawful games—he might not contract matrimony nor absent himself from his master day or night—but, above all, demean and behave himself toward his master during all the said term.

In consideration of all this, the master also assumed a few obligations. The following is from the document given by James Franklin to the father of Benjamin Franklin:

"The said James Franklin, master printer, for and in consideration of the sum of ten pounds of lawful British money, to him in hand paid by the said Josiah Franklin, the receipt of which is hereby acknowledged, the said apprentice in the art of a printer which he now useth he shall teach and instruct, or cause to be taught and instructed, the best way and manner that he can, finding and allowing unto the said apprentice meat, drink, washing, lodging and all other necessaries during the said term."

Further terms of the contract are quaint and somewhat amusing. The master was obliged to provide apparel for the apprentice, described thus:

"A pair of deerskin breeches coming hardly down to his knees, which, before they could be allowed to come into the presence of ladies, at meeting, on the Sabbath, were regularly to be blacked upon the preceding night, in order to give them a clean and fresh appearance for the Sunday; a pair of woolen yarn stockings, a thick and substantial pair of shoes, well greased and ornamented with a pair of small, brass buckles (the latter however to be a present for his good behavior)—a speckled shirt for all the week—and a white one for Sunday—which was always carefully to be taken off as soon as he returned from meeting, folded up and laid by for the next Sabbath."

Franklin once commented that the leather breeches, after several years of wear, became greasy as they grew old and could only be kept flexible when worn, by the superflux of youthful heat.

Thus was Benjamin Franklin, a lad of but 12 years, launched upon a career destined to land him, when only 42 years of age, at the port of wealth and influence, and bring him, in his riper years, greater and greater distinction—not only in his beloved land, but throughout the civilized world.

James Franklin proved to be a mean taskmaster and occasion presenting itself, Benjamin broke the indentures that bound him and though but a lad of 16 years, fearlessly started out to make his way elsewhere.

He arrived in Philadelphia on a Sunday morning in October, in the year 1723, and though his apprenticeship in point of time had been but half completed, he was even then a competent journeyman printer, as well as something of a writer. He found ready employment in the shop of Samuel Keimer, one of the two printers then established in that city. Keimer was slovenly in person and in business, according to Franklin—suspicious and something of a knave withal. This employment was not happy nor did it last long.

The following year a trip was made to Boston at the suggestion of Governor Keith of Pennsylvania, who had become attracted to young Franklin, but who proved to be a very unreliable patron. At Keith's suggestion Franklin sought assistance from his father, Josiah, to the purpose of starting a printing business of his own in Philadelphia.

His father, however, took a dim view of the lad's plans, saying that "Keith must be of small discretion to think of setting up a boy in business who still wanted 3 years of being of man's estate."

Though help was refused by the elder Franklin, advice was generously given, "telling me," as Franklin says, "that by steady industry and prudent parsimony, I might save enough by the time I was 1 and 20 to set me up; that if I came near to the matter he would help me out with the rest."

In December 1724, Franklin sailed for England, again following irresponsible advice and promises by Governor Keith, which were never kept.

The journey was not without profit, however, for he spent nearly 2 years there working for two of London's foremost printers; much improving his knowledge of the business and his skill as a craftsman.

In 1726 he returned to Philadelphia, again went to work for Keimer, for—though still determined to go into business on his own, earnings were neeeded in the meantime.

An incident occurred at about this time of lasting interest, for he fell ill of the pleurisy and in the certainty that he was about to die, he wrote the famous epitaph, which to this day remains one of the most remarkable and widely known writings of its kind. In it he proudly identified himself for posterity with his craft, just as he did later, in his last will—as Benjamin Franklin, Printer.

In the spring of 1728 there was a day to mark the beginning of a new era in the history of printing in America.

The types and press ordered earlier from a London firm by Benjamin Franklin arrived in Philadelphia and were being installed at No. 51 High Street, and the firm name, Franklin and Meredith was hung above the door.

Meredith was a printer in Keimer's shop and a friend of Franklin's. He had been given to overindulgence in drink and Franklin, by advice and example, had redeemed him to a very creditable degree. In gratitude Meredith's father furnished a sum of money, though not wholly adequate, for the purchase of equipment, in return for a partnership—and probably further moral support—for his son. This partnership, however, was dissolved, in 1730, and Franklin became sole owner of the business.

In his autobiography Franklin says that at the time of the beginning of this new firm it was freely predicted that Franklin and Meredith must fail as there were already too many printers in the city. Yet there were only two, one of them Andrew Bradford, the other Samuel Keimer, and neither had the grasp and knowledge of his business possessed by the youthful Franklin.

Franklin did not just hang out his sign, announce that he was in business and wait for customers.

When he and Meredith opened for business, the public printer of Pennsylvania was Andrew Bradford, a dilatory man whose competition had been negligible and only from the highly incompetent Samuel Keimer.

Evidently, the bounty of the public purse was just as alluring in Franklin's day as in our times and political security was then, as now, a dangerous illusion.

Franklin therefore aimed his first competition at Bradford's most lucrative plum, the public printing of the Assembly of Pennsylvania which promptly fell right into his lap.

To use his own words "Bradford had printed an address of the House by the Governor, in a coarse, blundering manner." We reprinted it elegantly and correctly and sent one to every Member. They were sensible of the difference; it strengthened the hands of our friends in the House, and they voted us their printers for the year ensuing.

This, I venture to say, was the beginning of modern lobbying technique in America.

From that year, 1730, until his retirement, Franklin remained the official public printer of Pennsylvania.

In 1736 he clinched the contract by getting himself appointed clerk to the assembly, thus insuring, without interference, the direct transmission of printing orders from the assembly directly to the printer.

This clerkship was Franklin's first political post and his first step in a long career in public service.

Undoubtedly the public printing business was the foundation and side walls of Franklin's Way to Wealth.

At about the same time that he took the job of clerk to the assembly he also broke Bradford's monopoly in the newspaper field.

Keimer, in competition with Bradford's paper, the American Weekly Mercury, had issued on December 24, 1728, his first edition of a weekly called by the impressive title, "The Universal Instructor in All Arts and Sciences and Pennsylvania Gazette."

Within 6 months Keimer was through. He never had over 100 subscribers so he offered the paper to Franklin for what Franklin called a "trifle."

On October 2, 1729, Franklin began publishing the paper with a more reasonable title "The Pennsylvania Gazette." That paper was published regularly until 1815, 25 years after his death.

Franklin was a keen newspaperman. He knew that controversial issues created reader interest, and he has told of controversies he published which, as he says, "Got the publisher and editor talked about by the principal people involved and in a few weeks brought them all in as subscribers."

There is no complete list of books that Franklin and his various partners published from 1728 until 1766, when he sold his interest in the firm to David Hall whom he had taken into a partnership 18 years earlier.

The most reliable count of Franklin's imprints, made about half a century ago, recorded at that time 759 titles.

Next in importance to the public printing were religious works and sermons and books on theology, as a group.

He was not a sectarian publisher and the religious works he wrote, or edited, and published amply covered the field of all sects sheltered under William Penn's "freedom to worship" policy.

Next to religious works and very important profitwise were his almanacs. Of the 759 known items Franklin published, religious titles accounted for 148 and almanacs for 119 items. Very likely even more have now been accounted for.

One item—Poor Richard's Almanack, regularly published for 26 years, far outsold all of its competitors, but he did not carry all of his almanac eggs in one basket. In one year, 1751, he issued six different almanacs, one in the German language and one in the export field called The Barbados Almanac.

I have mentioned briefly some of the important items printed and published by Franklin but there were other and very profitable items such as forms, letterheads, announcements, and such materials as the job printer and stationer supplies.

In those days it was the custom to print certain business forms, such as bills of lading starting with the words "By the grace of God." Franklin felt that some users of these forms might prefer to have those words omitted so he advertised that he would supply bills of lading with or without the grace of God.

Nor have I accounted for the great numbers of pamphlets which he wrote and printed on the philosophical society, the university, and the library company—all of which he helped to found: on his stove, on electricity, medicine, and on politics.

At 42 years of age Franklin had made amply secure his future, financially, and then retired from active participation in the business so that he might have more time for the increasing burdens of public service and his many other interests.

It may be fairly said that Poor Richard's words of worldly wisdom, his pamphlets, his pen, and printing press did more to mould the new American character than any other influence in his time.

A delegate to the First Congress assembled in America at Albany, N. Y., in 1754, he presented his plan for the union of the colonies, which unquestionably awakened in the minds of the colonists a new national consciousness. Many regard this as Franklin's most significant contribution in behalf of the independence of our country.

George Washington, to whom we refer affectionately as the Father of Our Country, was in that same year, 1754, a lad of about 20 years, mainly occupied with the task of surveying his family's estates in Virginia.

Franklin died at the age of 84 years and 3 months, soon after Washington, at the age of 57, was inaugurated first President of the United States.

I would like to now conclude this discussion of Benjamin Franklin, printer, by recalling, what we must believe he valued among the finest rewards of a life of devoted service to his country and to mankind.

It was a letter that he received on his deathbed, but while he was still in possession of his faculties and ability to clearly comprehend, which I now read:

"If to be venerated for benevolence—if to be admired for talent—if to be beloved for philanthropies—can gratify the human mind, you must have the present consolation to know that you have not lived in vain; and I flatter myself that it will not be ranked among the least grateful occurrences of your life to be assured that, so long as I retain my memory, you will be recollected with respect, veneration, and affection by your sincere friend, George Washington."

Albert Gallatin, a Great Swiss-American Patriot

EXTENSION OF REMARKS
OF
HON. HENRY S. REUSS
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES
Wednesday, January 18, 1956

Mr. REUSS. Mr. Speaker, we are approaching January 29, the birth date of Albert Gallatin.

From the very inception of the democratic way of life on our shores there have come from across the seas men and women whose contribution it was to help build America into a nation that is today the freest, richest, and most powerful on earth.

Some came in time of war and others came in time of peace. The illustrious names of Lafayette, Kosciusko, Von Steuben, Rochambeau are known to all of us as the heroes whose assistance on the fields of battle or on the high seas helped the colonials throw off the yoke of the foreign oppressor. Their military feats are forever enshrined in the memories of our people.

But after the birth of the Nation came the growth of the Nation. It was then the young Republic turned to heroes of another sort, men whose job it was to fill out the democratic framework which had been erected at such cost.

Such a man was the young Swiss-born Albert Gallatin, a youth of 13 in Geneva when our great Revolutionary War began. Born on January 29, 1761, and an immigrant at 19, Gallatin, as Senator, Congressman, and Secretary of the Treasury, was destined to fulfill himself nobly as an American and to earn for himself, in the company of such giants as Washington, Jefferson, Madison, John Adams, the title of Founding Fathers.

His history as an American began in 1780 when he landed in Boston, fired with the concept of democracy he was never to forget, even in the most provoking circumstances.

For Gallatin, whom Jefferson called a man "of a pure integrity, and as zealously devoted to the liberties and interests of our country as its most affectionate native citizen," was, during his early political career, to be submitted to the most outrageous attacks because of his foreign birth.

When Gallatin entered Congress in 1795 and had the temerity to challenge the fiscal operations of the United States under the Federalists, Secretary of the Treasury Alexander Hamilton was in power. And, smarting under the demand that the Treasury must account to the people for its expenditures, Hamilton and his associates unleashed their attack on Gallatin who, nonetheless, achieved his purpose by keeping a cool head on his shoulders and fighting with the immense financial learning he commanded.

In 1801, when the Federalists were defeated by Jefferson and Gallatin was named Secretary of the Treasury, the Federalist attack on Gallatin was renewed; but he was to weather it, and, in the course of his tenure, substantially reduce the national debt, lower taxes, and develop and extend the credit and commercial relations of his adopted land in the markets of Europe.

Idealism, tempered by a respect for thrift and work, made Gallatin an ideal addition to the party of Jefferson and Madison. His early and exacting training in Switzerland, plus a natural aptitude for finance, were the very leaven his party needed to achieve the prosperity which, along with its democratic ideas, won and kept the support of the people.

Sound commercial relations—not war—offered the key to prosperity in Gallatin's thinking; and his policies were to bring the young Republic enormous dividends, and even the friendship of England with which he negotiated a commercial treaty following the War of 1812 which abolished all discriminatory duties.

In this light, it might be well to reevaluate some of our Government's recent decisions to place pitfalls in the way of commercial harmony. I refer especially to the increase in the watch tariff last year which affects the country of Gallatin's birth and our own country as well.

A successful working through of this tariff problem, in the light of Gallatin's precepts, is one way America can now profit from the exemplary life of this devoted adopted son.

Address by Hon. Alexander Wiley, of Wisconsin, at Marshall College

EXTENSION OF REMARKS
OF
HON. ALEXANDER WILEY
OF WISCONSIN
IN THE SENATE OF THE UNITED STATES
Wednesday, January 18, 1956

Mr. WILEY. Mr. President, on Monday it was my pleasure to address a forum at Marshall College in Huntington, W. Va., on the subject of the administration's foreign policy in the European area.

I was pleased to share the platform with my distinguished colleague from Minnesota [Mr. HUMPHREY], who discussed the problems of our relations with Asian lands.

I send to the desk the text of my own address, and ask unanimous consent that it be printed in the CONGRESSIONAL RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

SENATOR WILEY COMMENDS EISENHOWER ADMINISTRATION FOREIGN POLICY; SAYS NONPARTISAN UNITY MORE ESSENTIAL THAN EVER BEFORE; URGES DEMOCRATS MAKE THEIR CONSTRUCTIVE CRITICISMS, IF ANY, "MORE SPECIFIC"

It is a pleasure for me to address this fine assembly, and to share the platform with my

colleague from my neighbor State of Minnesota.

One of his many important services these days is his chairmanship of an exceedingly important subcommittee of the Senate Foreign Relations Committee, devoted to the vital problem of disarmament proposals.

SENATOR HUMPHREY'S POSITION AND MINE

My colleague has become somewhat of a specialist in disarmament. But I trust that when he gets around to any references to the Democratic Party, that his remarks tonight will not prove too "disarming."

Seriously, I know that you will enjoy his remarks, because Senator HUMPHREY has shown great interest in the problems of Asia and real understanding, just as he has been very alert to our problems in Europe as well.

Before I proceed further, may I say that, although my good friend from Minnesota and I have frankly disagreed at times on some domestic issues, we have voted side by side and fought, shoulder to shoulder, on some of the key international questions of our time.

We have both been supporters of the basic policies aimed at constructive American leadership in the contracted world of the air atomic age.

We have both fought against those narrow, backward-looking forces which, ostrich-like, would try to "bury America's head in the sand."

We have both fought for a strong technical aid program to uplift the standards of living in the under-developed areas of the world. And I could cite other instances of our unity as well.

Later on, I shall refer to the points on which we differ somewhat—points which will become apparent to you, as we both proceed to the substances of our remarks.

EUROPE—A KEY TO THE WORLD BALANCE

But first, let us turn to the European area, as such—Europe, the industrial, political, and cultural cradle of our own Western civilization, Europe—the area of our principal ancestry, Europe—the principal arena of the forces that have molded the 20th century.

It is in Europe that communism first established its beachhead. It is in Europe that it gained its home base for aggression. It is in Europe that it made its first spectacular advances. It is in Europe that it posed its most serious threat after World War II. And it is in Europe, where, thanks to the Marshall plan, NATO, and now the Western European Union, that a rough equilibrium has been achieved, stopping communism, at least temporarily, in its tracks.

Most observers, I think, would agree that our most impressive successes in postwar foreign policy have tended to be in the European area, whereas our most significant and ominous problems tend to be in the Asian area, to which Senator HUMPHREY will refer.

EUROPE, ASIA INTERRELATED

Europe and Asia are hardly disconnected, however. They can hardly be spoken of, as if they were separate problems.

Although I shall confine my own remarks principally to the European area, as requested, it is almost inevitable that some of my comments will lap over into the Middle East, Africa, Asia, and, indeed, South American areas as well, just as will Senator HUMPHREY'S comments overlap somewhat.

One cannot talk, for example, about continued prosperity of Great Britain without referring to her considerable dependence upon pound sterling earnings in the troubled Middle East and southeast Asia.

One cannot talk about France, without immediately bringing up the sore problem of self-deterioration in North Africa.

One cannot speak in terms of our NATO relations, without almost automatically bringing up problems of our relations with the colonial and former colonial areas which belong now or used to belong to some of the NATO powers.

Obviously, the world today is an interrelated unit—economically, politically, militarily, socially. Of course, this world is divided by the still formidable Iron Curtain. Nevertheless, a solution to our problems in Europe is crucially dependent upon success of our decisions in other areas, and vice versa.

Thus, when you think about our relations with our friends in, say, Portugal, it is more than a European problem. You must also bear in mind the problems of our relations with our friends in India and the specific, difficult problem of Goa.

You must think, however, as well, of those crucial Azores bases—belonging to Portugal—which are an indispensable link in our own Atlantic chain of defense.

KEEP BROAD PERSPECTIVE

We need, therefore, to keep an overall and broad perspective.

A segmented view of the world—a view of merely Asia's or Europe's problems—all by themselves—may tend to be narrow and distorted.

Our problems are complex and interwoven. We dare not ignore dangerous side-effects and after-effects of our European actions in Asia, nor of our Asian actions in Europe.

A BALANCE SHEET OF EUROPEAN POLICIES

Now, let us draw up a balance-sheet in Europe.

What does it show? How successful have our policies been there?

I believe—very successful indeed, although obviously far from perfect.

On the "plus" side of the ledger, our achievements in Europe have been:

1. The coming into being of the Western European Union, as a substitute for the European Defense Community.

WEU is not a perfect substitute, but it is an effective wroking alternative for achieving greater unity, principally between those two traditional enemies—France and Germany.

2. A second success is the reentry by the people of Germany into the family of sovereign nations.

Unhappily, it is only the people of the Federal Republic of Germany, that is, West Germany. But we are continuing our efforts looking toward the earliest possible unification of both zones, along free and democratic lines.

3. The regaining by the people of Austria of their long-sought independence.

4. The settlement of the bitter Italian-Yugoslav dispute over Trieste.

5. Progress under the High Coal and Steel Authority, and steps toward other economic integration.

6. The taking of the necessary steps to bring into being the United Nations Atomic Agency. These steps have been spearheaded by the Atlantic powers which have made the most progress in peaceful application of atomic energy. But non-European powers are of course also included.

7. The continued strengthening of the North Atlantic Treaty Organization, including efforts, most recently, designed to lead toward a NATO radar system.

8. The entry of additional free European powers into the United Nations, including countries such as Ireland, Italy, and Spain, which had heretofore been arbitrarily excluded by Soviet veto.

9. The continued booming prosperity of Western Europe which, while it is occasionally marred here or there, has been surpassing almost all prewar records in production and consumption.

These are a few elements of the positive side of the ledger. These are the assets, the gains, the pluses.

THE PROBLEM SIDE OF THE LEDGER

No one should, however, ignore the continuing difficulties.

1. Foremost among those difficulties is, of course, that faced by our friends in the uneasy Republic of France.

You are all familiar with the serious parliamentary deadlock between the forces of the right center and the left center, led respectively by former Prime Minister Faure and former Prime Minister Mendes-France.

You recognize how the diabolic Communists will continue to attempt to throw the monkey wrench into France's parliamentary system, by virtue of the fact that they now command 145 seats in the French Assembly out of 594. You recognize too, the unsettling effect of the 52 Assembly votes on the extreme right.

2. Secondly, you are familiar with the disarrangement of the Saar agreement by the recent pro-German votes.

The Western European Union is, of course, hinged on French-German agreement on the Saar.

So, a great deal more must still be done to patch up the obvious differences which have occurred in that iron- and steel-rich area.

THREE DANGERS IN NORTH AFRICA

3. Thirdly, everyone is all too aware these days of the threat posed to the Atlantic powers by the continued serious disturbances in North Africa, particularly in Morocco and Algeria.

The riots and fighting there are not only of grave concern to our French friends, but are of particular concern to ourselves in view of three facts:

(a) The strategic stake which we have in the areas because of the presence of our Strategic Air Command bases. (These bases, I need not remind you, are a crucial part of America's principal deterrent against world war III.)

(b) The dangerous effect of the disturbances on the whole Moslem world—stretching from North Africa through the explosive Middle East—through Pakistan and all the way to Islamic Indonesia.

(c) The fact that France has drained off 300,000 troops for North African duty, and thus has seriously depleted NATO strength in Europe.

DEPRESSED AREAS IN ITALY

4. Another of the continuing problems is the fact that in some areas in Europe, there are still considerably depressed segments of national economies.

The principal example is, of course, in our good ally, Italy. There, in spite of an enormous financial commitment by the United States, and in spite of strenuous efforts by the Government, a vast unemployment problem continues to exist. Meanwhile, land redistribution in Italy has not achieved anywhere near its fullest goals, and there is considerable want and privation among many of the Italian people, especially in the south.

HOW LARGE SHOULD NATO'S GROUND FORCES BE?

5. Another key question relates to NATO's adequacy in the light of changing facts of the air-atomic age.

We must remember that the ground area of Western Europe is actually comparatively small.

That means that supersonic jet planes—fighters and bombers—could streak from Soviet bases across the entire NATO area in a matter of minutes and hours.

Moreover, the Soviets are constantly modernizing their armed forces. And so, we have an enormous problem in terms of modernizing NATO forces, as well.

NATO weapons are quickly becoming obsolete. The question is: Who is to foot the new bill? How much can Uncle Sam afford to provide?

A related question is: How large should NATO's ground forces be, considering the

fact that the principal threat to NATO may come from air-atomic weapons, rather than from the traditional-type infantry—ground assault?

Inevitably, the Western European countries find themselves pinched in their military budgets. Inevitably, there is pressure to reduce the size of their ground forces. (This is so, particularly, in view of occasional Soviet smiles and sweet talk.) One can see the impact in virtually every one of the NATO powers. Thus, in some of these powers, there is a tendency drastically to shorten the period of military enlistment, indeed, to make it so short that the men may not have sufficient specialized training at all.

PARLIAMENTARY PROBLEMS IN THE WEST

6. We turn to a sixth problem, relating to recurrent parliamentary crises. Even so relatively stable a country as Britain—which has had only 3 changes in the postwar era, in comparison to France's 22 governments since 1945—even Britain has had her parliamentary conflicts.

Prime Minister Eden, for example, has found himself in difficulty because of a combination of crises in the Middle East—where Britain has traditionally exerted a paramount influence—and because of the United Kingdom's serious economic problems as well.

OUR REVIEW OF THESE PROBLEMS

These, then, are but a few of the problems which exist.

No one should underestimate these problems. Senator HUMPHREY and I, as well as our colleagues on the Senate Foreign Relations and House Foreign Affairs Committees, "wrestle" virtually every week with these problems.

Very shortly we will be making an intensive review of the administration's mutual-security requests for the coming fiscal year; and, no doubt, many of these specific problems will be coming up.

THE CONTINUING CRISIS IN MIDDLE EAST

Also looming large will be the continuing crisis in the Middle East.

I need not tell you that a match which might be lit near that powder keg could explode in a manner which might quickly engulf not only Europe, but Asia and the Western Hemisphere as well.

Secretary Dulles has, of course, been making an intensive effort to compose the bitter Arab-Israeli dispute. Progress has been made. Agreement has been approached on Eric Johnston's Jordan water-development plan. But obviously a great deal more constructive work still needs to be done.

THE PROBLEM OF FOREIGN POLICY AND NOVEMBER 1956

This, then, for brief summary purposes, must be our general outline of the situation in Europe.

In the few moments which are remaining to me I should like to say just a few words with regard to the relations here at home between the two political parties over our foreign policy.

No one need remind you that in this crucial election year of 1956 it is inevitable that both parties may, to some extent, try to use foreign-policy arguments to their own advantage.

It is inevitable that the Eisenhower administration will "hold with pride," and that some of our Democratic friends may tend to "view with alarm."

It has been my hope (indeed it has been the hope, I believe, of most thinking Americans) that we can keep partisan disputes on foreign policy to an absolute minimum.

We must keep the argument to manageable proportions. We must not allow foreign policy to be completely dragged into the political arena, where it might be kicked around to such an extent that America's prestige declines throughout the world.

The eyes of all mankind are upon us. Our friends are not slow to note our shortcomings, and our enemies are quick to seize upon our shortcomings.

GENERALIZED CRITICISM OF FOREIGN POLICY

Now, let me say just a word with regard to some of the criticisms which have been leveled against our foreign policy.

One quickly notes that one uniform characteristic of these criticisms is that they have really been confined to generalities and not to specifics.

Occasionally the criticisms become specific. One example is the hindsight possibility that we might have become involved in the Indo-Chinese fighting at the Communist siege of Dien Bien Phu.

Well, a lot of things might theoretically have happened in the past and a lot of things might theoretically happen in the future. This is a world of alternative risks and dangers. We could spend time indefinitely discussing risks which we took in the past or alternatives which we might have taken, but didn't.

THE SURPLUS OF ABSTRACT ADJECTIVES AND ADVERBS

Basically, however, as you read most of the Democrats' criticisms, you will see that generally our Democratic friends merely say, in a completely unspecific way, that our foreign policy is "not clear enough." And they use dozens of other abstract adjectives and adverbs as well.

When you try to pin them down, when you try to ask them for their own constructive counterproposals, when you ask them what they would actually do, differently than what we are not doing now, there is a comparative silence. I say "comparative," because silence is not a noun generally associated with the Democratic Party. Basically the Democrats do not really have specific alternative plans to the ones which the Eisenhower administration is now following. The Democrats want us to achieve all of these "lovely" adjective goals which they set forth—flexibly, dynamic, etc.—but they do not tell us how—concretely.

Let me assure you that I, for one, very definitely want our foreign policy to be clear, dynamic, flexible, and so forth.

But I believe that right now it basically does strive for these objectives. And I believe that no two people are working harder for those goals than are Dwight D. Eisenhower and John Foster Dulles.

DEMOCRATIC ADMINISTRATIONS ESTABLISHED PRESENT OUTLINES

Lest my position be misinterpreted, let me quickly state that this Nation is indebted to the previous Democratic administrations for the broad outline of leading policies which have proven successful in Europe and emphasized in Europe.

This Nation is indebted to an ex-Secretary of State like Gen. George C. Marshall, who recently observed his 75th birthday. And it is indebted to other men of great stature who served this Republic well in the field of foreign relations during the long period of Democratic occupancy of the White House and control of the Congress.

It is my hope that, thanks to the great talent and ability of both major parties, we will continue to make a success of our policies in Europe, as well as in Asia, and elsewhere.

PRINCIPAL THREAT TODAY IN ASIA

In my judgment, the principal Soviet threat today is not in Europe. It is in the Asian theater, where conditions of colonialism, of widespread poverty, illiteracy, and disease provide ripe opportunities for communistic intrigue. About this we shall hear more from our good friend from Minnesota.

CONCLUSION

It has been a great pleasure to be with you tonight, and I look forward to the opportunity to respond to your questions.

Address by the Vice President on the 250th Anniversary of the Birth of Benjamin Franklin

EXTENSION OF REMARKS
OF
HON. FREDERICK G. PAYNE
OF MAINE
IN THE SENATE OF THE UNITED STATES
Wednesday, January 18, 1956

Mr. PAYNE. Mr. President, last evening the Vice President delivered an excellent address before the golden anniversary dinner of the Poor Richard Club in Philadelphia on the 250th anniversary of the birth of Benjamin Franklin. I ask unanimous consent that the Vice President's address may be printed in the CONGRESSIONAL RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

TEXT OF ADDRESS OF THE VICE PRESIDENT OF THE UNITED STATES BEFORE THE GOLDEN ANNIVERSARY DINNER OF THE POOR RICHARD CLUB, BELLEVUE-STRATFORD HOTEL, PHILADELPHIA, PA., JANUARY 17, 1956

This is a very special occasion for me for several reasons:

Because I am privileged to share with you the 250th anniversary of the birth of the most versatile, the most complete man in our history, Benjamin Franklin.

Because, at the same time, I share also the golden anniversary of this club, which bears a name which both Dr. Franklin and my mother thought well of.

Because you have so highly honored me by allowing me to join the distinguished group of men and women who have received your gold-medal award in years gone by.

In accepting the award may I suggest that it could have more appropriately been presented to many others, but particularly to one who is in this audience. The citation speaks generously of the contribution to good will and understanding I may have made in serving in my present office. May I be permitted to tell you a little story at this point.

When we returned from our two-and-a-half-months' trip to Asia in December 1953, the President and Mrs. Eisenhower very generously invited us to the White House upon our arrival. As we were sitting in the White House apartment on the second floor enjoying a cup of tea, the President turned to me and said, "I've had some good reports on you, Dick, on this trip." And then he turned to Mrs. Nixon and said, "But the reports on you, Pat, have been wonderful."

Now Benjamin Franklin was a most gallant man. As you recall, on being chided by a lady as to why he had not come to call, he replied, "Madam, I am waiting until the nights are longer." I am sure he would agree that this club would have done better to honor the lady rather than the man tonight. In that spirit, then, I accept this award with humility and gratitude.

And now I embark on one of the most difficult tasks which could confront a speaker.

To speak on Benjamin Franklin before this group is like carrying coals to Newcastle. Or, as Foreign Minister Shigemitsu of Japan, put it when he was here a few months ago, like carrying Sake to Nada. You have had distinguished speakers galore tell you again and again of Franklin's life, his achievements, his priceless anecdotes.

But I should like to consider this versatile man Franklin tonight in his role as a public man and a public servant. Because in addition to his many better-known talents he was a superb political operator. He

was a businessman who recognized the importance of politics and public service. He was a governor. He was our first Postmaster General. He was our first Ambassador to a foreign country.

I, of course, would like to claim that he was the first Republican, but the terms "Democrat" and "Republican" in the sense we think of them today were not known to him. I am sure, however, that it would not be inaccurate to state that he was a moderate.

And since leading figures in both political parties see the merits of moderation today, that makes any praise of Franklin which I intend to indulge in completely bipartisan in character.

We have only to read the concluding sentence of his famous speech to the Constitutional Convention which had such a great impact on that historic body to find the true guide lines for moderation.

"I cannot help expressing the wish that every member of the Convention who may still have objections to it, would with me on this occasion doubt a little of his infallibility and to make manifest our unanimity put his name to this instrument."

No one could read or hear these words without agreeing that Franklin was in truth a moderate in the best sense of the word.

Let us now see what advice this infinitely wise man might have for us on the great issues which confront our Government today.

We do not have to look far to find what his position would have been on national defense. It was Franklin who said:

"The very fame of our strength and readiness would be a means of discouraging our enemies, for 'tis a wise and true saying that one sword often keeps another in the scabbard. The way to secure peace is to be prepared for war."

And I can assure you that we are following Franklin's advice today in our national policy.

Today America's military strength, combined with that of our allies, is greater than it has ever been in war or peace. We can, if necessary, with our allies meet and defeat any aggressor who dares to launch an attack.

And I am sure that the great majority of the American people will agree when I say that as long as a malignant aggressive force threatens the peace of the world, the understandable desire we all share for cutting our taxes and balancing our budget must never be allowed to compromise our judgment as to the necessary level of our military strength during this period of international tension.

Franklin also, even in those early days of the Republic, was a full-blown, practical internationalist in every sense of the word. It is true that his famous statement, "We must indeed hang together or assuredly we shall all hang separately," was made in reference to the American Colonies and not with regard to the United States' relations with other countries, but other statements show the trend of his thinking. With amazing foresight, he virtually predicted NATO and the United Nations.

And there is no doubt whatever but that he would have been a strong proponent of reducing barriers to trade between nations and of providing foreign aid when the interests of the United States as well as the countries aided would be served. It was he who said:

"I am sorry to find that that wisdom which sees the welfare of the parts in the prosperity of the whole seems not yet to be known in this country. We are so far from conceiving that what is best for mankind, or even for Europe in general, may be best for us."

I can imagine that if Franklin were here today he might have given us a new definition of an internationalist. I submit one on his behalf. "An internationalist is a nationalist who recognizes that in the final analysis what is good for our friends abroad is good for the United States, and what is bad for them is bad for us."

In line with this definition, may I at this point say some things about foreign economic aid which I think very desperately need to be said and understood by the American people? What I say now has not been cleared with the White House or with the Department of State, but it represents my own personal estimate of a deadly danger which confronts the United States and the free world.

We seldom have any difficulty in arousing the American people to the necessity of providing men and arms to defend the frontiers of our allies against armed aggression. Korea was a prime example of this truth.

And I am sure that if the Soviet Union were to launch an armed attack against Indonesia, Afghanistan, Syria, India—any of the countries of the Far East, Near East, or Africa—the people of the United States would realize that such an attack endangered our own security and would take appropriate action to meet it.

The reason we are so ready to take up arms and send our men to fight on foreign shores is that we recognize that if a potential enemy is allowed to overrun either free or neutral countries our own world position is weakened and we eventually will be next on the list.

What we must realize today is that sinister new means have been developed by the Communists for taking over countries without ever launching armed attack across a border.

Since World War II the Communist conspiracy has added 600 million people and a quarter of the earth's territory to the area which it dominates. The significant fact about this accomplishment is that the gains were made without the loss of a single Russian soldier in combat.

What it adds up to is that the major danger the free world faces today is not defeat in hot war but defeat in cold war—a cold war in which potential enemies undeterred by any moral restraint use political, economic, phychological and other tactics which are just as effective in taking over territory as armed aggression—and much less costly. This is the way the Communist nations operate.

We hear today a chorus of opposition to the so-called "giveaway foreign aid programs" while at the same time we find virtually no opposition to programs which build up our armed strength at home and that of our allies abroad.

But if we examine the problem realistically we will find that the men in the Kremlin are waging not only a great ideological offensive against the free world but a very subtle and economic offensive as well—an offensive in which they are attacking what they think are the weak spots of the neutralist and the free world with offers of economic aid.

They are not making these offers because of any highly developed sense of philanthropy. The realistic men in Moscow know that a country which becomes an economic satellite will inevitably become a political and military satellite as well.

Our foreign aid program is not designed to buy the friendship of peoples in the countries to which our aid is given. That is why both neutrals and allies should share in that program.

What we are trying to do is to shore up their strength so that they can be free economically and politically of any foreign domination—so that they can be independent members of the family of nations. This in the final analysis is the best guaranty of our own freedom and our own independence.

An economic offensive is potentially just as dangerous and in some ways more dangerous than a military offensive which might be launched against us or one of our allies.

If we want to keep our freedom and our independence we must recognize this threat and deal with it imaginatively, boldly, and effectively.

I am sure that Franklin who, in speaking of the benefits of peace, said, "What vast additions to the conveniences and comforts of living might mankind have acquired if the money spent in wars had been employed in works of public utility," would have approved wholeheartedly of President Eisenhower's conduct at the Geneva Big Four Conference.

He would have recognized that the millions of the world's people want peace and he would have argued the necessity and rightness of his country being on the side of peace.

And the Geneva Conference which for the first time since World War II got the United States off the defensive and on the offensive on the great issue of peace and did so without one concession of liberty or territory would in Franklin's judgment have been considered a memorable success.

But the man who said, "There never was a good war, or a bad peace," would certainly not have been an appeaser. We must remember that he was a revolutionary leader. It was he who said, "They that can give up essential liberty to obtain a little temporary safety deserve neither liberty nor safety." Surely we can find no better guideline for our conduct in the world conflict which engulfs us today.

He would have been proud to have read and heard the statement the President made recently on the subject of the captive countries. "The peaceful liberation of the captive peoples has been, is, and until success is achieved, will continue to be a major goal of United States foreign policy."

In summary, I rather imagine that Franklin would have approved wholeheartedly of President Eisenhower's recent statement—"We must wage peace with our eyes open, our heads cool, and our tempers well under control, yielding neither to Soviet threats or Communist blandishments in our crusade for a free, peaceful, and prosperous world."

I believe too that Franklin would undoubtedly have approved of good will trips of every type and description. He was himself a man of infinite good will, beloved in every country to which his journeys took him.

And it was he who uttered these eloquent words, "I think it cannot but have a good effect in promoting a certain interest too little thought of by selfish man, and scarcely ever mentioned, so that we hardly have a name for it; I mean the interest of humanity, or common good of mankind."

I personally again can testify to the truth of his statement. It has been my privilege to visit 30 countries in the past 3 years and I have no doubt whatever but that as people know each other the prejudices which otherwise would drive them apart will inevitably melt away. I had heard before I visited these countries how different the people of each nation I was to visit were. These people were supposed to be reserved, others were supposed to be arrogant, others were anti-American.

But I found that while there were differences in food, religion, customs, and languages, a smile, a handshake, a friendly gesture, got the same reaction abroad as in the United States. That was true everywhere we went in Asia. And, in Latin America my memories are full of gestures of good will.

And may I say that one of the reasons I am particularly moved by receiving this medal tonight is that this organization recognized the importance and the contribution

that can be made by public officials when they go abroad offering no treaties, no arms, no economic concessions, but simply an abundance of American good will.

This very practical man would have had some appropriate comments on some of our more mundane but nevertheless important domestic problems.

I am confident that the subject on the domestic scene which would have fascinated him the most would be the current controversy which is developing over automation. There are a number of reasons for this conclusion.

Franklin invented all types of labor-saving devices. A machine to copy letters. A long arm for taking down books from high shelves. A rocking-chair with an attachment which caused a fan above the chair to move rhythmically back and forth cooling the sitter and shooing the flies.

He was a man who valued time more than any man in history. It was he who said, "Lose no time, be always employed in something useful, cut off all unnecessary action."

He even carried his passion for saving time to extremes which might not be approved in some quarters. He noticed that it always took a considerable time for his father to ask the blessing at the dinner table. He studied the situation and came up with this ingenious idea. He suggested to his father that he could bless all the food in the barrels at one time and thus save the time of blessing each portion of it at the table.

Rather than engaging in gloomy predictions as to unemployment and dislocation which might be caused by further automation, he would probably have pointed out these salient facts:

There has been no significant rise in unemployment in these days when automation is increasing.

On the contrary, employment, wages, and income for America's workers are the highest in history.

There is no appreciable unemployment in those industries in which automation is furthest advanced: chemical, electrical, communications, and automobiles.

And looking to the future he would have noted these facts:

Today the labor force includes approximately 42 percent of our population.

By 1965, it is estimated that it will be less than 38 percent of our population at that time.

On the other hand, the number of nonproductive persons will have increased from 34 percent of the population to over 49 percent in the same period.

These percentage figures are based on a projection by the Bureau of the Census which indicates that by 1965 the total population of the United States will increase about 25 millions while at the same time the number of persons aged 26 to 64 will increase by only 8 millions.

This brings us to an inevitable conclusion. The only way to make up this growing difference between the relative number of workers and consumers is by better management of the Nation's productive resources. It will not be enough to go on doing as well as we have done. We will have to do much better, and that means we will have to have much more automation.

I am sure Franklin would have gloried in this situation. He would have seen that here is truly a new frontier for America, and, with that gentle humor of his which always glowed but never seared, he would have laughed out of court the prophets of doom, the reactionaries who see such grave consequences in this new vista of progress for America and the world.

All in all, considering the manifold problems of the diversive regions, groups and interests in America, we can be sure that Franklin above all would have been a true statesman. It was he who said, "To serve the public faithfully, and at the same time please it entirely is impracticable."

I think that he would have been immensely proud of another man of good will, one of whose actions I would like to describe briefly to you now.

This is an incident which occurred in a Cabinet meeting. It is not necessary to identify the bill involved or the people involved because this incident is so typical of the man who heads our Nation today. A question arose as to whether he should veto a bill if it passed Congress. Though the bill would cost several millions more than everybody in the President's Cabinet believed should be appropriated for the particular purpose, one of those present urged that he not veto the bill on the ground that history showed that vetoes by previous Presidents of such bills had proved to be politically damaging because of the political power of the group favoring the bill.

The President looked him straight in the eye and said: "I have s udied the history of such bills also and I agree that in the short run such veto action may have been politically unwise. But I have always found in my life that you never get into trouble in the long run doing what is right, and I am not going to be black-jacked by any group in America to do something which I do not think is in the best interests of all the American people."

I am sure that Benjamin Franklin would say that this kind of statesmanship which we have learned to expect from our great Presidents, both Republicans and Democrats, is what has made America the great country it is today.

Of course, I realize that up to this time I have not commented upon the major political question of the day, and I must admit that even Franklin on this subject appears to be somewhat inconsistent. On the one hand he said, "The first mistake in public business is the going into it." But then again he said, "I shall never ask, never refuse, or never resign an office."

All that I can say is that I know that 32 million Republicans and Democrats who voted for President Eisenhower are hoping and praying that he will see fit to follow the advice Franklin gave in the second quotation rather than the first.

Finally, tonight, I think that your great Philadelphia philosopher would have had little advice for me.

A careful reading of most of what he said unfortunately shows no direct advice to public speakers. But after reading and rereading source materials, I finally ran across this gem: "It is ill manners to silence a fool, and cruelty to let him go on."

Now I don't mean by this quotation that Franklin meant that all Vice Presidents and/or orators are fools. And I know the members of the Poor Richard Club in this City of Brotherly Love could never be cruel or rude.

But I do know that Franklin, a man who loved life, good humor, and good fellowship, with the knowledge of the delightful entertainment that is to follow the speaking part of this program, would say, "Anyone who talks any longer at this point is a fool."

So may I conclude my remarks by saying to you again—

Thank you for the honor you have conferred upon me through your award.

Thank you for the privilege of allowing Mrs. Nixon and me to share this historical event with you.

And may the years ahead for each of you be filled with the wisdom, the good humor, the great humanity with which the creator of Poor Richard was so abundantly blessed.

Speaker Rayburn Lends Power of His Voice to Public Shock and Alarm Following Disclosure of Brink of War Philosophy and Practice on the Part of Secretary Dulles—Calls It Pitiful Performance

EXTENSION OF REMARKS

OF

HON. JOE L. EVINS

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 18, 1956

Mr. EVINS. Mr. Speaker, many millions of alarmed American citizens—as well as many of our allies—are reading today with relief and gratification that the calm, reasonable, and powerful voice of our distinguished Speaker, Hon. SAM RAYBURN, has been raised in condemnation of the suddenly disclosed brink-of-war philosophy which, it seems, is being practiced by our State Department; at least it has been practiced, by his own admission, by the Secretary of State, Mr. Dulles.

Speaker RAYBURN, in a press conference statement on yesterday, called Mr. Dulles' practiced brink-of-war philosophy a pitiful performance and many will find themselves in complete agreement. For my own part, I can see only one bright result coming out of Mr. Dulles' self-praiseworthy disclosure of his diplomatic tactics—and that is, that having revealed his tricks of the trade to an appalled world, Mr. Dulles may find them impossible for successful practice further in the future.

In this connection, Mr. Speaker, I include excerpts from the report of Mr. RAYBURN'S press conference statement, as written for the New York Times by Mr. William S. White, in the RECORD.

The excerpts follow:

RAYBURN ASSAILS STAND BY DULLES—HOUSE SPEAKER SCORES PITIFUL PERFORMANCE AND CHARGES PERIL TO UNITED STATES ALLIANCES

(By William S. White)

WASHINGTON, January 16.—House Speaker SAM RAYBURN added his power today to Democratic attacks on Secretary of State Dulles.

* * * * *

As Mr. RAYBURN broadened Democratic charges of election-year irresponsibility against the Secretary of State, President Eisenhower coincidentally asked Congress to grant him the right to pledge foreign economic aid for some time into the future.

The Speaker * * * accused Mr. Dulles of a "pitiful performance." Mr. RAYBURN said the Secretary had endangered the United States' alliances by a statement in an interview in Life magazine that the administration's diplomatic skill had saved the peace after the Nation had walked "to the brink of war."

Speaker RAYBURN'S denunciation of Secretary Dulles was of unusual significance.

It was the first instance in which a member of the Democratic congressional leadership had joined what had heretofore been rank-and-file criticism of Mr. Dulles over the "brink of war" statement, which appeared in an interview in Life magazine.

* * * * *

Mr. RAYBURN's action was one of the rare times he had assailed the administration on foreign policy since President Eisenhower took office in 1953.

The Speaker asserted at a press conference that Mr. Dulles' interview was likely to lose friends abroad who were needed by the United States more than ever.

"That [the article] may be a satisfactory thing for Mr. Dulles," Mr. RAYBURN declared, "but it is a pretty dangerous performance for the country. All in all, the article and Mr. Dulles' quotes in it were a pitiful performance.

"The brink of anything is too close for me. I think we need friends now more than we ever needed them. I fear that by a performance like this we may have fewer of them in the future than we have now."

"Do Big Oil Companies High-Pressure Local Gas Stations?"

EXTENSION OF REMARKS
OF
HON. THOMAS J. LANE
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, January 18, 1956

Mr. LANE. Mr. Speaker, under leave to extend my remarks, I wish to include the following radio address I delivered over station WMEX, Boston, Mass., on Saturday, October 15, 1955:

Greetings. In the maze of congressional activity the evidence developed through some hearings and investigations does not receive the attention that it deserves.

Take the case of Pete, who runs the gas station around the block. We may drive the many cars in his neighborhood, but he is the one who provides the services that enable them to run.

Pete is a pleasant man, who seems to delight in waiting on us.

Even though he is kept busy all of his long day, in his little supply office, at the gas pumps, or under the hoist.

Pete is a small-business man.

We know that he works hard, but we figure he enjoys the fact that he is independent.

There are some 200,000 others just like him, who lease their stations from the major oil companies.

Offhand, Pete would seem to be far removed from the great national and international issues that come before the Congress of the United States for study, debate, and decision.

Pete, however, has his own special problems.

Being a small operator, and dependent upon his big suppliers, there is always the danger that he will be subjected to power pressures.

After receiving many complaints, the Small Business Committee of the United States House of Representatives authorized an investigation.

Subcommittee No. 5, under the chairmanship of Congressman JAMES ROOSEVELT, held numerous hearings concerning alleged coercive and discriminatory practices used by oil company suppliers against retail gasoline operators.

Sixty-four witnesses were heard.

Thirty-one were retail gasoline-station operators.

Fifteen were retail gasoline trade association officers or attorneys.

Twelve were officials of oil company suppliers mentioned in the testimony, or retail operators of the company who testified on behalf of company policy and practices.

In addition, the subcommittee accepted for the record, statements presented under oath in affidavit form.

On the basis of the testimony, the subcommittee reached the following conclusions:

1. A substantial proportion of all sales of refined gasoline of major oil companies to the general public is made through retail outlets where the dealer has a short-term lease from the oil company supplier, usually for 1 year. The importance and the proportion of the total retail market serviced by such short-term lessee dealers has been increasing.

2. The dealer operating his station under a short-term lease with the oil company supplier, oftentimes is not independent and is subject to control by the oil company supplier.

3. The short-term leases and sales practices of major oil companies in relation to sponsored products have had the effect of operating against a dealer's freedom of choice in using or dealing in competitive products, and operate to substantially lessen competition and tend to eliminate price competition.

4. Price discrimination: oil company suppliers have held the level of their prices generally while at the same time cutting their prices to one or more dealers at a particular location. In such situations, the lower price has prevailed until the low price, off-brand dealer saw fit to increase his price. This policy or practice has had the immediate effect of fomenting price wars among the retail dealers, and results ultimately in eliminating a substantial amount of price competition between and among both brand and off-brand gasoline. Moreover, short-term lessee dealers in many instances have been coerced or induced by their oil company suppliers into so-called price wars in an effort to secure the business enjoyed by the low-price off-brand dealer. It was also established that on occasion price wars have been started when some dealers engaged in price-cutting activities on their own initiative.

5. The lessee dealer needs immediate and permanent relief to enable him to fulfill his role as an independent businessman.

Let's take some testimony at random.

A lessee dealer in Manchester, Ga., testified company representatives told him that he had to abide by the policies of the big oil company and that they had a quota of TBA products (tires, batteries, accessories) to meet. His station had to meet this quota and that they were going to do it one way or another.

Despite these threats, the dealer refused to purchase the required items. Shortly thereafter his lease was canceled pursuant to a 10-day notice provision. Forced to move from the station all equipment and stock other than the oil company's products, the dealer suffered a loss of approximately $1,500.

Another dealer in Rockville, Md., testified as to pressure, both as to one big oil company's TBA products, and the retail price of its gasoline as posted. Because of this pressure, he was forced to take a competitive brand of tires out of his station and hide them in another location although he felt that the competitive brand tires were cheaper and had a stronger guaranty than the company-sponsored tires.

Detroit, Mich., lessee testified that he was told by a company representative "to get out of his station all merchandise competitive with the company's TBA items. Following his refusal to do so, his lease was not renewed, and he stated that company representatives told him one of the reasons for the refusal was that he did not sell enough TBA items and lubricants.

A Johnstown, Pa., lessee testified that another big oil company's salesman—"caught me with two winter tires manufactured by a competitor which I had bought on special request for a good customer. The salesman told me that if I could not adhere to the policies of my supplier, he would put someone in my station who would. Every time he wasn't too well pleased with my oil or gas sales, displays, or hours, he would tell me about the fellows in training at the big company's station, who would replace me on short notice."

This dealer was canceled out of his station on December 24, 1954, the company refusing to buy its own brand stock in his inventory.

A Seattle, Wash., lessee testified: "* * * That there was one point my big company supplier made very clear, that you do carry their complete line * * * I carried this line for one reason, to try and keep peace with them. Even though I don't like their complete line of merchandise."

He further testified that he could have bought the same TBA items he purchased through the company distributor, at a cheaper price from an independent jobber.

The effect of the heretofore described practices of certain oil companies upon the free competitive economy, was brought forth in the testimony of officers of the 'Blank' Oil Company of California. Its president said that his company sold its oil strictly through independent dealers. With reference to motorcar and repair shop dealers, the company was able to sell to approximately 75 percent of such dealers. With reference to service-station dealers, it was only able to sell to approximately 35 percent of the total number of such dealers. Of the 35 percent of the retail gasoline station dealers who did purchase the 'Blank' Co.'s oil, a majority would not display this product, but kept it hidden.

This official states that: "In many instances our delivery truck cannot even deliver to their place of business. They are afraid they will be caught by the major company representative, and so we deliver oil and it is written right on the order that our delivery truck carries it to a man's home, or to a small independent business alongside of him with whom he is friendly. Our oil is stored in the back of automobiles, is stored in locked-up cabinets, in restaurants * * * it is stored where the major gasoline company representative is not likely to find it."

A substantial part of the complaints of retail operators dealt with alleged coercive and discriminatory practices of the major oil companies in relation to the retail price of gasoline.

As one off-brand dealer testified: "Nobody can afford it when a major oil company deliberately goes out and subsidizes a station. Well, the intent is so obvious, in my opinion; it is for no other purpose than to force me out of business, or force me to 'up' the price so that they can dictate the price I can sell at."

The oil companies testified that discounts are given to "meet competition." It is significant when the off-brand station is forced to raise its price to the 2-cent differential, that the discounts are withdrawn, the price war ends overnight, and retail prices return either to their former or a higher level. The evidence therefore, is to the effect that the oil companies concept of "meeting competition" involves a practice which results in the isolation, and then the destruction, of competition.

As a result of these hearings, the subcommittee recommended that:

1. The antimonopoly laws designed to protect and preserve small and independent business enterprises as necessary to our free and competitive enterprise system, should be strengthened.

2. That all oil company suppliers consider liberalization of their policies regarding leases with retail dealers.

3. That the full House Select Committee on Small Business continue and expand its study of the problems of the small-business men in the petroleum and other industries who are dependent upon large suppliers.

4. That the record of the hearings be forwarded to the antitrust division of the Department of Justice and the Federal Trade Commission. With the intent that these agencies (a) consider the utilization of existing laws to the extent possible to eliminate the harmful practices shown in the record and the committee's report, and (b) to report to Congress those areas in which existing laws are not adequate to achieve relief, and what further legislation is necessary in order to achieve comprehensive and permanent relief.

Filling station owners should not be forced to carry certain tires, batteries, and other accessories which the big oil companies want carried, whether the neighborhood or roadside dealer wants them or not.

Legislation will be proposed to divorce oil companies from the retail business, just as motion-picture production has been separated from motion-picture exhibition.

Retail trade is the last stronghold of little business.

It must be protected from the high-handed pressures of monopolies.

Hon. John Phillips of California—Hon. Ezra Taft Benson

EXTENSION OF REMARKS
OF
HON. LEROY JOHNSON
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, January 18, 1956

Mr. JOHNSON of California. Mr. Speaker, under leave to extend my remarks in the CONGRESSIONAL RECORD I include two short articles published in the California Farmer, one of the best agricultural papers in California, about my colleague, JOHN PHILLIPS, and also an article in the same publication and in the same issue about Secretary of Agriculture Ezra Taft Benson.

JOHN PHILLIPS came to Congress at the same time I became a Member of the House. He is an able legislator and is especially versed in agricultural problems because he has been a member of the same committee in the California State senate.

Just what Mr. PHILLIPS will do after he has left Congress no one knows, perhaps not even himself. But whatever it may be I am sure that he will be engaged in some useful work, perhaps writing.

I am a great admirer of Mr. Benson. He knows what he is doing and I predict that he will outlast all his detractors. He is dedicated to the job of developing a sensible and reasonable agricultural support program and I am positive that he will accomplish his purpose. Intelligence, courage and determination can conquer almost any obstacles and since he has all these attributes I feel certain that he will bring the present agricultural situation out of chaos.

The articles referred to follow:

JOHN PHILLIPS TO RETIRE

Representative JOHN PHILLIPS of the 29th district, representing Riverside and Imperial Counties, has decided not to run again. He retires after 24 years of public life.

We have always had great respect for JOHN PHILLIPS. A handsome, composed man with a good head on his shoulders. He has represented the farmer well and with understanding.

JOHN PHILLIPS writes a newsletter home, periodically, that is in our estimation some of the best writing coming out of Washington, and that includes all the syndicated columnists. Someone should induce John to stay on in Washington as a columnist.

We were impressed with the way PHILLIPS announced his intention of withdrawing. He said that he did not intend to run again next year. That he had no picked candidate and did not intend to take part in the primary campaign of 1956.

Furthermore, he offered to sit down with anybody during the next 13 months who thought he might want to run for the job, and try to outline to him just what the job of being a Representative in the Congress of the United States entailed.

Also, John is going to try in the remaining newsletters he sends home to define that job in some detail. We just hope the next person does as good a job as JOHN PHILLIPS has done.

THE JOB WHERE YOU CAN'T WIN

We see by the papers that a California public relations firm has been retained by the Republican Party to help humanize Secretary Benson. We suppose that all facets of the political diamond are being polished but it is painfully evident that no longer can a man stand on his record.

Our mail tells us that not all farmers in this State are happy with the record of Mr. Benson, but we also know the same would have been true if Davy Crockett had been Secretary of Agriculture during the term of this administration.

It is also evident that a man cannot go to Washington and do the job without mixing in a generous amount of politicking, but imagine the necessity of hiring a firm to make someone like you better.

We have met Benson and found him a charming personality. Evidently he is of the old school that thinks if you devote all your time to the job and do the best you are capable of, you have fulfilled your commitment. Sad to say, that is no longer the case in Washington. You have to waste a great deal of time in the social whirl and spend a great deal of time shaking hands, being seen with the right people, and placating the thin-skinned.

In our humble opinion, agriculture got into her present mess through a bipartisan vote-in of Socialist experimental legislation. The aim to stimulate production worked wonderfully well. The money stimulus combined with an unprecedented era of mechanization, fertilizer advancements, chemical miracles for control of pests and diseases and plant breeding, with the result that double jackpots were hit for years in succession.

Meantime the socialistic experiments had obliterated the true market place and practically repealed the law of supply and demand for some of our basic crops. This encouraged foreign competition. We were afraid of offending anyone in the world market, and agriculture lagged behind the rest of the economy with a depressing inventory of surplus goods. The socialistic tinkering threw out of gear the natural agricultural cycles. After offering the political candy of subsidies, politicians of both parties were afraid to withdraw the sweet bait for fear of losing votes.

People write us and blame Benson for their troubles. It's nice to have a whipping boy but in our estimation the Secretary is being accorded extraordinary powers when you blame your entire plight on him alone.

It will take the President, Secretary of Agriculture, Secretary of State, and Congress in concert to solve this farm problem or even to influence the economic status of the farmer to any marked degree. It is evident that both parties are a little bankrupt of ideas on how to meet the farm problem. Note that the Secretary has sent out an appeal to all citizens to submit ideas on the problem.

M. L. Benedum: The Oilman of the Century

EXTENSION OF REMARKS
OF
HON. EDWARD MARTIN
OF PENNSYLVANIA
IN THE SENATE OF THE UNITED STATES
Wednesday, January 18, 1956

Mr. MARTIN of Pennsylvania. Mr. President, it was my privilege on October 12 last to take part in honoring a great American whose distinguished achievements have brought him worldwide fame. On that occasion, in the city of Pittsburgh, I had the pleasant task of presenting to Mr. M. L. Benedum a plaque designating him as the oilman of the century.

This was a proper and richly deserved tribute paid to Mr. Benedum by the Allegheny County Oil Industry in its observance of Oil Progress Week.

It was a testimonial of love and respect for a man whose vision, courage, and rugged individualism have made him famous as the "King of the Wildcatters."

His outstanding career renews our faith in the traditional American system of free enterprise. It was that system which caused men like Mike Benedum to go into all parts of the earth in search of oil to lighten the burdens of humanity and to stimulate progress for world betterment.

Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD my remarks in presenting the plaque to Mr. Benedum, and also his most inspiring words of acceptance.

There being no objection, tht matters were ordered to be printed in the RECORD, as follows:

REMARKS OF UNITED STATES SENATOR EDWARD MARTIN, OF PENNSYLVANIA, IN PRESENTING TO M. L. BENEDUM A PLAQUE DESIGNATING HIM AS THE OILMAN OF THE CENTURY AT THE OIL PROGRESS DINNER OF THE ALLEGHENY COUNTY OIL INDUSTRY INFORMATION COMMITTEE, IN THE WILLIAM PENN HOTEL, PITTSBURGH, OCTOBER 12, 1955

It is always a pleasure to join in honoring a distinguished American for outstanding achievement.

It is a proud part of our American heritage that a long list of men of humble origin have led this Nation to great heights.

That is the essence of American progress. It is made possible by freedom of the individual, strengthened by freedom of enterprise and supported by individual responsibility.

Reward for individual effort is the foundation of the greatness of our economic system. It is the right of every American to acquire and own property and to enjoy the fruits of his labor, energy, and initiative.

This concept of individual freedom, written into our fundamental law, made America a land of opportunity. It holds out to the youth of our land equal opportunity to reach the highest place in every activity that upholds the American way of life.

Our paramount obligation as free citizens of our great Republic is to keep it that way. It is our responsibility to keep alive the freedoms and the opportunities that have made the United States the greatest Nation on earth. It is up to us to leave to future generations the same kind of America that we have been privileged to enjoy.

The man we honor tonight is a brilliant product of those priceless American assets—freedom of the individual and freedom of enterprise.

By his own efforts, without social or economic advantages, he reached the pinnacle of success in the toughest and most hazardous form of industrial enterprise—the search for oil.

Those of us who have followed his brilliant career have some knowledge of the great personal and financial risks involved.

We know of the dangers and the hardships that are encountered by those who venture into the most inaccessible places of the world in the hope that oil might be found. We know of the disappointments and discouragements that are part of this extremely uncertain business.

Those were some of the obstacles that gave way before the vision and driving energy of our guest of honor. Every new venture differed from the other. Every one brought new and more difficult problems to be solved.

But determination, resourcefulness, and hard work won out and in 60 years of wildcatting M. L. Benedum has brought in more producing oil wells from wildcat territory than any other man in history.

We honor him tonight because his rugged individualism will live as an inspiration to generations far into the future.

In him are represented all the finest elements of our national strength and character—faith, vision, courage, integrity, hard work and devotion to the public welfare.

We do not measure the worth of an individual by the dollars he has accumulated, but rather by his service to his fellow man. In that respect I can find no better example than his own words which sum up the noble philosophy by which he lives.

Last July, when interviewed by newspaper reporters on his 86th birthday, Mr. Benedum said and I quote:

"I have always felt that I am merely a trustee of money and that it is my responsibility to use it in the public interest."

No words of mine are adequate to express our high regard for Mr. Benedum. Nor is it necessary for me to dwell at length on the love and esteem in which he is held by this group of his warmest admirers.

He has richly earned all our praise and gratitude and it is a high privilege, on behalf of the Allegheny County Oil Industry, to present to you, Sir, Mr. Benedum, this plaque which rightfully and properly designates you as the "Oilman of the Century."

REPLY OF MR. M. L. BENEDUM ACCEPTING PLAQUE DESIGNATING HIM AS THE "OILMAN OF THE CENTURY"

Mr. Toastmaster, Senator MARTIN, ladies, and gentlemen, I am indeed grateful to this fine group of the oil fraternity for the honor you have conferred upon me, and for this beautiful plaque. I am also grateful to this truly great American, Senator MARTIN, for his gracious and generous remarks.

I have been in the oil business for 65 years and sometimes I feel that I have not learned too much about it, but I have learned a lot about the people in it. In the early days many of the men in the oil business were real diamonds in the rough. Underenath, however, they had honor, integrity, and a high sense of dignity. They respected their obligations, they kept their word, they tried to improve the lot of their more unfortunate fellow men. In short, they lived up to the highest concept of Christian citizenship.

There have been great changes in the business since I started in it, but the oil man still retains those traits which mark the real measure of a man. His word is still his bond. He still believes that a man's wealth is calculated in terms of the confidence and respect of his fellow men rather than in dollars.

Please believe me when I say to you I would rather have the confidence and respect of the men and women of the oil industry than of any other group on earth.

Science and invention to a great extent have pointed the way to all of the progress of the last century so we must give much credit to the scientific men. It is their genius that has sparked the fantastic progress in oil as well as in all American business.

As an oil man, I am proud that our industry has more than kept pace with the industrial revolution. It has been out front most of the time, blazing a trail for the others to follow. There is scarcely a single thing that has been developed in the last 50 years that has not required oil to help in its completion and in many cases it is necessary to use it for its operation. (Take for instance the auto, the aeroplane, and all kinds and characters of machinery that we use daily.) In fact, as I see it, oil is the mainspring of our industrial life. Did you ever stop to think that the economic and social progress of the last 75 years has been in direct ratio to the consumption of oil? The more oil people use—the better they live.

I often wonder what would happen in the world if oil should be suddenly taken from us.

If it were given me to live my life over, I would still want to be an oilman. I am grateful to providence that either through lucky chance or divine guidance I became an oil man.

Several days ago, a Washington newspaper man asked me how I, at 86 years of age, occupied my time. I replied, "I expect to pass through this life but once: I have already lived 16 years beyond the allotted time; I have lived to see most of my associates and loved ones leave; therefore, I now live for those left whom I love; I live for the tasks which God has assigned to me, and for the good that I may be able to do for others."

Again, I thank you from the bottom of my heart for the honor you have conferred upon me tonight. I shall always cherish this beautiful plaque and the memory of this pleasant occasion. God bless you and good night.

Eisenhower in Milwaukee—Let's Have the Complete Record

EXTENSION OF REMARKS

OF

HON. HENRY S. REUSS

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 18, 1956

Mr. REUSS. Mr. Speaker, recently the members of this House have been favored by several insertions in the CONGRESSIONAL RECORD of substantial portions of the memorable speech made by General Eisenhower in Milwaukee, Wis., on October 3, 1952. This was the time when the Republican presidential candidate expressed so eloquently his views on the problem of communism and freedom in the United States.

I am glad that these remarks by Mr. Eisenhower have again been brought to public attention. I am glad, not only as a proud citizen of Milwaukee, but as one who believes it is sound and instructive, as a new presidential campaign gets under way, to have everything which has been said on this vital subject spread again upon the public record.

However, Mr. Speaker, I believe that it would serve us all best if the complete record of the remarks which Mr. Eisenhower prepared for that important address were brought to light. I am thinking of the paragraph concerning Gen. George C. Marshall which, according to press accounts, Mr. Eisenhower omitted when he actually delivered the speech.

It is a distinct loss to the public, and a disservice to the President, it seems to me, to omit that brief paragraph. I have never been so fortunate as to learn its exact words, but I have heard that it was a heartening defense of a gallant fellow soldier against the incredible charges made on the Senate floor that General Marshall had led a conspiracy to let the United States fall victim to Soviet intrigue.

Mr. Eisenhower apparently found it necessary to omit this passage when he spoke in Milwaukee, yet it is an integral and important part of his views as he originally composed them. In the interest of a complete record and a full presentation of Mr. Eisenhower's statement, it should be restored to its original place. I hope, therefore, that one of my colleagues who is fortunate enough to have secured the text of this tribute will wish to insert it in the RECORD.

For the record, too, it would be helpful also, I think, if we could be enlightened as to just why these sentences were removed from the Milwaukee text. In looking over the press reports, I found the New York Herald Tribune reporting as follows:

[From the New York Herald Tribune of October 11, 1952]

During his talk with the reporters, General Eisenhower also sought to explain why he had deleted from his Milwaukee speech a four-line defense of General of the Army George C. Marshall, denounced by Senator JOSEPH R. MCCARTHY, Republican, of Wisconsin, as the unwitting dupe of a great Soviet conspiracy.

The General frankly admitted that he had cut the Marshall tribute from his speech after talking to Senator MCCARTHY in a hotel room in Peoria, Ill., the night before. However, he said he had not "censored" his own speech at the request of Senator MCCARTHY.

THOUGHT IT OUT OF PLACE

He did it, he said, because, first, he was guest of Gov. Walter J. Kohler, Jr., of Wisconsin, a MCCARTHY backer, and he thought it would be out of place to belabor Senator MCCARTHY in Wisconsin, and, second, he already had defended General Marshall. General Marshall knew exactly where General Eisenhower stood and had even sent him a note of gratitude, he added.

This seemed to be clear enough but then I found a different account. In the Washington Post and Times Herald, I read:

[From the Washington Post and Times Herald of July 12, 1954]

BOLTON LANDING, N. Y., July 11.—The real story of what happened in Wisconsin in the 1952 presidential campaign—how General Eisenhower agreed to delete from his pre-

pared speech a eulogy of Gen. George C. Marshall—was told here today.

It has often been said that Senator JOSEPH R. MCCARTHY, Republican, Wisconsin, persuaded General Eisenhower to drop what he proposed to say about General Marshall.

However, Gov. Walter J. Kohler told reporters today that it was he who was responsible, not MCCARTHY. He told how he argued for elimination of the Marshall passage, first with Sherman Adams, and then in a meeting with General Eisenhower, Adams, and Maj. Gen. Wilton B. "Slick" Persons. This took place on the Eisenhower special train en route from Green Bay to Milwaukee, where the speech was to be delivered.

Governor Kohler, who is here attending the annual governors' conference, reminded newsmen that at the time General Eisenhower was in Wisconsin (early October) the outcome of the 1952 election was very much in doubt.

"So far as I was concerned," he said, "the most important thing in the world right then was the election of a Republican President. I had been shown a draft of General Eisenhower's speech. It was a defense of General Marshall against the charge of treason.

"I felt that General Eisenhower was a guest in our State, and that if he said what he planned to say it would be construed as an overt attack on MCCARTHY. That wouldn't be good.

"I remember saying to Sherman Adams, 'When a man calls on the pope, he doesn't tell him what a fine fellow Martin Luther was.' "

Obviously, these two versions are inconsistent with each other. Can they not be promptly explained? Let us get the complete record straight for posterity.

Review of United Nations Administrative, Personnel, and Budgetary Problems

EXTENSION OF REMARKS
OF

HON. ALBERT P. MORANO

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 18, 1956

Mr. MORANO. Mr. Speaker, during the recess our distinguished colleague and a hard-working, very able member of the House Foreign Affairs Committee, the Honorable CHESTER E. MERROW, delivered a number of very fine addresses while serving as a United States Delegate to the 10th General Assembly of the United Nations.

There follows the first of these addresses, delivered on October 11, 1955, which is the first time in the history of the United Nations that such a thorough overall review of the administrative progress and problems in the United Nations and its specialized agencies had ever been given:

ADMINISTRATIVE PROGRESS AND PROBLEMS IN THE UNITED NATIONS AND ITS AGENCIES

(Statement by CHESTER E. MERROW, United States Representative to the General Assembly)

As you know, it has become almost a tradition in the United States for the President to appoint at least two Members of the Congress to serve on the United States delegation to the United Nations. As in all countries, such an appointment is one of the highest honors which one can receive. I accordingly consider myself most fortunate to have been asked by President Eisenhower to serve as a delegate to this 10th General Assembly.

In the course of these first days of the General Assembly, I have had an opportunity to meet a number of my fellow delegates from many other countries. We have exchanged views on several topics. One of the favorite topics has been the comparison of assignments. In the course of our discussions, I have been struck by the fact that the Administrative and Budgetary Committee, to which we here have been assigned, is a central and all-important committee. Although the functions of the Committee are comparable to the Appropriations Committees of National Congresses and Parliaments, they also extend to broader problems of administration.

You, Mr. Chairman [Hans Engen], as the respected Ambassador of Norway, a country known for its interest in administration and economy, and the distinguished Chairman of the Advisory Committee, Ambassador Aghnides, are among those whom I have met who share my own view of the importance of this Committee.

Because it is essential that the importance of this body, the counterpart of similar committees in our national parliaments, be fully understood, I hope I may be pardoned if I express my views on the work of the Administrative and Budgetary Committee and on its place in the United Nations structure.

First, and of special importance, is the fact that the Administrative and Budgetary Committee is the only place in the United Nations where the representatives of governments can examine together the organizational, administrative, and financial structure of the various parts of the United Nations system to insure the development of a sound and integrated whole. This opportunity is of particular interest to me. During my service in the Congress of the United States, I have had the privilege of serving as chairman of the House Foreign Affairs Subcommittee on International Organizations and Movements. This subcommittee conducted hearings and studied the operations of the United Nations and the specialized agencies, and other international organizations. I was also head of a mission that visited all of the specialized agencies located in Europe, as well as the branch office of the United Nations. This mission discussed with the key officials of these agencies many of the problems which concern us here. The report of the mission to the Congress has been printed and given public distribution. With Ambassador Aghnides, I share the experience and memory of attending the 1945 conference in London that drafted the UNESCO constitution. All of this makes the opportunity for an exchange of views in the General Assembly especially welcome.

It is well, perhaps, in this 10th anniversary year of the United Nations, to begin with an across-the-board look at the developments in our major fields of concern—organizational matters, budgets and contributions, personnel policy, and coordination of the United Nations and its specialized agencies.

GROWTH OF THE UNITED NATIONS SYSTEM

First, in the organizational field. The years since the establishment of the United Nations have seen a growth not only in the United Nations itself but also the development of 10 specialized agencies of the United Nations. There is the International Labor Organization, which was originally part of the League of Nations and is seeking to raise labor standards and improve working conditions. The Food and Agriculture Organization has been established to improve food and agricultural production and distribution. To promote peace through collaboration in educational, scientific, and cultural matters, there is the United Nations Educational, Scientific and Cultural Organization. The International Civil Aviation Organization aims at developing international air transport and improving standards of international air navigation. The task of facilitating exchange of mail and improving world postal services falls to the Universal Postal Union, one of the oldest international organizations, dating back to 1875. The World Health Organization is dedicated to raising world health standards. The International Telecommunication Union, which stems from an organization established in 1865, is engaged in promoting the rational and efficient use of telecommunication facilities. Better weather reporting is the aim of the World Meteorological Organization, a recent outgrowth of the International Meteorological Organization. The International Bank and the International Monetary Fund undertake to facilitate the investment of capital for productive purposes and to promote currency stability.

In addition to these permanent and regularly supported specialized agencies, there are now five programs operating under United Nations aegis with the assistance of voluntary contributions. These are the International Children's Fund, to promote maternal and child welfare; the Technical Assistance Program, to bring about higher living standards; the Palestine Relief and Works Agency, to provide food, shelter, and gainful employment for nearly 900,000 refugees; the Korean Reconstruction Agency, to relieve the suffering and repair the devastation caused by aggression; and the Refugee Fund, to find permanent solutions for limited groups of refugees.

The activities of these agencies and programs extend to nearly every part of the world—to approximately 90 countries and territories, in fact, thus reaching far beyond the membership of the United Nations itself. The result is a growth in the size of the regular international secretariats until they now total more than 9,000 persons. To this must be added the internationally recruited personnel required to operate the voluntary programs—a total of approximately 2,200 persons. This is exclusive of local assistance which runs into the thousands.

This trend has led to organizational decentralization, and this in turn raises the most difficult kind of management problems, many of which have yet to be solved in a satisfactory manner. Through his organizational survey extending over the last 2 years, the Secretary-General has sought to assess the character of the problems which the United Nations faces in this area. He is now in the process of instituting measures designed to improve overall United Nations management and control of its far-flung operations. Whether current measures are an adequate answer to this problem remains to be seen. I am convinced that efforts in the same direction should be continued in the United Nations and should be undertaken in the specialized agencies.

TOTAL COST OF THE U. N. SYSTEM

The Information Annex to the Budget Estimates for 1956 (Document A/2904/Add.1) shows us that the gross budgets of the United Nations and its specialized agencies, exclusive of the International Bank and International Monetary Fund, total $85 million in 1955. To this should be added $102,500,000, representing the approximate 1955 operating level of the voluntarily financed United Nations programs of the International Children's Fund, the Expanded Program of Technical Assistance, the Refugee Fund, the Palestine Relief and Works Agency, and the Korean Reconstruction Agency. The combined total of regular budgets and voluntary programs for 1955 approximate $187,500,000. This compares to a total expenditure figure of approximately $122,500,000 in 1947, the

first fully operative year of the United Nations, the Children's Fund, and the then existing specialized agencies (inclusive of the International Refugee Organization, but exclusive of the International Bank and Fund).

For the period from 1946 to 1954 inclusive, the total of the United Nations and the currently existing specialized agency expenditures (exclusive of the Bank and Fund) amount to approximately $601 million. If the budgets for 1955 are added, the cumulative total to date is $686 million. Add to this $665 million representing the amount spent on the voluntarily financed programs of the United Nations for the same period, plus $412,700,000 expended by the International Refugee Organization, and we see that a total of $1,764,000,000 has been devoted by the international community to the work of the United Nations agencies.

If these facts and figures are to be really meaningful in terms of the task of this committee, it is necessary to analyze them briefly. The 1947 figures represent the initial development stage of the United Nations, the International Children's Fund, and 7 specialized agencies, 1 of which is no longer in operation, namely, the International Refugee Organization. The 1955 figure represents the going programs of the United Nations, 8 of the specialized agencies, and 5 major operating agencies, supported by voluntary funds.

Translated into activities, the growing figures spell cooperative international endeavor to keep the peace, to raise standards of living through economic and social development, to feed the hungry, to care for the displaced and homeless, to fight disease and ignorance, to facilitate man's efforts to communicate, and to enhance man's enjoyment of work and life. Given these goals, the funds expended can be easily justified, provided this committee and its counterpart in other agencies exercise the necessary vigilance to insure that waste, inefficiency, organizational defects, and unnecessary overhead are eliminated and that the results achieved are commensurate with the outlay of funds. The fact that the United Nations budget seems to have reached a stabilization point does not mean that we should relax our efforts to find ways and means of improving efficiency and eliminating unnecessary activities. This is a continuing responsibility of good stewardship. The budgets of the specialized agencies should likewise be subjected to continuing and careful scrutiny by governments.

SHARING OF COSTS

At the same time that these regular budgets of the United Nations agencies have been increasing, there has been a trend toward more equitable sharing of costs, so that no one member pays more than one-third of the total budget in any agency. The payment record in all agencies would indicate that with few exceptions, where the circumstances are most unusual, assessments upon governments have not exceeded their capacity or willingness to pay. This presents a sharp contrast to the situation existing in the programs financed by voluntary contributions, viz, the United Nations International Children's Fund, the United Nations Relief and Works Agency for Palestine Refugees, United Nations Korean Reconstruction Agency, United Nations Refugee Fund, and the Expanded Technical Assistance Program.

We had a report last week from Mr. Cutts, the chairman of the special committee set up to negotiate and collect contributions for these programs. This report indicated that pledges in particular lag far behind the financial targets which have been set in order to operate an adequate program. This is in spite of the fact that the larger contributors assume a higher proportion of the total costs than is the case with the regular budgets. In the light of the important tasks assigned to these agencies, I believe we should give serious attention to the possible reasons for this situation—whether targets are set too high or governments are ignoring their responsibilities or both.

The support of all member governments—and I stress the word "all"—for the causes served by the programs of the United Nations agencies must be sustained and indeed increased. The form of such support, i. e., through an international agency or otherwise, and the amount of money devoted to it will require a continuing assessment of the following factors, among others:

(a) whether an international agency can be demonstrated to be the best instrument for meeting the needs which are justifiably the concern of the international community;

(b) the degree to which the members of such an agency are willing to bear an equitable share of the financial burdens entailed in assuming such international responsibilities. It is an inescapable fact that, if the brunt of the costs fall upon a few member states, the undertaking is not truly international and misunderstandings will surely result;

(c) and lastly, whether international assistance will be adequately supported and supplemented by national endeavor.

PERSONNEL MANAGEMENT

Another major area of continual concern to this committee has been the development of sound personnel policies. The record will show, I believe, that this has been one of the most challenging but difficult aspects of the development of international organizations. This is due not only to the human and personal problems involved, but also to the vastly different national traditions and approaches in dealing with these problems. Nevertheless, considerable progress has been made in developing among the United Nations agencies good, sound, and consistent conditions of service in respect of such matters as salaries and allowances, pensions, leave, sickness, and disability benefits. Past and current debate in this committee and in the specialized agencies indicates, however, the continued existence of numerous unsolved problems connected with staff morale and with the selection, development, and maintenance of competent staff of the highest integrity.

For example, concern has been reiterated many times on such problems as attracting high caliber staff, equitable geographical distribution, eliminating incompetent or unsuitable staff, giving encouragement and recognition to competent staff, and development of an esprit de corps within the organization. These utterances, together with expressed attitudes and actions of the various staff councils, indicate that far greater attention and emphasis needs to be given to ways and means of improving personnel management. It would appear to be essential, for example, to develop recognized and accepted standards of competence for selection and promotion and to evolve methods for applying these as objectively as possible. Member governments, the staff, and the public at large must be assured that the controlling criteria are the charter standards of the highest integrity, competence, and efficiency, and that to the extent that these standards are met, due regard is paid to recruiting on as wide a geographical basis as possible.

A second consideration is that perhaps the time has come to examine the concept of geographical representation to see whether the interests of the organization might be better served if this is interpreted to be a fair representation of the various cultures indigenous to the various member states. A mere counting of heads by nationality does not serve the purpose of enriching the organization by the provision of diversified training, background, and traditions. Still another factor requiring attention is mentioned by the International Civil Service Advisory Board, a group of international experts in this field, when it emphasized that adequate staff induction and training, as well as effective supervision, are especially important in an international organization. Yet there appears to be little evidence throughout the agencies of specific programs to insure that these needs are met. These are but a few examples, but I believe this recital serves to illustrate how much more can and should be done in the interest of improving effectiveness of the staff.

COORDINATION OF UNITED NATIONS AND SPECIALIZED AGENCIES

While I have sought to present an overall summary of administrative progress and problems in the United Nations and its specialized agencies, such a survey would not be complete without mention of the question of coordination, as such. Considerable progress in coordination among the United Nations and its specialized agencies has been made in the administrative field. There are, for example, a generally comparable salary allowance and leave system, a common pension system, comparable personnel and financial regulations, and certain common administrative services. This accomplishment has been primarily due to the combined efforts of the Advisory Committee on Administrative and Budgetary Questions, the Administrative Committee on Coordination and its subcommittees, and the consistency of positions of many of the governments represented in the various organizations.

In view of this and the work being undertaken by the Economic and Social Council to insure coordination and integration of program planning, it seems timely to my delegation to explore what measures this committee might recommend to improve the combined operations and effectiveness of the United Nations and its specialized agencies.

Before advancing the suggestions of my delegation, let me state briefly what I believe the basic relation of the United Nations and its agencies should be. The central fact is that each agency, regardless of its constitutional autonomy, is a vital part of the whole United Nations system. In the eyes of the world, the success of a specialized agency is considered the success of the United Nations itself and vice versa. Likewise, the weakness of a specialized agency is considered to be the weakness of the United Nations. There is a reality we should not ignore.

RECOMMENDATIONS

Against this background of progress and problems, I shall proceed to outline the views of my delegation on both the issues before us which require immediate action and those on which attention needs to be focused and an exchange of views encouraged if solutions are to be eventually developed.

1. We are satisfied with the role of the Advisory Committee and the Contributions Committee, and we shall on most points support their recommendations for the 1956 United Nations budget and scale of assessment. We note that both committees are authorized by the Assembly to render service to the specialized agencies. The Contributions Committee has been called upon by numerous agencies to provide factual and statistical data. The Advisory Committee received authorization last year to visit the specialized agencies, upon their invitation, to continue the study of administrative and budgetary coordination. It is understood that at least one agency has extended an invitation to the Advisory Committee. It is to be hoped that others will do likewise, since there is a very real need for the budget of every U. N. organization to have the careful and thorough type of expert examination which is given by the Advisory Committee on behalf of governments.

The advantage of having one group do the task for all agencies is obvious. It is a means by which the administration and governments in each agency can obtain objective advice on administrative improvements that would lead to better results for the money expended. It offers a means of identifying and focusing attention on common problems and the solutions thereto. The question arises, however, as to how the Advisory Committee can fulfill its responsibilities to the Assembly and at the same time perform a useful role on behalf of the agencies.

Since article 17 of the United Nations Charter places upon the Assembly certain responsibilities for review of specialized agency budgets, we can all agree that from the standpoint of the General Assembly as well as of the specialized agencies it is important for the Advisory Committee to undertake such a role. The problem therefore boils down to one of practical arrangements. It would appear to my delegation that there are several possible courses of action that would enable the Advisory Committee to fulfill this enlarged role satisfactorily to all concerned. Before advancing any specific suggestions on this matter, however, I think it is more fitting that we should profit from any views the Advisory Committee itself may have on this point. I hope that Ambassador Aghnides, with his usual wisdom, can point the way for a fruitful discussion among delegations and representatives of the specialized agencies.

2. The second major suggestion which grows out of my introductory analysis is in response to the need for giving more attention to achieving better personnel management. This, of course, can only be done successfully if the head of each agency recognizes the importance of this matter and gives it his full support. Otherwise day-to-day operations will tend to crowd out such a program. We would urge that the Secretary-General and the heads of the various agencies give this matter high priority during the course of the next few years. It is important that the U. N. organizations benefit from modern techniques in personnel management. One rather concrete proposal which suggests itself on the basis of current United States experience is the institution of an incentive award system.

The President of the United States, with congressional approval, initiated a program of this kind last November, as a means of enlisting the ingenuity and inventiveness of every member of the United States civil service in the cause of greater efficiency and productivity. The Chairman of the United States Civil Service Commission reported recently that during the first 7 months of operation 138,000 suggestions were received, 35,000 adopted, about $1,500,000 were paid out in cash awards, and the taxpayer benefited to the extent of savings of $40 million. While the unique and complex character of personnel problems in international organizations may require considerable modification of national experience, it is still valid to expect that these organizations can benefit from experience like that of the United States.

We also believe that the International Civil Service Advisory Board could play a useful and more active role in this connection. To date the Board has issued advisory reports covering recruitment, training, and standards of conduct. They provide basic policy guides which can and should be used to better purpose by all agencies, but there has been no followup. More could be done by the Board, particularly in assisting those organizations to plan and develop sound programs of this kind, tailored to the agency's needs.

3. My third major suggestion is directed to both the secretariats and the governments represented here and in other agencies. I believe, and it is the belief of my Government, that greater vigilance and restraint are required in order to avoid an unduly large proportion of international budgets being used for administrative and overhead services. There are a number of specific measures which could and should be employed with greater fidelity to curb this tendency and which should lead to greater economy.

(a) In the absence of exceptional circumstances, major meetings of international organizations should be held at headquarters.

(b) Meetings should be scheduled to avoid peaks and valleys in the workloads for secretariats and governments.

(c) There should be strict publication and documentation control. In this connection, my delegation would like to suggest that the fifth committee might set an example and establish a healthy precedent by foregoing summary records except for important debates. For many items on the agenda, such as those we have just disposed of, the report of the committee constitutes an adequate account of the proceedings.

This is not solely a United Nations problem. The following plaintive note is sounded in the report of the Program Commission of the last General Conference of UNESCO.

"In conclusion, the Commission wishes to call the attention of the General Conference to certain problems which have not only caused delay but have also, in many cases, reduced the effectiveness of its work. First is the problem of paperwork. Never before has the Commission had to consider so many documents as this year. * * * A considerable number of important resolutions were hidden in these piles of papers, from which they had to be sorted out in order to be adopted, or more often than not held over for another meeting, or amended, or reamended, until one's head began to spin."

This has an all-too-familiar ring and has been echoed in these halls as well as elsewhere.

(d) Meetings should start promptly. In this, some of the technical agencies such as WHO maintain a better record than the United Nations organs. The International Scientific Conference on Peaceful Uses of Atomic Energy in Geneva last August was outstanding on this score. The following excerpt from the closing address of the president of the conference, Dr. Bhabha, of India, points to the fact that:

"Its success is also due to the spirit and the manner in which all the delegates have played their part. From the very beginning meetings have begun and ended on time, and all the speakers have adhered to the time limit set in the program. I am told that this is by no means a usual feature of international conferences. The difference can perhaps be attributed to the circumstance that, in a scientific conference such as this, each speaker has something concrete to communicate. I suppose that, when one has nothing too concrete to communicate, there is no inherent reason why, having started speaking, one should stop."

My colleagues will be greatly relieved, I am sure, to know that I have taken the last comment of Dr. Bhabha to heart and that very soon I will stop.

ADDITIONAL SPECIAL ITEMS

Mr. Chairman, I should like to indicate at this point the United States position on several nonrecurring items which are important primarily in the United Nations context.

My delegation strongly supports the recommendations of the Special Committee on Judicial Review of Administrative Tribunal Judgments and hopes that the report of that committee will enable the Fifth Committee to deal with this item with a minimum of debate.
